Preface

Our aim in compiling this volume was to provide a source of descriptions and critical evaluations of currently useful intact cell systems and general techniques applicable to the study of hormone action on biochemical and biophysical parameters of intact cells. Many of these systems and techniques will be useful for studying the actions of a variety of hormones, neurotransmitters, and pharmacological agents. Others will be suitable primarily for investigators whose interests are confined to actions of a single hormone or class of hormones.

The hormone-responsive systems described represent most mammalian organ systems and include tissue slices, isolated cells, isolated perfused and nonperfused organs and organ fragments, cell and organ cultures, and *in situ* organ preparations. The general techniques described, for example those involving measurement of substrate and calcium fluxes, generally involve processes that are sensitive to modulation by hormones or neurotransmitters in a variety of cell types.

Omissions have inevitably occurred—some because potential authors were overcommitted, some because of editorial oversight, some because of the timing of new developments relative to the publication deadline. Some apparent omissions, particularly those involving the isolation and culture of cells, can be found in Volume XXXII.

We thank Drs. S. P. Colowick and N. O. Kaplan who originated the idea for and encouraged the compilation of this volume. We thank the staff of Academic Press for their help and advice. We especially thank the contributing authors for their patience and full cooperation and for carrying out the research that made this volume possible.

Joel G. Hardman
Bert W. O'Malley

CONTRIBUTORS TO VOLUME XXXIX

PREFACE

VOLUMES IN SERIES

Section I. Kidney

1. The Perfused Rat Kidney	R. H. BOWMAN	3
2. Isolated Mammalian Renal Tubules	HOWARD RASMUSSEN	11
3. The Preparation of Renal Cell Suspensions for the Study of Renin Production and Other Renal Functions	ANDREW M. MICHELAKIS	20

Section II. Liver

4. The Perfused Rat Liver	JOHN H. EXTON	25
5. The Fetal Rat Liver Explant as a Model System in the Study of Hormone Action	EDWARD BRESNICK AND KURT BURKI	36

Section III. Heart

6. Techniques for Perfusing Isolated Rat Hearts	J. R. NEELY AND M. J. ROVETTO	43
7. Frog Ventricular Muscle Suitable for Use in Measuring Rapid Metabolic Changes during the Contractile Cycle	GARY BROOKER	60

Section IV. Skeletal and Smooth Muscle

8. The Perfused <i>in Situ</i> Rabbit Skeletal Muscle	JAMES T. STULL AND STEVEN E. MAYER	67
9. A Technique for Perfusion of an Isolated Preparation of Rat Hemicorpus	L. S. JEFFERSON	73
10. <i>In Vitro</i> Preparations of the Diaphragm and Other Skeletal Muscles	ALFRED L. GOLDBERG, SUSAN B. MARTEL, AND MARTIN J. KUSHMERICK	82
11. The Use of the Levator Ani Muscle <i>in Vitro</i> in Evaluating Hormone Action	A. ARVILL, S. ADOLFSSON, AND K. AHRÉN	94
12. Systems for Evaluation of Uterine Responses <i>in Vitro</i>	G. P. TALWAR AND SHAIL K. SHARMA	101

Section V. Endocrine and Reproductive Tissue

13. Isolation, Cloning, and Hybridization of Endocrine Cell Lines	PETER O. KOHLER	109
14. Initiation of Clone Cultures of Rat Anterior Pituitary Cells Which Secrete a Single Gonadotropic Hormone	ANNA STEINBERGER	128
15. Basic Electron Microscopy Techniques for Endocrine Tissue	ROBERTO VITALE	133
16. An Ultrastructural Approach to the Study of Endocrine Cells <i>in Vitro</i>	A. JOSEPHINE MILNER	157
17. Methods for Studying Pituitary-Hypothalamic Axis <i>in Situ</i>	JOHN C. PORTER	166
18. Methods for Assessing Hormone-Mediated Differentiation of Ovarian Cells in Culture and in Short-Term Incubations	CORNELIA P. CHANNING AND FLORENCE LEDWITZ-RIGBY	183
19. A Technique for Perfusion of Rabbit Ovaries <i>in Vitro</i>	KURT AHRÉN, PER OLOF JANSON, AND GUNNAR SELSTAM	230
20. The Technique of Slice Incubation to Study Corpus Luteum Function	JOHN M. MARSH, ADALGISA ROJO, AND JORGE E. CIDRE	238
21. Perfusion of the Placenta <i>in Vitro</i>	L. CEDARD AND E. ALSAT	244
22. Gonadotropic Stimulation of Interstitial Cell Functions of the Rat Testis <i>in Vitro</i>	M. L. DUFAY AND K. J. CATT	252
23. The Infused Testis	KRISTEN B. EIK-NES	272
24. <i>In Vitro</i> Techniques for the Study of Spermatogenesis	ANNA STEINBERGER	283
25. Preparation of Mouse Embryos for the Evaluation of Hormone Effects	DIANNE MOORE SMITH AND JOHN D. BIGGERS	297
26. Superfusion Techniques for Assessment of Steroid Hormone Production in Endocrine Tissue and Isolated Cells (Adrenal)	SYLVIA A. S. TAIT AND DENNIS SCHULSTER	302
27. The Perfused Adrenal Gland	SIRET DESIRÉE JAANUS AND RONALD P. RUBIN	328
28. The Rat Adrenal <i>in Situ</i>	WENDELL E. NICHOLSON AND ANDRE PEYTEMANN	336

29. A New Approach to the Structure-Activity Relationship for ACTH Analogs Using Isolated Adrenal Cortex Cells	STEVEN SEELIG, BARRY D. LINDLEY, AND GEORGE SAYERS	347
30. Perfusion of the Thyroid Gland	JUDAH FOLKMAN AND MICHAEL A. GIMBRONE, JR.	359
31. The <i>in Vitro</i> Perfused Pancreas	GEROLD M. GRODSKY AND RUDOLPH E. FANSKA	364
32. Superfusion Techniques in the Study of Insulin Release	ROBERT A. SHARP AND IAN M. BURR	373
33. Methods for Assessing the Biological Activity of the Mammalian Pineal Organ	DANIEL P. CARDINALI AND RICHARD J. WURTMAN	376
34. Pineal Gland Organ Culture Techniques	HARVEY M. SHEIN	398
35. Use of O_2 Microtechniques for Assessment of Hormone Effects on Isolated Endocrine Cells	LARS HAMBERGER, HANS HERLITZ, AND RAGNAR HULTBORN	403

Section VI. Neural Tissue

36. Electrophysiological Techniques for the Study of Hormone Action in the Central Nervous System	B. J. HOFFER AND G. R. SIGGINS	429
---	-----------------------------------	-----

Section VII. Exocrine Tissue

37. Techniques for Studying Development of Normal Mammary Epithelial Cells in Organ Culture	YALE J. TOPPER, TAKAMI OKA, AND BARBARA K. VONDERHAAR	443
38. Androgen Metabolism and Receptor Activity in Preputial Glands and Kidneys of Normal and Androgen-Insensitive tfm Rats and tfm/y Mice	C. WAYNE BARDIN, LESLIE P. BULLOCK, AND IRENE MOWSZOWICZ	454
39. Enzyme Secretion and K^+ Release Mediated by Beta and Alpha Adrenergic Receptors in Rat Parotid Slices	MICHAEL SCHRAMM AND ZVI SELINGER	461
40. An Insect Salivary Gland: A Model for Evaluating Hormone Action	WILLIAM T. PRINCE, MICHAEL J. BERRIDGE, AND HOWARD RASMUSSEN	466

Section VIII. Vascular Tissue

41. Preparation of Isolated Epididymal Capillary Endothelial Cells and Their Use in the Study of Cyclic AMP Metabolism	J. J. KEIRNS, R. C. WAGNER, AND M. W. BITENSKY	479
--	--	-----

Section IX. Unicellular Organisms

42. The Growth and Utilization of *Dictyostelium discoideum* as a Model System for Hormone or Protohormone Action MICAH I. KRICHEVSKY
AND LESLIE L. LOVE 485

Section X. Substrate and Ion Fluxes

43. Modulations of Substrate Entry into Cells DAVID M. REGEN 495
44. Methods for Assessing Hormone Effects on Calcium Fluxes *in Vitro* ANDRÉ B. BORLE 513
