LIST OF PUBLICATIONS

ENGINEERING INDEX, INC., indexes and annotates selectively, on the basis of engineering significance, the available current technical periodicals received by and permanently housed in the Engineering Societies Library. Included are the regular professional and trade journals, publications of engineering societies, scientific and technical associations, universities, laboratories and research institutions, government departments and agencies, and industrial organizations. Papers of conferences and symposia, separate and non-serial publications of various kinds, and selected books are also covered. Patents are excluded. The following lists only the periodical and serial publications reviewed.
