INTRODUCTION

The purpose of this directory is to provide current information on the availability and content of Federal machine-readable data files which are available from NTIS.

Almost 1,000 data files are listed and described in the Directory; technical reports are not described. The minimum documentation (i.e., technical report) available for these data files is a description of the contents of the tape file (i.e., the record layout). All of these files are available for purchase from NTIS.

For additional information, contact:

Computer Products Support Group
National Technical Information Service
5285 Port Royal Road
Springfield, VA 22161
Phone: (703) 487-4763
FTS 737-4763

HOW TO ORDER

To order a magnetic tape or document from NTIS, fill out the order form (or a copy) bound in the back of this application and sent it to NTIS, 5285 Port Royal Road, Springfield, VA 22161. Be sure to include the NTIS order number (printed at the upper right of each entry in the abstract section). Please specify tape recording mode on the order form. You can pay by check, American Express, MasterCard, or Visa credit card account, or NTIS Deposit Account. If payment is by check, please make it payable to NTIS; if by credit card, please give your card number, expiration date, and sign with your authorized signature. If you would like to open an NTIS Deposit Account, please call (703) 487-4770 or write to NTIS at the above address.

PRICING

Costs of data files available from NTIS are given in price codes in the right-hand portion of the last line of each entry in the Number Index section. Price codes are also contained in the availability statement in each citation. Price codes, rather than price are indicated so that you will always be able to determine the current price. The following domestic price schedules list prices in effect for the North American Continent at the time this Directory was published. Contact NTIS for prices in effect outside the North American Continent. Prices for magnetic tapes include all accompanying documentation.

PRICE SCHEDULES January 1, 1984

PAPER COPY STANDARD PRICE SCHEDULE			MAGNETIC TAPE PRICE SCHEDULE	
Price Code	Paper Range	North American Continent	Price Code*	North American Continent
A01	Microfiche	\$ 4.50	T01	\$ 125.00
A02	001-025	7.00	T02	140.00
A03	026-050	8.50	T03	240.00
A04	051-075	10.00	T04	320.00
A05	076-100	11.50	T05	400.00
A06	101-125	13.00	T06	465.00
A07	126-150	14.50	T07	530.00
A08	151-175	16.00	T08	595.00

A25	576-600	41.50		
A99—Contact NTIS for Price Quote.				
For documents over 600 pages, add \$3.00 for each additional 25-page increment, or portion thereof.			* For tapes ordered in 800 or 1,600 bpi	

HOW TO USE THIS DIRECTORY

A machine-readable data file* can be located in two ways: It can be found in the Abstract Section under the appropriate subject category; or it can be found by using the indexes in the back of the Directory. The following indexes are available:

- Agency Index** Lists the originating agencies (or their contractors) for these data files. Entries are sequenced alphabetically by agency, including applicable subunit, then by NTIS order number or originating agency number.
- Number Index** Lists all data files in alphanumeric order by NTIS order number or originating agency number.
- Subject Index** Lists all data files in alphanumeric order by NTIS order number arranged in alphanumeric order under each subject term.

A typical sample entry is graphically detailed on the facing page; the various parts of an abstract entry and its association major index entries are labeled. The key words with preceeding asterisks are the subject terms under which a title is found in the subject index.

* All references to machine-readable data files include related technical reports, where applicable.

SAMPLE ITEM

Title of Data File: Countries, Dependencies, and Areas of Special Sovereignities

Originating Agency: National Bureau of Standards
Gaithersburg, Maryland

ABSTRACT ENTRY

Countries, Dependencies, and Areas of Special Sovereignty. **PB-267 936** NTIS Order Number—USE THIS NUMBER TO ORDER PRODUCTS

Data file. This publication provides a list of geographical-political entities of the world and associated standard codes. These entities include independent states, dependent areas, areas of quasi-independence, noncontiguous territories, possessions without populations, areas with special sovereignty associations, areas without sovereignty, political regimes not recognized by the United States, and outlying areas of the United States.

For related technical report, see FIPS-PUB-10-2.

Keywords: *Data file, *Geography, *Data processing. Standards, Magnetic tapes, *Countries, Federal information processing standards. Data elements. **Keywords—USED FOR INDEXING AND SEARCHING**

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation, FIPS-PUB-10-2.

DIRECTORY OF COMPUTERIZED DATA FILES, 1984

ECONOMICS

1. AGRICULTURAL ECONOMICS

PB-194 346/3

Survey of Purchases of Fish Products by Households, Volume 2, Fresh and Frozen Shellfish (1969-70).

Data file. The file contains complete records of purchases of fresh and frozen shellfish for home use by participating households surveyed during the period Feb 69-Jan 70. Each two week survey was done from a continuing panel of 1500; these remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-02.

Keywords: *Data file, *Fishes, *Market surveys, *Shellfish.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, Ebcdic odd parity.

PB-194 347/1

Survey of Purchases of Fish Products by Households, Volume 4, Canned Salmon (1969-70).

Data file. The file contains complete records of purchases of canned salmon for home use by participating households surveyed during the period Feb 69-Jan 70. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of

residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-04.

Keywords: *Data file, *Fishes, *Market surveys, *Salmon.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

PB-194 348/9

Survey of Purchases of Fish Products by Households, Volume 3, Fresh and Frozen Finfish (1969-70).

Data file. The file contains complete records of purchases of fresh and frozen finfish for home use by participating households surveyed during the period Feb 69-Jan 70. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-03.

Keywords: *Data file, *Fishes, *Market surveys.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, Ebcdic, odd or even parity; or 9 track, 800bpi, odd parity.

ECONOMICS

Field 1—AGRICULTURAL ECONOMICS

PB-194 349/7

Survey of Fish Products by Households, Volume 5, Canned Tuna (1969-70).

Data file. The file contains complete records of purchases of canned tuna for home use by participating households surveyed during the period Feb 69 thru Jan 70. Each two-week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-05.

Keywords: *Data file, *Fishes, *Market surveys, *Tunas.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: IBM compatible, 7 track, 800bpi, Bcd, odd or even parity; or 9 track, 800bpi, Ebcdic, odd parity.

PB-194 350/5

Survey of Fish Products by Households, Volume 6, Canned Sardines (1969-70).

Data file. The file contains complete records of purchases of canned sardines for home use by participating households surveyed during the period Feb 69-Jan 70. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-06.

Keywords: *Data file, *Fishes, *Market surveys, *Sardines.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

PB-194 351/3

Survey of Purchases of Fish Products by Households. Fish Meals Away from Home (1969-70).

Data file. The tape contains complete records of fish and shellfish meals eaten away from home by participating households surveyed over the period February 1969 through January 1970. Each 2 week survey was done from a continuing panel of 1,500; those remaining in the survey 6 months or more (1,043 households) are included in this tape. Purchases are identified as to product, number of meals, and whether it was a main dish. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase the various fish products. (Author)

Keywords: *Data file, *Fishes, *Market surveys.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 or 9 track, 800bpi and odd or even parity. (Note: 9 track is available only in odd parity).

PB-194 352/1

Survey of Fish Products by Households, Volume 7, Miscellaneous Canned Fish or Shellfish (1969-70).

Data file. The file contains complete records of purchases of miscellaneous canned fish or shellfish for home use by participating households surveyed during the period Feb 69-Jan 1970. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-07.

Keywords: *Data file, *Fishes, *Market surveys, *Shellfish.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

ECONOMICS

COMMERCE - UNITED STATES AND FOREIGN—Field 2

PB-232 863/1

Feed Grain, Wheat and Cotton Reports Master File: 1973

Data file. The file records by county the following data on voluntary participation in the 1973 feed grain, wheat and cotton set-aside programs: the number of farms eligible and the number of farms and producers participating, applicable acres of cropland, conserving base, feed grain bases, wheat and cotton allotments, set-aside acreage, payments and reductions, and planted acres for each crop. Data are as recorded through September 1973. Additions corrections and/or adjustments subsequent to that date are not included. Source documents include producer participation and compliance data on sheets prepared and furnished by ASCS county offices, and the 1973 Set-Aside Programs Annual Report.

Keywords: *Data file, *Agricultural products, *Grains(Food), *Wheat, *Cotton plants, Federal programs, Projects, Feeding stuffs, Wheat, Cotton plants, Statistical data, Farms, Land, Farm crops, Allocations, Payment, Classifications, Magnetic tapes, Set aside programs, Voluntary participation, Eligibility.

Availability: NTIS, CP T01, 1 reel mag tape. Available as STC Model 3450-5, Standard OS-360 headers/trailers, 9 track, 1600bpi, Ebcidic.

PB-234 639/3

Livestock Production, Disposition and Income (1965-69).

Data file. The file contains annual data covering production of livestock by state, income, and value of production from livestock cash receipts and disposition of livestock.

For related technical reports, see PB-234 643/5, PB-234 642/7, PB-234 641/9, PB-234 640/1.

Keywords: *Data file, *Livestock, Tables(Data), Cattle, Swine, Sheep, Goats, Income, Farms, Inventories.

Geocoding: States.

Availability: NTIS, CP T01, 1 reel mag tape*. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, bcd; or 9 track, 800bpi, odd parity, Ebcidic. Price includes documentation.

PB82-157314

Foreign Production, Supply and Distribution of Agricultural Commodities.

Data file. This file contains information on foreign production, supply and distribution of agricultural products. This includes area harvested, production, beginning stocks, total imports, total exports, total domestic use and ending stocks. Commodity coverage includes grains, rice, dairy, poultry, livestock, oilseeds, cotton, coffee, sugar, tobacco and cigarettes. The most recent year reported is 1982. Complete supply and distribution data are not always available. When only production figures are reported, this will be indicated by a Production Only flag in the record.

Keywords: *Data file, *Agricultural products, Foreign countries, *Marketing, *International trade, Supply(Economics), Production, Food supply, Commodities, Dairy products, Grains(Food), Livestock, Poultry, Tobacco, Coffee, Sugar crops, Cotton plants, Imports, Exports, Magnetic tapes.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

2. COMMERCE - UNITED STATES AND FOREIGN

COM-72-10818/6

Interregional Commodity Trade Flow Estimates - Appendix D: 1963 Commodity Flows for Census Regions - Tons and Dollars.

Data file. The file contains estimates of trade flow in tons and dollars for 61 commodity groups between the nine census geographic divisions in the U.S. for 1963.

For related technical report, see COM-72-10817/8.

Keywords: *Data file, Interstate transportation, *Cargo transportation, Value, Estimates, *Commerce, Commodity management, Tonnage, Commodity data, Regions.

Geocoding: Census regions.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidic, odd parity.

COM-72-10819/4

Interregional Commodity Trade Flow Estimates - Appendix E: 1963 Commodity Flows for States and State Combinations - Tons and Dollars.

Data file. The file contains estimates of trade flows in tons and dollars for 61 commodity groups between 44 states and combinations of states in the U.S. for 1963.

For related technical report, see COM-72-10817/8.

Keywords: *Data file, Interstate transportation, *Cargo transportation, Estimates, Value, *Commerce, Commodity data, Tonnage, Geocoding, States(United States).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidic, odd parity.

COM-72-10820/2

Interregional Commodity Trade Flow Estimates - Appendix F: 1963 Commodity Flows Production and Rest-of-State Areas - Tons and Dollars.

Data file. The report contains estimates of trade flows in tons and dollars for 61 commodity groups between 76 production areas and rest-of-state areas in the U.S. for 1963.

For related technical report, see COM-72-10817/8.

Keywords: *Data file, Commodity management, *Cargo transportation, Marketing, Intrastate transportation, Economic analysis,

ECONOMICS

Field 2—COMMERCE - UNITED STATES AND FOREIGN

Value, Estimates, *Commerce, Commodity data, Tonnage, Production areas, Geocoding, States(United States).

Geocoding: United States.

Availability: NTIS, CP T03, 12 reels mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcdic, odd parity.

COM-73-10533/0

Data Files for the Report: Implementation and Evaluation of the Multiregional Input-Output Model of the United States.

Data file. The first reel of a two-reel file contains the following data: 1963 state input-output tables, state transfer matrices, and modified trade flows. The second reel contains the following data: 1963 final demands; payrolls, employment, and output for 1963, 1958, and 1947; projected final demands for 1970 and 1980.

Technical data: The files were designed for use with the Fortran 5 Univac 1108 computer programs, which are available separately (see COM-73-10534) and are also included with the data files as COM-73-10531-SET.

For related technical report, see PB-242 558, AE.

Keywords: *Data file, Models-simulation, Economic models, *Salaries, *Employment, Computer programming, *Input output analysis, *Economic analysis, *Commerce.

Availability: NTIS, CP T03, 2 reels mag tape. Specify tape recording mode desired: Univac 1108, 7 track, 556 or 800bpi, Bcd, odd or even parity; or 9 track, 800bpi, Ebcdic, odd parity.

PB-178 679/7

Magnetic Data Tape for Input-Output Transactions by Transportation Mode - 1947 and 1958 Tables.

Data file. A file is available on the revision of the 1947 and 1958 national tables to derive separate input-output detail for eight modes of transportation: railroads, overseas water transportation, domestic water transportation, trucking and warehousing, airlines and aviation services, pipelines, intercity bus and local passenger transportation, and transportation services not elsewhere classified. The 1947 revisions are to be incorporated in the OBE version of the table which is being aggregated and redefined as necessary to be consistent with the classification and definitions of the 1958 table. The work was intended to provide a basis for analyzing the time trends in transportation requirements by industry sectors in the input-output model by separate modes of transportation over the period 1947, 1958 and 1963 (data for the latter year to be supplied from the forthcoming input-output table for 1963). The study was performed by Jack Faucett Associates, Inc., under contract with The Office of the Secretary of Transportation of the U.S. Department of Transportation, assisted by several members of the staff of the Harvard Economic Research Project.

Publications: Input-Output Transactions by Transportation Mode, 1947 and 1958 (April, 1968). NTIS Publication No. PB-178 677.

For related technical report, see PB-178 677/1.

Keywords: *Data file, Air transportation, Shipping(Marine), Highway transportation, Rail transportation, Pipeline transportation, Bus lines, Water transportation, Passenger transportation, *Time series analysis, *Commerce, *Cargo transportation, *Industries, *Input output analysis, Time trends, Warehousing, Trucking.

Availability: NTIS, CP T01, 2 reels mag tape. For 1947 order PB-178 679; for 1958 order PB-178 678. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcdic, odd parity.

PB-201 045/2

Transoceanic Cargo Study: Data Tape - U.S. Foreign Trade, 1963-68 Air and Water Combined.

Data file. The file is the Master Foreign Trade file used as input to the Forecast Model Report No. DOT-OS-A9-024-IV. Data time span is 1963-68 (Air and water movements combined). The part one file is prepared using an IBM 360/65, block size of 720 characters, six records per block.

Keywords: *Data file, *Cargo transportation, Economic forecasting, *International trade, Economic models, Data processing, Water transportation, Air transportation, *Exports, *Master files.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcdic, odd parity.

PB-201 046/0

Transoceanic Cargo Study: Data Tape - U.S. Foreign Trade - 1963-68; Air and Water Combined, Exports: Research Study, Data Tape.

Data file. The file is the Master Foreign Trade file used as input to the Forecast Model (Report No. DOT-OS-A9-024-IV). Data time span is 1963-68 (air and water movements combined). The part two file is prepared using an IBM 360/65. Block size is 720 characters, six records per block.

Keywords: *Data file, *Cargo transportation, Economic forecasting, *International trade, Economic models, Data processing, Water transportation, Air transportation, *Exports, Master files.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcdic, odd parity.

PB-229 488/2

Crude, Unfinished, Finished and Residual Fuel Oil Data File

Data file. The file contains data relative to imports of petroleum and petroleum products into U.S. Customs territory by commodity and geographical area PAD 1, I - IV, V, and Puerto Rico, and country of origin.

Keywords: *Data file, *Oils, *International trade, Data, Crude oil, Residual oils, Fuel oil, Magnetic tapes, *Imports, *Petroleum products.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 556 or 800 BPI, odd and even parity; or 9 track, 800 BPI, odd parity.

ECONOMICS

COMMERCE - UNITED STATES AND FOREIGN—Field 2

PB-233 583/4

Multiregional Input-Output Basic Data - DOTR1

Data file. Four data tapes are available for the multiregional input-output (MRIO) data. This tape (DOTR1) contains the following data: 1947, 1958, 1963 Final demands; 1963 Commodity Credit Corporation adjustment to federal government final demand; 1947 (58\$) and 1958 (63\$) final demand deflators; 1947, 1958, and 1963 outputs, employment, and payrolls; 1947/58 output deflators; 1970 and 1980 final demand projections; state secondary matrices--1963; sum of state secondary matrices--1963. A detailed description of the assembly of the data is available in the series edited by Karen R. Polenske, entitled, *Multiregional Input-Output Analysis*, which is being published by Lexington Books, D.C. Heath and Company.

Keywords: *Data file, Regional economic activity, Multiregional models, *Input output analysis, Demand(Economics), Federal policies, State planning, Payrolls, *Employment, Economic projections, Data files, Magnetic tapes, United States, *Commerce, *Economic analysis, Economic deflators, Geocoding, Regions, *Salaries.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity, BCD; or 9 track, 800 BPI, odd parity, EBCDIC.

PB-233 584/2

Multiregional Input-Output Basic Data - DOTR2

Data file. Four data tapes are available for the multiregional input-output (MRIO) data. This tape (DOTR2) contains the following data: State input-output tables--1963, and Sum of state input-output tables--1963. A detailed description of the assembly of the data is available in the series edited by Karen R. Polenske, entitled *Multiregional Input-Output Analysis*, which is being published by Lexington Books, D.C. Heath and Company.

Keywords: *Data file, Regional economic activity, State programs, Multiregional models, *Input output analysis, Statistical data, Economic analysis, United States, Data files, Magnetic tapes, Technology utilization, *Economic analysis.

Geocoding: States(United States).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity, BCD; or 9 track, 800 BPI, odd parity, EBCDIC.

PB-233 585/9

Multiregional Input-Output Basic Data - DOTR3

Data file. Four data tapes are available for the multiregional input-output (MRIO) data. This tape (DOTR3) contains the following data: Trade flows from JFA (PREUDUD)--1963, Sum of trade flows from JFA (PREUDUD)--1963, Adjusted trade flows (POSTDUD)--1963, and Sum of adjusted trade flows (POSTDUD)--1963. A detailed description of the assembly of the data is available in the series edited by Karen R. Polenske, entitled *Multiregional Input-Output Analysis*, which is being published by Lexington Books, D.C. Heath and Company.

Keywords: *Data file, Regional economic activity, Multiregional models, *Input output analysis, Data files, Trade flows, Statistical

data, Transportation development, United States, Magnetic tapes, *Commerce, *Economic analysis.

Geocoding: Regions.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity, BCD; or 9 track, 800 BPI, odd parity, EBCDIC.

PB-233 586/7

Multiregional Input-Output Basic Data - DOTR4

Data file. Four data tapes are available for the multiregional input-output data. This tape (DOTR4) contains the following data: 1970 and 1980 Total final demands without residual and secondary; 1963 regional transfers-out; 1963 service industry residual; 1970 and 1980 projected outputs; 1970 projected trade flows; sum of 1970 projected trade flows; 1980 projected trade flows; sum of 1980 projected trade flows. A detailed description of the assembly of the data is available in the series edited by Karen R. Polenske, entitled *Multiregional Input-Output Analysis*, which is being published by Lexington Books, D.C. Heath and Company.

Keywords: *Data file, Regional economic activity, Multiregional models, *Input output analysis, Data files, Magnetic tapes, United States, Demand(Economics), Service industries, Trade flows, Economic projections, Statistical data, Transferring, *Commerce, *Economic analysis.

Geocoding: Regions.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity, BCD; or 9 track, 800 BPI, odd parity, EBCDIC.

PB-251 369/5

Multi-Regional Input-Output Basic Data Tape, DOTR5.

Data file. The tape (DOTR5) consists of 3 files. The first file contains the 1963 state tonnage trade flows, the second file contains the sum of the 1963 state tonnage trade flows; and the third file contains the 1963 commodity prices. Specific information on the data assembly of the interregional shipments is available in a volume by John M. Rodgers, *State Estimates of Interregional Commodity Trade, 1963* (Lexington, Mass.: Lexington Books, D.C. Heath and Co., 1973).

Keywords: *Data file, Economic models, *Commerce, Industries, *Economic analysis, Regional planning, Transportation, Magnetic tapes, FORTRAN, Input-output models, Multiregional models, Trade flows, Regional economic activity, *Input output analysis, (*Geocoding, Regions).

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in BCD character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-251 370/3

Multi-Regional Input-Output Basic Data Tape, DOTR6.

Data file. The tape consists of 4 files. The first file contains the projected 1970 state tonnage trade

ECONOMICS

Field 2—COMMERCE - UNITED STATES AND FOREIGN

flows; the second file contains the sum of the projected 1970 state tonnage trade flows, the third file contains the projected 1980 state tonnage trade flows; and the fourth file contains the sum of the projected 1980 state tonnage trade flows. Specific information on the assembly of 1963 trade data upon which these projections are based is contained in a book by John M. Rodgers, 'State Estimates of Inter-regional Commodity Trade, 1963', (Lexington, Mass.: Lexington Books, D.C. Heath and Co., 1973). Information on the method of making the projections is contained in a report by Karen R. Polenske, Caroline W. Anderson, and Mary M. Shirley, 'A Guide for Users of the U.S. Multiregional Input-Output Model' (DOT Report No. 2, Prepared for the Office of Systems Analysis and Information, U.S. Department of Transportation, September 1973, revised--NTIS No. PB-242 558.)

For related technical report, see PB-242 558.

Keywords: *Data file, Economic models, Industries, *Economic analysis, Regional planning, Transportation, Magnetic tapes, *Commerce, *Cargo transportation, Input-output models, Multiregional models, Trade flows, Regional economic activity, *Input output analysis, Geocoding, Regions.

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in BCD character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-184830

Chilton Light Truck Data Base.

Data file. This tape contains data on the physical operating performance and market characteristics of light trucks for the model years 1955-1977. Information was collected from published and unpublished sources with extrapolation and correlations being made when raw data was unavailable. Vehicles are reported by model year and grouped by manufacturer, using production volume, model, body type, engine displacement, transmission and GVWR class attributes as criteria to select representative vehicle configurations. Models which are essentially duplicated by more than one division of a manufacturer--i.e., Chevrolet C-10 and GMC C-1500--are represented by attributes of only one of the duplicate models. Production volume for both models is then combined. Characteristics are documented for vehicles representative of total U.S. sales of domestic and imported light trucks for the model years indicated.

For related technical report, see PB81-144388.

Keywords: *Data file, *Trucks, Market research, Performance evaluation, Sales, Production rate, Magnetic tapes, *Motor trucks, Light duty vehicles, Motor vehicles(1955-1977 models).

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB82-948500

Consumer Price Index: 1913 to Date (Updated Monthly).

Data files. The Consumer Price Index (CPI) is a statistical measure of change, over time, of the prices of goods and services in major expenditure groups--such as food, housing, apparel, transportation, and health and recreation--typically purchased by urban consumers. Essentially, it measures the purchasing power of consumers' dollars by comparing what a sample market basket of goods and services costs with what the same sample market basket cost at an earlier reference date. This reference date is designated as the base period. The revised CPI introduced by the BLS in 1978 includes indexes for two populations: urban wage earners and clerical workers; and all urban consumers. The urban wage earners and clerical workers index represents the buying habits of about 40 percent of the noninstitutional, civilian population. The all urban consumers index covers about 80 percent of the population by including the following groups: the self-employed; professional, managerial, and technical workers; short-term workers; the unemployed; retirees; and others not in the labor force. U.S. average indexes for both populations are available monthly for 357 consumer items and groups of items. Indexes for both populations are available for 28 urban places for 64 items. Regional indexes for both populations are available for four regions with about 100 items. Five city-size indexes for both populations are available with 89 items and groups per class.

Keywords: *Data file, *Prices, *Cost indexes, Indexes(Ratios), Expenses, Consumers, Magnetic tapes, Consumer price indexes, Price index, Consumer products.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$960.00/year, \$110.00/individual issue; all others write for quote.

PB82-948600

Producer Price Index: 1947 to Date (Updated Monthly).

Data files. The Producer Price Index (PPI) is a measure of price changes for goods sold in primary markets in the United States. The universe for the PPI covers manufactured and processed goods and the output of industries classified as manufacturing, agriculture, forestry, fishing, mining, gas and electricity, public utilities and goods competitive with those made in the producing sector, such as waste and scrap materials. To the extent possible, the prices used in constructing the PPI are those that apply to the first significant commercial transaction in the

ECONOMICS

COMMERCE - UNITED STATES AND FOREIGN—Field 2

United States. The classification system follows commodity lines. Products are grouped by similarity of end-use or material composition. The PPI classification does not match any other standard classification. BLS collects over 10,000 price quotations each month covering 2,700 commodities and commodity groups, most beginning in 1974 or earlier. These data are obtained from reports submitted by individual producers supplemented with information appearing in trade publications or obtained through programs of other government agencies.

Keywords: *Data file, *Prices, *Cost indexes, *Manufacturers, Indexes(Ratios), Expenses, Magnetic tapes, Wholesale price index, Price index.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$960.00/year, \$110.00/individual issue; all others write for quote.

PB82-948700

Imports - Industrial Commodity Classes (1972 SIC): 1972 to Date (Updated Quarterly).

Data files. BLS receives reports (IM-145) from the Bureau of the Census containing the value and quantity of imported commodities classified by the Tariff Schedules of the United States Annotated (TSUSA). These reports are summarized by customs value to quarterly and annual commodity measures on a 4-digit 1972 Standard Industrial Classification (SIC) basis. Value-based ratios of imports to new supply (U.S. product shipments plus imports) are calculated annually for 4-digit SIC-based commodity import groups. Beginning with statistics for 1978, the timing of the statistical month for recording imports was changed from the date of entry (DOE)--filing date of documents--to the date of importation (DOI)--date the shipment actually entered the U.S. Therefore, caution should be exercised in relating current data with data for 1977 and prior years. The import industrial commodity classes survey, based on the 1972 SIC, has 414 quarterly and annual import value series on a 4-digit SIC basis, beginning in 1975. Annual ratios of imports to new supply for 347 4-digit (1972) SIC manufacturing commodity import groups are available beginning in 1972.

Keywords: *Data file, *Imports, *International trade, United States, Commodities, Magnetic tapes, Foreign trade.

Availability: NTIS, Subscription, 4 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$420.00/year, \$125.00/individual issue; all others write for quote.

PB82-948800

Imports - By Tariff Commodity Class: 1968 to Date (Updated Quarterly).

Data files. BLS receives reports (IM-145) from the Bureau of the Census containing the value and quantity of imported commodities classified by the 7-digit Tariff Schedules of the United States Annotated

(TSUSA). These reports of customs values and quantities of imports are summarized to quarterly and annual measures on a TSUSA basis. Beginning with statistics for 1978, the timing of the statistical month for recording imports was changed from the date of entry (DOE)--the date the documents were filed--to the date of importation (DOI)--the date the shipment actually entered the U.S. Therefore, caution should be used in comparing current data with data for 1977 and prior years.

Keywords: *Data file, *Imports, *International trade, United States, Magnetic tapes, Commodities, Foreign trade.

For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$420.00/year, \$125.00/individual issue; all others write for quote.

PB82-948900

Export and Import Price Indexes: 1970 to Date (Updated Quarterly).

Data files. The export price indexes measure price changes for products produced in the U.S. and sold to residents of other countries. The import price indexes measure changes in the prices paid by U.S. residents for goods produced in other countries and imported into the U.S. The products covered are concentrated in machinery and equipment, chemicals, crude materials, and some intermediate products. Plans are to extend coverage to all major categories of U.S. imports and exports in the next few years. Price data are obtained directly from exporters and importers residing in the U.S. and represent transaction prices in the third month of each calendar quarter for the products which are reported. Export and import product samples yield quarterly price indexes publishable at the 4- and 5-digit level and higher level aggregates of the Standard International Trade Classification System, a product classification scheme developed by the United Nations. Export and/or import price indexes, with a combined total of about 100 commodities, are available on a quarterly basis beginning in 1974. Index series for June of each year covering the period before 1974 are available for most series. Also available are over-the-quarter percent change series.

Keywords: *Data file, *Prices, *Imports, *Exports, *International trade, Commodities, Magnetic tapes, *Cost indexes, Foreign trade.

Availability: NTIS, Subscription, 4 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. PB-224 075/2

Annual Statistical Report of REA Telephone Borrowers (1972).

Data file. The annual report presents financial and statistical information on the operations of REA telephone borrowers individually and as a group. The report is based on financial and statistical statements submitted by 816 borrowers. However, since some borrowers did not report all items, the number of borrowers included is not the same for all tables. The data in the report are on a calendar year basis to coincide with the accounting period of practically all borrowers. The information submitted by the borrowers is subject to possible revision as a result of future audits and adjustments.

Source documents: Financial and statistical report (REA Form 479, 479A) These reports are submitted by REA borrowers to REA on a calendar year basis. Loan and accounting information obtained from REA Loan Accounting System files. The above mentioned source documents generally are not matters of public record.

Publications: Annual Statistical Report, Rural Telephone Borrowers, (REA Bulletin 300-4).

Keywords: *Data file, *Rural areas, *Telephone systems, State summaries, *Financing.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

PB-224 076/0

Annual Statistical Report of REA-Electric Distribution Borrowers (1972).

Data file. An annual report contains financial and statistical information about the operations of REA electric borrowers individually and as a group. The report also presents separate summary data on cooperative borrowers. Data in the report are on a calendar year basis, since most borrowers close their books on December 31. About 94% of the

borrowers are private business corporations. Their detailed financial statements and operating reports generally are not matters of public record. If more details than given in the report are desired, requests should be submitted directly to individual borrowers. Additional data on borrowers which are not cooperatives are included in Federal Power Commission annual reports. The revenue and expense statistics for each borrower show the year's financial operations. The trend of a borrower's operations can be observed by comparing data in this report with that in previous annual reports. Statistics relating to principal and interest payments to REA are cumulative from the time the borrower obtained an REA loan. The calculations of interest and principal due the government reflect the following: The payment schedule originally established for each borrower; changes in the original repayment and interest schedules through (a) reduction in interest rate and extension of amortization periods, pursuant to the 1944 amendments to the Rural Electrification Act; and (b) any extensions in the time of payment of interest or principal that may have been approved pursuant to Section 12 of the Act; and notes paid in full, ahead of schedule, are shown as due and paid in the full amount. All data on operations of borrowers' systems are based on reports submitted by borrowers and are subject to possible revision as the result of future audits and adjustments.

Source documents: Financial and Statistical Report (REA Form 7 and 7a). These operating reports are submitted by REA borrowers to REA on a calendar year basis. Loan and accounting information obtained from REA Loan Accounting System files. The above mentioned source documents generally are not matters of public record.

Publications: Annual Statistical Report, Rural Electric Borrowers, (REA Bulletin 1-1).

Keywords: *Data file, *Electric utilities, *Public utilities, *Financing, Corporations.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

WIN II Program Evaluation - Data Tape for Public Use Data Base (1954-75).

Data file. The data base contains WIN program experience, welfare histories and employment information for a sample of WIN participants and registrants collected during a comprehensive, longitudinal evaluation of the WIN program. The data has been merged from three sources -- personal interviews and WIN/welfare records from local offices. Up to three completed questionnaires are available for each of the 6,555 respondents corresponding to one of the three waves of personal interviews. Information on the client's participation in the WIN program was recorded during the original sample selection in

1974 and the second-run site visits in 1975. The client's welfare history was coded from records at local welfare offices.

For related technical report, see PB-284 230.

PB-289 909/4

Pennsylvania Continuous Wage and Benefit History.

Data file. The Pennsylvania Continuous Wage and Benefit History (PA-CWBH) data is drawn from the administrative records maintained by the Pennsylvania Bureau of Employment Security. This data base contains detailed longitudinal histories of both the employment and unemployment experience of 0.6 percent of the workers who claimed unemployment insurance benefits in Pennsylvania from 1966 to 1968. Work histories describe employment and earnings for 1967-1970. Claim histories describe benefits paid for claims established in 1966-1968. Over 4,000 workers are included in the file. The data are contained on one reel of magnetic tape. The data tape is 9 track, EBCDIC, 1600 bpi, with standard labels suitable for use with IBM and most other computers. A codebook which describes the data set in detail accompanies the tape.

For related technical report, see PB-289 910.

Arizona Employment and Unemployment Data of the Continuous Wage and Benefit History.

Data file. The Arizona Employment and Unemployment Data Set (AZEUD) is made up of information drawn from the administrative records of government agencies in two separate samples: A 20% sample of workers who applied for unemployment insurance (UI) in Arizona from 1963 to 1971. A 1% sample of the Arizona labor force from 1957 to 1972. The 20% sample is drawn from the Continuous Wage and Benefit History (CWBH) data set maintained by the Arizona Bureau of Employment Security. This data base contains detailed longitudinal histories of both the employment and unemployment experience of
