## A MESSAGE FROM THE CONFERENCE CHAIRS

On behalf of the American Society of Mechanical Engineers (ASME) and the other sponsoring societies, we invite you to join us at Walt Disney Village in Orlando, Florida, for the 30th Intersociety Energy Conversion Engineering Conference (IECEC). The IECEC Conference has always served as a window into the future of energy technologies. Coincidentally, the discussion about the technologies that will lead us into the next century is being held at a location where the futuristic ideas of Walt Disney provide entertainment as well as educational experiences.

Since the early 1990s, there has been a worldwide discussion on Sustainable Development and at this time the idea has become universally accepted. There is, however, no consensus on what action or set of actions will lead us to a sustainable future. A 1987 report of the World Commission on Environment and Development, "Our Common Future," defined sustainable development as the "development that meets the needs of the present without compromising the ability of future generations to meet their own needs." In practical terms it means providing for food, energy and other necessities in a way that maintains a sustainable level of natural resources and environmental quality. Since energy conversion and utilization have a large impact on natural resources and environmental quality, it is appropriate and timely to discuss the energy technologies that will lead us toward a sustainable future. Hence, the theme for this year's IECEC is *Energy Technologies for a Sustainable Future*.

The IECEC provides a forum to present and discuss the engineering aspects of energy conversion, advanced and unconventional energy systems and devices, energy conversion and utilization, environmental issues and policy implications on research, development, and implementation of technologies. We recognize that no single energy resource or technology will provide for a sustainable future. Instead, the solution will lie in a mix of all of the available energy resources (renewable and non-renewable) and diverse energy conversion technologies that will maintain quality of life in a sustainable manner. IECEC is the only forum that brings experts in all of the energy technologies together for a cross-disciplinary exchange of information. As always, this year's IECEC is expected to bring together participants from academia, government, industry and utilities, and from all continents of the world.

As Orlando is the vacation land of the world, we are arranging social and entertainment activities such as behind-the-scenes Disney tours, reception entertainment, a golf tournament, etc., that will make this conference entertaining, enjoyable, and intellectually stimulating.

Welcome to the 30th IECEC.

D. Yogi Goswami  
Landis Kannberg  
Sriram Somasundaram  
Tom R. Mancini

## **ACKNOWLEDGMENTS**

The Conference Chairmen gratefully acknowledge the assistance provided by the following staff members of the Battelle Pacific Northwest Laboratory, without whose dedication and generosity of their personal time, the publication of these Proceedings would not have been possible. They send their very best wishes to all attendees and hope that the 1995 IECEC contributes to their future success.

## **HOST SOCIETY**

American Society of Mechanical Engineers  
345 East 47th Street  
New York, N.Y. 10017

## **CONFERENCE COMMITTEE**

Dr. D. Yogi Goswami, *Conference Chairman*  
Dr. Landis D. Kannberg, *Technical Program Chairman*  
Dr. Sriram Somasundaram, *Technical Program Co-Chairman*  
Dr. Thomas R. Mancini, *Technical Program Co-Chairman*

## **1994–1995 IECEC STEERING COMMITTEE**

### **Society of Automotive Engineers (SAE)**

*Timothy J. Bland*, Sundstrand Corp., Rockford, IL *Buryl McFadden*, Wright Patterson AFB, OH

### **American Institute of Aeronautics and Astronautics (AIAA)**

*Perry Bankston*, Jet Propulsion Laboratory, Pasadena, CA

*Robert C. Winn*, Engineering Systems, Inc., Colorado Springs, CO

### **American Society of Mechanical Engineers (ASME)**

*Yogi Goswami*, University of Florida, Gainesville, FL  
*Landis Kannberg*, Battelle, Pacific Northwest Laboratory, Richland, WA

### **Institute of Electrical and Electronics Engineers (IEEE)**

*P.R.K. Chetty*, Orbital Sciences Corp., Germantown, MD

*William D. Jackson*, HMJ Corporation, Kensington, MD

### **American Institute of Chemical Engineers (AIChE)**

*Elton J. Cairns*, Lawrence Berkeley Laboratory, Berkeley, CA

*Frank R. McLarnon*, Lawrence Berkeley Laboratory, Berkeley, CA

### **American Nuclear Society (ANS)**

*Dennis Bitz*, Kirkland, WA

## **TOPICAL COORDINATORS**

### **Aerospace Power Systems**

*Melvin Swerding*, I.R. Associates, North Hills, CA

### **Conversion Technologies**

*William D. Jackson*, HMJ Corporation, Kensington, MD

### **Electrochemical Conversion**

*Kim Kinoshita*, Lawrence Berkeley Laboratory, Berkeley, CA

### **Energy Systems**

*Sriram Somasundaram*, Pacific Northwest Laboratory, Richland, WA

### **Environmental Impact**

*Herbert Inhaber*, Westinghouse Savannah River, Aiken, SC

*Jas S. Devgun*, Argonne National Laboratory, Argonne, IL

### **New Technologies for Energy Utilization**

*Patrick Bailey*, Lockheed Missiles and Space Co., Mountain View, CA

### **Policy Impacts On Energy**

*Stephen Herring*, INEL, Idaho Falls ID

### **Renewable Energy Resources**

*Thomas R. Mancini*, Sandia National Laboratories, Albuquerque, NM

### **Stirling Engines and Applications**

*Alan Kornhauser*, Virginia Tech, Blacksburg, VA

## **COOPERATING SOCIETIES**

### **American Power Conference (APC)**

*A.K. Behera*, Illinois Institute of Technology

### **Electro-Chemical Society (ECS)**

*P. Ng*, AT&T Bell Labs.

### **International Solar Energy Society (ISES)**

*G. Meckler*, Gershon Meckler Association

### **Japan Society of Mechanical Engineers (JSME)**

*N. Isshiki*, Isshiki Research and Development Laboratory

## **INTERNATIONAL COORDINATORS**

### **South Europe**

*Antonio Valero*, University of Zaragoza, Spain

### **North Europe**

*Gunnar Svedberg*, Royal Institute of Technology Stockholm, Sweden

### **Japan/Pacific**

*Naotsugu Isshiki*, Tokyo, Japan

### **India**

*S. K. Sharma*, Panjab University, Chandigarh, India

## **SESSION ORGANIZERS**

### **AEROSPACE POWER**

#### **Aircraft Power**

*E.J. Woods*, Boeing Company, Seattle, WA

#### **Aerospace Power Systems — Automation**

*N. Dugal-Whitehead*, NASA Marshall Space Flight Center, Huntsville, AL

#### **Batteries for Aerospace Power**

*S. Gaston*, Martin-Marietta, West Windsor, NJ  
*J. Brewer*, Marshall Space Flight Center, AL  
*S. Schiffer*, Martin-Marietta, West Windsor, NJ

#### **Computer Simulation**

*J.E. Chen*, Lockheed Missiles Space Company, Inc., CA  
*W.J. Billerbeck*, MRJ Inc., Fairfax, VA

#### **Power Electronics**

*W. Baker*, Naval Research Labs, Washington, DC  
*G.E. Schwarze*, NASA Lewis Research Center, Cleveland, OH

#### **Power Management**

*J. Barton*, Boeing Company, Seattle, WA

#### **Space Solar Power**

*M. Piszcior*, NASA Lewis Research Center, Cleveland, OH

#### **Space Power Systems**

*L. Isenberg*, I.R. Associates, La Hambra, CA

#### **Space Energy Statics/Dynamics**

*R. Harty*, Rockwell International, Canoga Park, CA

#### **Space Power — Requirements and Issues**

*M. Swerdlung*, I.R. Associates, North Hills, CA

#### **Space Station Power**

*G. Kaelin*, Rockwell International Canoga Park, CA

#### **Terrestrial Applications of Space Power**

*C. W. Wood*, US Air Force Academy, CO  
*R.C. Winn*, Engineering Systems Inc., Colorado Springs, CO

#### **Thermal Management**

*J. Beam*, Wright Laboratory/USAF, Dayton, OH

#### **Wireless Transmission**

*F. Little*, Texas A&M University, College Station, TX

#### **Space Nuclear Power — Applications**

*W. Adam*, Consultant, Rockford, IL

#### **Space Nuclear Power — Thermionics**

*M. Jacox*, Idaho National Engineering Laboratory, Idaho Falls, ID

#### **Space Nuclear Power — Isotopic**

*R. Hartman*, Martin Marietta, Philadelphia, PA

#### **Space Nuclear Power — Thermoelectric**

*J. Vandersande*, Jet Propulsion Laboratory, Pasadena, CA

### **Bimodal Propulsion**

*M. Jacox*, Idaho National Engineering Laboratory, Idaho Falls, ID

### **Electric Propulsion**

*F. Curran*, NASA Lewis Research Center, Cleveland, OH

### **Solar Thermal**

*M. Schuller*, Phillips Lab., Albuquerque, NM

### **Solar Bimodal**

*M. Jacox*, Idaho National Engineering Laboratory, Idaho Falls, ID

## **CONVERSION TECHNOLOGIES**

### **Heat Pumps**

*E.P.H. Fu*, US Department of Energy, Washington, DC

### **Advanced Cycles**

*F. Bernard*, Consultant

### **Thermoelectrics**

*J. Vandersande*, Jet Propulsion Laboratory, Pasadena, CA

### **Thermionics**

*W.D. Jackson*, HMJ Corporation, Kensington, MD

### **Alkali Metal Thermal to Electric Conversion (AMTEC)**

*W.D. Jackson*, HMJ Corporation, Kensington, MD

## **ELECTROCHEMICAL CONVERSION**

### **Fuel Cells — Status and Applications**

*M. Williams*, DOE/METC, Morgantown, WV

*F. Chen*, ORNL, Oak Ridge, TN

### **Fuel Cells — Technology and Development**

*R. Fiskum*, DOE/OBT, Washington, DC

*J. Hirschenhofer*, Gilbert/Commonwealth Inc., Reading, PA

### **Batteries for Terrestrial Applications**

*F. McLarnon*, Lawrence Berkeley Laboratory, Berkeley, CA

*A. Himy*, Westinghouse Electric Company, Pittsburgh, PA

## **ENVIRONMENTAL IMPACTS**

### **Environmental Impacts**

*H. Inhaber*, Westinghouse Savannah River, Aiken, SC

### **Environmental Technologies**

*Jas S. Devgun*, Argonne National Laboratory, Argonne, IL

## **ENERGY SYSTEMS**

### **Electric/Hybrid Vehicle Technology**

### **Transportation System Assessments**

*A.F. Burke*, ITS, University of California, Davis, CA

*W. Loscutoff*, California State University, Fresno, CA

**Simulation and Modeling of Energy Systems**  
**Cogeneration and Other Energy Systems Applications**  
*W. Dan Turner, Texas A&M University, College Station, TX*

**Thermal Energy Storage Applications**  
*I. Salyer, University of Dayton Research Institute  
Dayton, OH*  
*S.K. Sharma, Panjab University, Chandigarh, India*  
*C.K. Jotshi, University of Florida, Gainesville, FL*  
*A. Roque, Florida Power and Light Co., Miami, FL*

**Fluids and Heat Transfer Topics**  
*S. Somasundaram, Pacific Northwest Laboratory,  
Richland, WA*

**Nuclear Engineering Technologies (Panel)**  
*J. Ohanian, University of Florida, Gainesville, FL*

**Demand Side Management (DSM) in Buildings**  
*G.D. Mathur, Zexel USA Corp., Decatur, IL*  
*F. Colacino, Florida Power and Light Co., Miami, FL*

**Energy Management**

DAVID A. SCHEIMAN, PHILIP P. JENKINS, <i>NYMA Setar Inc.</i>	
DAVID J. BRINKER, <i>NASA Lewis Research Center</i>	
AP-109 .....	333
<b>The Next Generation of Solar Panel Substrates?</b>	
KRISTEN M. GLEDHILL, RANDY L. BOSWELL, JOHN G. PAUL, THOMAS D. KIM, <i>U.S. Air Force Phillips Laboratory</i>	

AP-324 .....	337
<b>A Lightweight Inflatable Solar Array</b>	
PATRICK K. MALONE, GEOFFREY T. WILLIAMS, <i>L'Garde, Inc.</i>	
AP-405 .....	347
<b>The UltraFlex Solar Array Qualification Testing Program</b>	
P. ALAN JONES, T. JEFFREY HARVEY, MARK V. DOUGLAS, <i>AEC-Able Engineering Company, Inc.</i>	
AP-265 .....	353
<b>MIR 1 Cooperative Solar Array Photovoltaic Panel Module Production</b>	
WILLIAM WILKINSON, <i>Lockheed Missiles &amp; Space Co., Inc.</i>	
AP-206 .....	357
<b>Elevated Temperature Testing of the MIR 1 Cooperative Solar Array Photovoltaic Panel Module</b>	
MARIA T. CHAU, HOLLY N. BRISCO, <i>Lockheed Missiles &amp; Space Co., Inc.</i>	
AP-421 .....	363
<b>Initial Results from the Solar Dynamic (SD) Ground Test Demonstration (GTD) Project at NASA Lewis</b>	
RICHARD K. SHALTENS, <i>NASA Lewis Research Center</i>	
ROBERT V. BOYLE, <i>AlliedSignal Aerospace</i>	

### SPACE POWER SYSTEMS

AP-234 .....	369
<b>A Modular Multi-Mission Electrical Power Subsystem for Geosynchronous Satellites</b>	
STEVEN M. CANZANO, HOWARD F. WEBBER, ANTHONY Z. APPLEWHITE, DARYL K. HOSICK, HOWARD E. POLLARD, <i>Space Systems/Loral</i>	
AP-27 .....	375
<b>On-Orbit Performance of TOPEX/Poseidon Electrical Power System through its Design Life of Three Years</b>	
P.R.K. CHETTY, MICHAEL DOHERTY, <i>Orbital Sciences Corp.</i>	
ROBERT SHERWOOD, <i>Jet Propulsion Laboratory</i>	
AP-186 .....	381
<b>A General Spacecraft Power Subsystem Architecture</b>	
PETER R. GLUCK, KHOSROW A. BAHRAMI, MARY O. LEI, <i>Jet Propulsion Laboratory</i>	
AP-248 .....	387
<b>The Power System of ESA's ENVISAT-1 Mission</b>	
JIM E. HAINES, <i>European Space Agency</i>	
AP-26 .....	393
<b>Hybrid Electrical Power Source for Thrust Vector Control Electromechanical Actuation</b>	
DAVID K. HALL, <i>NASA Marshall Space Flight Center</i>	
STEPHEN A. MERRYMAN, <i>Space Power Institute</i>	

### SPACE ENERGY STATICS/DYNAMICS

AP-136 .....	399
<b>Analysis of Solar Receiver Flux Distributions for U.S./Russian Solar Dynamic System Demonstration on the MIR Space Station</b>	
THOMAS W. KERSLAKE, JAMES FINCANNON, <i>NASA Lewis Research Center</i>	
AP-220 .....	405
<b>Stirling Converters for Space Dynamic Power Concepts with 2 to 130 We Output</b>	
BRAD A. ROSS, <i>Stirling Technology Company</i>	

AP-168 .....	411
<b>Design of the Heat Receiver for the U.S./Russia Solar Dynamic Power Joint Flight Demonstration</b>	
HAL J. STRUMPF, CHRISTOPHER KRYSTKOWIAK, BETH A. KLUCHER, <i>AlliedSignal Aerospace Equipment Systems</i>	

AP-176 .....	417
<b>Joint US/Russian Solar Dynamic Flight Demonstration Project Plan</b>	
JOYCE S. WANHAINEN, TIMOTHY E. TYBURSKI, <i>NASA Lewis Research Center</i>	

## **SPACE POWER: REQUIREMENTS AND ISSUES**

AP-349 .....	421
<b>Space Power System Requirements for Future NASA Missions</b>	
MICHAEL F. PISZCZOR, <i>NASA Lewis Research Center</i>	
MURRAY S. HIRSCHBEIN, <i>NASA Headquarters</i>	
AP-354 .....	427
<b>Nuclear Space Power and Propulsion Requirements and Issues</b>	
MEL SWERDLING, LON ISENBERG, <i>IR Associates</i>	
AP-255 .....	431
<b>Space Battery Requirements and Issues — What's Driving the Technology</b>	
PATRICIA M. O'DONNELL, <i>NASA Lewis Research Center</i>	
AP-366 .....	437
<b>Electric Power and Propulsion: The Future</b>	
FRANK M. CURRAN, JEFFREY G. SCHREIBER, <i>NASA Lewis Research Center</i>	
LISA WOOD CALLAHAN, <i>NASA Headquarters</i>	
AP-249 .....	443
<b>Current Status, Architecture, and Future Directions for the International Space Station Electric Power System</b>	
EDWARD GHOLDSTON, JAMES HARTUNG, JERRY FRIELEFT, <i>Rockwell International</i>	

## **SPACE STATION POWER**

AP-86 .....	449
<b>Shadow Prediction Model for the International Space Station Alpha</b>	
DONG K. CHUNG, <i>Rockwell International</i>	
AP-16 .....	455
<b>Performance of International Space Station Alpha Electric Power Systems</b>	
ROBERT HILL, CHENG-YI LU, VIDYA PADHYE, GYAN HAJELA, LISA HAGUE, <i>Rockwell International</i>	
AP-106 .....	461
<b>Analysis of Shadowing Effects on MIR Photovoltaic and Solar Dynamic Power Systems</b>	
JAMES FINCANNON, <i>NASA Lewis Research Center</i>	
AP-28 .....	467
<b>EPS Performance Predictions Support TOPEX/Poseidon Spacecraft Mission Beyond Design Goal of 5 Years</b>	
P.R.K. CHETTY, MICHAEL DOHERTY, <i>Orbital Sciences Corp.</i>	
ROBERT SHERWOOD, <i>Jet Propulsion Laboratory</i>	

## TERRESTRIAL APPLICATIONS OF SPACE POWER

AP-34 .....	473
<b>Effects of Refrigeration in a Transportable Cryogenic Aerospace Application</b>	
BRIAN D. DONOVAN, TOM MAHEFKEY, <i>Wright Laboratory</i>	
MYSORE L. RAMALINGAM, <i>UES, Inc.</i>	
AP-41 .....	479
<b>On the Feasibility of a 1 MW Inverter in Less Than a Cubic Meter Volume for Vehicle Applications</b>	
THOMAS F. PODLESAK, H. SINGH, <i>Army Research Laboratory</i>	
AP-303 .....	485
<b>Dynamics of Fire Behavior</b>	
DAVID G. LILLEY, <i>Oklahoma State University</i>	
AP-305 .....	491
<b>Current Directions in Photovoltaic Power Conditioner Development Using Smart Power/Power Integrated Circuit Technologies</b>	
STAN KRAUTHAMER, RADHE DAS, <i>Jet Propulsion Laboratory</i>	
ALEC BULAWKA, <i>U.S. DOE</i>	
AP-323 .....	497
<b>Energy Recovery Opportunities from Wastes</b>	
ASHWANI K. GUPTA, <i>University of Maryland</i>	
DAVID G. LILLEY, <i>Oklahoma State University</i>	
AP-10 .....	503
<b>Increased Thermophotovoltaic System Efficiency Using Selective Emitters</b>	
PETER L. ADAIR, M. FRANK ROSE, <i>Auburn University</i>	
AP-304 .....	509
<b>Combustion Simulation in Computer Predictions</b>	
MINGCHUN DONG, DAVID G. LILLEY, <i>Oklahoma State University</i>	
AP-319 .....	515
<b>Reduced Dissolved Oxygen and Jet Fuel Deposition</b>	
J.S. ERVIN, S.P. HENEGHAN, T.F. WILLIAMS, M.A. HANCHAK, <i>University of Dayton</i>	
AP-322 .....	523
<b>Environmentally Acceptable Disposal of Solid Wastes</b>	
E.L. KEATING, S. GILL <i>Naval Surface Warfare Center</i>	
A.K. GUPTA, <i>University of Maryland</i>	
AP-388 .....	529
<b>Prescribed Wake Methodologies for Wind Turbine Design Codes</b>	
R.A. GALBRAITH, F.N. COTON, D.J. ROBISON, <i>The University of Glasgow</i>	
AP-187 .....	537
<b>Combustion Powered Thermophotovoltaic Emitter System</b>	
ROBERT McHENRY, MARK J. HARPER, KEITH W. LINDLER, <i>U.S. Naval Academy</i>	

## THERMAL MANAGEMENT

AP-18 .....	543
<b>High Temperature Loop Heat Pipes</b>	
WILLIAM G. ANDERSON, JOSEPH J. BLAND, <i>Thermacore Inc.</i>	
Y. FERSHTATER, K.A. GONCHAROV, M. NIKITKIN, <i>TAIS, Inc. (Russia)</i>	
ALBERT JUHASZ, <i>NASA Lewis Research Center</i>
