Preface

The International Conference on Asian Digital Libraries (ICADL) was born in Hong Kong in 1998 and hosted in Taipei (1999), Seoul (2000), Bangalore (2001), Singapore (2002), Kuala Lumpur (2003), Shanghai (2004) and Bangkok (2005). ICADL 2006 held in Kyoto, Japan was the 9th of the ICADL series. ICADL has been recognized as an important event for the digital library communities not only in Asia but also globally. The primary mission of ICADL, like the Joint Conference on Digital Libraries (JCDL) and European Conference on Digital Libraries (ECDL), is to serve as a forum for exchange of new advanced technologies and ideas among researchers and practitioners. In addition, ICADL as a conference based in Asia is an important event not only for people in developed countries but also in developing countries where there is large diversity in culture, language and development.

ICADL 2006 received 170 paper submissions from 23 countries. Every submission was reviewed by at least three reviewers. The Program Committee selected 46 full papers and 14 short papers based on the quality and contribution to digital library research. ICADL as well as JCDL and ECDL cover a wide range of information technologies for digital libraries as well as the human and social aspects of digital libraries. The topics of the papers in the proceedings include information extraction, information retrieval, metadata, architectures for digital libraries and archives, ontologies, information seeking, cultural heritage and e-learning.

The Program Committee accepted six papers as posters from those submitted primarily by authors from developing countries in Asia. In general, it is difficult for authors in developing countries to get their papers accepted in major digital library conferences. Through this new category in ICADL, the Program Co-chairs hope to enable Asian authors to present their works to the global community and to inform the global community of activities in Asia.

ICADL 2006 is proud of our distinguished keynote and invited speakers. Their experiences, activities and perspectives for the future are very valuable to the global digital library community. ICADL 2006 organized a special program as a showcase of national DL activities in Asia and Japan and invited several important institutions and organizations.

We would like to express our special thanks to Katsumi Tanaka and all members of the Organizing Committee of ICADL 2006. We would like to express our special thanks to Eepeng Lim, Shalini Urs, Hsinchun Chen, Ching-chih Chen, Edward A. Fox and all members of the Steering Committee of ICADL who encouraged us to organize ICADL 2006. We would like to thank our Program Committee members and reviewers for their excellent work. Last but not least,

we would like to thank all of the authors who submitted their papers to ICADL 2006.
