

WATER

and WATER

POLLUTION

HANDBOOK

volume **3**

edited by **LEONARD L. CIACCIO**

Water and Water Pollution Handbook

VOLUME 3

(in four volumes)

Edited by LEONARD L. CIACCIO

GTE LABORATORIES INCORPORATED
BAYSIDE, NEW YORK

Contributors to Volume 3

- H. E. Allen, *Department of Environmental and Industrial Health, School of Public Health, University of Michigan, Ann Arbor, Michigan*
- P. L. Brezonik, *Department of Environmental Engineering, University of Florida, Gainesville, Florida*
- S. D. Faust, *Department of Environmental Sciences, Rutgers-The State University, New Brunswick, New Jersey*
- R. A. Horne, * *Arthur D. Little, Inc., Cambridge, Massachusetts*
- J. V. Hunter, *Department of Environmental Sciences, Rutgers-The State University, New Brunswick, New Jersey*
- J. L. Lambert, *Department of Chemistry, Kansas State University, Manhattan, Kansas*
- K. H. Mancy, *Department of Environmental and Industrial Health, School of Public Health, University of Michigan, Ann Arbor, Michigan*
- H. C. Marks, *Pennwalt Corporation, King of Prussia, Pennsylvania*
- A. H. Molof, *School of Engineering and Science, New York University, Bronx, New York*
- D. A. Rickert, *Department of Environmental Sciences, Rutgers-The State University, New Brunswick, New Jersey*
- V. T. Stack, Jr., *Director of Research and Development, Roy F. Weston Environmental Scientists and Engineers, West Chester, Pennsylvania*
- I. H. Suffet, *Environmental Engineering and Science Program, Drexel University, Philadelphia, Pennsylvania*

*Present address: JBF Scientific Corp., Burlington, Massachusetts.

Contents of Volume 1

Chemical, Physical, and Biological Characteristics of Water Resources, WALTON H. DURUM, *U.S. Geological Survey, Washington, D.C.*

Chemical, Physical, and Biological Characteristics of Estuaries, WALTER ABBOTT,* C. E. DAWSON, *Gulf Coast Research Laboratory, Ocean Springs, Mississippi*, and C. H. OPPENHEIMER, *Florida State University, Tallahassee, Florida*

Chemical, Physical, and Biological Characteristics of Irrigation and Soil Water, J. D. RHOADES and LEON BERNSTEIN, *U. S. Salinity Laboratory, U.S. Department of Agriculture, Riverside, California*

Self-Purification in Natural Waters, R. J. BENOIT, *EcoScience Laboratory, Division of Environmental Research & Applications, Inc., Norwich, Connecticut*

Use of Computer Technology to Develop Mathematical Models for Natural Water Systems, A. R. LEFEUVRE, *Canada Centre for Inland Waters, Department of Energy, Mines and Resources, Burlington, Ontario*

The Effects of Pollution upon Aquatic Life, MAX KATZ, *College of Fisheries, University of Washington, Seattle, Washington*

Chemical, Physical, and Biological Characteristics of Wastes and Waste Effluents, H. A. PAINTER, *Water Pollution Research Laboratory, Stevenage, Herts, England*

Chemical and Physical Purification of Water and Waste Water, J. E. SINGLEY, *College of Engineering, University of Florida, Gainesville, Florida*

Biological Waste Treatment, EMIL J. GENETELLI, *Department of Environmental Sciences, Rutgers—The State University, New Brunswick, New Jersey*

*Present address: Environomics, Houston, Texas.

Contents of Volume 2

Sampling of Natural Waters and Waste Effluents, DARRELL L. KING,
Department of Civil Engineering, University of Missouri, Columbia,
Missouri

Concentration and Separation Techniques, JULIAN B. ANDELMAN,
Graduate School of Public Health, University of Pittsburgh, Pitts-
burgh, Pennsylvania, and S. CHARLES CARUSO, Mellon Institute,
Carnegie-Mellon University, Pittsburgh, Pennsylvania

Insoluble Matter in Natural Water, WILLIAM TUTHILL LAMMERS,
Department of Biology, Davidson College, Davidson, North
Carolina

Bacterial and Viral Analysis of Water and Waste Water, PASQUALE V.
SCARPINO, *Environmental Health Engineering, Department of Civil*
Engineering, University of Cincinnati, Cincinnati, Ohio

Toxicity Bioassay Techniques Using Aquatic Organisms, MAX KATZ,
College of Fisheries, University of Washington, Seattle, Washington

Contents of Volume 4

- Determination of Minor Metallic Elements in the Water Environment, J. F. COSGROVE and D. J. BRACCO, *GTE Laboratories Incorporated, Bayside, New York*
- Determination of Radioactive Nuclides in the Water Environment, BERND KAHN, *Radiological Engineering Laboratory, Environmental Health Service, Bureau of Radiological Health, Department of Health, Education, and Welfare, Cincinnati, Ohio*
- Monitoring of Water Systems, PATRICK J. MCNELIS, *Automated Environmental Systems, Inc., Woodbury, New York*
- Automated Methods in Water Analysis, JOHN S. JERIS, *Civil Engineering Department, Manhattan College, Bronx, New York*, RAUL CARDENAS, *Department of Civil Engineering, New York University, Bronx, New York*, and LEONARD L. CIACCIO, *GTE Laboratories Incorporated, Bayside, New York*.
- Gas Chromatographic Analysis of Water and Waste Waters, PETER CUKOR and HOWARD MADLIN, *GTE Laboratories Incorporated, Bayside, New York*
- Mass Spectrometry in Water Analysis, JOHN ROBOZ, *Department of Chemistry, ATRAN, Mt. Sinai Hospital, New York, New York*
- Infrared Spectroscopy in Water Analysis, FRANK S. PARKER, *Department of Biochemistry, New York Medical College, New York, New York*
- Luminescence Techniques in Water Analysis, PETER A. ST. JOHN, *American Instrument Company, Inc., Silver Springs, Maryland*
- Electrochemical Techniques in Water Analysis, E. JUNE MAIENTHAL and JOHN K. TAYLOR, *Microchemical Analysis Section, Analytical Chemistry Division, National Bureau of Standards, U.S. Department of Commerce, Washington, D.C.*

Contents

CONTRIBUTORS TO VOLUME 3	iii
CONTENTS OF VOLUME 1	ix
CONTENTS OF VOLUME 2	x
CONTENTS OF VOLUME 4	xi
15. Biochemical Oxygen Demand Measurement	801
<i>Vernon T. Stack, Jr.</i>	
I. Biochemical Oxygen Demand	801
II. Measurements of Biochemical Oxidation	824
III. BOD and Related Parameters	826
IV. Summary	827
References	828
16. Chemical Kinetics and Dynamics in Natural Water Systems	831
<i>Patrick Lee Brezonik</i>	
I. Introduction	832
II. Chemical Kinetics	834
III. Heterogeneous Reaction Kinetics	858
IV. Biochemical Reaction Kinetics and Dynamics	871
V. Analytical Implications	896
References	908
17. Effect of Structure and Physical Characteristics of Water on Water Chemistry	915
<i>R. A. Horne</i>	
I. Introduction	915
II. The Structure of Pure Liquid Water	918

III. The Effect of Temperature and Pressure on the Structure of Pure Water	923
IV. Aqueous Electrolyte Solutions	926
V. Interfacial Water Structure and Hydrophobic Hydration	936
VI. Water Structure and Chemistry	944
References	946
18. The Use of Standards in the Quality Control of Treated Effluents and Natural Waters	949
<i>Alan H. Molof</i>	
I. Introduction	949
II. Historical Development	950
III. Organized Concern on Pollution Policy	951
IV. Implementation of Pollution Policy by the Use of Standards and Criteria	952
V. Differing Viewpoints on Standards	954
VI. Government Action	956
VII. Response to Setting of Standards	957
VIII. Methods to Meet Stricter Effluent and Natural Water Standards	959
IX. Enforcement of Standards	962
References	962
Appendix	963
19. Design of Measurement Systems for Water Analysis	971
<i>Herbert E. Allen and K. H. Mancy</i>	
I. Introduction	971
II. Objectives	972
III. Water Quality Parameters	975
IV. Selection of Analytical Methods	1006
V. Conclusion	1016
References	1017
20. Organic Analytical Chemistry in Aqueous Systems	1021
<i>Joseph V. Hunter and David A. Rickert</i>	
I. Introduction	1022
II. Preliminary Fractionation	1023
III. Concentration and Separation	1026
IV. Basic Structural Considerations in Qualitative Organic Analysis	1028
V. Physical Identification Methods	1062
VI. Chemical Identification Methods	1105

VII. Quantitative Organic Analysis	1142
VIII. Summary and Conclusion	1155
References	1156
21. Inorganic Analytical Chemistry in Aqueous Systems	1165
<i>Jack L. Lambert</i>	
I. Introduction	1166
II. Arsenic	1167
III. Boron	1168
IV. Bromine	1170
V. Calcium	1171
VI. Carbon	1172
VII. Chlorine	1176
VIII. Fluorine	1180
IX. Hydrogen	1182
X. Iodine	1183
XI. Magnesium	1184
XII. Nitrogen	1186
XIII. Oxygen	1190
XIV. Phosphorus	1193
XV. Potassium	1195
XVI. Selenium	1196
XVII. Silicon	1197
XVIII. Sodium	1198
XIX. Sulfur	1199
XX. General Reference Works	1202
References	1203
22. Residual Chlorine Analysis in Water and Waste Water	1213
<i>Henry C. Marks</i>	
I. Introduction	1214
II. Methods Based on Orthotolidine	1218
III. Benzidine Derivatives Other Than Orthotolidine	1223
IV. Methods Based on <i>p</i> -Aminodimethylaniline	1225
V. Methods Based on <i>p</i> -Aminodiethylaniline	1226
VI. The Crystal Violet Method	1229
VII. Methyl Orange Method	1230
VIII. Cyanogen Chloride Method	1231
IX. Miscellaneous Amino and Hydroxy Aromatic Compounds	1233
X. The α -Naphthoflavone-Iodide Method	1235
XI. Starch-Iodide Methods	1236
XII. Amperometric Titrations	1237

XIII. Amperometry	1242
XIV. Voltammetry	1242
XV. Use of Electrode Potentials	1243
References	1244

23. Analysis for Pesticides and Herbicides in the Water Environment **1249**

Samuel D. Faust and Irwin H. Suffet

I. Introduction	1250
II. Occurrences in Natural Waters and Bottom Muds	1250
III. Water Quality Criteria	1251
IV. Chemical and Physical Properties of Organic Pesticides	1253
V. Significant Levels of Detection	1260
VI. Collection of Samples	1263
VII. Efficiencies of Recovery	1264
VIII. Extractive Techniques	1265
IX. Cleanup Techniques	1280
X. Chromatographic Separation and Tentative Identification of Organic Pesticides and Their Metabolites	1284
XI. Confirmatory Techniques	1294
XII. General Discussion and Summary	1302
Appendixes	1303
References	1309
