Preface

Volumes VIII and IX of this treatise deal with the important and versatile enzymes that catalyze the transfer of a variety of chemical groups. The most extensively studied are enzymes catalyzing phosphoryl group transfer from ATP to various acceptors, known by their trivial name as kinases; thirteen separate chapters on kinases appear in the two volumes. Volume VIII also includes a general chapter dealing with the chemical basis of phosphoryl transfer. Intramolecular phosphoryl transfer was covered earlier in Volume VI with the isomerases, and phosphoryl transfer by phosphatases was covered in Volume IV with the hydrolases.

Another class of transferases of prime metabolic importance are those catalyzing transfer of one-carbon groups. These are covered in this volume. Prominent consideration is given the catalytic versatility of folic acid. Aspartate transcarbamylase also falls within this group because of the elegant researches on its separate catalytic and regulatory subunits that introduced new principles into enzymology. One-carbon group transfer also includes some molecular information about methylation of DNA; rapid growth is anticipated in this area.

As representative of the widespread occurrence of transfer of glycosyl moieties, some key enzymes of carbohydrate metabolism and biosynthesis appear in these volumes. Other miscellaneous group transfer reactions complete the coverage.

As with previous volumes, the principal criterion for inclusion as a separate chapter is considerable information at the molecular level about either the enzyme or the process catalyzed. Response of the best-qualified authors in the field continues to be gratifying. For nearly all the chapters, the author is the first choice of the Advisory Board and the Editor. It is to these authors that the reader is indebted for the excellent coverage. Also it is a pleasure to extend appreciation to the members of the Advisory Board for their invaluable assistance in planning the volumes.

The continued fine professional work by the staff of Academic Press is clearly evident in the product produced.

Contents of Other Volumes

Volume I: Structure and Control

- X-Ray Crystallography and Enzyme Structure

 David Eisenberg
- Chemical Modification by Active-Site-Directed Reagents

 Elliott Shaw
- Chemical Modification as a Probe of Structure and Function

 Louis A. Cohen
- Multienzyme Complexes

 Lester J. Reed and David J. Cox
- Genetic Probes of Enzyme Structure

 Milton J. Schlesinger
- Evolution of Enzymes

 Emil L. Smith
- The Molecular Basis for Enzyme Regulation D. E. Koshland, Jr.
- Mechanisms of Enzyme Regulation in Metabolism E. R. Stadtman
- Enzymes as Control Elements in Metabolic Regulation

 Daniel E. Atkinson
- Author Index—Subject Index

Volume II: Kinetics and Mechanism

Steady State Kinetics

W. W. Cleland

Rapid Reactions and Transient States

Gordon B. Hammes and Paul R. Schimmel

Stereospecificity of Enzymic Reactions G. Popják

Proximity Effects and Enzyme Catalysis

Thomas C. Bruice

Enzymology of Proton Abstraction and Transfer Reactions
Irwin A. Rose

Kinetic Isotope Effects in Enzymic Reactions

J. H. Richards

Schiff Base Intermediates in Enzyme Catalysis

Esmond E. Snell and Samuel J. Di Mari

Some Physical Probes of Enzyme Structure in Solution Serge N. Timasheff

Metals in Enzyme Catalysis

Albert S. Mildvan

Author Index—Subject Index

Volume III: Hydrolysis: Peptide Bonds

Carboxypeptidase A

Jean A. Hartsuck and William N. Lipscomb

Carboxypeptidase B

J. E. Folk

Leucine Aminopeptidase and Other N-Terminal Exopeptidases Robert J. DeLange and Emil L. Smith

Pepsin

Joseph S. Fruton

Chymotrypsinogen: X-Ray Structure

J. Kraut

The Structure of Chymotrypsin

D. M. Blow

Chymotrypsin—Chemical Properties and Catalysis George P. Hess

Trypsin

B. Keil

Thrombin and Prothrombin
Staffan Magnusson

Pancreatic Elastase

B. S. Hartley and D. M. Shotton

Protein Proteinase Inhibitors—Molecular Aspects

Michael Laskowski, Jr., and Robert W. Sealock

Cathepsins and Kinin-Forming and -Destroying Enzymes

Lowell M. Greenbaum

Papain, X-Ray Structure

J. Drenth, J. N. Jansonius, R. Koekoek, and B. G. Wolthers

Papain and Other Plant Sulfhydryl Proteolytic Enzymes

A. N. Glazer and Emil L. Smith

Subtilisin: X-Ray Structure

J. Kraut

Subtilisins: Primary Structure, Chemical and Physical Properties Francis S. Markland, Jr., and Emil L. Smith

Streptococcal Proteinase

Teh-Yung Liu and S. D. Elliott

The Collagenases
Sam Seifter and Elvin Harper

Clostripain

William M. Mitchell and William F. Harrington

Other Bacterial, Mold, and Yeast Proteases

Hiroshi Matsubara and Joseph Feder

Author Index-Subject Index

Volume IV: Hydrolysis: Other C-N Bonds, Phosphate Esters

Ureases

F. J. Reithel

Penicillinase and Other β -Lactamases

Nathan Citri

Purine, Purine Nucleoside, Purine Nucleotide Aminohydrolases C. L. Zielke and C. H. Suelter

Glutaminase and γ -Glutamyltransferases Standish C. Hartman

L-Asparaginase

John C. Wriston, Jr.

Enzymology of Pyrrolidone Carboxylic Acid Marian Orlowski and Alton Meister

Staphylococcal Nuclease X-Ray Structure
F. Albert Cotton and Edward E. Hazen, Jr.

Staphylococcal Nuclease, Chemical Properties and Catalysis

Christian B. Anfinsen, Pedro Cuatrecasas, and Hiroshi Taniuchi

Microbial Ribonucleases with Special Reference to

RNases T_1 , T_2 , N_1 , and U_2

Tsuneko Uchida and Fujio Egami

Bacterial Deoxyribonucleases

I. R. Lehman

Spleen Acid Deoxyribonuclease Giorgio Bernardi

Deoxyribonuclease I M. Laskowski, Sr. Venom Exonuclease

M. Laskowski, Sr.

Spleen Acid Exonuclease

Alberto Bernardi and Giorgio Bernardi

Nucleotide Phosphomonoesterases

George I. Drummond and Masanobu Yamamoto

Nucleoside Cyclic Phosphate Diesterases

George I. Drummond and Masanobu Yamamoto

E. coli Alkaline Phosphatase

Ted W. Reid and Irwin B. Wilson

Mammalian Alkaline Phosphatases

H. N. Fernley

Acid Phosphatases

Vincent P. Hollander

Inorganic Pyrophosphatase of Escherichia coli

John Josse and Simon C. K. Wong

Yeast and Other Inorganic Pyrophosphatases

Larry G. Butler

Glucose-6-Phosphatase, Hydrolytic and Synthetic Activities

Robert C. Nordlie

Fructose-1,6-Diphosphatases

S. Pontremoli and B. L. Horecker

Bovine Pancreatic Ribonuclease

Frederic M. Richards and Harold W. Wyckoff

Author Index—Subject Index

Volume V: Hydrolysis (Sulfate Esters, Carboxyl Esters, Glycosides), Hydration

The Hydrolysis of Sulfate Esters

A. B. Roy

Arylsulfatases

R. G. Nicholls and A. B. Roy

Carboxylic Ester Hydrolases

Klaus Krisch

Phospholipases

Donald J. Hanahan

Acetylcholinesterase

Harry C. Froede and Irwin B. Wilson

Plant and Animal Amylases

John A. Thoma, Joseph E. Spradlin, and Stephen Dygert

Glycogen and Starch Debranching Enzymes

E. Y. C. Lee and W. J. Whelan

Bacterial and Mold Amylases

Toshio Takagi, Hiroko Toda, and Toshizo Isemura

Cellulases

D. R. Whitaker

Yeast and Neurospora Invertases

J. Oliver Lampen

Hyaluronidases

Karl Meyer

Neuraminidases

Alfred Gottschalk and A. S. Bhargava

Phage Lysozyme and Other Lytic Enzymes

Akira Tsugita

Aconitase

Jenny Pickworth Glusker

 β -Hydroxydecanoyl Thioester Dehydrase

Konrad Bloch

Dehydration in Nucleotide-Linked Deoxysugar Synthesis

L. Glaser and H. Zarkowsky

Dehydrations Requiring Vitamin B₁₂ Coenzyme Robert H. Abeles

Enolase

Finn Wold

Fumarase and Crotonase

Robert L. Hill and John W. Teipel

6-Phosphogluconic and Related Dehydrases

W. A. Wood

Carbonic Anhydrase

S. Lindskog, L. E. Henderson, K. K. Kannan, A. Liljas, P. O. Nyman, and B. Strandberg

Author Index-Subject Index

Volume VI: Carboxylation and Decarboxylation (Nonoxidative), Isomerization

Pyruvate Carboxylase

Michael C. Scrutton and Murray R. Young

Acyl-CoA Carboxylases

Alfred W. Alberts and P. Roy Vagelos

Transcarboxylase

Harland G. Wood

Formation of Oxalacetate by CO₂ Fixation on Phosphoenolpyruvate Merton F. Utter and Harold M. Kolenbrander

Ribulose-1,5-Diphosphate Carboxylase

Marvin I. Siegel, Marcia Wishnick, and M. Daniel Lane

Ferredoxin-Linked Carboxylation Reactions

Bob B. Buchanan

Amino Acid Decarboxylases

Elizabeth A. Boeker and Esmond E. Snell

 ${\bf Acetoacetate\ Decarboxylase}$

Irwin Fridovich

Aldose-Ketose Isomerases
Ernst A. Noltmann

Epimerases

Luis Glaser

Cis-Trans Isomerization
Stanley Seltzer

Phosphomutases

W. J. Ray, Jr., and E. J. Peck, Jr.

Amino Acid Racemases and Epimerases

Elijah Adams

Coenzyme B_{12} -Dependent Mutases Causing Carbon Chain Rearrangements

H. A. Barker

B₁₂ Coenzyme-Dependent Amino Group Migrations
