Acknowledgments

The book has been published with the financial support of the Fondazione Cassa di Risparmio di Padova e Rovigo – Project of Excellence “Economics and Management of Knowledge-Intensive Business Services: Innovation Processes in Services and Competitiveness of Firms and Territories” – University of Padua – Department of Economics and Management “Marco Fanno”.

Notes on Contributors

Alberto Alvisi is Assistant Professor in Business Management, University of Padova, Department of Economics and Management “Marco Fanno”, Padova, Italy. His research interests are focused on new product development and innovation, networks of firms, systemic products and co-opetition, and knowledge-transfer dynamics. His research has been published in domestic and international books and journals.

Roberto Antonietti is Assistant Professor of Economics, University of Padova, Department of Economics and Management “Marco Fanno”, Padova, Italy. His research interests range from urban and regional economics to international economics and labor and industrial economics, with particular focus on innovation. He has published in international journals like *Regional Studies*, *Annals of Regional Science*, *Journal of Economic Surveys*, *International Review of Applied Economics*, and *Economia Politica*.

Marco Bettiol is Assistant Professor in Business Management, University of Padova, Department of Economics and Management “Marco Fanno”, Padova, Italy. His research focuses on the relationship between design, innovation and firm competitiveness; design and knowledge management; information technology and marketing strategy. He published in national and international journals like *International Entrepreneurship and Management Journal* and *International Journal of Project Management*.

Anna Cabigiosu is a post-doc researcher in Organizational Behavior, University of Padova, Department of Economics and Management “Marco Fanno”, Padova, Italy. Her research interests are the relationship between product and organizational architectures, the micro knowledge-based dynamics of new products developments, as well as KIBS modularity. Her research has been published in international and national books and journals such as *Organization Science*.

Giulio Cainelli is Full Professor of Economics, University of Padova, Department of Economics and Management “Marco Fanno”, Padova, Italy. He is also an Associate Researcher at CERIS, Research Institute on Firms and Development, National Research Council (CNR). He is a co-author of papers on regional, international and industrial economics published on journals such as *Economic Geography*, *Regional Studies*,

Cambridge Journal of Economics, Annals of Regional Science, Growth and Change, Journal of Evolutionary Economics, Review of Income and Wealth, Revue d'Economie Industrielle, Industry and Innovation, Journal of Socio-Economics, International Review of Applied Economics, International Journal of Economics and Business and *Economia Politica*. He has also published an international monograph.

Diego Campagnolo is Assistant Professor of Business Organization, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. His research interests include the growth strategies of SMEs through alliances and M&As and the evolution of SMEs business model, particularly in the industries of the so-called Made in Italy. He is also interested in studying the knowledge dynamics in KIBS firms. His research has been published in international books and journals such as *International Journal of Management Reviews, Industry & Innovation, The IMP Journal*.

Nicoletta Corrocher is Lecturer in Applied Economics at the Department of Management and Technology and research fellow at KITEs, Bocconi University, Milan, Italy. Her main research interests concern technology diffusion, innovation, and industrial dynamics in the ICT industry and in the service sectors. She has published in major academic journals such as *Research Policy* and *Journal of Evolutionary Economics*.

Giovanni Costa is Professor in Business Strategy and Organizational Behavior, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. His research interests include the strategic human resource management, the organizational development, and the growth strategies of the Italian firms. His research findings have been presented at many national and international conferences and have been published in international journals and publications.

Lucia Cusmano is Assistant Professor of Political Economy at Insubria University, Varese, Italy, and Research Fellow at KITEs (Knowledge, Innovation and Technology Studies), Bocconi University, Milan, Italy. In 2010 she joined as Senior Economist at the OECD Centre for Entrepreneurship, Small and Medium-sized Enterprises and Local Development. She holds a PhD in Economics from Pavia University and a Master's of Science in Economics from Warwick University, UK. She has published extensively in international journals on innovation and economic development in advanced and developing regions.

Barbara Di Bernardo is Full Professor in Business Management, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. Her research interests concern knowledge management and innovation, the service economy and innovation in services, networks of firms. Her studies have been published extensively in national books and journals.

Eleonora Di Maria is Associate Professor in Business Management, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. Her research focuses on the evolution of business models and local economic systems related to internationalization, innovation, and network technologies, as well as on KIBS and innovation processes. Her research has been published in international books and journals such as *Research Policy*, *International Journal of Operations and Production Management*, *International Entrepreneurship and Management Journal*, *European Planning Studies*, and *Industry & Innovation*.

David Doloreux is Full Professor in the Telfer School of Management at the University of Ottawa and holds the Research Chair on entrepreneurship, innovation, and regional development. He is also research fellow at Fraunhofer-ISI. His research program focuses on two principal themes: the determinants of innovation in manufacturing firms and knowledge-intensive business services and the dynamics and functions of clusters and regional innovation systems across different sectors and regions in Canada and Europe. He has published in leading journals in the field of innovation and regional development such as *Industry & Innovation*, *Regional Studies*, *Technovation*, *Entrepreneurship & Regional Development*, and *Journal of Economic Geography*.

Marina E. Doroshenko is Head of Analytical Department, Institute of Statistical Studies and Economics of Knowledge of National Research University Higher School of Economics, Moscow, Russia. Her research interests are concentrated in emerging, future-oriented fields with short market history or no market history, among which the large-scale study of knowledge-intensive business services in Russia plays an important role. She has published articles in prestigious Russian journals and her work is summarized in a book that is the pioneering publication in this field in Russia.

Andrea Furlan is Associate Professor of Management, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. His research interests focus on new ventures and SMEs, strategic supply chain management, and lean manufacturing. His research has appeared in

several international journals such as *Strategic Management Journal*, *Industrial Marketing Management*, *International Journal of Production Economics*, and *International Journal of Operations & Production Management*.

Martina Gianecchini is Assistant Professor in Human Resource Management, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. Her research interests are focused on entrepreneurship in SMEs and professional service firms, career management (especially the school-work transition of young workers), and labor market dynamics. Her research findings have been presented at national and international conferences and have been published in international journals.

Roberto Grandinetti is Full Professor in Business Management, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. His main areas of research are the evolutionary paths of Italian industrial districts, the inter-firm relationships, and the evolution of marketing in a relational sense. He has published books and articles in journals including *Revue d'Economie Industrielle*, *Human Systems Management*, *Piccola Impresa/Small Business*, *Industrial Marketing Management*, *International Journal of Operations & Production Management*, *The IMP (Industrial Marketing and Purchasing) Journal*, *Production Planning & Control*, and *The Learning Organization*.

Paolo Gubitta is Associate Professor in Organizational Theory and Entrepreneurship, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. His research focuses on the management and governance of small and medium sized firms and professional firms, academic entrepreneurship and spin offs, and entrepreneurial competencies. His research has been published in international journals such as *Family Business Review* and *Cross Cultural Management*.

Ian Miles is Professor of Technological Innovation and Social Change at the University of Manchester, based in the Manchester Institute of Innovation Research, which is located in Manchester Business School (MBS). At MBS he is also acting head of the Manchester Centre for Service Research, bringing together researchers in innovation, informatics, marketing, and other areas of service studies. He is also head of the Laboratory of Economics of Innovation, at the Research University-Higher School of Economics, in Moscow. His main research areas are KIBS, service innovation, and foresight and information society studies, and many presentations and publications are available online as well as through conventional books and journals.

Andrea Morrison is Assistant Professor at the Department of Economic Geography, Utrecht University, the Netherlands, and research affiliate at KITeS-Bocconi University, Milan, Italy. His research interests lie in the area of evolutionary economic geography. He has published extensively in major academic journals, such as *Regional Studies*, *Research Policy*, and *World Development*.

Emmanuel Muller is an economist who specializes in innovation and knowledge economics. He has held a professorship at the University of Applied Sciences Heidelberg, Germany, since 2001. Since 2009 he has coordinated the evoREG initiative devoted to innovation policy and research in the Upper Rhine and associating the Bureau d'Economie Théorique et Appliquée (BETA, University of Strasbourg, France) and the Fraunhofer Institute for Systems and Innovation Research ISI (Karlsruhe, Germany). Apart from teaching and publishing in the fields of innovation economics, management, and policy he is performing contract research mainly on the issues of regional innovation systems, knowledge-intensive business services (KIBS) and creative economics.

Marco Paiola is Assistant Professor in Business Management, University of Padova, Department of Economics and Management "Marco Fanno", Padova, Italy. His current research interests are in the areas of service management and innovation, manufacturing into service transformation processes, and innovation in knowledge-intensive business services. His research has been published in *Industrial Marketing Management*, *Industry & Innovation*, *International Journal of Quality and Service Science*, *Managing Service Quality*, and *Journal of Business-to-Business Marketing*.

José-Carlos Ramos is founder partner and senior consultant in strategic knowledge management and innovation at Avanzalis Knowledge Associates. He has a PhD in Business Administration, a Master's in Telecommunications and an Executive MBA. He combines this activity with lecturing as associate professor at ESADE Business School and the University of Barcelona. He is member of international forums on intellectual capital such as The New Club of Paris, CISC and ACSI (Aalto University). He leads a research workgroup focused on knowledge productivity and its implications for innovation.

Richard Shearmur is Full Professor at the University of Quebec's INRS Urbanisation Culture Société, a graduate university and research center specializing in urban and cultural studies. After graduating from Cambridge in 1989 he spent five years as an international property consultant in London, Paris, and Madrid. This firsthand experience of

KIBS work convinced him to undertake a Master's in Urban Planning (McGill) and a PhD in economic geography (Université de Montréal), which he completed in 1999. He has published work in a variety of fields connected with the spatial deployment of economic activity and territorial development: intra-metropolitan urban forms, high-order services in metropolitan areas, the development of peripheral regions, the geography of high-order services and, most recently, the geography of innovation in service and manufacturing establishments. He currently holds the Canada Chair in Spatial Statistics and Public Policy.

Simone Strambach is Professor of Services, Communication and Innovation, at the Department of Geography, University of Marburg, Germany. Her research focus is on innovation and the geography of knowledge economics. Knowledge-intensive service industries in socio-economic change and their role for innovation in global-local value systems are her main research fields. At the core of her current research projects are the internationalization of innovation as well as the relationship between innovation, knowledge dynamics, and institutional change in economic space.

Andrea Zenker is a geographer specializing in innovation economics and regional innovation. She is working as researcher and project manager at the Fraunhofer Institute for Systems and Innovation Research ISI in Karlsruhe, Germany. She received her PhD in 2007 at the Université de Strasbourg (former Université Louis Pasteur). Andrea is engaged in contract research in innovation economics, regional innovation systems and strategies, and knowledge economics. Her recent research and publication activities focus on creativity, knowledge-intensive business services, German-French research cooperation, and innovation systems.

Contents

<i>List of Tables and Figures</i>	ix
<i>Acknowledgments</i>	xii
<i>Notes on Contributors</i>	xiii
Introduction	1
<i>Eleonora Di Maria, Roberto Grandinetti, and Barbara Di Bernardo</i>	
I.1 Relationships with customers versus relationships with other organizations	3
I.2 Service customization versus service standardization	4
I.3 Knowledge co-production versus knowledge exchange	6
I.4 Spatial proximity versus internationalization	7
1 KIBS and Knowledge Dynamics in Client–Supplier Interaction	13
<i>Ian Miles</i>	
1.1 Introduction	13
1.2 When clients learn little	15
1.3 KIBS relationships	16
1.4 Specialist domain knowledge	21
1.5 Client knowledge and organization	28
1.6 Conclusions: What is to be learned?	32
2 Knowledge Angels, Creative Behaviors, and Emerging Innovation Modes: Observations from Alsace, Baden-Württemberg, and Catalonia	35
<i>Emmanuel Muller, Andrea Zenker, and José-Carlos Ramos</i>	
2.1 Introduction	35
2.2 What are knowledge angels?	36
2.3 Knowledge angels in Alsace, Baden-Württemberg, and Catalonia: An exploratory investigation	39
2.4 Knowledge angels and emerging innovation modes	48
2.5 Conclusion	54

3	Knowledge Dynamics and Knowledge Commodification of KIBS in Time and Space	56
	<i>Simone Strambach</i>	
3.1	Introduction	56
3.2	The role of KIBS in knowledge dynamics and knowledge commodification: An evolutionary perspective	57
3.3	Innovation biography: A methodology to grasp knowledge dynamics in space and time	61
3.4	KIBS in the sectoral knowledge domain of the automotive industry in Baden-Württemberg	63
3.5	Some conclusions	77
4	How Knowledge-Intensive Business Services Upgrade their Customers: Evidence from Russia	79
	<i>Marina E. Doroshenko</i>	
4.1	Introduction	79
4.2	Data and methodology	82
4.3	KIBS production and co-production in Russia	85
4.4	The co-production puzzle	86
4.5	Perception asymmetry and the "turbid glass" effect	88
4.6	Customer experience and its impact on demand for KIBS	89
4.7	Customer experience and outsourcing of KIBS	92
4.8	Customer progress within co-production	93
4.9	Conclusions	98
5	KIBS Roles in KIBS Industries	100
	<i>Alberto Alvisi</i>	
5.1	Introduction	100
5.2	Data and measures	105
5.3	Discussion	114
5.4	Conclusions and future research	117
6	Creativity Versus Standardization in Knowledge-Intensive Business Services: A Real Trade-Off?	120
	<i>Marco Bettiol, Eleonora Di Maria, and Roberto Grandinetti</i>	
6.1	Introduction	120
6.2	Standardization in KIBS	121
6.3	Design and communication: Creativity-based services	124
6.4	Case study	127
6.5	Discussion	132
6.6	Conclusions	134

7	Innovation and Co-Production in Computer Services: The Case of Complex Software Solutions in the Fashion and Retail Industry in Italy	137
	<i>Marco Paiola</i>	
7.1	Introduction	137
7.2	Theoretical premises	138
7.3	Empirical research	146
7.4	Main findings and contributions	152
8	Knowledge Dynamics in Third-Party Logistics: Balancing Exploitation and Exploration Through Service Architectures	155
	<i>Anna Cabigiosu, Diego Campagnolo, Giovanni Costa, and Andrea Furlan</i>	
8.1	Introduction	155
8.2	Knowledge sharing and service project architecture	156
8.3	Method	158
8.4	Case analysis	160
8.5	Discussion	171
8.6	Conclusions	173
9	The Role of Entrepreneurs' Human and Social Capital in Knowledge-Intensive Business Services	174
	<i>Martina Gianecchini and Paolo Gubitta</i>	
9.1	Introduction	174
9.2	The KIBS sector: Competitive advantage factors	175
9.3	The entrepreneur's human and social capital and the firm's development stages	177
9.4	Research method	184
9.5	Results	186
9.6	Discussion	189
10	Is There a Connection between Geographic Clustering and KIBS Innovation?	193
	<i>Richard Shearmur and David Doloreux</i>	
10.1	Introduction	193
10.2	Clusters and innovation	194
10.3	Methodology and research design	198
10.4	Results	200
10.5	Conclusion	210
