

SCANIA BUSES AND COACHES

# Introducing Scania Citywide

SCANIA CITYWIDE

# Take the lead in the urban challenge

More than half of today's global population now lives in cities. And this urbanisation continues to accelerate. This is an opportunity!

That's why we created Scania Citywide – your perfect tool for sustainable, flexible and cost-effective public transport. What better way to meet the challenges you face with higher fuel prices, tougher legislation and ever-increasing climate concerns?

Easily adaptable for inner city, suburban and regional transport, the Scania Citywide delivers high uptime, low operating costs and reduced environmental impact. And it's backed by our full range of services and Scania's 100% commitment. In short you get a uniquely attractive solution for drivers and passenger alike.

Scania – a partner you can trust – listening, changing and working together with you, on today's challenges and those to come.

SCANIA CITYWIDE

## Grow your fleet on Scania Citywide's versatile platform

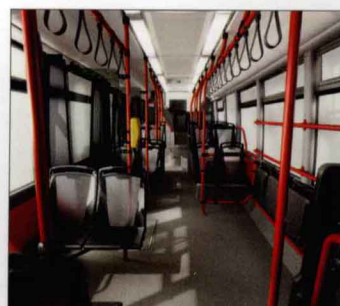

The Scania Citywide is remarkably flexible. We created it to fulfill all your urban transport needs – from dedicated inner-city buses to flexible city-suburban commuters. With a wide array of floor, seating, glazing and interior décor options, each Scania Citywide can be specified to satisfy your exact requirements.

### **Making travel a joy**

Stepping aboard, your passengers will instantly realise that Scania Citywide is an attractive way to travel. The modern exterior design and roomy

interior makes the most of every centimetre of space. Wide opening doors and full side kneeling provide easy access – even for those using prams or wheelchairs.

Whether seated or standing, the large windows allow your passengers to enjoy the view, and interior lighting is positioned to enhance comfort and safety during low-light conditions. Highly efficient insulation combined with advanced ventilation keep the interior both comfortable and quiet in all weather.

### **Making work a pleasure**

The comfort of your drivers is central to the ergonomic design of Scania Citywide's driver station. Here, you'll find a fully adjustable instrument panel that moves together with the steering wheel as a single unit. This allows your drivers to easily set the optimal distance to operating controls and switches. A new and improved fixed instrument panel is also available.

Improved forward visibility and well-placed mirrors let you monitor traffic at the sides and rear of the bus at a glance. In addition, sophisticated features like high torque, electronic

antilock disc brakes and pendant pedals all help to make the Scania Citywide not just a pleasure to drive, but also a safer vehicle offering excellent environmental performance and long-term reliability.

### **Lean and green**

Scania engines are renowned for their dependability as well as outstanding fuel efficiency. You have full flexibility to choose the engine and fuel source that best meets the operational needs of your market: conventional diesel, biogas, bio-ethanol or biodiesel.

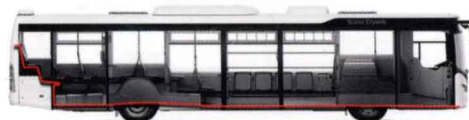

## The optimal choice for your routes

Scania Citywide LF (low floor) is designed for busy inner-city routes demanding fast passenger flows and maximum capacity. The full-length flat floor enables the most spacious interior.

Scania Citywide LE (low entry) is an effective dual-purpose solution that allows you to run the same high-capacity vehicle on both city and suburban routes. This layout promotes rapid passenger flow with excellent comfort and visibility for seated passengers in the rear.

Both Scania Citywide LF and LE are available in various configurations from 11–18 metres. You're free to specify the layout and length that best fits your transport needs.

Scania Citywide LF (low floor).

Scania Citywide LE (low entry).

## Our total commitment

Peace of mind comes from knowing that you can turn to Scania for true one-stop-shopping for all your services – an investment that quickly pays for itself with improvements in operating costs, uptime, safety, emissions and driver retention.

With our total operational focus, we support you with maintenance and repair contracts backed by Scania's comprehensive global network with more than 20,000 trained professionals ready to serve you.

To minimise CO<sub>2</sub> emissions we offer you Ecolution by Scania. It's a solution whereby the right services and technologies interact to create the optimal and profitable solution for your business as well as for the environment. Ecolution by Scania is not a vision for the distant future, it's here and now.

So, if you're looking for a 100% commitment, Scania is the ideal choice for a long-term partner offering a complete operational approach.
