Fight cancer with a will

When drawing up your will, please remember the vital work being done by the Imperial Cancer Research Fund which is fighting all forms of cancer, including leukaemia, in its own laboratories. It has no official grants and is entirely supported by voluntary contributions.

Form of Bequest

I hereby bequeath the sum of..... pounds free of duty to the Imperial Cancer Research Fund, Lincoln's Inn Fields, London, WC2A 3PX for the purpose of scientific research, and I direct that the receipt of the Honorary Treasurer or Secretary shall be a good discharge for such legacy.

Please write for further information to: The Secretary,
Imperial Cancer Research Fund (Dept. 193).

New Medical Books

Clinical Cardiac Radiology

Keith Jefferson, MA, FRCP, FFR and Simon Rees, MA, MRCP, FFR

This is a practical book on the use of chest X-ray in heart disease, written for radiologists, physicians and surgeons. It is based on a study of films from over 1,500 patients in whom the anatomy of the heart and the physiology of the circulation were known, computer analysis being used where appropriate. The book contains over 500 radiographs, with numerous diagrams and ample references.

1973 320 pp., illustrated 0 407 13575 8 £15.00

Clinical Genetics 2nd Edition

Edited by Arnold Sorsby, CBE, MD, FRCS

This is a comprehensive textbook of clinical genetics, with contributions from thirty-one outstanding British and American authorities.

After an opening section dealing with general problems, twenty-one chapters are devoted to the genetic aspects of the individual specialties, such as metabolic disorders, the muscles, the central nervous system, the haemopoietic system and cancer. A concluding chapter deals with syndromes.

1973 658 pp., illustrated 0 407 13651 7 £17.00

The Kidney

Jan Brod, MD, DrSc, FRCP(Lond)

This book is the author's distillation of thirty years' experience at the frontier of nephrological research. Renal physiology and clinical medicine are treated throughout in relation to the life processes of the whole body.

The text contains approximately five thousand references to the nephrological literature, which will be invaluable to those who wish to pursue particular topics in greater depth.

1973 750 pp., illustrated 0 407 23900 6 £28.00

Postgraduate Obstetrics and Gynaecology 4th Edition

J. C. McClure Browne, BSc(Hons), MB, BS, FRCS(Ed), FRCOG

With a contribution by **Erica Wachtel, MD**

This book is recognized as the standard text for postgraduate study and has now been completely updated to take in the many significant advances in the practice of obstetrics and gynaecology. New sections have been added on abortion, sterilization, contraception and exfoliative cytology.

1973 692 pp., illustrated 0 407 36121 9 £15.00

Gray's Anatomy

Thirty-fifth Edition

■ The essential factual content of **GRAY'S ANATOMY** has been maintained and indeed increased in all sections; but the functional and experimental aspects have received much greater emphasis.

■ The references now over 3,000 are not only grouped at the end of the book where they are shown in full detail, but they are also shown concisely as footnotes on the appropriate text pages.

■ 600 specially prepared illustrations have been introduced, and 200 old ones discarded.

■ The new illustrations include about 200 pieces of commissioned artwork and 235 photographs—almost all in colour, about 80 electron micrographs and 65 radiographs.

■ The addition of the new illustrations, overall revision, and much new writing, has increased the volume's size by some 30%.

■ **GRAY'S ANATOMY** continues to be a useful book for undergraduates and its use to postgraduates has been increased.

1488 pages 298 mm x 232 mm
new format in double column fully illustrated with line drawings, colour photographs, electron micrographs and radiographs which now number over 1,600.

Septtrin

a story of success

decisive action

Bactericidal against a wide range of organisms, including *Proteus* sp, *E coli*, *H influenzae*. Double attack on bacteria substantially reduces the chances of resistant strains developing.

rapid response

Fast absorption from the gut to give peak plasma concentrations in 2-4 hours. Quick eradication of pathogens speeds the patient's recovery.

ease of treatment

Simple dosage regimen. Available in tablet and suspension forms.

Septtrin

in bacterial infections

SEPTRIN* Tablets, SEPTRIN Adult Suspension, SEPTRIN Paediatric Tablets and SEPTRIN Paediatric Suspension contain trimethoprim and sulphamethoxazole. Full information is available on request.
