PREFACE

Research into the cognitive strategies required for effective knowledge acquisition, storage, and use has exploded during the past few years. Work on study strategies, once an isolated and largely atheoretical area of prescriptive manuals and race-horse training studies, has suddenly blossomed into an interdisciplinary topic of considerable theoretical and practical concern. Drawing upon advances in fields such as cognitive, developmental, educational, and social psychology, current research on learning and study strategies reflects concerns about cognitive, metacognitive, and affective aspects of the learner and the instructional task and interactions between learners and tasks.

Learning and Study Strategies reflects the theoretical diversity and interdisciplinary nature of current research on the cognitive strategies of autonomous learning. Topics such as metacognition, attribution theory, self-efficacy, direct instruction, attention, and problem solving are discussed by leading researchers of learning and study strategies. Further, the contributors to this volume acknowledge and address the concerns of educators at the primary, secondary, and postsecondary school levels. This blend of theory and practice is an important feature of this volume.

Learning and Study Strategies is organized around three critical issues: assessment of an individual's strategic behaviors, delivery of strategy instruction, and evaluation of strategy instruction and research. The discussion begins with two stage-setting chapters. McKeachie examines the need for strategy training in terms of current conditions in our schools and colleges. Mayer examines the conceptual bases of learning strategies, drawing particularly on cognitive psychology.

In the section on assessment, Weinstein, Zimmermann, and Palmer review assessment instruments and describe the development and evaluation of the Learning and Study Strategies Inventory (LASSI). Palmer and Goetz argue that in order to understand students' selection and use of strategies we

must examine their beliefs about self and strategies. Garner cautions about the use of self-reports of strategy selection and implementation. Reynolds and Shirey report studies that circumvent Garner's concerns by the use of on-line measures to examine the role of attention in studying.

The section on instruction represents a variety of approaches. Dansereau outlines his research on cooperative learning, in which the students teach each other (and themselves). Winograd and Hare review work on direct instruction of strategies, in which the teacher delivers explicit information about strategy use to the students. McCombs calls for strategy instruction that combines cognitive, metacognitive, and affective components. Schmeck discusses the consideration of individuals' strategies in the context of his model of learning styles in order to reconcile strategy instruction with individuals' differing styles and personalities. Schallert, Alexander, and Goetz examine implicit strategy instruction provided by instructors and texts in college courses. O'Malley, Russo, Chamot, and Stewner-Manzanares examine the role of strategies in the learning of English as a second language. Jones describes efforts to develop curriculum for the Chicago Public Schools that translates advances in "laboratory" research into gains in the classroom.

Evaluation of strategy instruction and research is considered from methodological, theoretical, and applied perspectives. Willson critically examines experimental designs and statistical techniques employed in the area and suggests alternative procedures that address some of the problems and gaps. Rothkopf ponders what effective strategies are "really like" and what is required to get students to use them. Wittrock views the work on learning and study strategies as reflective of current theoretical views in cognitive psychology, notably his generative process model. Paris considers the theoretical models and metaphors that have guided strategy research and the ways in which they have constrained this research. The chapters by Wilson and Miles express the need to provide information and instructional techniques for learning and study strategies to the educational practitioners in primary, secondary, and postsecondary schools. Wilson and Miles also discuss the pitfalls that threaten such translation and implementation.

The intended audience for this volume is primarily educators and researchers in higher education. More specifically, this book should be of interest to individuals whose areas of interest include comprehension, instruction, learning, and memory. Instructors of study skills and developmental reading courses should also profit from reading this volume, as should teacher trainers and public school resource personnel.

The chapters included in this volume were originally presented at a conference funded by the Basic Research Program of the Army Research Institute, jointly sponsored by the University of Texas and Texas A&M University, and held at the Texas A&M University campus during October 1984.

The editors and authors would like to express their deep appreciation to the members of these institutions who worked so hard to help make the conference and the book a success and, we hope, an important contribution to the field. In particular, we would like to thank Robert Sasmor and Judith Orasanu from the Army Research Institute, Mollie Banks and Michael Thomas from the University of Texas, and Michael Ash and William Peters from Texas A&M University.

CONTENTS

Contributors	xiii
Preface	xv

PART I. INTRODUCTION: TWO PERSPECTIVES ON LEARNING AND STUDY STRATEGIES

1. THE NEED FOR STUDY STRATEGY TRAINING	3
<i>W. J. McKeachie</i>	
2. LEARNING STRATEGIES: AN OVERVIEW	11
<i>Richard E. Mayer</i>	
I. Three Views of Learning	12
II. Four Components of Learning	14
III. Can Students Learn to Manipulate Their Cognitive Processes?	18
IV. An Example	20
V. Research Issues	21
VI. General Conclusion	21
References	22

PART II. ISSUES IN THE ASSESSMENT OF LEARNING AND STUDY STRATEGIES

3. ASSESSING LEARNING STRATEGIES: THE DESIGN AND DEVELOPMENT OF THE LASSI	25
<i>Claire E. Weinstein, Stephen A. Zimmerman, and David R. Palmer</i>	
I. Issues in the Assessment of Learning Strategies	26
II. LASSI—Early Developmental Stages	28

III.	Preliminary Pilot Test	30
IV.	Revision of the LASSI Item Pool	32
V.	Second Pilot Test	32
VI.	Construction of the LASSI Scales	33
VII.	Test-Retest Reliability	34
VIII.	Validity and Norms	34
IX.	Concluding Comment	36
X.	Appendix: Brief Descriptions of LASSI Scales and Sample Items	36
	References	39
4.	SELECTION AND USE OF STUDY STRATEGIES: THE ROLE OF THE STUDIER'S BELIEFS ABOUT SELF AND STRATEGIES	41
	<i>Douglas J. Palmer and Ernest T. Goetz</i>	
I.	Conceptual Frameworks	43
II.	Attribution Theory	46
III.	Self-Efficacy Theory	49
IV.	Learner Variables and Strategy Use	51
V.	An Empirical Look at the Model	53
VI.	Implications	55
	References	57
5.	VERBAL-REPORT DATA ON COGNITIVE AND METACOGNITIVE STRATEGIES	63
	<i>Ruth Garner</i>	
I.	Strategies: What Are They?	64
II.	Verbal-Report Methods	65
III.	Criticisms of Verbal Reports as Data	67
IV.	Other Methods for Assessing Strategies	71
	References	74
6.	THE ROLE OF ATTENTION IN STUDYING AND LEARNING	77
	<i>Ralph E. Reynolds and Larry L. Shirey</i>	
I.	Introduction	77
II.	What is Effective Studying?	78
III.	The Process of Studying	80
IV.	Theoretical Considerations	94
	References	98

PART III. APPROACHES TO INSTRUCTION IN LEARNING AND STUDY STRATEGIES

7.	COOPERATIVE LEARNING STRATEGIES	103
	<i>Donald F. Dansereau</i>	

Development of a Dyadic Cooperative Learning Strategy	104
References	118
 8. DIRECT INSTRUCTION OF READING COMPREHENSION STRATEGIES: THE NATURE OF TEACHER EXPLANATION	 121
<i>Peter Winograd and Victoria Chou Hare</i>	
I. The Nature of Teacher Explanation	121
II. Teacher Explanations in Successful Instructional Studies	124
III. The Value of Complete Explanations in Strategy Instruction	133
IV. Summary	136
References	137
 9. MOTIVATIONAL SKILLS TRAINING: COMBINING METACOGNITIVE, COGNITIVE, AND AFFECTIVE LEARNING STRATEGIES	 141
<i>Barbara L. McCombs</i>	
I. Role of Motivation in Strategic Behavior	141
II. An Integrative Model of Processes underlying Intrinsic Motivation to Learn	154
III. Conclusion and Future Research Recommendations	163
References	165
 10. INDIVIDUAL DIFFERENCES AND LEARNING STRATEGIES	 171
<i>Ronald R. Schmeck</i>	
I. Learning Style as a Dimension of Individual Difference	172
II. Inventory of Learning Processes	176
III. Should We Accommodate Personal Characteristics or Try to Change Them?	179
IV. Other Individual Differences Worthy of Study	181
V. Summary	187
References	188
 11. IMPLICIT INSTRUCTION OF STRATEGIES FOR LEARNING FROM TEXT	 193
<i>Diane Lemonnier Schallert, Patricia A. Alexander, and Ernest T. Goetz</i>	
I. Student Diaries	196
II. Student Interviews	202
III. Instructor Interviews	207
IV. General Discussion	208
References	213
 12. APPLICATIONS OF LEARNING STRATEGIES BY STUDENTS LEARNING ENGLISH AS A SECOND LANGUAGE	 215
<i>J. Michael O'Malley, Rocco P. Russo, Anna Uhl Chamot, and Gloria Stewner-Manzanares</i>	

I. Review of Literature	215
II. Descriptive Study	218
III. Training Study	225
References	230
13. TEXT LEARNING STRATEGY INSTRUCTION: GUIDELINES FROM THEORY AND PRACTICE <i>Beau Fly Jones</i>	223
I. Educational Contexts	223
II. Major Theoretical and Practical Issues	235
III. Concepts and Principles from Practice	245
IV. Concluding Comments	256
References	257
 PART IV. EVALUATION OF RESEARCH AND PRACTICE IN LEARNING AND STUDY STRATEGIES	
14. EVALUATION OF LEARNING STRATEGIES RESEARCH METHODS AND TECHNIQUES <i>Victor L. Willson</i>	263
I. Purposes for Learning Strategy Research	264
II. Techniques and Methods Used in Learning Strategies Research	265
III. Conclusion	273
References	273
15. PERSPECTIVES ON STUDY SKILLS TRAINING IN A REALISTIC INSTRUCTIONAL ECONOMY <i>Ernst Z. Rothkopf</i>	275
I. School Perspectives	275
II. The Research Picture	277
III. Learning Strategies and Educational Styles	278
IV. Elicitation and Maintenance of Learning Activities	281
V. Conclusions	284
References	285
16. A CONSTRUCTIVE REVIEW OF RESEARCH ON LEARNING STRATEGIES <i>M. C. Wittrock</i>	287
I. Introduction	287
II. The Teaching of Learning Strategies	287
III. A Model of Learners' Thought Processes	289
IV. The Teaching of Reading Comprehension	292
V. A Research Strategy	295

VI. Summary	296
References	297
17. MODELS AND METAPHORS OF LEARNING STRATEGIES	299
<i>Scott G. Paris</i>	
I. Describing the Unknown	301
II. The Value of Metaphors	309
III. Conclusions	317
References	318
18. IMPLICATIONS OF LEARNING STRATEGY RESEARCH AND TRAINING: WHAT IT HAS TO SAY TO THE PRACTITIONER	323
<i>John E. Wilson</i>	
I. A High School Learning Strategies/Study Skills Program	323
II. Learning Strategies, Practitioners, and Parents	327
III. Research and Practical Applications	328
IV. Training and Educating Teachers	329
V. Conclusion	330
Reference	331
19. COGNITIVE LEARNING STRATEGIES: IMPLICATIONS FOR COLLEGE PRACTICE	333
<i>Curtis Miles</i>	
I. The Students	334
II. The Faculty	335
III. The Process of Innovation	336
IV. Marketing Cognitive Learning Strategies	338
V. The Role of Research	339
VI. Increasing the Relevance	341
VII. Summary	346
