Preface

This edition of **MIMS Annual Vietnam** contains full prescribing information on more than 700 products available in Vietnam, including recently launched products not found in last year's edition.

The product monographs in **MIMS Annual Vietnam** are listed by brand name in alphabetical order for ease of reference. Users of **MIMS Annual Vietnam** can, thus, go directly to the Product Section (white pages) for information on any specific products, if the brand name is known. If the point of reference is by generic name, by manufacturer, or by pharmacological class, the products can be located in the Generic & Brand Name Index (blue pages), in the Manufacturers' Index (yellow pages), or the Pharmacological Classification Index (orange pages), all of which are found in the front pages of **MIMS Annual Vietnam**, just before the Product Section.

MIMS Annual Vietnam is also a databank on medical information. It contains a compilation of significant contraindications, precautions, side effects, adverse reactions and interactions of drug classes; a list of doping drugs banned by the International Olympic Committee Medical Commission; and **NEW** in this issue are: a guide to drugs in pregnancy and lactation, an obstetric table, infant feeding/paediatric dosage details, treatment of worm and fluke infestation, interpreting hepatitis B markers and an infectious disease table have been added.

The cooperation and support of manufacturers and distributors in supplying and reviewing the information contained in the Product Information Section (white pages) have made possible the timely distribution of this edition of **MIMS Annual Vietnam**. We also gratefully acknowledge the encouragement that came from the Ministry of Health and support from the Ho Chi Minh City Health Services.

We hope you will find **MIMS Annual Vietnam** helpful in your daily practice.

Foreword

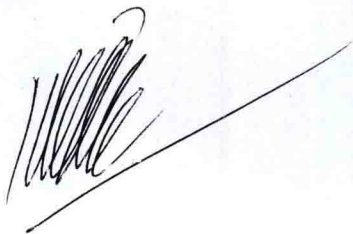

In the change towards free market economy in Vietnam, the pharmaceutical section is undergoing major changes and developments. A number of new drugs, domestic as well as imported, are now becoming available all over Vietnam.

Many of these drugs are unknown to the prescribers. The need for accurate information in these drugs including recommendations for their usage is apparent.

Therefore, this edition of **MIMS Annual** for Vietnam will become an important source of information about the medicines available on the market.

The **MIMS Annual Vietnam** is a handbook to be used in daily practice by prescriber to function as a reference system which will assist doctors in making more rational and safer prescribing decisions.

The handbook will also be useful when counselling patients about their medication, which should be an important part of medicine practice.

Foreword

We welcome this issue of **MIMS Annual Vietnam** as a major step towards meeting the urgent need for a drug reference in Vietnam.

Presented in a standard format, product monographs in **MIMS Annual Vietnam** are arranged in alphabetical sequence by product name, thus, providing uniform, logically-arranged and easy-to-use information for prescribers.

In the years to come, we see **MIMS Annual Vietnam** playing an important role in the delivery of healthcare services in Vietnam. Physicians practising in the country will, thus, be well-advised to use it often in daily practice, if only to assure patient safety.

Duong Quang Trung, M.D.

Director, Ho Chi Minh Health Services
Dean, University Training Centre for
Health Care Professionals

**Looking for the best way to enter the
Vietnamese pharmaceutical market?
Want to develop distribution of your
pharmaceutical and health care
products in Vietnam?**

OPV can help.

For success in the distribution of pharmaceuticals and health care products in Vietnam, you need a strong partner. A partner who knows the Vietnamese environment inside out. A partner who understands your needs and requirements as an international company.

Your distribution needs in Vietnam are not foreign to us. Our focus is also the distribution of pharmaceuticals and health care products. And we work only on Vietnam. We have worked with leading international companies in Vietnam over decades in the past. We are currently working with American and European pharmaceutical and health care companies to distribute their products in Vietnam.

Ask us about our services, from product registration, importation, and warehousing to distribution, marketing, and local manufacturing. We can handle all your local distribution needs in Vietnam so that you can mind your own core business more effectively. Contact us, and we can arrange for you to visit our facilities in Vietnam and understand what we can do for you.

**GROWTH
ENERGY
ALERTNESS**

Since the growth years are a very critical period in their life, children must be equipped with essential nutrients and vitamins to keep them in good health. More often than not, these nutrients are not available from natural sources due to inadequate supply or faulty preparation. Thus, dietary supplementation has been a common concern.

The people around here know us

Zuellig Pharma is a familiar name to hospitals, clinics, doctors and pharmacies in the Asia Pacific region. Over the years, we've developed the relationships and the knowledge of the pharmaceutical and health care industries that can only come from long experience.

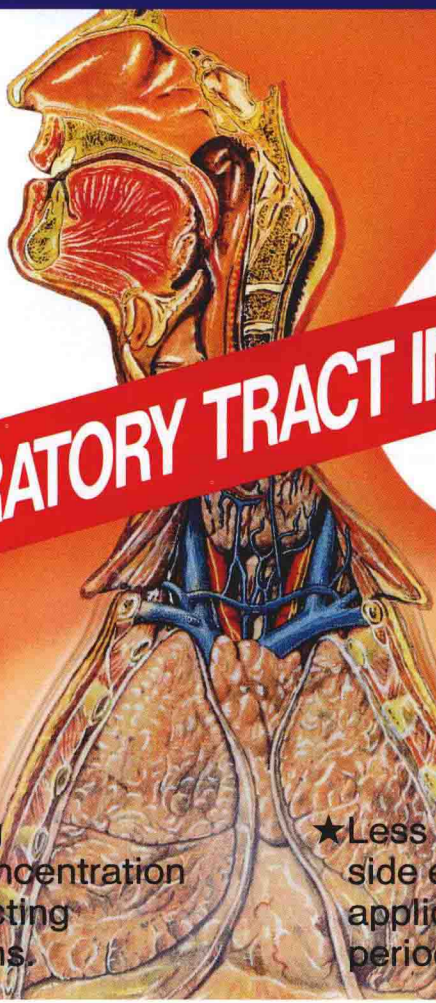

As a result, more than 125 multinational companies have chosen Zuellig Pharma to distribute their products in Asia. Many of them also count on our experience for services like local registration, manufacturing, marketing and sales. Combining local knowledge with international experience is what we do best.

ZUELLIG PHARMA

Acetyl Spiramycin Tab. Kyowa 200

ACETYL SPIRAMYCIN

IN RESPIRATORY TRACT INFECTIONS

★ Maintaining
a higher concentration
and long-acting
in the organs.

★ Less toxic and fewer
side effects, and
applicable for a long
period.

DOSAGE AND ADMINISTRATION

Usually for adults, administer orally 200 mg (potency) of acetylspiramycin daily in 4-6 divided doses. The dose may be adjusted according to the age of patients and severity of symptoms.
