

STANDARD METHODS OF CHEMICAL ANALYSIS

SIXTH EDITION

*Volume Two—Industrial and Natural Products and
Noninstrumental Methods*

Part B

FRANK J. WELCHER, Ph.D., *Editor*

Professor of Chemistry, Indiana University

IN COLLABORATION WITH MANY CONTRIBUTORS
(SEE LIST ON PAGES FOLLOWING)

D. VAN NOSTRAND ~~COMPANY~~, INC.

Princeton, New Jersey

Toronto

New York

London

CONTRIBUTORS *Sixth Edition—Volume Two*

Herbert Abraham
The Ruberoid Co.

Walter W. Anderson
Commercial Testing and Engineering Co.

Gilbert H. Ayres
University of Texas

A. J. Barnard, Jr.
J. T. Baker Chemical Co.

H. F. Beeghly
Jones and Laughlin Steel Corp.

Eugene W. Berg
Louisiana State University

Jacob Block
Olin Mathieson Chemical Corp.

* Richard J. Block
Boyce Thompson Institute for Plant
Research, Inc.

John A. Brabson
Tennessee Valley Authority

Clark E. Bricker
College of Wooster

Robert W. Chaffin
Rock Island Refining Corp.

John D. Christena
Rock Island Refining Corp.

W. Stanley Clabaugh
Department of Health, Education and
Welfare

John G. Cobler
Dow Chemical Co.

Thomas E. Courtney
Reilly Tar and Chemical Corp.

* Deceased.

W. V. Cropper
Precision Scientific Development Co.

Louise K. Forlini
McCrone Associates

Robert B. Forney
Indiana University Medical Center

James S. Fritz
Iowa State University

Owen R. Gates
Naval Research Laboratory

F. W. Gilcreas
University of Florida

Louis Gordon
Case Institute of Technology

W. N. Greer
Leeds and Northrup Co.

William G. Guldner
Bell Telephone Laboratories, Inc.

Wilson C. Hanna
California Portland Cement Co.

Rolla N. Harger
Indiana University Medical Center

Martha A. Helzel
Pittsburgh Plate Glass Co.

S. Mark Henry
Boyce Thompson Institute for Plant
Research, Inc.

Clyde F. Hirn
Sherwin-Williams Co.

Morris B. Jacobs
Columbia University

Ivan M. Jakovljevic
Eli Lilly and Co.

- E. F. Joy
J. T. Baker Chemical Co.
- Peter O. Krumin
Ohio State University
- Norbert R. Kuzel
Eli Lilly and Co.
- Ralph B. Lingeman
Indiana University Medical Center
- William F. Linke
American Cyanamid Co.
- Claude A. Lucchesi
Mobil Chemical Co.
- T. S. Ma
Brooklyn College of The City University
of New York
- Walter C. McCrone
McCrone Associates
- F. R. McCrumb
W. A. Taylor and Co.
- Virgil C. Mehlenbacher
Swift and Co.
- John Mitchell, Jr.
E. I. DuPont de Nemours and Co.
- A. Wendell Musser
Indiana University Medical Center
- Theodore A. Olson
University of Minnesota
- John L. Parsons
Consultant to the Paper and Allied
Industries
- Raymond H. Pierson
U. S. Naval Ordnance Test Station
- Arthur Rose
Pennsylvania State University
- Edward J. Rubins
University of Connecticut
- E. D. Salesin
Eastman Kodak Co.
- Paul J. Secrest
Sherwin-Williams Co.
- Sidney Siggia
Olin Mathieson Chemical Corp.
- George A. Simmons, Jr.
Owens-Illinois Technical Center
- R. C. Stillman
Procter and Gamble Co.
- Louis Tanner
U. S. Customs Laboratory
- Michael J. Taras
Detroit Department of Water Supply
- W. A. Taylor
W. A. Taylor and Co.
- Max Tryon
National Bureau of Standards
- Willard P. Tyler
B. F. Goodrich Co. Research Center
- Dean I. Walter
Naval Research Laboratory
- Harold F. Walton
University of Colorado
- Herbert Weisz
Universitaet Freiburg/Breisgau, Ger-
many
- Frank J. Welcher
Indiana University
- Wesley W. Wendlandt
Texas Technological College
- W. E. Westlake
U. S. Department of Agriculture
- J. C. White
Oak Ridge National Laboratory
- Channing W. Wilson
Baltimore Gas and Electric Co.
- W. J. Youden
National Bureau of Standards

CONTENTS

EXPLOSIVES AND PROPELLANTS

BLACK POWDER, 1285; **Sampling**, 1285; **Moisture**, 1285; **Nitrates**, 1285; **Sulfur**, 1285; **Charcoal**, 1285; **Ash**, 1285.

GENERAL METHODS, 1286; **Heat of Explosion**, 1286; **Hygroscopicity** (for Propellants), 1288; **Moisture by the Carbon Tetrachloride Distillation Procedure**, 1289; **Moisture by Karl Fischer Titration**, 1290; **Moisture and Volatiles by Oven Drying at 100°C.**, 1294; **Moisture and Volatiles by Vacuum-Oven Drying at 55°C.**, 1294; **Nonaqueous Titration**, 1294; **Stability by International Test at 75°C.**, 1295; **Stability by Potassium Iodide-Starch Test**, 1295; **Stability by Heat Test at 120° or 134.5°C. with Standard Methyl Violet Test Paper**, 1295; **Stability by Surveillance Test at 65.5°C.**, 1296; **Stability by the Taliani Test (for Propellants)**, 1296; **Stability by Vacuum Stability Test (for Propellants or Ingredients)**, 1298; **Strand Burning Rate of Solid Rocket Propellants**, 1299; **Total Volatiles by the Solution Evacuation Procedure**, 1304; **Titrimetric Calculations**, 1304.

INGREDIENTS, 1306; **Aluminum**, 1306; **Ammonium Nitrate**, 1311; **Ammonium Perchlorate**, 1313; **1,1-Dimethylhydrazine (UDMH, Unsymmetrical Dimethylhydrazine)**, 1316; **Hydrazine**, 1317; **Hydrogen Peroxide**, 1318; **Magnesium, Powdered**, 1321; **Magnesium Oxide**, 1323; **Nitric Acid, Fuming (White or Red)**, 1325; **Nitrocellulose (Cellulose Nitrate)**, 1330; **Nitroglycerin (Glyceryl)Trinitrate**, 1335; **Nitroguanidine (Picrite)**, 1336; **Polypropylene Glycol**, 1337; **2,4-Toluene Diisocyanate**, 1339; **Triacetin (Glyceryl Triacetate)**, 1340; **2,4,6-Trinitrotoluene (TNT)**, 1341; **Zinc Oxide**, 1343.

EXPLOSIVES, 1345; **Qualitative Tests of Explosives**, 1345; **Quantitative Analysis of Explosive Mixtures**, 1350; **Dynamites**, 1350; **Blasting Caps and Electric Detonators**, 1365; **Primers**, 1367.

PROPELLANTS, 1371; **Liquid Propellants**, 1371; **Solid Propellants**, 1371.

APPENDIX A: PARTIAL LIST OF SPECIFICATIONS AND ABBREVIATIONS RELATED TO EXPLOSIVES, PROPELLANTS, OR THEIR INGREDIENTS, 1408.

NATURAL FATS

Sampling, 1411; **Determination of Impurities**, 1414; **Identification**, 1430; **Chemical Characteristics of Fats**, 1437; **Physical Characteristics of Fats**, 1442; **Composition of Fats**, 1462.

FERTILIZERS

Sampling and Sample Preparation, 1483; **Water**, 1484; **Nitrogen**, 1484; **Phosphorus**, 1490; **Potassium**, 1499; **Acid- or Base-Forming Quality**, 1504.

FUEL GASES AND RELATED PRODUCTS

Introduction and Scope, 1507; Sampling, 1507; Determination of Major Constituents, 1513; Determination of Miscellaneous Constituents, 1539.

GAS ANALYSIS—VACUUM TECHNIQUES

Collection, Measurement, and Analysis of Micro Gas Samples, 1564; Injection of Metal Samples into a Vacuum Station, 1567; Admission of Gas to an Evacuated System, 1569; Devices for Obtaining Gas from Closed Containers, 1576; Methods for the Determination of Oxygen, Hydrogen, Nitrogen, and Carbon in Metals, 1580.

PAINT, VARNISH, AND LACQUER

Preliminary Inspection of the Sample, 1617; Tests on the Total Coating, 1618; Separation of Pigment, Binder, and Thinner of Solvent Type Coatings, 1621; Separation of Pigment, Binder, and Thinner of Latex Paints, 1626; Identification of the Binder, 1627; Analysis of the Vehicle, 1641; Identification and Analysis of Pigments, 1680; Identification and Analysis of the Thinner, 1703; Example of Complete Analysis of a Surface Coating, 1704; Infrared Spectra, 1708.

PAPER, WOOD, AND PULP

ANALYSIS OF WOOD, 1723; Water Solubility of Wood, 1723; Methoxyl Groups in Wood, 1724; Moisture in Wood Chips and Sawdust by Toluene Method, 1727; One Per Cent Caustic Soda Solubility of Wood, 1730; Ether Solubility of Wood, 1731; Alcohol-Benzene Solubility of Wood, 1731; Holocellulose in Wood, 1732; Sampling and Preparing Wood for Analysis, 1734; Preparation of Extractive-Free Wood, 1736; Lignin in Wood, 1737; Ash in Wood, 1738; Cellulose in Wood, 1739; Pentosans in Wood, 1742.

ANALYSIS OF PULP, 1745; Cellulose in Pulp, 1745; Chlorine Consumption of Pulp, 1747; Alpha-, Beta-, and Gamma-Cellulose in Pulp, 1751; Pitch in Wood Pulp, 1755; Cuprammonium Disperse Viscosity of Pulp, 1756; Water Solubility of Pulp, 1760; Weighing, Sampling, and Testing Pulp for Moisture, 1761; Ash in Pulp, 1766; One Per Cent Caustic Soda Solubility of Pulp, 1767; Permanganate Number of Pulp, 1769; Copper Number of Pulp, 1772; Pentosans in Pulp, 1774; Cupriethylenediamine Disperse Viscosity of Pulp, 1780; Solubility of Pulp in Sodium Hydroxide at 20°C., 1789.

ANALYSIS OF PAPER, 1794; Sampling Paper for Testing, 1794; Conditioning Paper and Paperboard for Testing, 1795; Reducible Sulfur in Paper and Paperboard, 1797; Amount of Coating on Mineral-Coated Paper, 1799; Rosin in Paper and Paperboard, 1800; Moisture in Paper, Paperboard, and Paperboard and Fiberboard Containers, 1804; Ash in Paper, 1806; Casein in Paper (Qualitative), 1808; Proteinaceous Nitrogenous Materials in Paper (Qualitative), 1808; Starch in Paper, 1809; Qualitative Analysis of Mineral Filler and Mineral Coating of Paper, 1812; Water-Soluble Acidity or Alkalinity of Paper, 1818; Alpha-, Beta-, and Gamma-Cellulose in Paper, 1819; Titanium Pigments in Paper, 1824; Copper Number of Paper and Paperboard, 1828; Acid-Soluble Iron in Paper, 1830; Hydrogen Ion Concentration (pH) of Paper Extracts, 1831; Alkali-Staining Resistance of Paper, 1833;

Pentosans in Paper, 1834; Turpentine Test for Grease Resistance of Paper, 1837; Kappa Number of Pulp, 1838.

PESTICIDES

Aerosol Insecticides, 1843; Aldrin, 1845; Allethrin, 1845; Alpha Naphthyl Thiourea, 1848; 3-Amino-1,2,4-Triazole, 1848; Aramite, 1849; Arsenicals, 1849; Benzene Hexachloride, 1856; Calcium Cyanide, 1858; Captan, 1858; Ceresan and Lignasan, 1859; Chlorobenzilate, 1860; Chlorine (Total), 1860; Chlorine or Bromine in Organic Compounds, 1862; Chlorthion, 1863; CMU, 1863; Cryolite, 1864; Cubé, 1864; 2,4-D; 2,4,5-T or Mixtures of Both, 1864; DDT, 1865; Demeton, 1866; Derris, 1866; Diazinon, 1866; Dibutyl Oxalate in Indalone or in 6-2-2 Repellent Mixture, 1866; Dieldrin, 1867; N,N-Diethyl-*m*-Toluamide, 1868; Diphacinone, 1869; Disodium Endothal in Formulations, 1869; Diuron, 1870; DN Compounds, 1870; Endrin, 1871; EPN, 1871; 2-Ethyl-1,3-Hexanediol, 1871; Ethylenechlorobromide, 1871; Ethylene Dibromide, 1871; Ethylene Dichloride, 1871; Ethylene Oxide, 1872; Fenuron, 1872; Ferbam, 1873; Fluorine, 1876; Fluorine Present as Sodium Fluosilicate, 1878; Formaldehyde (in Solutions), 1878; Fumarin, 1879; Genite, 1879; Guthion, 1879; Heptachlor in Technical Heptachlor and Formulations, 1880; Lignasan, 1880; Lindane, 1880; Malathion, 1880; Maneb, 1881; Mercury, 1881; Methoxychlor, 1883; Methyl Bromide, 1883; Methyl Parathion, 1884; Monuron, 1884; Nabam, 1884; Nicotine, 1885; Organic Thiocyanates, 1886; Ovex (Ovotran), 1888; Panogen, 1889; Panogen 15 and Panogen 42, 1889; Parathion or Methyl Parathion, 1890; Perthane, 1891; Phenothiazine, 1891; Phorate, 1891; Phosphorus (Organic), 1891; Phosphorus Pastes, 1892; Pival, 1894; Pival in Bait Materials, 1895; Pivalyn (Sodium Salt of 2-Pivalyl-1,3-Indandione), 1895; Potassium Cyanate, 1896; Potassium Cyanide, 1897; Pyrethrum Powder, 1897; Pyrethrum Extracts in Mineral Oil, 1898; Rotenone, 1899; Sabadilla, 1901; Schradan, 1902; Sevin, 1902; Sodium Chlorate, 1903; Sodium and Potassium Cyanides, 1903; Sodium Dimethyldithiocarbamate, 1904; Sodium Fluosilicate, 1904; Sulfenone, 1904; Sulfotepp, 1904; TDE, 1904; Tetraethyl Pyrophosphate, 1904; Tetramethylthiuram Disulfide (Thiram M), 1906; Tetramethylthiuram Disulfide, 1908; Thallous Sulfate, 1908; Thiodan, 1909; Thiram, 1910; Toxaphene, 1910; Trithion, 1910; Warfarin, 1910; Zineb, 1912.

PETROLEUM AND PETROLEUM PRODUCTS

Flash Point by Tag Closed Tester, 1913; Flash and Fire Points by Cleveland Open Cup, 1918; Flash Point by Pensky-Martens Closed Tester, 1923; API Gravity of Petroleum and Its Products, 1926; Distillation of Petroleum Products, 1929; Distillation of Crude Petroleum, 1938; Saybolt Viscosity, 1943; Specific Gravity of Petroleum and Its Products, 1950; Vapor Pressure of Petroleum Products (Reid Method), 1953; Cloud and Pour Points, 1963; Existent Gum in Fuels by Jet Evaporation, 1967; Water in Petroleum Products and Other Bituminous Materials, 1972; Water and Sediment in Fuel Oils by Centrifuge, 1975; Aniline Point and Mixed Aniline Point of Petroleum Products and Hydrocarbon Solvents, 1979; Neutralization Value (Acid and Base Numbers) of Petroleum Products, 1985; Conradson Carbon Residue of Petroleum Products, 1993; Ash from Petroleum Oils, 1998; Copper Strip Corrosion by Petroleum Products, 1999; Doctor Tests for Petroleum Distillates, U.O.P. Method, 2005; Mercaptan Sulfur in Jet Fuels (Color-Indicator Method), 2006; Lead Antiknock Compounds in Gasoline, 2009; Sulfur in Petroleum Products by the Bomb Method, 2012; Dilution of Engine Crankcase Oils, 2016; Sulfur in Petroleum Prod-

ucts Including Liquefied Petroleum Gas by Lamp Combustion Method 1, 2019; Sulfur in Petroleum Products by Lamp Combustion Method 2, 2031.

PLASTICS

PART 1 IDENTIFICATION OF PLASTICS, 2036; Identification by Infrared Spectrometry, 2036; Identification by Pyrolysis-Gas Chromatography, 2041.

PART 2 GENERAL PROCEDURES, 2044; Preparation of Sample, 2044; Determination of Additives and Preparation of Additive-Free Resin, 2044; Molecular Weight Distribution and Fractionation of Plastics, 2046; Metallic Impurities, 2048; Sulfated or Sulfonated Emulsifiers in Emulsion Polymerized Resins, 2050; Polyether-Type Emulsifiers in Emulsion Polymerized Resins, 2051; Index of Refraction of Transparent Plastics, 2052; Specific Gravity of Plastics, 2053.

PART 3 PROCEDURES FOR THE ANALYSIS OF VARIOUS TYPES OF PLASTICS, 2055; Styrene Plastics, 2055; Vinyl Chloride Plastics, 2068; Vinylidene Chloride Plastics, 2079; Ethylene Plastics, 2080; Acrylic Plastics, 2088; Cellulosic Plastics, 2098.

POISONS

Choice and Handling of Body Materials for Toxicological Analysis, 2106; Preliminary Tests, 2107.

SYSTEMATIC PROCEDURE FOR SEPARATING AND DETECTING CERTAIN POISONS FROM BODY MATERIALS, 2110; Volatile Poisons, 2110.

QUANTITATIVE DETERMINATION OF CERTAIN POISONS, 2124; Alkaloids, 2124; Arsenic, 2126; Barbiturates, 2130; Boric Acid, 2131; Carbon Monoxide, 2132; Cyanide, 2135; Ethanol, 2136; Ethylene Glycol, 2138; Isopropyl Alcohol and Acetone, 2139; Lead, 2140; Mercury, 2142; Methanol, 2143; Phenol, 2143; Phosphorus, 2144; Salicylic Acid, 2144; Thallium, 2145.

RUBBER AND RUBBER PRODUCTS

INTRODUCTION, 2146; The Nature of Rubber and Rubber Products, 2146; Rubber Polymer Nomenclature, 2148; The Analytical Problem, 2149; Complete Analysis Scheme, 2149.

CRUDE RUBBER ANALYSIS, 2151; Natural Rubber, 2151; Synthetic Rubbers, 2164.

ANALYSIS OF RUBBER COMPOUNDS, 2190; Introduction, 2190; Preparation of Samples, 2190; Identification of Rubber Polymers, 2191; Determination of Rubber Polymer Content, 2193; Determination of Nonrubber Components, 2202.

SILICATES: GLASSES, ROCKS, AND FERROUS SLAGS

Sampling, 2227.

THE ANALYSIS OF GLASSES, 2229; The Analysis of Soda-Lime Glasses, 2229; The Analysis of Lead Glasses, 2246; The Analysis of Borate Glasses, 2251.

CONTENTS

xi

THE ANALYSIS OF SILICATE ROCKS, 2259; The Analysis of Quartz Sands, 2259; The Analysis of Clays and Feldspars, 2261.

THE ANALYSIS OF FERROUS SLAGS, 2265; The Analysis of Open Hearth and Blast Furnace Slags, 2265.

SOAPS AND DETERGENTS

General Scheme of Analysis, 2277; Sampling, 2277; Methods of Analysis, 2279; Methods for Active Ingredient and Other Alcohol-Soluble Material, 2285; Active Ingredient and Equivalent Combined SO_3 , 2285; Test for Soap (Fatty Acid Salts), 2288; Tests for Synthetic Detergents, 2295; Organic Builders, 2302; Inorganic Builders in the Alcohol Insoluble, 2302; Miscellaneous Tests, 2308; Comment, 2309.

SOILS

Sampling, 2310; Field Description of Soils, 2312; Physical Analysis of Soils, 2312; Carbonate Carbon, Organic Carbon, and Organic Matter, 2313; Total Nitrogen, Ammonia, and Nitrates, 2315; Total Determination of Major Soil Constituents by Fusion Analysis, 2318; Total Determination of Other Soil Constituents, 2322; Exchangeable Cations and the Cation Exchange Capacity, 2325; Determination of Soil Reaction (pH), Exchangeable Hydrogen, and Lime Requirement, 2328; Gypsum and Water Soluble Salts in Saline and Alkali Soils, 2331; Chemical Analysis as a Measure of Soil Fertility, 2333.

VITAMINS

Vitamin A, 2339; Vitamin D, 2345; Vitamin E, 2350; Vitamin K, 2353; Vitamin K_1 , 2354; Vitamin K_2 , 2354; Vitamin K_3 , 2354; Vitamin K_4 , 2355; Thiamine, 2358; Riboflavin, 2362; Nicotinic Acid, 2366; Nicotinamide, 2368; Pyridoxine, 2369; Vitamin B_{12} , 2371; Pantothenic Acid, 2375; Choline, 2376; Biotin, 2379; Inositol, 2380; Folic Acid, 2381; *p*-Aminobenzoic Acid, 2383; Ascorbic Acid, 2384.

WATER ANALYSIS

The Purpose of Chemical Analysis, 2388; Sampling of Water, 2391; Order of Analysis in Laboratory, 2396; Preparation of Common Incidental Reagents, 2396; Physical and Chemical Determinations, 2398.

WATER: BACTERIOLOGICAL EXAMINATION

Bacteria Indicative of Pollution, 2500; Sampling for Bacterial Tests, 2502; Bacteriological Examinations, 2505; Selected Bibliography, 2517.

WATER: BIOLOGICAL EXAMINATION

Introduction, 2519; Sampling for Biological Examinations, 2523; Examination of the Sample, 2524; Control of Growths of Plankton in Water, 2539; Summary, 2541; Selected Bibliography, 2541.

INDEX, 2543
