concerning the diagnosis, the surgical techniques and the post-operative management in the infant group. This presentation will serve a useful purpose if it acts as a stimulus to others to pursue with vigour this exciting area, in the anticipation that the results with primary repair will prove superior to those achieved with palliation.

Brian Barratt-Boyes

*Convener*

International Symposium on Surgical Heart Disease  
Green Lane Hospital

## ACKNOWLEDGEMENTS

It is a pleasure to acknowledge the help of Mr S. Yarrow and his associates for recording on tape all papers and discussions at the meeting, Mrs Wendy Masters for many of the illustrations, Mr R. Hart for the photography and Mrs Helena Parham and Mrs Joan Findlay for the secretarial work. We are grateful also for the help of other members of the Green Lane medical staff who contributed in many ways and to Messrs Churchill Livingstone who have been helpful and cooperative throughout.
