

# ANATOMY & PHYSIOLOGY

SEELEY • STEPHENS • TATE

# ANATOMY & PHYSIOLOGY

**ROD R. SEELEY, Ph.D.**

Professor of Physiology  
Idaho State University

**TRENT D. STEPHENS, Ph.D.**

Professor of Anatomy and Embryology  
Idaho State University

**PHILIP TATE, D.A. (Biological Education)**

Instructor of Anatomy and Physiology  
Phoenix College  
Maricopa Community College District

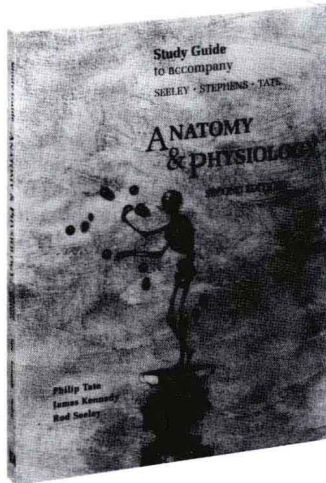

**SECOND EDITION**

 **Mosby  
Year Book**

St. Louis   Baltimore   Boston   Chicago   London   Philadelphia   Sydney   Toronto

## STUDY GUIDE

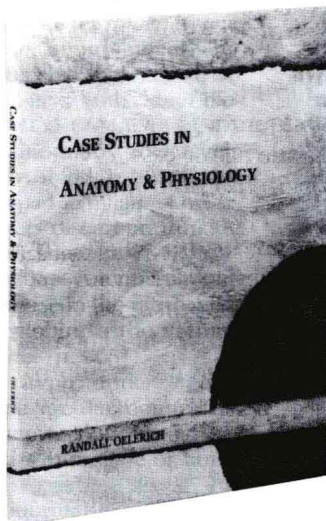

**Phil Tate, James Kennedy, and Rod Seeley  
1992 (ISBN 0-8016-4803-3)**

An invaluable study tool, this Study Guide reinforces the material in ANATOMY & PHYSIOLOGY, helping you understand and remember important content during exams.

Each chapter includes the Focus Statement, Content Learning Activities, and Quick Recall exercises designed to improve your retention of material.

A Mastery Learning Activity in each chapter can be used as a "Practice Test," reflecting the actual tests you will face in the classroom.

Answers to all questions in the Study Guide are provided, as well as explanations for the more complex questions.

## CASE STUDIES IN ANATOMY AND PHYSIOLOGY

**Randall Oelerich  
1992 (ISBN 0-8016-6658-9)**

This new learning resource helps you gain practical skills and self-confidence in applying your knowledge of anatomy and physiology to new situations.

Each case study includes learning objectives, the case presentation, case background, and questions about the case.

To get these excellent study partners, just ask your bookstore manager or call Mosby-Year Book toll-free at 800-633-6699 to order.

# Contents in Brief

## **PART I** ORGANIZATION OF THE HUMAN BODY

- 1** The Human Organism 3
- 2** The Chemical Basis of Life 29
- 3** Structure and Function of the Cell 63
- 4** Histology: The Study of Tissues 103

## **PART II** SUPPORT AND MOVEMENT

- 5** Integumentary System 135
- 6** Skeletal System: Histology and Development 157
- 7** Skeletal System: Gross Anatomy 183
- 8** Articulations and Biomechanics of Body Movement 227
- 9** Membrane Potentials 253
- 10** Muscular System: Histology and Physiology 271
- 11** Muscular System: Gross Anatomy 303

## **PART III** INTEGRATION AND CONTROL SYSTEMS

- 12** Functional Organization of Nervous Tissue 353
- 13** Central Nervous System: Brain and Spinal Cord 381
- 14** Peripheral Nervous System: Cranial Nerves and Spinal Nerves 429
- 15** The Senses 457
- 16** Autonomic Nervous System 505
- 17** Functional Organization of the Endocrine System 525
- 18** Endocrine Glands 545

**PART IV REGULATION AND MAINTENANCE**

- 19**    *Cardiovascular System: Blood*    585
- 20**    *Cardiovascular System: The Heart*    611
- 21**    *Cardiovascular System: Peripheral Circulation and Regulation*    645
- 22**    *Lymphatic Organs and Immunity*    699
- 23**    *Respiratory System*    735
- 24**    *Digestive System*    771
- 25**    *Nutrition and Metabolism*    819
- 26**    *Urinary System*    849
- 27**    *Water, Electrolytes, and Acid-Base Balance*    881

**PART V REPRODUCTION AND DEVELOPMENT**

- 28**    *Reproductive System*    907
- 29**    *Development, Growth, Aging, and Genetics*    947

# Contents

## **I ORGANIZATION OF THE HUMAN BODY**

### **1 The Human Organism 3**

- Anatomy, 4
- Physiology, 4
- Structural and functional organization, 4
  - Molecular, 4
  - Organelle, 5
  - Cellular, 5
  - Tissue, 5
  - Organ, 5
  - Organ system, 6
  - Organism, 6
- The human organism, 11
  - Characteristics of life, 11
  - Biomedical research, 11
- Homeostasis, 12
  - Negative feedback, 12
  - Positive feedback, 15
- Terminology and the body plan, 16
  - Directional terms, 16
  - Planes, 18
  - Body regions, 19
  - Body cavities, 19

### **2 The Chemical Basis of Life 29**

- Basic chemistry, 30
  - Matter and elements, 30
  - Atoms, 30
  - Electrons and chemical bonds, 32
- Chemical reactions, 37
  - Classification of chemical reactions, 37
  - Reversible reactions, 38
  - Rate of chemical reactions, 39
- Energy, 39
  - Electrical energy, 39
  - Electromagnetic energy, 39
  - Chemical energy, 40
  - Heat energy, 41
- Inorganic molecules, 41
  - Water, 41
  - Solution concentrations, 41
  - Acids and bases, 42
  - Oxygen, 44
  - Carbon dioxide, 44
- Organic molecules, 44
  - Carbohydrates, 44
  - Lipids, 46
  - Proteins, 49
  - Nucleic acids: DNA and RNA, 54
  - Adenosine triphosphate, 57

### **3** *Structure and Function of the Cell* 63

Structure of the plasma membrane, 65  
Movement through the plasma membrane, 66  
    Diffusion, 66  
    Osmosis, 67  
    Filtration, 69  
    Mediated transport mechanisms, 69  
    Endocytosis and exocytosis, 72  
Nucleus, 75  
Cytoplasm, 76  
    Cytosol, 76  
    Organelles, 76  
Whole cell activity, 85  
Cell metabolism, 85  
Protein synthesis, 87  
    Transcription, 88  
    Translation, 89  
    Regulation of protein synthesis, 91  
Cell life cycle, 91  
    Interphase, 91  
    Cell division, 94  
Meiosis, 94

### **4** *Histology: The Study of Tissues* 103

Epithelial tissue, 104  
    Classification of epithelium, 104  
    Functional characteristics, 104  
    Glands, 112  
Connective tissue, 113  
    Connective tissue cells, 113  
    Protein fibers of the matrix, 113  
    Other matrix molecules, 113  
    Classification of connective tissue, 114  
    Matrix with fibers as the primary feature, 114  
    Matrix with both protein fibers and ground substance, 120  
    Predominantly fluid matrix, 121  
Muscular tissue, 121  
Nervous tissue, 123  
Embryonic tissue development, 124  
Membranes, 124  
Inflammation, 124  
Tissue repair, 125

# 11 SUPPORT AND MOVEMENT

## 5 Integumentary System 135

- Hypodermis, 136
- Skin, 136
  - Dermis, 136
  - Epidermis, 136
  - Thick and thin skin, 139
  - Skin color, 139
- Accessory skin structures, 141
  - Hair, 141
  - Muscles, 145
  - Glands, 145
  - Nails, 147
- Functions of the integumentary system, 150
  - Protection, 150
  - Temperature regulation, 150
  - Vitamin D production, 150
  - Sensation, 151
  - Excretion, 151
- Effects of aging on the integumentary system, 151

## 6 Skeletal System: Histology and Development 157

- Functions of the skeletal system, 158
- Tendons and ligaments, 158
- Hyaline cartilage, 158
- Bone, 159
  - Bone shape, 159
  - Bone anatomy, 159
  - Bone histology, 162
- Bone ossification, 165
  - Intramembranous ossification, 166
  - Endochondral ossification, 166
- Bone growth, 168
  - Appositional growth, 168
  - Endochondral growth, 168
  - Factors affecting bone growth, 170
- Maintenance of blood calcium levels, 171
- Bone remodeling, 172
- Bone repair, 174

## 7 Skeletal System: Gross Anatomy 183

- General considerations, 184
- Axial skeleton, 186
  - Skull, 186
  - Vertebral column, 203
  - Thoracic cage, 208
- Appendicular skeleton, 210
  - Upper limb, 210
  - Lower limb, 215

## 8 Articulations and Biomechanics of Body Movement 227

- Naming of joints, 229
- Classes of joints, 229
  - Fibrous joints, 229
  - Cartilaginous joints, 231
  - Synovial joints, 234
- Types of movement, 236
  - Angular movements, 236
  - Circular movements, 240
  - Special movements, 241
- Description of selected joints, 241
  - Temporomandibular joint, 241
  - Shoulder joint, 242
  - Hip joint, 244
  - Knee joint, 244
  - Ankle joint, 248
  - Arches of the foot, 249

## 9 Membrane Potentials 253

- Concentration differences across the cell membrane, 254
- Resting membrane potential, 255
- Movement of ions through the cell membrane, 258
  - Ions channels, 258
  - Sodium-potassium exchange pump, 260
- Electrically excitable cells, 260
  - Local potential, 260
  - Action potential, 262
  - Propagation of action potentials, 263
  - Action potential frequency, 265

## **10** *Muscular System: Histology and Physiology* 271

- General functional characteristics of muscle, 272
- Skeletal muscle: structure, 273
  - Connective tissue, 273
  - Muscle fibers, myofibrils, sarcomeres, and myofilaments, 274
- Sliding filament theory, 278
- Physiology of skeletal muscle fibers, 279
  - Neuromuscular junction, 279
  - Excitation contraction coupling, 282
  - Energy requirements for contraction, 283
  - Muscle relaxation, 284
- Physiology of skeletal muscle, 284
  - Muscle twitch, 284
  - Stimulus strength and muscle contraction, 286
  - Stimulus frequency and muscle contraction, 287
  - Types of muscle contractions, 289
  - Length vs. tension, 289
  - Fatigue, 290
  - Physiological contracture and rigor mortis, 291
  - Energy sources, 291
  - Oxygen debt, 291
  - Slow and fast fibers, 292
  - Effects of exercise, 293
  - Heat production, 293
- Smooth muscle, 294
  - Smooth-muscle types, 294
  - Electrical properties of smooth muscle, 294
  - Functional properties of smooth muscle, 294
- Cardiac muscle, 296

## **11** *Muscular System: Gross Anatomy* 303

- General principles, 306
  - Muscle shapes, 306
  - Nomenclature, 306
  - Movements accomplished by muscles, 307
- Head muscles, 309
  - Head movement, 309
  - Facial expression, 312
  - Mastication, 315
  - Tongue movements, 317
  - Swallowing and the larynx, 318
  - Movements of the eyeball, 320
- Trunk muscles, 321
  - Muscles moving the vertebral column, 321
  - Thoracic muscles, 324
  - Abdominal wall, 324
  - Pelvic floor and perineum, 327
- Upper limb muscles, 328
  - Scapular movements, 328
  - Arm movements, 328
  - Forearm movements, 334
  - Wrist, hand, and finger movements, 336
- Lower limb muscles, 338
  - Thigh movements, 338
  - Ankle, foot, and toe movements, 342

# III

## INTEGRATION AND CONTROL SYSTEMS

### 12 *Functional Organization of Nervous Tissue* 353

Divisions of the nervous system, 354

Cells of the nervous system, 356

Neurons, 356

Neuron types, 358

Neuroglia, 358

Axon sheaths, 361

Organization of nervous tissue, 363

The synapse, 364

Receptor molecules in synapses, 365

Neurotransmitters and neuromodulators, 365

EPSPs and IPSPs, 367

Presynaptic inhibition and facilitation, 369

Spatial and temporal summation, 369

Reflexes, 374

Neuronal circuits, 374

### 13 *Central Nervous System: Brain and Spinal Cord* 381

Development, 382

Brainstem, 384

Medulla oblongata, 384

Pons, 387

Midbrain, 387

Reticular formation, 388

Diencephalon, 388

Thalamus, 388

Subthalamus, 388

Epithalamus, 388

Hypothalamus, 390

Cerebrum, 390

Cerebral cortex, 391

Basal ganglia, 397

Limbic system, 398

Cerebellum, 398

Spinal cord, 400

General structure, 400

Cross section, 401

Spinal reflexes, 402

Stretch reflex, 402

Golgi tendon reflex, 405

Withdrawal reflex, 405

Spinal pathways, 407

Ascending pathways, 410

Descending pathways, 414

Meninges and cerebrospinal fluid, 419

Meninges, 419

Ventricles, 419

Cerebrospinal fluid, 420

## **14** *Peripheral Nervous System: Cranial Nerves and Spinal Nerves* 429

- Cranial nerves, 430
  - Sensory, 436
  - Somatomotor/proprioception, 437
  - Somatomotor/proprioception and sensory, 437
  - Somatomotor/proprioception and parasympathetic, 438
  - Somatomotor/proprioception, sensory, and parasympathetic, 438
- Spinal nerves, 438
  - Cervical plexus, 441
  - Brachial plexus, 442
  - Lumbar and sacral plexuses, 447
  - Coccygeal plexus, 453

## **15** *The Senses* 457

- Classification of the senses, 458
- Sensation, 458
- Types of afferent nerve endings, 459
- Olfaction, 462
  - Olfactory epithelium and bulb, 462
  - Neuronal pathways for olfaction, 462
- Taste, 464
  - Histology of taste buds, 464
  - Function of taste, 464
  - Neuronal pathways for taste, 466
- Visual system, 467
  - Accessory structures, 467
  - Anatomy of the eye, 470
  - Functions of the complete eye, 473
  - Structure and function of the retina, 476
  - Neuronal pathways for vision, 480
- Hearing and balance, 484
  - Auditory structures and their functions, 484
  - Auditory function, 488
  - Neuronal pathways for hearing, 493
  - Balance, 494
  - Neuronal pathways for balance, 498

## **16** *Autonomic Nervous System* 505

- Contrasting the somatomotor and autonomic nervous systems, 506
- Divisions of the autonomic nervous system:
  - structural features, 507
  - Sympathetic division, 507
  - Parasympathetic division, 507
- Neurotransmitter substances and receptors, 511
- Regulation of the autonomic nervous system, 514
- Functional generalizations about the autonomic nervous system, 516
  - Stimulatory vs. inhibitory effects, 516
  - Dual innervation, 516
  - Opposite effects, 516
  - Cooperative effects, 519
  - General vs. localized effects, 519
  - Functions at rest vs. activity, 520

## **17 Functional Organization of the Endocrine System** 525

- General characteristics of the endocrine system, 526
- Chemical structure of hormones, 529
- Control of secretion rate, 529
- Transport and distribution in the body, 532
- Metabolism and excretion, 533
- Interaction of hormones with their target tissues, 534
- Classes of hormone receptors, 536
  - Membrane-bound receptors and the second-messenger model, 536
  - Intracellular receptor mechanism, 538

## **18 Endocrine Glands** 545

- Pituitary gland and hypothalamus, 546
  - Structure of the pituitary gland, 546
  - Relationship of the pituitary to the brain, 547
- Hormones of the pituitary gland, 550
  - Neurohypophyseal hormones, 550
  - Adenohypophyseal hormones, 552
- Thyroid gland, 554
  - Histology, 555
  - Thyroid hormones, 555
  - Calcitonin, 559
- Parathyroid glands, 559
- Adrenal glands, 562
  - Histology, 563
  - Hormones of the adrenal medulla, 563
  - Hormones of the adrenal cortex, 564
- Pancreas, 567
  - Histology, 567
  - Effect of insulin and glucagon on their target tissues, 567
  - Regulation of pancreatic hormone secretion, 569
- Hormonal regulation of nutrients, 571
- Reproductive hormones, 575
- Hormones of the pineal body, thymus gland, and others, 575
- Hormonelike substances, 577

## **IV REGULATION AND MAINTENANCE**

### **19 Cardiovascular System: Blood 585**

- Functions, 586
  - Transportation, 586
  - Maintenance, 586
  - Protection, 586
- Plasma, 586
- Formed elements, 586
  - Production of formed elements, 586
  - Erythrocytes, 590
  - Leukocytes, 594
  - Platelets, 595
- Hemostasis, 595
  - Vascular spasm, 596
  - Platelet plug formation, 596
  - Coagulation, 596
  - Control of clot formation, 599
  - Clot retraction and dissolution, 599
- Blood grouping, 600
  - ABO blood group, 601
  - Rh blood group, 602
- Diagnostic blood tests, 602
  - Type and cross match, 602
  - Complete blood count, 603
  - White blood cell differential count, 604
  - Clotting, 604
  - Blood chemistry, 605

### **20 Cardiovascular System: The Heart 611**

- Size, form, and location of the heart, 612
- Anatomy of the heart, 612
  - Pericardium, 612
  - External anatomy, 614
  - Heart chambers and valves, 616
- Route of blood flow through the heart, 618
- Histology, 619
  - Heart skeleton, 619
  - Heart wall, 619
  - Cardiac muscle, 619
  - Conducting system, 622
- Electrical properties, 623
  - Action potentials, 623
  - Authorhythmicity of cardiac muscle, 624
  - Refractory period of cardiac muscle, 624
  - Electrocardiogram, 624
- Cardiac cycle, 626
  - Systole and diastole, 629
  - Aortic pressure curve, 631
  - Heart sounds, 631
- Regulation of the heart, 632
  - Intrinsic regulation, 632
  - Extrinsic regulation, 632
- Heart and homeostasis, 635
  - Effect of blood pressure, 635
  - Effect of pH, carbon dioxide, and oxygen, 637
  - Effect of extracellular ion concentration, 637
  - Effect of body temperature, 637

## 21 *Cardiovascular System: Peripheral Circulation and Regulation* 645

- General features of blood vessel structure, 646
  - Capillaries, 646
  - Structure of arteries and veins, 647
  - Nerves, 650
  - Aging of the arteries, 651
- Pulmonary circulation, 651
- Systemic circulation: arteries, 651
  - Aorta, 651
  - Coronary arteries, 653
  - Arteries to the head and neck, 653
  - Arteries of the upper limb, 656
  - Thoracic aorta and its branches, 658
  - Abdominal aorta and its branches, 658
  - Arteries of the pelvis, 661
  - Arteries of the lower limb, 662
- Systemic circulation: veins, 662
  - Veins draining the heart, 662
  - Veins of the head and neck, 662
  - Veins of the upper limb, 662
  - Veins of the thorax, 666
  - Veins of the abdomen and pelvis, 667
  - Veins of the lower limb, 669
- Lymph vessels, 670
  - Thoracic duct, 670
  - Right lymphatic duct, 672
- Physics of circulation, 672
  - Viscosity, 672
  - Laminar and turbulent flow in vessels, 672
  - Blood pressure, 673
  - Rate of blood flow, 673
  - Poiseuille's law, 674
  - Critical closing pressures and the law of LaPlace, 674
  - Vascular compliance, 674
- Physiology of systemic circulation, 675
  - Cross-sectional area of blood vessels, 675
  - Pressure and resistance, 676
  - Pulse pressure, 677
  - Capillary exchange, 678
  - Functional characteristics of veins, 679
  - Hydrostatic pressure and the effect of gravity, 679
- Control of blood flow in tissues, 680
  - Local control of blood flow by the tissues, 680
  - Nervous regulation of local circulation, 682
- Regulation of mean arterial pressure, 683
  - Short-term regulation of blood pressure, 686
  - Long-term regulation of blood pressure, 692

## 22 *Lymphatic Organs and Immunity* 699

- Lymphatic organs, 701
  - Diffuse lymphatic tissue and lymph nodules, 701
  - Tonsils, 701
  - Lymph nodes, 702
  - Spleen, 703
  - Thymus, 703
- Immunity, 706
- Nonspecific resistance, 706
  - Mechanical mechanisms, 706
  - Chemicals, 706
  - Cells, 707
  - Inflammatory response, 710
- Specific immunity, 712
  - Origin and development of lymphocytes, 712
  - Activation of lymphocytes, 714
  - Inhibition of lymphocytes, 717
  - Antibody-mediated immunity, 719
  - Cell-mediated immunity, 723
- Acquired immunity, 724
  - Active natural immunity, 724
  - Active artificial immunity, 724
  - Passive natural immunity, 726
  - Passive artificial immunity, 726

## 23 *Respiratory System* 735

- Anatomy and histology, 736
  - Nose and nasal cavity, 736
  - Pharynx, 737
  - Larynx, 738
  - Trachea, 738
  - Bronchi, 740
  - Lungs, 740
  - Pleura, 742
  - Blood supply, 742
  - Muscles of respiration, 744
  - Thoracic wall, 744
- Ventilation and lung volumes, 744
  - Pressure differences and air flow, 744
  - Collapse of the lungs, 745
  - Compliance of the lungs and the thorax, 747
  - Pulmonary volumes and capacities, 747
  - Minute respiratory volume and alveolar ventilation rate, 748
- Physical principles of gas exchange, 749
  - Partial pressure, 749
  - Diffusion of gases through liquids, 750
  - Diffusion of gases through the respiratory membrane, 751
  - Relationship between ventilation and capillary blood flow, 752
- Oxygen and carbon dioxide transport in the blood, 752
  - Oxygen diffusion gradients, 753
  - Carbon dioxide diffusion gradients, 753
  - Hemoglobin and oxygen transport, 754
  - Transport of carbon dioxide, 757
- Control of respiration, 758
  - Nervous control of rhythmic ventilation, 758
  - Chemical control of respiration, 761
  - Effect of exercise on respiratory movements, 764

## 24 *Digestive System* 771

- General overview, 772
- Anatomy overview, 772
- Histology overview, 772
  - Mucosa, 773
  - Submucosa, 773
  - Muscularis, 773
  - Serosa or adventitia, 773
- Physiology overview, 775
  - Ingestion, 775
  - Mastication, 775
  - Propulsion, 775
  - Mixing, 776
  - Secretion, 776
  - Digestion, 776
  - Absorption, 776
  - Transportation, 776
  - Excretion, 776
  - Regulation, 776
- Anatomy and histology of the digestive tract, 776
  - Oral cavity, 776
  - Pharynx, 781
  - Esophagus, 781
  - Stomach, 781
  - Small intestine, 782
  - Liver, 787
  - Gallbladder, 788
  - Pancreas, 788
  - Large intestine, 788
  - Peritoneum, 790
- Functions of the digestive system, 791
  - Functions of the oral cavity, 791
  - Deglutition, 793
  - Stomach functions, 795
  - Functions of the small intestine, 801
  - Liver functions, 803
  - Functions of the gallbladder, 804
  - Functions of the pancreas, 804
  - Functions of the large intestine, 805
- Digestion, absorption, and transport, 807
  - Carbohydrates, 807
  - Lipids, 808
  - Proteins, 809
  - Water, 811
  - Ions, 811

## **25** *Nutrition and Metabolism* 819

- Nutrition, 820
  - Nutrients, 820
  - Kilocalories, 820
  - Carbohydrates, 820
  - Lipids, 822
  - Proteins, 823
  - Vitamins, 823
  - Minerals, 825
- Metabolism, 826
- Carbohydrate metabolism, 827
  - Glycolysis, 827
  - Anaerobic respiration, 830
  - Aerobic respiration, 831
- Lipid metabolism, 834
- Protein metabolism, 836
- Interconversion of nutrient molecules, 837
- Metabolic states, 839
- Metabolic rate, 839
- Body temperature regulation, 843

## **26** *Urinary System* 849

- Urinary system, 850
  - Kidneys, 850
  - Arteries and veins, 856
  - Ureters and urinary bladder, 857
- Urine production, 858
  - Filtration, 858
  - Tubular reabsorption, 861
  - Tubular secretion, 864
  - Urine concentration mechanism, 864
- Regulation of urine concentration and volume, 867
  - Hormonal mechanisms, 867
  - Autoregulation, 871
  - Effect of sympathetic innervation on kidney function, 871
- Clearance and tubular maximum, 871
- Urine movement, 872
  - Urine, flow through the nephron and the ureters, 872

## **27** *Water, Electrolytes, and Acid-Base Balance* 881

- Body fluids, 883
- Regulation of intracellular fluid composition, 883
- Regulation of extracellular fluid composition, 883
- Regulation of ion concentrations, 884
  - Sodium ions, 884
  - Chloride ions, 888
  - Potassium ions, 888
  - Calcium ions, 888
  - Phosphate ions, 891
- Regulation of water content, 891
- Regulation of acid-base balance, 894
  - Acids and bases, 894
  - Buffer systems, 894
  - Mechanisms of acid-base balance regulation, 895

## **V REPRODUCTION AND DEVELOPMENT**

### **28 Reproductive System 907**

- Male reproductive system, 909
  - Scrotum, 909
  - Perineum, 911
  - Testes, 911
  - Ducts, 914
  - Accessory glands, 917
- Physiology of male reproduction, 918
  - Regulation of sex hormone secretion, 918
  - Puberty, 919
  - Effects of testosterone, 919
  - Male sexual behavior and the male sex act, 919
- Female reproductive system, 920
  - Ovaries, 922
  - Uterine tubes, 926
  - Uterus, 926
  - Vagina, 927
  - External genitalia, 927
  - Perineum, 929
  - Mammary glands, 929
- Physiology of female reproduction, 930
  - Puberty, 930
  - Menstrual cycle, 930
  - Female sexual behavior and the female sex act, 933
  - Female fertility and pregnancy, 934
  - Menopause, 936

### **29 Development, Growth, Aging, and Genetics 947**

- Prenatal development, 948
  - Fertilization, 948
  - Early cell division, 948
  - Morula and blastocyst, 948
  - Implantation of the blastocyst and development of the placenta, 948
  - Formation of the germ layers, 952
  - Neural tube and neural crest formation, 953
  - Somite formation, 954
  - Formation of the gut and body cavities, 954
  - Limb bud development, 956
  - Development of the face, 956
  - Development of the organ systems, 957
  - Growth of the fetus, 965
- Parturition, 966
- The newborn, 969
  - Circulatory changes, 969
  - Digestive changes, 970
  - APGAR scores, 972
- Lactation, 972
- First year after birth, 973
- Life stages, 974
- Aging, 974
- Death, 975
- Genetics, 975
  - Chromosomes, 976
  - Patterns of inheritance, 976

#### **APPENDIXES**

- A** *Mini-Atlas of Human Anatomy, A-1*
- B** *Table of Measurements, B-1*
- C** *Scientific Notation, C-1*
- D** *Solution Concentrations, D-1*
- E** *pH, E-1*
- F** *Some Reference Laboratory Values, F-1*

**Glossary, G-1**
