Drug Notice

The contributors, the editors, and the publisher have made every effort to ensure the accuracy and appropriateness of the drug dosages presented in this textbook. The medications described do not necessarily have specific approval by the Food and Drug Administration for use in the diseases and dosages for which they are recommended. The package insert for each drug should be consulted for use and dosage as approved by the FDA. Because standards for usage change, it is advisable to keep abreast of revised recommendations, particularly those concerning new drugs.
