Further reading

- \* Barney, J. (1991) 'Firm resources and sustained competitive advantage', *Journal of Management*, 17(1): 99-120.  
A classic and top ranked cited academic paper which outlines comprehensively Jay Barney's resource-based view of the firm. This was one of the articles which marked a watershed point for HR researchers and practitioners. It acknowledges much more openly and clearly the role of people than typically is found in strategic frameworks based on industry environment analysis.
- \* Schuler, R. S. and Jackson, S. E. (1987) 'Linking competitive strategies with human resource management practices', *Academy of Management Executive*, 1(3): 207-19  
Randall Schuler and Susan Jackson were one of the first researchers to link psychological and organisational behaviour concepts with the strategies of cost leadership, differentiation and innovation. Although now something of an 'oldie but goodie', many cohorts of undergraduate and postgraduate students have found this paper by Schuler and Jackson to be really helpful for understanding exactly how the people issues can be linked with the strategic issues.
- \* Yetton, P., Craig, J., Davis, J. and Hilmer, F. (1992) 'Are diamonds a country's best friend? A critique of Porter's theory of national competition as applied to Canada, New Zealand and Australia', *Australian Journal of Management*, June, 17(1): 89-119.  
This paper critiques Michael Porter's diamond and argues that as a matter of empirical fact a country may achieve a comparative advantage through possession of just one or two of the determinant factors. The authors conclude therefore that the theory is over stated and potentially misleading for government policy makers and business leaders.
- \* Haaskisson, R., Hitt, M., Wan, W. and Yiu, D. (1999) 'Theory and research in strategic management: swings of a pendulum', *Journal of Management*, 25(3): 417-56.  
If you are interested in finding out more about strategic management and where it comes from, in terms of research schools of thought and core disciplinary concepts, then this is a very readable and accessible review of developments in the research field.
- \* Johnson, G., Scholes, K. and Whittington, R. (2010) *Exploring Corporate Strategy*, 8th edn. Harlow: FT Prentice Hall.  
Alternatively, if you are looking for a book to learn more about strategy and strategic management as a practical tool and way of thinking, then this classic textbook is an excellent resource for answering almost any question that you have on strategy.
- \* Whittington, R. (2001) *What is Strategy – and Does it Matter?* 2nd edn. London: Thomson Learning.  
There again, if you in fact are looking for something more concise, then this book is an excellent read on four theories of strategy (classical, evolutionary, processual and systemic) one is generally very popular with postgraduate students.

- \* Pinnington, A. H. and Gray, J.T. (2007) 'The global restructuring of legal services work? A study of the internationalisation of Australian law firms', *International Journal of the Legal Profession*, July, 14(2): 147-72.  
The research discussed in this journal article addresses the internationalisation strategies of knowledge workers based in a country with a comparatively small population and economy. It examines the ways that an elite group of law firms in Australia are contributing to the globalisation of business and restructuring of legal services work. It seeks to understand Australian law firms' collective strategic intent, which at the time of the research was to develop a global competitive presence in markets in the Asia Pacific region. It is an interesting study of the little guys rather than the big guys trying to establish a global presence. It examines the distinctive commercial orientation and institutional corporate connectors of this group, focusing on how their strategic practice in many ways actually favours the elite group US and UK firms. The data specifically on the recent phase of internationalisation of legal services show Australian lawyers to be of lower status when compared to elite US and European law firms.
- \* Adler, P.S., Kwon, S.W. and Heckscher, C. (2008) 'Professional work: the emergence of collaborative community', *Organization Science*, March–April, 19(2): 359-76.  
A multidisciplinary journal article related to strategic management, knowledge management and IHRM which examines the historical evolution of the organisation of professional work. It provides examples from medicine and hospitals and proposes that the nature of professional work and its communities have changed from craft guild forms to state-based hierarchical institutions with a societal orientation. Adler et al. propose that organisations are now moving more towards new collaborative forms of work and organising.
- \* Krogh, G.V., Nonaka, I. and Aben, M. (2001) 'Making the most of your company's knowledge: a strategic framework', *Long Range Planning*, 34: 421-439.  
If you want to really get to grips with the multitude of ways in practice that corporations can implement knowledge management, then this is one of the best starting points for ideas. The authors show how Unilever engaged in a set of concurrent strategies to manage knowledge in ways that create value and may lead towards attaining a competitive advantage.

**Emirates Airline – airline keeps cash reserves strong**

New Boeing 777 Aircraft delivery delayed until the next year  
Emirates Airline will delay the delivery of several new Boeing 777 aircraft next year by several months to protect its cash reserves during the downturn, says officials.

It is the latest interim measure for the Dubai airline to navigate through the global recession, following efforts to give staff leave of absence and reposition aircraft to more promising routes as demand has waned in some markets. Emirates is expected to announce a small profit in coming weeks amid one of the worst revenue environments for airlines in decades.

Maurice Flanagan, the executive vice chairman of Emirates Airline and Group, said there had been a 'slight reorganisation' of deliveries next year, without disclosing further details. However, in a media report yesterday, Abdulrah Shams, a fleet manager at Emirates based at the Boeing factory in Washington, said the delays involved the long-range 777.

Airlines around the world have deferred and even cancelled aircraft orders amid the global recession. Boeing received 40 new aircraft orders this year while seeing 33 previous orders cancelled. The cancellations come as airlines in the first quarter lost US\$1 billion – in line with a forecast for a US\$4.7bn loss for the year, the International Air Transport Association said.

'Around the globe, we are seeing a number of customers look for some deferrals, including in the Middle East', said Mary Benhott, the senior vice president of Middle East and Africa sales for Boeing's commercial aeroplanes division. 'We are staying close to these customers in these challenging times.'

Mr Flanagan said the move would help the airline's cash position, which suffered a 32 per cent drop during the six months ending in September, to US\$2.3bn from US\$3.4bn. The airline said the drop came after pre-delivery payments, financing a cabin refurbishment programme and paying a dividend to the Dubai Government. Its primary shareholder.

Self-assessment questions

- Indicative answers to these questions can be found on the companion website at [www.sagepub.co.uk/hrzinge](http://www.sagepub.co.uk/hrzinge).
- 1 Why is it that the role of cultural difference in influencing the success or failure of an M&A may be exaggerated?
  - 2 A useful way of conceptualising M&As is to consider their desired end-state. What are the five end-states according to Marks and Mirvis (1998)? Briefly define each one.
  - 3 What are the top ranked factors contributing to acquisition success according to well-known surveys and reports?
  - 4 What do Evans and colleagues (2010) propose are the cultural and people issues in cross-border M&As?
  - 5 Specify some of the questions that a cultural due diligence team should ask in order to understand the 'deep knowledge' of the culture.
