INTRODUCTION

The first titrations were carried out over 100 years ago and, together with gravimetric determinations, titration belongs to the classical procedures of chemical analysis. Analytical methods based on titration have always found and continue to find extensive application, with the modern accent on procedures with micro and submicro quantities. It is customary to distinguish between direct and indirect titration procedures. Direct titration has been treated in Part I of this book and indirect procedures are dealt with here in Part II.

CONTENTS

INTRODUCTION	v
SECTION 1: INDIRECT TITRATION PROCEDURES	
Requirements of the Procedures	1
Procedure Type 1	2
Procedure Type 2	2
Procedure Type 3	2
Titration Features	3
1. Measurement of the Amount of Reagent X (for Procedure Type 1) and of Sample	4
2. Measurement of Unused X (Procedure Type 1), Reaction Product A' or A'', etc., or Unchanged Components B or C	4
3. Mixing of Reactants	4
4. Speed of Reaction	4
5. End-Point Determination	11
Reactions used in the Indirect Titration of Organic Compounds	11
1. Oxidation	14
2. Reduction	15
3. Addition	16
4. Hydrolysis	17
5. Ion/Ion and Ion/Molecule Combination	18
6. Hydrogen Replacement (Substitution)	19
7. Condensation	20
8. Esterification and Trans-Esterification	20
9. Complex Formation	21
10. Amide Formation	22
11. Dealkylation (of ethers)	22
12. Dehydration	22
13. Reduction and Oxidation (concurrently)	22
14. Halogen Replacement	22
15. Nitrosation	23
16. Decarboxylation	23
17. Fission of S-S Bonds	23
18. Fission of C-S Bonds	23
19. Xanthate Formation	24
20. Other Reactions	24

Examples of Indirect Titration of Organic Materials	25
Material and Literature Covered	25
Classification of Data	26

SECTION 2: REAGENTS USED IN INDIRECT TITRATION OF ORGANIC COMPOUNDS

Acetic Acid (see Carboxylic Acids and Carboxylates)	
Acetic Anhydride (see Anhydrides)	
Acetyl Chloride (see Halides ('Active'))	
Acid Chlorides (see Halides ('Active'))	
1. Acids	29
Acrylonitrile (see Nitriles)	
2. Alcohols	31
Aldehydes (see Carbonyl Compounds)	
3. Alkalies	42
Alkali Hydroxides (see Alkalies)	
Alkaline Earth Hydroxides (see Alkalies)	
Alkoxides (see Alkalies)	
Alkyl Halides (see Halides ('Active'))	
Aluminium (Metal) (see Metals)	
4. Aluminium Hydride and Borohydride	103
Aluminium Hydride, Lithium (see Aluminium Hydride and Borohydride)	
5. Aluminium Isopropylate	106
Amalgams (see Metals)	
6. Amines and Heterocyclic Bases	107
Ammonia (see Ammonium Hydroxide and Ammonium Salts)	
7. Ammonium Hydroxide and Ammonium Salts	124
8. Anhydrides	129
Aniline (see Amines and Heterocyclic Bases)	
Anthracene (see Hydrocarbons)	
Anthranilic Acid (see Amines and Heterocyclic Bases)	
9. Arsenate	153
10. Arsenic (III)	154
Azeotropic Distillation (see Physical Methods)	
11. Barium (II)	155
Barium Carbonate (see Alkalies)	
Barium Hydroxide (see Alkalies)	
Benzaldehyde (see Carbonyl Compounds)	

	Benzenesulphonic Acid (see Sulphonic Acids)	
	Benzidine (see Amines and Heterocyclic Bases)	
	Benzoic Acid (see Carboxylic Acids and Carboxylates)	
	Benzoic Anhydride (see Anhydrides)	
	Benzoquinone (see Quinones)	
	Benzoyl Chloride (see Halides ('Active'))	
	Benzoyl Peroxide (see Percarboxylic Acids)	
	Benzyl Chloride (see Halides ('Active'))	
12.	Bichromate and Chromic Oxide	156
	Bindshedler's Green (see Dyes)	
	Bismihalides (see Bismuth (III))	
13.	Bismuth (III)	185
14.	Bisulphate	188
15.	Bisulphite and Sulphite	189
	Borohydride, Sodium (see Aluminium Hydride and Borohydride)	
	Bromate (see Bromine Reagents)	
	Bromine (see Bromine Reagents)	
	Bromine Chloride (see Bromine Reagents)	
16.	Bromine Reagents	212
	Bromoacetyl Bromide (see Halides ('Active'))	
	<i>p</i> -Bromophenacyl Bromide (see Halides ('Active'))	
	<i>p</i> -Bromophenylhydrazine (see Hydrazines)	
	<i>N</i> -Bromosuccinimide (see Halides ('Active'))	
	Butanol (see Alcohols)	
	Butylamine (see Amines and Heterocyclic Bases)	
	Butyl Bromide (see Halides ('Active'))	
	Cadmihalides (see Cadmium (II))	
	Cadmium (Metal) (see Metals)	
17.	Cadmium (II)	284
18.	Calcium (II)	288
	Calcium Hydroxide (see Alkalies)	
	Calcium Oxide (see Alkalies)	
19.	Carbon Disulphide	294
20.	Carbonyl Compounds	298
	Carboxylates (see Carboxylic Acids and Carboxylates)	
21.	Carboxylic Acids and Carboxylates	304
	<i>p</i> -Carboxyphenylhydrazine (see Hydrazines)	
22.	Cerium (IV)	310
	Chloramine T,B (see Halides ('Active'))	

23.	Chlorate	319
24.	Chlorine Reagents	320
25.	Chlorite	325
	Chloroacetodiethylamide (see Halides ('Active'))	
	Chloroacetyl Chloride (see Halides ('Active'))	
	<i>p</i> -Chloroaniline (see Amines and Heterocyclic Bases)	
	Chloromaleic Anhydride (see Maleic Anhydride)	
	Chlorosulphonic Acid (see Halides ('Active'))	
	Chromic Acid (see Bichromate)	
26.	Chromium (II)	327
27.	Copper (I)	329
28.	Copper (II)	332
29.	Copper (III)	362
30.	Cyanide	363
	Cyclopentadiene (see Hydrocarbons)	
	Cyclopentanone (see Carbonyl Compounds)	
	Devarda's Alloy (see Metals)	
31.	Diazonium Salts	371
	Dibutylamine (see Amines and Heterocyclic Bases)	
	Dichloramine T (see Halides ('Active'))	
	2,4-Dichloroaniline (see Amines and Heterocyclic Bases)	
	Diethanolamine (see Amines and Heterocyclic Bases)	
	Diethylamine (see Amines and Heterocyclic Bases)	
32.	Digitonin	371
	Dimedone (see Carbonyl Compounds)	
	Dimethylamine (see Amines and Heterocyclic Bases)	
	1,1-Dimethylhydrazine (see Hydrazines)	
33.	Dimethyl Sulphate	373
	3,5-Dinitrobenzoyl Chloride (see Halides ('Active'))	
	2,4-Dinitrochlorobenzene (see Halides ('Active'))	
	2,4-Dinitrofluorobenzene (see Halides ('Active'))	
	2,4-Dinitrophenylhydrazine (see Hydrazines)	
	Diphenyl Sulphide (see Sulphides)	
	Distillation (see Physical Methods)	
34.	Dithionite	374
	Dodecyl Mercaptan (see Mercaptans)	
35.	Dyes	375
36.	Electrolytic Reduction	376
	Ethanol (see Alcohols)	
	Ethylamine (see Amines and Heterocyclic Bases)	

Ethylenediamine (see Amines and Heterocyclic Bases)	
2-Ethylhexaldehyde (see Carbonyl Compounds)	
Ethyl Iodide (see Halides ('Active') and Iodides and Hydriodic Acid)	
Extraction (see Physical Methods)	
37. Ferricyanide	376
38. Ferrocyanide	391
Formaldehyde (see Carbonyl Compounds)	
Formic Acid (see Carboxylic Acids and Carboxylates)	
39. Gelatine	392
Girard T Reagent (see Hydrazines)	
Glycine (see Amines and Heterocyclic Bases)	
Glyoxal (see Carbonyl Compounds)	
Glyoxylic Acid (see Carbonyl Compounds)	
40. Halides ('Active')	392
41. Halogen Reagents in Determination of Unsaturation	407
Heteropoly Acids (see Molybdenum (VI) and Tungsten (VI))	
Hexamethyleneimine (see Amines and Heterocyclic Bases)	
Hexamethylenetetramine (see Amines and Heterocyclic Bases)	
n-Hexylmercaptan (see Mercaptans)	
42. Hydrazines	409
Hydriodic Acid (see Iodides and Hydriodic Acid)	
43. Hydrobromic Acid	416
44. Hydrocarbons	420
45. Hydrochloric Acid	420
46. Hydrofluoric Acid	444
47. Hydrogen (Gas)	444
48. Hydrogen Peroxide	446
Hydroxides (see Alkalies)	
49. Hydroxylamine	454
o-Hydroxymercuribenzoate (see Mercury (II))	
Hypobromite (see Bromine Reagents)	
Hypochlorite (see Chlorine Reagents)	
Hypoiodite (see Iodine Reagents)	
Iodoacetamide (see Halides ('Active'))	
50. Iodate and Iodine Pentoxide	476
51. Iodides and Hydriodic Acid	487
52. Iodine Reagents	524
Iodine Bromide (see Iodine Chlorides, Bromide and Thiocyanate)	

53.	Iodine Chlorides, Bromide, and Thiocyanate	581
	Iodine Pentoxide (see Iodate and Iodine Pentoxide)	
	Iodine Thiocyanate (see Iodine Chlorides, Bromide and Thiocyanate)	
54.	Iodosobenzoate	601
55.	Ion Exchangers	602
	Iron (Metal) (see Metals)	
56.	Iron (II)	609
57.	Iron (III)	612
	Isobutylamine (see Amines and Heterocyclic Bases)	
58.	Isocyanate and Isothiocyanate	615
	Isopropanol (see Alcohols)	
	Isothiocyanate (see Isocyanate and Isothiocyanate)	
	Ketones (see Carbonyl Compounds)	
59.	Kjeldahl Nitrogen Determination	616
	Lauric Acid (see Carboxylic Acids and Carboxylates)	
	Laurylamine (see Amines and Heterocyclic Bases)	
60.	Lead (II)	620
61.	Lead (IV)	623
	Lithium Aluminium Hydride (see Aluminium Hydride and Borohydride)	
	Magnesium (Metal) (see Metals)	
62.	Maleic (and Chloromaleic) Anhydride	626
63.	Manganate	632
64.	Manganese (III)	633
65.	Manganese (IV)	634
66.	Mercaptans	635
	Mercurihalides (see Mercury (II))	
67.	Mercury (I)	638
68.	Mercury (II)	639
69.	Metals	669
	Methanol (see Alcohols)	
	Methylene Blue (see Dyes)	
	Methyl Iodide (see Halides ('Active') and Iodides and Hydriodic Acid)	
	Molybdate (see Molybdenum (VI) and Tungsten (VI))	
70.	Molybdenum (III)	685
71.	Molybdenum (VI) and Tungsten (VI)	685
	Molybdophosphoric Acid and Salts (see Molybdenum (VI) and Tungsten (VI))	

Molybdosilicic Acid and Salts (see Molybdenum (VI) and Tungsten (VI))	
Monoethanolamine (see Amines and Heterocyclic Bases)	
Morpholine (see Amines and Heterocyclic Bases)	
Naphthalenesulphonic Acids (see Sulphonic Acids)	
Naphthylamines (see Amines and Heterocyclic Bases)	
Nessler Reagent (see Mercury (II))	
Nickel (Metal) (see Metals)	
72. Nickel (II)	689
73. Ninhydrin	692
Nitranilic Acid (see Nitrophenols)	
74. Nitric Acid	695
75. Nitriles	699
76. Nitrite	701
<i>m</i> -Nitroaniline (see Amines and Heterocyclic Bases)	
<i>m</i> -Nitrobenzenesulphonyl Chloride (see Halides ('Active'))	
<i>m</i> -Nitrobenzohydrazide (see Hydrazines)	
<i>p</i> -Nitrobenzoyl Chloride (see Halides ('Active'))	
77. Nitrophenols	707
<i>p</i> -Nitrophenylhydrazine (see Hydrazines)	
3-Nitrophthalic Anhydride (see Anhydrides)	
78. Nitrosobenzene	717
Octyl Thioglycollate (see Mercaptans)	
Oxalic Acid and Salts (see Carboxylic Acids and Carboxylates)	
79. Ozone	717
Palladium (see Metals)	
Partition (see Physical Methods)	
2,4-Pentanedione (see Carbonyl Compounds)	
Peracetic Acid (see Percarboxylic Acids)	
Perbenzoic Acid (see Percarboxylic Acids)	
Percamphoric Acid (see Percarboxylic Acids)	
80. Percarboxylic Acids	718
81. Perchloric Acid	721
Percuprate (see Copper (III))	
Perfuroic Acid (see Percarboxylic Acids)	
82. Periodates and Periodic Acid	724
Periodic Acid (see Periodates and Periodic Acid)	
83. Permanganate	744

	Permonophthalic Acid (see Percarboxylic Acids)	
	Perinaphthindane 2,3,4-trione Hydrate (see Ninhydrin)	
84.	Persulphate	764
	Pertrifluoroacetic Acid (see Percarboxylic Acids)	
85.	Phenols	766
	<i>m</i> -Phenylenediamine (see Amines and Heterocyclic Bases)	
	Phenylhydrazine (see Hydrazines)	
	Phenyliodochloride (see Chlorine Reagents)	
	Phosgene (see Halides ('Active'))	
86.	Phosphoric Acid	767
	Phthalic Anhydride (see Anhydrides)	
87.	Physical Methods	772
	Picric Acid (see Nitrophenols)	
	Picrolonic Acid (see Nitrophenols)	
	Picryl Chloride (see Halides ('Active'))	
	Piperidine (see Amines and Heterocyclic Bases)	
	Polyaminohydroxyethyl Chitosan (see Amines and Heterocyclic Bases)	
	Polymethylamino Chitosan (see Amines and Heterocyclic Bases)	
	Potassium (Metal) (see Metals)	
88.	Potassium (I)	776
	Potassium Alkoxides (see Alkalies)	
	Potassium Carbonate (see Alkalies)	
	Potassium Hydroxide (see Alkoxides)	
	<i>n</i> -Propanol (see Alcohols)	
	Propionic Anhydride (see Anhydrides)	
	Pyridine (see Amines and Heterocyclic Bases)	
89.	Pyrolysis	778
	Pyromellitic Anhydride (see Anhydrides)	
90.	Quinones	786
	Reineckates (see Thiocyanates (Simple and Complex))

114. Xanthydrol	905
Zinc (Metal and Amalgam) (see Metals)	
115. Zinc (II)	907

SECTION 3: INDEX TO FUNCTIONAL GROUPS AND COMPOUND CLASSES

Acetals and Ketals	911
Acetylenes	911
Acids (see under more specific headings like Carboxylic Acids, Sulphonic Acids)	
Acid Chlorides	911
Alcohols	912
Aldehydes (see also Carbonyl Compounds)	914
Aliphatic Hydrocarbons	915
Alkaloids and their Salts	915
Aluminium-containing Compounds	917
Amides and Imides	917
Amidines	918
Amines and Bases (in General) (see also Primary Amines; Secondary Amines and Heterocyclic Bases; Tertiary Amines and Heterocyclic Bases; also Alkaloids, Synthetic Bases, Purines)	919
Amino Acids	919
Amine Oxides	920
Ammonium Hydroxide and Salts, Substituted	920
Anhydrides	922
Anils	922
Antibiotics and related Compounds	922
Aromatic Hydrocarbons	923
Arsenic-containing Compounds	923
Azo Compounds (see also Dyes)	924
Barbituric Acids and Salts	924

Bismuth-containing Compounds	924
Boron-containing Compounds	924
Carbamates and Urethanes	925
Carbonyl Compounds (in general) (see also Aldehydes and Ketones)	925
Carboxylates	925
Carboxylic Acids	926
Conjugated Hydrocarbons	929
Cyanates and Isocyanates	929
Diazo Compounds	929
Diazonium Salts	929
Disaccharides (see Sugars)	
Disulphides	929
Dithiocarbamates	930
Dyes	930
Enediols	931
Enols (see also Ketones)	931
Epoxides and Ethyleneimines	931
Esters (see also Nitrate and Sulphate Esters)	932
Ethers	933
Germanium-containing Compounds	934
Guanidines	934
Halides (see Ammonium Hydroxide and Salts, Substituted; Alkaloids and their Salts; Synthetic Bases and Salts; various Amine classes, for Halide Salts: and Halogen-Containing Compounds for those with organically bound halogen)	
Halogen-containing Compounds (excepting Acid Chlorides and Sulphonyl Chlorides)	934
Heterocyclic Bases (see Amines; Secondary Amines; Tertiary Amines; Alkaloids; Dyes; Purines; Synthetic Bases)	
Hydrazines	937
Hydrazo Compounds	939
Hydrocarbons (see Acetylenes; Aliphatic Hydrocarbons; Aromatic Hydrocarbons; Conjugated Hydrocarbons; Olefines)	
Hydroxamates	939
Imides (see Amides)	
Iodoso and Iodoxy Compounds	939
Isocyanates (see Cyanates)	
Isopropylidene Groups	939

Isothiocyanates (see Thiocyanates)	
Ketals (see Acetals)	
Ketones (see also Carbonyl Compounds)	939
Lactones	940
Lead-containing Compounds	940
Lithium Alkyls (see Metal Alkyls)	
Magnesium-containing Compounds	941
Mercaptans	941
Mercury-containing Compounds	942
Metal Alkyls and Aryls	942
Methyl Groups	942
Methylol Groups	943
Monosaccharides (see Sugars)	
Nitrate Esters	943
Nitriles	943
Nitrite Esters	944
Nitro Compounds	944
Nitroso Compounds	945
Olefines (see also Conjugated Hydrocarbons, Isopropylidene Groups)	946
Oximes	948
Paraffins (see Aliphatic Hydrocarbons)	
Penicillins (see Antibiotics and related Compounds)	
Peroxides and other Per-compounds	948
Phenols and Heterocyclic Hydroxy Compounds	948
Phenothiazines	950
Phosphorus-containing Compounds	950
Polysaccharides	951
Potassium Alkyls (see Metal Alkyls)	
Primary Amines (see also Amines; Alkaloids, etc.)	952
Proteins and Related Compounds	954
Purines and Related Compounds	954
Pyrazolones	955
Quaternary Salts (see Ammonium Hydroxide and Salts, Substituted)	
Quinones	956
Secondary Amines and Heterocyclic Bases (see also Amines; Alkaloids; Synthetic Bases, etc.)	957
Selenium-containing Compounds	957
Silicon-containing Compounds	957
