PREFACE

Published annually, this book—Leading Cases in Constitutional Law—includes all the significant opinions handed down during the Supreme Court’s most recent Term, as well as previous Terms.

Although it might seem ironic for the authors of a nearly 1800–page constitutional law casebook also to produce this compact alternative, we have repeatedly heard colleagues express the need for a shorter, less expensive, more bare-bones book for a basic course in constitutional law. This book fills the gap that our colleagues identified. By judicious editing of the most important decisions of the Supreme Court and careful summarizing of less significant cases, we have encompassed the “essentials” for a constitutional law course in this paperback volume.

This book’s organization is very similar to that of our much larger and more traditional one, which includes an abundance of Notes and Comments. That larger book should serve as a resource for those who use this volume.

Cases and statutory citations, as well as footnotes of the Court, have sometimes been omitted without specification; other omissions are indicated by asterisks or by brackets. Numbered footnotes are from the original material; lettered footnotes are ours.
