The Law in Context Series

Editors: William Twining (University College London),
Christopher McCrudden (Lincoln College, Oxford) and
Bronwen Morgan (University of Bristol).

Since 1970 the Law in Context series has been at the forefront of the movement to broaden the study of law. It has been a vehicle for the publication of innovative scholarly books that treat law and legal phenomena critically in their social, political and economic contexts from a variety of perspectives. The series particularly aims to publish scholarly legal writing that brings fresh perspectives to bear on new and existing areas of law taught in universities. A contextual approach involves treating legal subjects broadly, using materials from other social sciences, and from any other discipline that helps to explain the operation in practice of the subject under discussion. It is hoped that this orientation is at once more stimulating and more realistic than the bare exposition of legal rules. The series includes original books that have a different emphasis from traditional legal textbooks, while maintaining the same high standards of scholarship. They are written primarily for undergraduate and graduate students of law and of other disciplines, but most also appeal to a wider readership. In the past, most books in the series have focused on English law, but recent publications include books on European law, globalisation, transnational legal processes, and comparative law.

Acknowledgements

The writing of this book has benefited significantly from the input of others. Drafts of this book were inflicted on several cohorts of students – at King's College London in 2009 and 2010, at the University of Singapore in 2010, and at Tilburg University in the course ICT and Law offered as part of the School of Law's Research Master in 2010 and 2011. Not only were these courses fun to teach, but the feedback of the students has helped us to tighten certain arguments and rethink how we present others. We are particularly grateful for their input. Also to colleagues at faculty seminars in Tilburg where various chapters have been presented for their useful suggestions and questions.

The authors thank the many copyright holders of the texts and materials cited for their permission to reproduce them here. Thanks are also due to Sinead Moloney, Sarah Roberts, Martin Barr and Helen Francis of CUP, who have ably assisted the authors throughout the process of this book's production.

The Tilburg Institute of Law, Technology and Society (TILT) provided a home to Morag Goodwin for the three years in which the book was conceived, materials collected and chapters written. The book has benefited greatly from discussions with TILT colleagues about both structure and content. She wishes to acknowledge a particular debt to Paul de Hert, Bert-Jaap Koops and Han Somsen, who read and commented on various chapters and who have been her tutors in the field of law and technology.
