### **PUBLISHER'S NOTICE**

All the codes, indexes and other material in the ICD-9-CM are compiled from official ICD-9-CM codes and instructions as well as the Medicare regulations and manuals issued or authorized by the Centers for Medicare and Medicaid Services. The code book is designed to provide accurate and authoritative information in regard to the subject covered, and every reasonable effort has been made to ensure the accuracy of the information within these pages. However, the ultimate responsibility for correct coding lies with the provider of services.

Ingenix, Inc., its employees, agents and staff make no representation, warranty or guarantee that this compilation of codes and narratives is error-free or that the use of this code book will prevent differences of opinion or disputes with Medicare or other third-party payers as to the codes that are accepted or the amounts that will be paid to providers of services, and will bear no responsibility or liability for the results or consequences of the use of this code book.

### **CONTINUING EDUCATION UNITS FOR AAPC CERTIFIED MEMBERS**

This publication has prior approval by the American Academy of Professional Coders for up to 5 continuing education units. Granting of prior approval in no way constitutes endorsement by AAPC of the publication content nor the publisher. Instructions to submit CEUs are available at [www.aapc.com/education/ceus.htm](http://www.aapc.com/education/ceus.htm)

Item No. 3539 **\$154.95**

**T**hese code books offer accurate and official code information integrated with all Medicare code edits crucial to appropriate reimbursement.

*Professional and Expert editions feature:*

- New and Revised Code Symbols.
- Fourth or Fifth-digit Alerts.
- Complete Official Coding Guidelines
- Age and Sex Edits.
- AHA's *Coding Clinic* references.
- Illustrations and Definitions.
- Manifestation Code Alert
- Complex Diagnosis and Major Complication Alerts
- HIV Major Related Diagnosis Alert
- CC Principal Diagnosis Exclusion
- CC Diagnosis Symbol
- Crucial Medicare Procedure Code Edits

*Expert editions also include these enhancements:*

- Special Reports Via E-mail
- PDX/MDC/DRG List
- Pharmacological List
- Valid Three-Digit Category List
- CC Code List

*Expert Updateable Binder Subscriptions feature:*

- **Three Updates a Year.** (Sept, Feb, and July)
  - Full text update with new code set in September.
  - February update with new illustrations, definitions, code edits, and AHA's *Coding Clinic* references.
  - July update newsletter with a preview of the new codes.
- **Summary of topics covered in the the latest AHA's *Coding Clinic***

St. Anthony Publishing/Medicode

# The Best Physicians' Current Procedural Terminology (CPT<sup>®</sup>) Reference in the Industry!

## 2004 CPT<sup>®</sup> Expert

**Spiral bound \$89.95** Item No. 4531  
Available: December 2003 ISBN: 1-56337-444-7

**Compact \$79.95** Item No. 4532  
Available December 2003 ISBN: 1-56337-445-5

**Publisher's Note:** CPT<sup>®</sup> Expert is not a replacement for the American Medical Association's CPT<sup>®</sup> 2003 Standard and Professional code books.

**T**he CPT<sup>®</sup> Expert offers physicians' offices codes and icons denoting new, changed, and deleted language from the latest release (CPT<sup>®</sup> 2004), plus information that will help the coder find and use CPT<sup>®</sup> codes more easily. An extensive index, terms to know, and other additions help clarify the codes and speed assigning accurate codes. The product also provides valuable information about CPT<sup>®</sup> coding for Medicare Part B.

Inside you'll find:

- **New!** Crosswalk from CPT<sup>®</sup> to equivalent HCPCS codes helps Medicare billing
- **Exclusive** — Color Keys and Icons. Color keys reveal comprehensive NCCI edits, and icons denote Medicare, CLIA, and other common coding rules.
- **Exclusive** — Code-specific Definitions, Rules, and Tips pulled from the Medicare Carriers Manual and Coverage Issues Manual, among others.
- **Complete**—All 2004 CPT<sup>®</sup> codes and official, full descriptions
- 2004 Deleted codes with full descriptions and strikeouts to help you finish outstanding claims.
- ASC icon denoting ASC group.
- Color keys help you identify easily miscoded codes, unlisted codes, and codes not covered by Medicare
- Common icons from the AMA CPT<sup>®</sup> code book help you match information with the official book
- Simple, short introductions to each chapter describe how best to assure accuracy and speed claims
- Terms found in the nomenclature, defined, in glossary.
- Extensive, improved Index makes navigating easy.
- **Easy To Use.** Quick color references throughout, identifying unique nomenclature and rules, along with commonly misreported procedures that could impact your coding decisions.
- **Illustrated.** Detailed illustrations orient you to the procedures.

# A must-have resource for ICD-9-CM users!

## ICD-9-CM Changes: An Insider's View

**\$57.95**

Item No.4952

Available: September 2003

ISBN: 1-56337-486-2

*CD-9-CM Changes: An Insider's View* serves as a reference tool for understanding each of the ICD-9-CM code changes found in ICD-9-CM 2004.

### Features/Benefits

- **Rationale for the New Codes and Revised Code.** Knowing the reasons behind every new or revised code change is critical to adapting coding practices.
- **Explanation of Changes to Indexes, Conventions and Instructional Notes.** Understand what other changes will impact coding practices.
- **Clinical Presentation and Treatment.** Coders must understand the clinical presentation of a condition or the intricacies of a procedure in order to code correctly without under coding or over coding.
- **Clinical Definitions of Diagnoses and Procedures.** Recognize terms found in the medical record that pertains to the new codes ensuring correct application of the code changes.
- **Coding History and Changes.** Understanding how the condition was coded in the past and how it should be coded now impacts coding practices.
- **New! Coding Scenarios.** Examples of coding scenarios clarify application the new codes.
- **Organized by Each Chapter of ICD-9-CM.** Organizing the changes in the context of relationship to other codes provides insight to the rationale of the code changes.
- **Illustrations.** Illustrations are worth a thousand words and clarify some of the complex issues surrounding many of the code changes.
- **Annotated Official Addendum.** View the official addenda that contain all the changes with annotations to the three volumes of ICD-9-CM, including text deletions.

# Don't Let Unanswered Medicare Part B Billing Questions Lead to Denied Claims

## Medicare Desk Reference for Physicians

formerly the *Complete Guide to Part B Billing and Compliance*

**\$249.95**

Item No. 3023

**T**he most comprehensive, updateable compilation of billing regulations and coverage guidelines for Part B services available, the *Medicare Desk Reference for Physicians* is an A to Z guide for billing compliance that no physician office should be without. Organized like an encyclopedia, all entries in this book are based on common terms used in the health care field.

This indispensable resource is designed to provide medical practices with plain-English answers to Medicare's complex Part B billing requirements and compliance guidelines.

Here's how you'll benefit:

- File accurate claims the first time using expert analysis.
- Locate answers to Medicare's complex payment policies quickly.
- Reduce claims denials due to billing errors by understanding specific claims requirements for the CMS-1500.

- Stay up-to-date with Part B billing changes with a full year of updates.
- Minimize your exposure to possible fraud and abuse allegations.

Features Include:

- Topics organized alphabetically
- Complete book on CD with search capabilities and official source documents
- Official sources cited at the end of each chapter
- Compliance and billing tips for individual services
- Fraud Alerts

# Quick Answers to Complex HIPAA Questions!

## HIPAA Desk Reference

**\$229.95**

Item No. 2011

Available: October 2003

ISBN: 1-56329-949-6

**T**he updateable *HIPAA Desk Reference* provides practical guidance on the HIPAA privacy, security, electronic transactions, code sets, and identifier requirements. The *HIPAA Desk Reference* is organized in an easy-to-follow format to help users quickly find answers to complex questions. This book provides plain-English explanations of the laws, regulations, and guidance issued by the Department of Health and Human Services' Office of Civil Rights, the Centers for Medicare and Medicaid Services' Office of HIPAA Standards, and other federal and state enforcement organizations. The *HIPAA Desk Reference* is just what organizations need as a go-to source for interpretation of all the latest HIPAA regulatory changes.

- **EXCLUSIVE—Easy to Use A-to-Z Listing.** Our A-to-Z listing allows the you to look up key terms and find comprehensive answers to complex questions in plain English – for example, the difference between “address” and “required” in reference to the security rule, and the meaning of “situational” in reference to transactions.

- **EXCLUSIVE—HIPAA Action Alert.** You'll receive e-mail alerts that make you aware of proposed changes to rules, release dates, and recent industry findings.
- **FREE Updates to the Book and CD.** Stay up to date with the latest changes to the HIPAA regulations.
- **FREE E-book.** Complete book on CD, with hyperlinks to official source documents, keyword search capability, and the latest industry intelligence.

1-56337-459-5	2004 Coders' Desk Reference for Procedures	5763	December 2003
1-56337-520-6	2004 Coders' Desk Reference for HCPCS	4974	December 2003
1-56337-503-6	2004 Coders' Desk Reference for Diagnoses	5765	September 2003

No matter how much experience you have using ICD-9-CM, Physicians' Current Procedural Terminology (CPT®) and HCPCS codes, there are always questions that hold up the billing process. And because billing errors can result in fines, you can't afford to guess... A staple for coders of all levels since 1995, *Coders' Desk Reference for Procedures* (formerly known as *Coders' Desk Reference*) has been providing the **RIGHT** answers to vexing coding questions. And now, Ingenix has added two additional must-have resources for ICD-9-CM and HCPCS coding—*Coders' Desk Reference for Diagnoses* and *Coders' Desk Reference for HCPCS*—creating an essential coding suite for every library.

### Coders' Desk Reference for Procedures

- Curb claim denials or delays by using only updated CPT® codes and descriptions for more than 7,000 CPT® procedures.
- Improve your coding accuracy with lay descriptions of procedures and tests.
- Facilitate your coding with laboratory and radiology codes, along with lay descriptions for these complicated chapters.

### Coders' Desk Reference for Diagnoses

- Submit claims with updated ICD-9-CM codes.
- Decrease coding time with the help of comprehensive lay descriptions of ICD-9-CM codes, along with clinical explanations of conditions, diseases and syndromes.
- Enhance your coding knowledge with explanatory clinical descriptions on using ICD-9-CM codes in DRGs.

### Coders' Desk Reference for HCPCS

- Submit claims with updated HCPCS codes at your fingertips in a familiar format.
- Speed up your coding with comprehensive lay descriptions for HCPCS supply items and services.
- Learn the quickest way to bill and use HCPCS Level II codes successfully.

Book Only	<b>\$199.95</b>	No. 3492
Data File and Book	<b>\$459.95</b>	No. 3493

Available: Now

**M**any physicians miss out on revenue because they neglect to stay on top of their pricing. An unmanaged fee schedule may yield fees that are actually below the discounted fees offered by payers! But developing a fair and reliable fee schedule requires an understanding of fees charged in your area, for your specialty. Specific information for your geographic locality is necessary, as fees vary widely across the country. *Customized Fee Analyzer* provides customized reports with relative and actual charge data for your area and specialty. This is exactly the type of information you need to optimize your fee schedule.

Whether you are looking to revise your current fee schedule, negotiate a managed care contract, or conduct competitive analyses for a specific geographic location, *Customized Fee Analyzer* has the data you need.

- **Five Percentiles of Charge Data: 50th, 60th, 75th, 80th, and 95th.** Five reference points of charge data enables you to perform competitive analyses with confidence.
- **Exclusive—Database of Over 400 Million Charge Records.** Never second-guess the data

you are referencing. These are charges submitted by your peers.

- **Commercial Follow-up Days by Procedure.** Denotes the number of days the physician is responsible for follow-up care services under a specific Physicians' Current Procedural Terminology (CPT®) code.
- **HFMA Co-labeled Product.** Product has been reviewed by HFMA for quality, accuracy and practical use.
- **Also Available—Customized Fee Analyzer for Anesthesia and Pain Management.** This **NEW** fee analyzer provides a full range of anesthesia conversion factors for any three geozips, as well as actual charges for pain management codes for a selected geozip.

# Preface

*ICD-9-CM for Physicians* has been designed with the physician office coder in mind. The most recent official government versions of volumes 1 and 2 have been combined to provide physicians and their office staff with an ICD-9-CM book that is easy to use.

In addition, our technical experts have drawn upon their extensive hands-on experience to enhance the government's official version with valuable features essential to correct coding and reimbursement. With these enhancements, physician office coders will increase the efficiency and timeliness of claim submission for both Medicare and other third-party payers.

As you review the content, you'll find the following:

- All the official ICD-9-CM codes, indexes, notes, footnotes and symbols
- Complete official coding guidelines
- Our exclusive color coding, symbols, and footnotes that alert coders to coding and reimbursement issues. Medicare outpatient code edits, such as invalid fourth or fifth digit for diagnosis codes and circumstances under which Medicare may be secondary payer (MSP), are identified.
- Illustrations and clinically oriented definitions to aid in correct code assignment
- Symbols identifying new codes and text revisions; pages are dated to indicate when the changes were made
- Exclusive QuickFlip Color Tabs for quick, easy location of terms and codes in the index and tabular list

## USE OF OFFICIAL SOURCES

This *ICD-9-CM for Physicians* contains the official U.S. Department of Health and Human Services, ICD-9-CM codes, effective for the current year.

The color coding, footnotes and symbols, which identify coding and reimbursement issues, are derived from official federal government sources, including the Medicare Outpatient Code Editor as well as the knowledge of our technical experts.

## IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION SERVICE

If you have purchased the updateable *ICD-9-CM for Physicians*, your subscription includes an updating service throughout the year to keep the code book current and accurate. Whenever CMS issues changes or corrections to the ICD-9-CM codes, we will issue an update to the book. In July you will receive a list of all new, revised, and invalid codes for the upcoming year.

## TECHNICAL EDITORS

Anita C. Hart, RHIA, CCS, CCS-P  
Product Manager, Ingenix, Inc.

Ms. Hart's experience includes 15 years conducting and publishing research in clinical medicine and human genetics for Yale University, Massachusetts General Hospital, and Massachusetts Institute of Technology. In addition, Ms. Hart has supervised medical records management, health information management, coding and reimbursement, and worker's compensation issues as the office manager for a physical therapy rehabilitation clinic. Ms. Hart is an expert in physician and facility coding, reimbursement systems, and compliance issues. Ms. Hart developed the *Complete Coding Tutor, ICD-9-CM Changes: An Insider View*, and has served as technical consultant for numerous other publications for hospital and physician practices. Currently, Ms. Hart is the Product Manager and Technical Editor for the ICD-9-CM, ICD-10-CM/PCS and DRG product lines.

Catherine A. Hopkins, CPC  
Clinical/Technical Editor, Ingenix, Inc.

Ms. Hopkins has 17 years experience in the health care field. Her experience includes six years as office manager and senior coding specialist for a large multi-specialty practice. Ms. Hopkins has written several coding manuals and newsletters and has taught seminars on CPT, HCPCS, and ICD-9-CM coding. She also serves as technical support for various software products.

In addition to the editors, the following people have contributed to this book:

Elizabeth Boudrie, *Vice President, Publisher*  
Kerrie Hornsby, *Desktop Publishing Manager*  
Gregory Kemp, *Desktop Publishing Specialist*  
Stacy Perry, *Desktop Publishing Manager*  
Tracy Betzler, *Desktop Publishing Specialist*  
Irene Day, *Desktop Publishing Specialist*  
Nora Fitzpatrick, *Desktop Publishing Specialist*  
Paul Driscoll, *Illustrator*  
Sheri Bernard, *Product Director*  
Lynn Speirs, *Senior Director, Publishing Services*

## WHAT TO DO IF YOU HAVE QUESTIONS

If you have any questions call our customer service department toll-free at 800-INGENIX (464-3649), option 1.

If you have comments on the content of this book, please e-mail them to [customerservice@ingenix.com](mailto:customerservice@ingenix.com) or fax to 801-982-4033.

# Introduction

## HISTORY AND FUTURE OF ICD-9

The *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM) is based on the official version of the World Health Organization's Ninth Revision, *International Classification of Diseases* (ICD-9). ICD-9-CM classifies morbidity and mortality information for statistical purposes, indexing of hospital records by disease and operations, data storage, and retrieval.

This modification of ICD-9 supplants the Eighth Revision *International Classification of Diseases, Adapted for Use in the United States* (ICDA-8) and the *Hospital Adaptation of ICDA* (H-ICDA).

The concept of extending the *International Classification of Diseases* for use in hospital indexing was originally developed in response to a need for a more efficient basis for storage and retrieval of diagnostic data. In 1950, the U.S. Public Health Service and the Veterans Administration began independent tests of the *International Classification of Diseases* for hospital indexing purposes. The following year, the Columbia Presbyterian Medical Center in New York City adopted the *International Classification of Diseases, Sixth Revision*, with some modifications for use in its medical record department. A few years later, the Commission on Professional and Hospital Activities (CPHA) in Ann Arbor, Mich., adopted the *International Classification of Diseases* with similar modifications for use in hospitals participating in the Professional Activity Study.

The problem of adapting ICD for indexing hospital records was addressed by the U.S. National Committee on Vital and Health Statistics through its subcommittee on hospital statistics. The subcommittee reviewed the modifications made by the various users of ICD and proposed that uniform changes be made. This was done by a small working party.

In view of the growing interest in the use of the *International Classification of Diseases* for hospital indexing, a study was undertaken in 1956 by the American Hospital Association and the American Medical Record Association (then the American Association of Medical Record Librarians) of the relative efficiencies of coding systems for diagnostic indexing. This study indicated the *International Classification of Diseases* provided a suitable and efficient framework for indexing hospital records. The major users of the *International Classification of Diseases* for hospital indexing purposes then consolidated their experiences, and an adaptation was first published in December 1959. A revision was issued in 1962 and the first "Classification of Operations and Treatments" was included.

In 1966, the international conference for revising the *International Classification of Diseases* noted the eighth revision of ICD had been constructed with hospital indexing in mind and considered the revised classification suitable, in itself, for hospital use in some countries. However, it was recognized that the basic classification might provide inadequate detail for diagnostic indexing in other countries. A group of consultants was asked to study the eighth revision of ICD (ICD-8) for applicability to various users in the United States. This group recommended that further detail be provided for coding of hospital and morbidity data. The American Hospital Association was requested to develop the needed adaptation proposals. This was done by an advisory committee (the Advisory Committee to the Central Office on ICDA). In 1968 the United States Public Health Service published the product, *Eighth Revision International Classification of Diseases, Adapted for Use in the United States*. This became commonly known as ICDA-8, and beginning in 1968 it served as the basis for coding diagnostic data for both official morbidity and mortality statistics in the United States.

In 1968, the CPHA published the *Hospital Adaptation of ICDA* (H-ICDA) based on both the original ICD-8 and ICDA-8. In 1973, CPHA published a revision of H-ICDA, referred to as H-ICDA-2. Hospitals throughout the United States were divided in their use of these classifications until January 1979, when ICD-9-CM was made the single classification intended primarily for use in the United States, replacing these earlier related, but somewhat dissimilar, classifications.

Physicians have been required by law to submit diagnosis codes for Medicare reimbursement since the passage of the Medicare Catastrophic Coverage Act of 1988. This act requires physician offices to include the appropriate diagnosis codes when billing for services provided to Medicare beneficiaries on or after April 1, 1989. The Centers for Medicare and Medicaid Services (CMS) designated ICD-9-CM as the coding system physicians must use.

In 1993 the World Health Organization published the newest version of *International Classification of Diseases, Tenth Revision, ICD-10*. This version contains the greatest number of changes in the history of ICD. There are more codes (5,500 more than ICD-9) to allow more specific reporting of diseases and newly recognized conditions. ICD-10 consists of three volumes; tabular list (volume 1), instructions (volume 2) and the alphabetic index (volume 3). It contains 21 chapters including two supplementary ones. The codes are alphanumeric (A00-T98, V01-Y98 and Z00-Z99). Currently ICD-10 is being used in some European countries with implementation expected after the year 2000 in the United States.

## ICD-9-CM BACKGROUND

In February 1977, a steering committee was convened by the National Center for Health Statistics to provide advice and counsel in developing a clinical modification of ICD-9. The organizations represented on the steering committee included the following:

- American Association of Health Data Systems
- American Hospital Association
- American Medical Record Association
- Association for Health Records
- Council on Clinical Classifications
- Centers for Medicare and Medicaid Services (formerly known as Health Care Financing Administration), Department of Health and Human Services
- WHO Center for Classification of Diseases for North America, sponsored by the National Center for Health Statistics, Department of Health and Human Services

The Council on Clinical Classifications was sponsored by the following:

- American Academy of Pediatrics
- American College of Obstetricians and Gynecologists
- American College of Physicians
- American College of Surgeons
- American Psychiatric Association
- Commission on Professional and Hospital Activities

The steering committee met periodically in 1977. Clinical guidance and technical input were provided by task forces on classification from the Council on Clinical Classification's sponsoring organizations.

ICD-9-CM is a clinical modification of the World Health Organization's ICD-9. The term "clinical" is used to emphasize the modification's intent: to serve as a useful tool to classify morbidity data for indexing medical records, medical care review, and ambulatory and other medical care programs, as well as for basic health statistics. To describe the clinical picture of the patient, the codes must be more precise than those needed only for statistical groupings and trend analysis.

## CHARACTERISTICS OF ICD-9-CM

ICD-9-CM far exceeds its predecessors in the number of codes provided. The disease classification has been expanded to include health-related conditions and to provide greater specificity at the fifth-digit level of detail. These fifth digits are not optional; they are intended for use in recording the information substantiated in the clinical record.
