Photocopy Rights

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the AMERICAN SOCIETY FOR TESTING AND MATERIALS for users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$2.50 per copy, plus \$0.50 per page is paid directly to CCC, 27 Congress St., Salem, MA 01970; Tel. (508) 744-3350. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0-8031-1596-2/91 \$2.50 + .50.

Foreword

ASTM, founded in 1898, is a scientific and technical organization formed for “the development of standards on characteristics and performance of materials, products, systems, and services; and the promotion of related knowledge.” It is the world’s largest source of voluntary consensus standards.

The Society operates through 132 main technical committees with 2067 subcommittees. These committees function in prescribed fields under regulations that ensure balanced representation among producers, users, general interest, and consumer participants.

The Society currently has 32,800 members, of whom approximately 19,825 serve as technical experts on committees, representing 96,800 units of participation.

Membership in the Society is open to all concerned with the fields in which ASTM is active. A membership application may be found at the back of this volume. Additional information may be obtained from Member and Committee Services, ASTM, 1916 Race St., Philadelphia, PA 19103.

1991 Annual Book of ASTM Standards

The 1991 *Annual Book of ASTM Standards* consists of 68 volumes, divided among 16 sections, of which this volume is one. It contains formally approved ASTM standard classifications, guides, practices, specifications, test methods, and terminology and related material such as proposals. These terms are defined as follows in the Regulations Governing ASTM Technical Committees:

Categories:

standard—as used in ASTM, a document that has been developed and established within the consensus principles of the Society and that meets the approval requirements of ASTM procedures and regulations.

Discussion—The term “standard” serves in ASTM as an adjective in the title of documents, such as test methods or specifications, to connote specified consensus and approval. The various types of standard documents are based on the needs and usages as prescribed by the technical committees of the Society.

proposal—a document that has been approved by the sponsoring committee for publication for information and comment prior to its consideration for adoption as a standard.

Discussion—Complete balloting procedures are not required for proposals.

emergency standard—a document published by the Society to meet a demand for more rapid issuance of a specific standard document.

Discussion—The Executive Subcommittee of the sponsoring committee must recommend the publishing of an emergency standard and the Committee on Standards must concur in the recommendation. Emergency standards are not full consensus documents because they are not submitted to Society ballot.

Types:

The various types of ASTM documents are to provide a flexibility of form, communication, and usage for both the technical committees and the myriad users of ASTM documents. The type of ASTM document that is developed and titled is based on the technical content and intended use, not on the degree of consensus achieved. The three categories of ASTM documents (standard, emergency standard, and proposal) can be of the following forms and types:

classification—a systematic arrangement or division of materials, products, systems, or services into groups based on similar characteristics such as origin, composition, properties, or use.

guide—a series of options or instructions that do not recommend a specific course of action.

Discussion—Whereas a practice prescribes a general usage principle, a guide only suggests an approach. The purpose of a guide is to offer guidance, based on a consensus of viewpoints, but not to establish a fixed procedure. A guide is intended to increase the awareness of the user to available techniques in a given subject area and to provide information from which subsequent evaluation and standardization can be derived.

practice—a definitive procedure for performing one or more specific operations or functions that does not produce a test result. (Compare *test method*.)

Discussion—A practice is not a downgraded test method. Examples of practices include procedures for conducting interlaboratory testing programs or other statistical procedures; for writing statements on sampling or precision and bias; and for selection, preparation, application, inspection, necessary precautions for use or disposal, installation, maintenance, and operation of testing equipment.

specification—a precise statement of a set of requirements to be satisfied by a material, product, system, or service that indicates the procedures for determining whether each of the requirements is satisfied.

Discussion—It is desirable to express the requirements numerically in terms of appropriate units together with their limits.

terminology—a document comprising definitions of terms; descriptions of terms; explanations of symbols, abbreviations, or acronyms.

test method—a definitive procedure for the identification, measurement, and evaluation of one or more qualities, characteristics, or properties of a material, product, system, or service that produces a test result. (Compare *practice*.)

A new edition of the Book of Standards is issued annually. Each volume contains all actions approved by the Society at least six months before the issue date. New and revised standards approved by the Society between the annual appearances of any given volume are made available as separate copies. The 1991 edition of the Book of Standards comprises approximately 53,000 pages and includes over 8600 ASTM standards.

Purpose and Use of ASTM Standards

An ASTM standard represents a common viewpoint of those parties concerned with its provisions, namely, producers, users, consumers, and general interest groups. It is intended to aid industry, government agencies, and the general public. The use of an ASTM standard is purely voluntary. The existence of an ASTM standard does not intend to preclude anyone from manufacturing, marketing, or purchasing products, or using products, processes, or procedures not conforming to the standard. Because ASTM standards are subject to periodic review and revision, those who use them are cautioned to obtain the latest revision.

Consideration of Comments on ASTM Standards

An ASTM standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of any standard or for additional standards and should be addressed to ASTM Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, 1916 Race St., Philadelphia, PA 19103.

Using the Annual Book of ASTM Standards

The standards are assembled in each volume in alphanumeric sequence of their ASTM designation numbers except for Volumes 11.01, 11.02, and 05.04, which are assembled by subject matter. Volume 06.03 is assembled first by committee, then in alphanumeric sequence. Each volume has a table of contents, listing the standards in alphanumeric sequence by ASTM designation; and a list by subjects, categorizing the standards according to subject. A subject index of the standards in each volume appears at the back of each volume.

Availability of Individual Standards

Each ASTM standard is available as a separate copy from ASTM. Special quantity prices and discounts for members can be obtained from Customer Services. When ordering, provide the ASTM standard designation and year of issue, title, quantity desired, and shipping instructions.

Obsolete Editions

This new edition of the *Annual Book of ASTM Standards* makes last year's edition obsolete. Each volume of the *Annual Book of ASTM Standards* is published annually because of additions of new standards and significant revisions in existing standards. On the average, about 30 % of each volume is new or revised. For practical purposes, therefore, it is not wise to use obsolete volumes. However, for teaching purposes, these outdated volumes might be useful.

Safety Hazard Caveat

In January 1990, the Board of Directors approved revisions to the ASTM Policy on Safety Precautions and modified the language of the generic caveat on Safety Hazards as follows:

This standard does not purport to address (all of) the safety problems associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

Inclusion of the caveat is required in test methods, specifications (where test methods are detailed other than by reference), practices, and guides.

Disclaimer of Liability as to Patents:

The American Society for Testing and Materials takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in these standards. Users of these standards are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility.

Listed by Section and Volume

Section 1—Iron and Steel Products

- Volume 01.01 Steel—Piping, Tubing, Fittings
- Volume 01.02 Ferrous Castings; Ferroalloys
- Volume 01.03 Steel—Plate, Sheet, Strip, Wire
- Volume 01.04 Steel—Structural, Reinforcing, Pressure Vessel, Railway
- Volume 01.05 Steel—Bars, Forgings, Bearing, Chain, Springs
- Volume 01.06 Coated Steel Products
- Volume 01.07 Shipbuilding

Section 2—Nonferrous Metal Products

- Volume 02.01 Copper and Copper Alloys
- Volume 02.02 Aluminum and Magnesium Alloys; Die-Cast Metals
- Volume 02.03 Electrical Conductors
- Volume 02.04 Nonferrous Metals—Nickel, Lead, Tin, Zinc, Cadmium Alloys; Precious, Primary, Reactive Metals
- Volume 02.05 Metallic and Inorganic Coatings; Metal Powders, Sintered P/M Structural Parts

Section 3—Metals Test Methods and Analytical Procedures

- Volume 03.01 Metals—Mechanical Testing; Elevated and Low-Temperature Tests; Metallography
- Volume 03.02 Wear and Erosion; Metal Corrosion
- Volume 03.03 Nondestructive Testing
- Volume 03.04 Magnetic Properties; Metallic Materials for Thermostats, Electrical Resistance, Heating, Contacts
- Volume 03.05 Chemical Analysis of Metals and Metal-Bearing Ores
- Volume 03.06 Analytical Atomic Spectroscopy; Surface Analysis

Section 4—Construction

- Volume 04.01 Cement; Lime; Gypsum
- Volume 04.02 Concrete and Aggregates
- Volume 04.03 Road and Paving Materials; Pavement Management Technologies
- Volume 04.04 Roofing, Waterproofing, and Bituminous Materials
- Volume 04.05 Chemical-Resistant Materials; Vitrified Clay, Concrete, Fiber-Cement Products; Mortars; Masonry
- Volume 04.06 Thermal Insulation; Environmental Acoustics
- Volume 04.07 Building Seals and Sealants; Fire Standards; Building Constructions
- Volume 04.08 Soil and Rock; Dimension Stone; Geosynthetics
- Volume 04.09 Wood

Section 5—Petroleum Products, Lubricants, and Fossil Fuels

- Volume 05.01 Petroleum Products and Lubricants (I): D 56–D 1947
- Volume 05.02 Petroleum Products and Lubricants (II): D 1949–D 3601
- Volume 05.03 Petroleum Products and Lubricants (III): D 3602–latest; Catalysts
- Volume 05.04 Test Methods for Rating Motor, Diesel, and Aviation Fuels
- Volume 05.05 Gaseous Fuels; Coal and Coke

Section 6—Paints, Related Coatings, and Aromatics

- Volume 06.01 Paint—Tests for Formulated Products and Applied Coatings
- Volume 06.02 Paint—Pigments, Resins, and Polymers; Cellulose
- Volume 06.03 Paint—Fatty Oils and Acids, Solvents, Miscellaneous; Aromatic Hydrocarbons

Section 7—Textiles

- Volume 07.01 Textiles (I): D 76–D 3219
- Volume 07.02 Textiles (II): D 3333–latest

LISTED BY SECTION AND VOLUME

Section 8—Plastics

- Volume 08.01 Plastics (I): C 177–D 1600
- Volume 08.02 Plastics (II): D 1601–D 3099
- Volume 08.03 Plastics (III): D 3100–latest
- Volume 08.04 Plastic Pipe and Building Products

Section 9—Rubber

- Volume 09.01 Rubber, Natural and Synthetic—General Test Methods; Carbon Black
- Volume 09.02 Rubber Products, Industrial—Specifications and Related Test Methods; Gaskets; Tires

Section 10—Electrical Insulation and Electronics

- Volume 10.01 Electrical Insulation (I)—D 69–D 2484
- Volume 10.02 Electrical Insulation (II)—D 2518–latest
- Volume 10.03 Electrical Insulating Liquids and Gases; Electrical Protective Equipment
- Volume 10.04 Electronics (I)
- Volume 10.05 Electronics (II)

Section 11—Water and Environmental Technology

- Volume 11.01 Water (I)
- Volume 11.02 Water (II)
- Volume 11.03 Atmospheric Analysis; Occupational Health and Safety
- Volume 11.04 Pesticides; Resource Recovery; Hazardous Substances and Oil Spill Responses; Waste Disposal; Biological Effects

Section 12—Nuclear, Solar, and Geothermal Energy

- Volume 12.01 Nuclear Energy (I)
- Volume 12.02 Nuclear (II), Solar, and Geothermal Energy

Section 13—Medical Devices and Services

- Volume 13.01 Medical Devices; Emergency Medical Services

Section 14—General Methods and Instrumentation

- Volume 14.01 Analytical Methods—Spectroscopy; Chromatography; Computerized Systems
- Volume 14.02 General Test Methods, Nonmetal; Laboratory Apparatus; Statistical Methods; Appearance of Materials; Durability of Nonmetallic Materials
- Volume 14.03 Temperature Measurement

Section 15—General Products, Chemical Specialties, and End Use Products

- Volume 15.01 Refractories; Carbon and Graphite Products; Activated Carbon
- Volume 15.02 Glass; Ceramic Whitewares
- Volume 15.03 Space Simulation; Aerospace and Aircraft; High Modulus Fibers and Composites
- Volume 15.04 Soap; Polishes; Leather; Resilient Floor Coverings
- Volume 15.05 Engine Coolants; Halogenated Organic Solvents; Industrial Chemicals
- Volume 15.06 Adhesives
- Volume 15.07 End Use Products
- Volume 15.08 Fasteners
- Volume 15.09 Paper; Packaging; Flexible Barrier Materials; Business Copy Products

Section 00—Index

- Volume 00.01 Subject and Alphanumeric Index

Listed by Subjects

List by Subjects

1991 ANNUAL BOOK OF ASTM STANDARDS, VOLUME 02.05

METALLIC AND INORGANIC COATINGS; METAL POWDERS, SINTERED P/M STRUCTURAL PARTS

A complete Subject Index begins on p. 803

Since the standards in this book are arranged in alphanumeric order, no page numbers are included in this list by subjects. The standards listed in italics are related documents included for information only and do not appear in this volume.

METALLIC AND INORGANIC COATINGS

Specifications for:

- §B 580 – 79 (1989) Anodic Oxide Coatings on Aluminum
- B 532 – 85 Appearance of Electroplated Plastic Surfaces
- B 607 – 91 Autocatalytic Nickel Boron Coatings for Engineering Use
- B 733 – 90 Autocatalytic Nickel-Phosphorus Coatings on Metals
- B 734 – 84 (1990) Electrodeposited Copper for Engineering Uses

Electrodeposited Coatings of:

- B 766 – 86^{§1} Cadmium
- B 650 – 85 Chromium of Ferrous Substrates, Engineering
- B 604 – 80 Copper/Nickel/Chromium on Plastics, Decorative
- B 456 – 91 Copper Plus Nickel Plus Chromium and Nickel Plus Chromium
- §B 488 – 86^{§1} Gold, Engineering
- B 200 – 85 Lead and Lead-Tin Alloys on Steel and Ferrous Alloys
- B 689 – 90 Nickel Coatings, Engineering
- B 679 – 91 Palladium, Engineering
- B 634 – 88 Rhodium, Engineering
- B 700 – 90 Silver, Engineering
- §B 545 – 83 Tin
- §B 579 – 73 (1982)^{§1} Tin-Lead Alloy (Solder Plate)
- B 605 – 75 (1982) Tin-Nickel Alloy
- §B 633 – 85^{§1} Zinc on Iron and Steel

Mechanically Deposited Coatings of:

- B 696 – 91 Cadmium
- B 635 – 91 Cadmium-Tin
- B 695 – 91 Zinc on Iron and Steel

Vacuum-Deposited Coatings of:

- B 699 – 86 Cadmium on Iron and Steel

Test Methods for:

- B 571 – 91 Adhesion of Metallic Coatings

Anodically Coated Aluminum:

- B 457 – 67 (1980) Impedance of
- B 680 – 80 (1989) Seal Quality, by Acid Dissolution
- §B 136 – 84 Stain Resistance of
- §B 137 – 89 Weight of Coating on

Thickness of Coating by:

- §B 567 – 91 Beta Backscatter Method
- §B 504 – 90 Coulometric Method
- §B 244 – 79 Eddy-Current Instruments for Nonconductive Coatings on Nonmagnetic Basis Metals
- B 588 – 88 Interference Microscope (Double-Beam) Technique
- B 681 – 88 Light-Section Microscope
- §B 530 – 88 Magnetic Method for Nickel Coatings on Magnetic and Nonmagnetic Substrates
- §B 499 – 88 Magnetic Method for Nonmagnetic Coatings on Magnetic Basis Metals
- B 748 – 90 Measurement of Cross Section with a Scanning Electron Microscope

§ Approved for use by agencies of the Department of Defense and, if indicated on the standard, replaces the corresponding Federal or Military document. Consult the DoD Index of Specifications and Standards for the specific year of issue which has been adopted by the Department of Defense.

LIST BY SUBJECTS

- §B 487 – 85 (1990) Microscopical Examination of a Cross Section
 B 556 – 90 Spot Test for Thin Chromium Coatings, Guide for
 §B 568 – 90 X-Ray Spectrometry
- Corrosion:*
 §B 368 – 85 (1990)^{€1} Copper-Accelerated Acetic Acid-Salt Spray (Fog) Testing (CASS Test)
 B 380 – 85 (1990) Corrodokote Procedure for Decorative Electrodeposited Coatings
 B 651 – 83 (1988) Corrosion Sites, Measurement of, in Nickel Plus Chromium or Copper Plus Nickel Plus Chromium
 Electroplated Surfaces with the Double-Beam Interference Microscope
 B 627 – 84 Electrolytic Corrosion Testing (EC Test)
 F 326 – 78 (1987)^{€1} Electronic Hydrogen Embrittlement Test for Cadmium-Electroplating Processes
 F 519 – 77^{€1} Hydrogen Embrittlement Testing of Plating Processes (and Aircraft Maintenance Chemicals)
 B 636 – 84 Internal Stress of Plated Metallic Coatings with the Spiral Contractometer
 B 578 – 87 Microhardness of Electroplated Coatings
 B 533 – 85 Peel Strength of Metal Electroplated Plastics
 B 735 – 89 Porosity in Gold Coatings on Metal Substrates by Gas Exposure
 B 741 – 90 Porosity in Gold Coatings on Metal Substrates by Paper Electrography
 B 809 – 90 Porosity in Metallic Coatings by Humid Sulfur Vapor ("Flowers-of-Sulfur")
 §B 117 – 90 Salt Spray (Fog) Testing
 B 602 – 88 Sampling by Attributes
 B 678 – 86 Solderability of Metallic-Coated Products
 B 553 – 79 (1985) Thermal Cycling of Electroplated Plastics
- Method for:*
 B 764 – 86 Simultaneous Thickness and Electrochemical Potential Determination of Individual Layers in Multilayer
 Nickel Deposit (STEP Test)
- Method of:*
 B 762 – 86 Variables Sampling of Metallic and Inorganic Coatings
- Guide for:*
 B 253 – 87 Aluminum Alloys for Electroplating, Preparation of
- Practices for:*
 B 449 – 67a (1982)^{€2} Chromate Treatments on Aluminum
 B 177 – 68 (1984) Chromium Electroplating on Steel for Engineering Use
 §A 380 – 88 Cleaning and Descaling Stainless Steel Parts, Equipment, and Systems
 B 322 – 85 Cleaning Metals Prior to Electroplating
 §B 600 – 91 Descaling and Cleaning Titanium and Titanium Alloy Surfaces, Guide for
 B 614 – 77 (1989)^{€1} Descaling and Cleaning Zirconium and Zirconium Alloy Surfaces
 B 507 – 86 Design of Articles to be Electroplated on Racks
- Electroforming:*
 B 503 – 69 (1984)^{€1} Copper and Nickel Electroplating Solutions
 B 450 – 85 Engineering Design of Articles
 B 431 – 85 Mandrels for
- Preparation of and Electroplating on:*
 B 630 – 88^{€1} Chromium (Electrodeposits) with Chromium
 B 281 – 88 Copper and Copper-Base Alloys
 B 320 – 60 (1990) Iron Castings
 B 480 – 88 Magnesium and Magnesium Alloys
 B 629 – 77 (1990) Molybdenum and Molybdenum Alloys
 B 558 – 79 (1991) Nickel Alloys
 B 343 – 79 (1985) Nickel (Electrodeposits) with Nickel
 B 727 – 83 (1988) Plastics Materials
 B 537 – 70 (1986) Rating of Electroplated Panels Subjected to Atmospheric Exposure
 B 242 – 54 (1990) Steel, High-Carbon
 B 183 – 79 (1990) Steel, Low-Carbon
 B 254 – 79 (1985) Steel, Stainless
 B 481 – 68 (1990) Titanium and Titanium Alloys
 B 482 – 85 (1990) Tungsten and Tungsten Alloys
 B 252 – 85 Zinc Alloy Die Castings and Conversion Coatings
- Testing:*
 B 489 – 85 Bend Test for Ductility
 B 490 – 90 Bend Test for Ductility, Micrometer
 B 201 – 80 (1989)^{€1} Chromate Coatings on Zinc and Cadmium Surfaces
- Preparation of Surfaces for Painting:*
 D 1730 – 67 (1984)^{€1} Aluminum and Aluminum-Alloy Surfaces
 D 1731 – 67 (1984)^{€1} Hot-Dip Aluminum Surfaces
 §D 1732 – 67 (1984) Magnesium Alloy Surfaces

LIST BY SUBJECTS

Terminology Relating to:

B 374 – 90a Electroplating

Guide for:

B 656 – 91 Autocatalytic (Electroless) Nickel-Phosphorus Deposition on Metals for Engineering Use
 B 767 – 88 Determining Mass Per Unit Area of Electrodeposited and Related Coatings by Gravimetric and Other Chemical Analysis Procedures
 B 697 – 88 Inspection of Electrodeposited Metallic and Inorganic Coatings, Selection of Sampling Plans
 B 319 – 84 Lead and Lead Alloys

Guide for Measurement of:

B 555 – 86 (1991) Electrodeposited Metallic Coating Thicknesses by the Dropping Test
 B 659 – 90 Thickness of
 B 556 – 90 Thin Chromium Coatings by the Spot Test

Guide for:

B 765 – 86 Porosity Tests for Electrodeposits and Related Metallic Coatings, Selection of

METAL POWDERS AND METAL POWDER PRODUCTS

For General Description of Production, Properties, and Uses of Sintered Metal Powder Bearings and Structural Parts, see Related Material section.

Test Methods for:

E 194 – 90 Acid-Insoluble Content of Copper and Iron Powders
 B 212 – 89 Apparent Density of Free-Flowing Metal Powders
 B 703 – 88 Apparent Density of Metal Powders Using the Arnold Meter
 B 417 – 89 Apparent Density of Non-Free-Flowing Metal Powders
 §B 329 – 90 Apparent Density of Powders of Refractory Metals and Compounds by the Scott Volumeter
 B 330 – 88 Average Particle Size of Powders of Refractory Metals and Their Compounds by the Fisher Sub-Sieve Sizer
 B 331 – 85 (1990) Compressibility of Metal Powders in Uniaxial Compaction
 B 610 – 85 (1988)[†] Dimensional Change of Metal Powder Specimens Due to Sintering, Measuring
 B 213 – 90 Flow Rate of Metal Powders
 B 312 – 82 (1988)[†] Green Strength for Compacted Metal Powder Specimens
 E 159 – 86 Hydrogen Loss of Copper, Tungsten, and Iron Powders
 B 796 – 88 Low-Alloy Powder Forged Steel Parts, Nonmetallic Inclusion Level of
 B 797 – 88 Low-Alloy Powder Forged Steel Parts, Surface Finger Oxide Penetration Depth and Presence of Interparticle Oxide Networks in
 B 795 – 88 Low-Alloy Powder Forged Steel Parts, Unalloyed Iron Contamination of
 B 721 – 91 Microhardness and Case Depth of Powder Metallurgy (P/M) Parts
 B 761 – 90 Particle Size Distribution of Refractory Metals and Their Compounds by X-Ray Monitoring of Gravity Sedimentation
 B 430 – 90 Particle Size Distribution of Refractory Metal-Type Powders by Turbidimetry
 §B 214 – 86 Sieve Analysis of Granular Metal Powders
 B 527 – 85 Tap Density of Powders of Refractory Metals and Compounds by Tap-Pak Volumeter

Practices for:

B 215 – 90 Sampling Finished Lots of Metal Powders

Metal Powder Bearings

Specifications for:

B 439 – 83 (1989) Iron-Base Sintered Bearings (Oil-Impregnated)
 B 612 – 91 Iron Bronze Sintered Bearings (Oil-Impregnated)
 B 782 – 88 Iron Graphite Sintered Bearings (Oil-Impregnated)
 B 438 – 83a (1989) Sintered Bronze Bearings (Oil-Impregnated)
 B 438M – 84 (1989) Sintered Bronze Bearings (Oil-Impregnated) [Metric]

Test Method for:

B 328 – 73 (1986)[†] Density and Interconnected Porosity of Sintered Powder Metal Structural Parts and Oil-Impregnated Bearings

Metal Powder Structural Parts

Specifications for:

B 783 – 90[†] Materials for Ferrous Powder Metallurgy Structural Parts
 B 595 – 84 Sintered Aluminum Structural Parts (Discontinued 1991†)

† Although this standard has been officially withdrawn from Society approval, a brief description is included for information only.

LIST BY SUBJECTS

Specifications for:

B 282 – 83a (1990)	Sintered Brass Structural Parts
B 255 – 83a (1990)	Sintered Bronze Structural Parts
B 715 – 83 (1989)	Sintered Copper Structural Parts for Electrical Conductivity Applications
B 458 – 83a (1990)	Sintered Nickel Silver Structural Parts

Test Methods for:

B 526 – 70 (1985) ^{€1}	Coefficient of Friction and Wear of Sintered Metal Friction Materials Under Dry-Clutch Conditions (Intent to Withdraw)
B 328 – 73 (1986) ^{€1}	Density and Interconnected Porosity of Sintered Powder Metal Structural Parts and Oil-Impregnated Bearings
B 376 – 65 (1985) ^{€1}	Density of Sintered Metal Friction Materials (Intent to Withdraw)
B 460 – 68 (1985) ^{€1}	Dynamic Coefficient of Friction and Wear of Sintered Metal Friction Materials Under Dry Conditions (Intent to Withdraw)
B 461 – 67 (1985) ^{€1}	Frictional Characteristics of Sintered Metal Friction Materials Run in Lubricants (Intent to Withdraw)
B 347 – 85	Hardness of Sintered Metal Friction Materials (Intent to Withdraw)
B 378 – 65 (1985) ^{€2}	Transverse Rupture Strength of Sintered Metal Friction Materials (Intent to Withdraw)
B 528 – 83a (1989)	Transverse Rupture Strength of Sintered Metal Powder Specimens

Cemented Carbides

Test Methods for:

B 611 – 85 (1990)	Abrasive Wear Resistance of Cemented Carbides
B 276 – 86	Apparent Porosity in Cemented Carbides
B 311 – 86	Density of Cemented Carbides
B 657 – 87	Metallographic Determination of Microstructure in Cemented Carbides
B 771 – 87	Short Rod Fracture Toughness of Cemented Carbides
B 406 – 90	Transverse Rupture Strength of Cemented Carbides

Practices for:

B 390 – 86	Evaluating Apparent Grain Size and Distribution of Cemented Tungsten Carbides
B 665 – 87	Metallographic Sample Preparation of Cemented Carbides

Method for:

B 294 – 86	Hardness Testing of Cemented Carbides
------------	---------------------------------------

Terminology

Terminology of:

B 243 – 90a	Powder Metallurgy
-------------	-------------------

PORCELAIN ENAMEL AND RELATED CERAMIC-METAL SYSTEMS

Classification of:

C 375 – 58 (1987) ^{€1}	Water Used in Milling of Porcelain Enamel
---------------------------------	---

Test Methods for:

C 448 – 88	Abrasion Resistance of Porcelain Enamels
C 282 – 89	Acid Resistance of Porcelain Enamels (Citric Acid Spot Test)
C 313 – 78 (1983)	Adherence of Porcelain Enamel and Ceramic Coatings to Sheet Metal (Discontinued 1991†)
C 988 – 83	Adherence of Porcelain Enamel Cover Coats Direct-to-Steel (Discontinued 1991†)
C 633 – 79 ^{€1}	Adhesion or Cohesive Strength of Flame-Sprayed Coatings
C 614 – 74 (1989)	Alkali Resistance of Porcelain Enamels
C 756 – 87	Cleanability of Surface Finishes
C 538 – 83	Color Retention of Red, Orange, and Yellow Porcelain Enamels
C 839 – 82	Compressive Stress of Porcelain Enamels by Loaded-Beam Method
C 536 – 83	Continuity of Coatings in Glassed Steel Equipment by Electrical Testing
C 743 – 87	Continuity of Porcelain Enamel Coatings
C 374 – 70 (1982) ^{€2}	Fusion Flow of Porcelain Enamel Frits (Flow-Button Methods)
C 346 – 87	Gloss of Ceramic Materials, 45-deg Specular
C 540 – 78 (1983)	Image Gloss of Porcelain Enamel Surfaces (Discontinued 1991†)
C 872 – 89	Lead and Cadmium Release from Porcelain Enamel Surfaces
C 539 – 84 (1990)	Linear Thermal Expansion of Porcelain Enamel and Glaze Frits and Ceramic Whiteware Materials by the Interferometric Method
C 715 – 90	Nickel on Steel for Porcelain Enameling by Photometric Analysis
C 810 – 90	Nickel on Steel for Porcelain Enameling by X-Ray Emission Spectrometry
C 632 – 88	Reboiling Tendency of Sheet Steel for Porcelain Enameling

LIST BY SUBJECTS

Test Methods for:

C 347 – 57 (1983) ^{€1}	Reflectance, Reflectivity, and Coefficient of Scatter of White Porcelain Enamels (Discontinued 1991†)
C 537 – 87	Reliability of Glass Coatings on Glassed Steel Reaction Equipment by High Voltage
C 283 – 54 (1983)	Resistance of Porcelain Enameled Utensils to Boiling Acid
C 285 – 88	Sieve Analysis of Wet-Milled and Dry-Milled Porcelain Enamel
C 703 – 72 (1983)	Spalling Resistance of Porcelain Enameled Aluminum
C 385 – 58 (1983)	Thermal Shock Resistance of Porcelain-Enameled Utensils
C 664 – 87	Thickness of Diffusion Coating
C 694 – 90a	Weight Loss (Mass Loss) of Sheet Steel During Immersion in Sulfuric Acid Solution
C 774 – 88	Yield Strength of Enameling Steels After Straining and Firing

Definitions of Terms Relating to:

§C 286 – 83a	Porcelain Enamel and Ceramic-Metal Systems
--------------	--

Specification for:

A 424 – 89	Porcelain Enameling, Steel, Sheet
------------	-----------------------------------

Practices for:

C 660 – 81 (1988) ^{€1}	Production and Preparation of Gray Iron Castings for Porcelain Enameling
---------------------------------	--

CORROSION TESTS

Test Methods for:

B 627 – 84	Electrolytic Corrosion Testing (EC Test)
§B 117 – 90	Salt Spray (Fog) Testing

Methods for:

§B 368 – 85 (1990) ^{€1}	Copper-Accelerated Acetic Acid-Salt Spray (Fog) Testing (CASS Test)
B 380 – 85 (1990)	Corrosion Testing of Decorative Electrodeposited Coatings by the Corrodokote Procedure

Practice for:

G 2 – 88	Corrosion Testing of Products of Zirconium, Hafnium, and Their Alloys in Water at 680°F or in Steam at 750°F (see Vols 02.04 and 03.02)
G 2M – 88	Corrosion Testing of Products of Zirconium, Hafnium, and Their Alloys in Water at 633°K or in Steam at 673°K [Metric] (See Vols 02.04 and 03.02)

RELATED SPECIFICATIONS

Specifications for:

B 440 – 83 (1988)	Cadmium
B 39 – 79 (1985)	Nickel
§D 1193 – 77 (1983) ^{€1}	Reagent Water
B 6 – 87 ^{€1}	Zinc

GENERAL METHODS OF TESTING

Test Methods for:

E 112 – 88	Determining the Average Grain Size (see Vol 03.01)
A 370 – 90a	Mechanical Testing of Steel Products, Test Methods and Definitions for (see Vols 01.01, 01.02, 01.03, 01.04, 01.05, and 03.01)
E 23 – 91	Notched Bar Impact Testing of Metallic Materials (see Vol 03.01)
E 3 – 80 (1986)	Preparation of Metallographic Specimens (see Vol 03.01)
E 8 – 90a	Tension Testing of Metallic Materials (see Vols 01.02, 02.01, 02.02, 02.03, and 03.01)
E 8M – 90a	Tension Testing of Metallic Materials [Metric] (see Vols 01.02, 02.01, 02.02, 02.03, and 03.01)

Test Methods for:

E 10 – 84	Brinell Hardness of Metallic Materials (see Vol 03.01)
E 384 – 89	Microhardness of Materials
E 18 – 89a	Rockwell Hardness and Rockwell Superficial Hardness of Metallic Materials (see Vols 02.03 and 03.01)

Practices for:

§E 527 – 83 ^{€1}	Numbering Metals and Alloys (UNS)
E 29 – 90	Using Significant Digits in Test Data to Determine Conformance with Specifications (see Vols 02.03, 03.01, 03.03, 03.05, 08.03, 10.02, and 14.02)
E 114 – 90	Ultrasonic Pulse-Echo Straight-Beam Examination Testing by the Contact Method (see Vol 03.03)

Standard Hardness Conversion Tables:

E 140 – 88	For Metals (Relationship Between Brinell Hardness, Vickers Hardness, Rockwell Hardness, Rockwell Superficial Hardness, and Knoop Hardness) (see Vols 02.01 and 03.01)
------------	---

METRIC PRACTICE

Practice for:

E 380 – 89a

Use of the International System of Units (SI) (the Modernized Metric System) (Excerpts) (see Related Material section)

Contents

1991 ANNUAL BOOK OF ASTM STANDARDS, VOLUME 02.05

METALLIC AND INORGANIC COATINGS; METAL POWDERS, SINTERED P/M STRUCTURAL PARTS

A complete Subject Index begins on p. 803

This contents includes only those standards included in this book and those standards that appeared previously that have been superseded or discontinued within the past five years. Since the standards in this book are arranged in alphanumeric sequence, no page numbers are given in this contents.

In the serial designations prefixed to the following titles, the number following the dash indicates the year of original adoption as standard or, in the case of revision, the year of last revision. Thus, standards adopted or revised during the year 1991 have as their final number, 91. A letter following this number indicates more than one revision during the year, that is 91a indicates the second revision in 1991, 91b the third revision, etc. Standards that have been reapproved without change are indicated by the year of last reapproval in parentheses as part of the designation number, for example, (1991). A superscript epsilon indicates an editorial change since the last revision or reapproval— $\epsilon 1$ for the first change, $\epsilon 2$ for the second change, etc.

A 165 – 80	Specification for Electrodeposited Coatings of Cadmium on Steel (Discontinued 1987—Replaced by B 766†)
§A 380 – 88	Practice for Cleaning and Descaling Stainless Steel Parts, Equipment, and Systems
B 6 – 87 $\epsilon 1$	Specification for Zinc
B 39 – 79 (1985)	Specification for Nickel
§B 117 – 90	Test Method of Salt Spray (Fog) Testing
§B 136 – 84	Method for Measurement of Stain Resistance of Anodic Coatings on Aluminum
§B 137 – 89	Test Method for Measurement of Mass of Coating on Anodically Coated Aluminum
B 177 – 68 (1984)	Practice for Chromium Electroplating on Steel for Engineering Use
B 183 – 79 (1990)	Practice for Preparation of Low-Carbon Steel for Electroplating
B 200 – 85	Specification for Electrodeposited Coatings of Lead and Lead-Tin Alloys on Steel and Ferrous Alloys
B 201 – 80 (1989) $\epsilon 1$	Practice for Testing Chromate Coatings on Zinc and Cadmium Surfaces
B 212 – 89	Test Method for Apparent Density of Free-Flowing Metal Powders
B 213 – 90	Test Method for Flow Rate of Metal Powders
§B 214 – 86	Test Method for Sieve Analysis of Granular Metal Powders
B 215 – 90	Practices for Sampling Finished Lots of Metal Powders
B 222 – 83a	Specification for Sintered Iron-Copper Structural Parts (Discontinued 1990—Replaced by B 783†)
B 242 – 54 (1990)	Practice for Preparation of High-Carbon Steel for Electroplating
B 243 – 90a	Terminology of Powder Metallurgy
§B 244 – 79	Method for Measurement of Thickness of Anodic Coatings on Aluminum and of Other Nonconductive Coatings on Nonmagnetic Basis Metals with Eddy-Current Instruments
B 252 – 85	Practice for Preparation of Zinc Alloy Die Castings for Electroplating and Conversion Coatings
B 253 – 87	Guide for Preparation of Aluminum Alloys for Electroplating
B 254 – 79 (1985)	Practice for Preparation of and Electroplating on Stainless Steel
B 255 – 83a (1990)	Specification for Sintered Bronze Structural Parts
B 276 – 86	Test Method for Apparent Porosity in Cemented Carbides
B 281 – 88	Practice for Preparation of Copper and Copper-Base Alloys for Electroplating and Conversion Coatings
B 282 – 83a (1990)	Specification for Sintered Brass Structural Parts
B 287 – 74 (1980) $\epsilon 1$	Method of Acetic Acid-Salt Spray (Fog) Testing (Discontinued 1988—Replaced by G 85†)
B 294 – 86	Method for Hardness Testing of Cemented Carbides
B 303 – 83a	Specification for Copper-Infiltrated Sintered Carbon Steel Structural Parts (Discontinued 1990—Replaced by B 783†)
B 310 – 83a	Specification for Sintered Carbon Steel Structural Parts (Discontinued 1990—Replaced by B 783†)
B 311 – 86	Test Method for Density of Cemented Carbides
B 312 – 82 (1988) $\epsilon 1$	Test Method for Green Strength for Compacted Metal Powder Specimens
B 319 – 84	Guide for Preparation of Lead and Lead Alloys for Electroplating
B 320 – 60 (1990)	Practice for Preparation of Iron Castings for Electroplating
B 322 – 85	Practice for Cleaning Metals Prior to Electroplating
B 328 – 73 (1986) $\epsilon 1$	Test Method for Density and Interconnected Porosity of Sintered Powder Metal Structural Parts and Oil-Impregnated Bearings
§B 329 – 90	Test Method for Apparent Density of Powders of Refractory Metals and Compounds by the Scott Volumeter

§ Approved for use by agencies of the Department of Defense and, if indicated on the standard, replaces the corresponding Federal or Military document. Consult the DoD Index of Specifications and Standards for the specific year of issue which has been adopted by the Department of Defense.

† Although this standard has been officially withdrawn from Society approval, a brief description is included for information only.
