# PREFACE

**T**he heritage of Western civilization has perhaps never been the focus of so much interest and controversy as it is today. Many commentators criticize it, many praise it, but for all it is a subject of intense discussion. *The Western Heritage*, sixth edition, is designed to allow teachers to introduce students to the subject of that discussion. It presents an overview of Western civilization, including its strengths, its weaknesses, and the controversies surrounding it.

On campus after campus, every aspect of Western civilization has become an object of scrutiny and debate. Many participants in this debate fail to recognize that such self-criticism is characteristic of Western civilization and an important part of its heritage. We welcome the debate and hope that this book can help raise its quality.

The collapse of Communism has left the people of half of Europe struggling to reorganize their political institutions and their social and economic lives. The choices they are making and the future they are forging will reflect in large measure their understanding of their heritage. To follow and participate in that process we too need to understand that heritage.

## GOALS OF THE TEXT

Since *The Western Heritage* first appeared, we have sought to provide our readers with a work that does justice to the richness and variety of Western civilization. Events since then have only added urgency to our purpose.

Our primary goal has been to present a strong, clear narrative account of the central developments in Western history. We have also sought to call attention to certain critical themes:

- the development of political freedom, constitutional government, and concern for the rule of law and individual rights
- the shifting relations among religion, society, and the state
- the development of science and technology and their expanding impact on thought, social institutions, and everyday life

- the major religious and intellectual currents that have shaped Western culture

We believe that these themes have been fundamental in Western civilization, shaping the past and exerting a continuing influence on the present.

**Balanced and Flexible Presentation** In this edition as in past editions, our goal has been to present Western civilization fairly, accurately, and in a way that does justice to its great variety. History has many facets, no one of which alone can account for the others. Any attempt to tell the story of the West from a single overarching perspective, no matter how timely, is bound to neglect or suppress some important part of that story.

*The Western Heritage*, sixth edition, is designed to accommodate a variety of approaches to a course in Western civilization, allowing teachers to stress what is most important to them. Some teachers will ask students to read all the chapters. Others will select among them to reinforce assigned readings and lectures.

We do not believe that a history of the West should be limited to politics and international relations, but we share the conviction that internal and external political events have shaped the Western experience in fundamental and powerful ways. Recent events in central and eastern Europe and the former Soviet Union have strengthened that belief. We have also been told repeatedly by teachers that no matter what their own historical specialization, they believe that a political narrative gives students an effective tool to begin to organize their understanding of the past.

*The Western Heritage* also provides one of the richest accounts of the social history of the West available today, with strong coverage of family life, the roles of women, and the place of the family in relation to broader economic, political, and social developments. This coverage reflects the explosive growth in social historical research in the past quarter century, which has enriched virtually all areas of historical study.

Finally, no other survey text presents so full an account of the religious and intellectual develop-

ment of the West. People may be political and social beings, but they are also reasoning and spiritual beings. What they think and believe are among the most important things we can know about them. Their ideas about God, society, law, gender, human nature, and the physical world have changed over the centuries and continue to change. We cannot fully grasp our own approach to the world without understanding the intellectual currents of the past and their influence on our thoughts and conceptual categories.

**Clarity and Accessibility** Good narrative history requires clear, vigorous prose. As in earlier editions, we have paid careful attention to the quality of our writing, subjecting every paragraph to critical scrutiny. Our goal was to make our presentation fully accessible to students without compromising vocabulary or conceptual level. We hope this effort will benefit both teachers and students.

**Recent Scholarship** As in previous editions, changes in this edition reflect our determination to incorporate the most recent developments in historical scholarship and the expanding concerns of professional historians.

**Pedagogical Features** This edition retains the pedagogical features of the last edition, including part-opening comparative timelines, a list of key topics at the beginning of each chapter, chapter review questions, and questions accompanying the more than 200 source documents in the text. Each of these features is designed to make the text more accessible to students and to reinforce key concepts.

- The *part-opening timelines*, which follow the essays that open each of the six parts of the book, summarize major events in politics and government, society and economy, and religion and culture side by side. Appropriate photographs have been added to each timeline.
- *Primary source documents*, more than one third new to this edition, acquaint students with the raw material of history and provide intimate contact with the people of the past and their concerns. *Questions* accompanying the source documents direct students toward important, thought-provoking issues and help them relate the documents to the material in the text. They can

be used to stimulate class discussion or as topics for essays and study groups.

- Each chapter includes an *outline*, a list of *key topics*, and an *introduction*. Together these features provide a succinct overview of each chapter.
- *Chronologies* follow each major section in a chapter, listing significant events and their dates.
- *Concluding sections* summarize the major themes of each chapter and provide a bridge to the next chapter.
- *Chapter review questions* help students review the material in a chapter and relate it to broader themes. They too can be used for class discussion and essay topics.
- *Suggested readings* lists following each chapter have been updated with new titles reflecting recent scholarship.

## CHANGES IN THE SIXTH EDITION

The sixth edition retains all of the major content changes that appear in the fifth edition. In addition, Chapter 30, “*Europe and the Soviet-American Rivalry*” has been reorganized to relate the various regional conflicts occurring outside of Europe, including the Mideast, Korea, and Vietnam, more closely to the Cold War conflict between the superpowers. Chapter 31, “*Toward a New Europe and the Twenty-first Century*,” reviews recent events in Eastern Europe. As in the fifth edition, questions appear with each document and after every chapter.

**New Features** New to the edition are two major features designed to expand students’ understanding of the heritage of the West. These are a series of illustrated essays, *The West @ the World*, and a series of maps with explanations focusing on key *Political Transformations*.

### The West & the World

The students reading this book are drawn from a wide variety of cultures and experiences. They live in a world characterized by highly interconnected economies and instant communication between cultures. In this emerging multicultural society it seems both appropriate and necessary to recognize the ways in which Western civilization has throughout its history interacted with other cultures, influencing other societies and being influ-

enced by them. Examples of this two-way interaction, such as that with Islam, already appear in the main body of the text. In this new feature, we focus on six subjects, comparing Western institutions with those of other parts of the world, or discussing the ways in which developments in the West have influenced cultures in other areas of the globe. Topics for this feature are:

#### ANCIENT SLAVERY (p. 150)

Slavery has arisen as a social and economic institution in virtually every world culture. This essay compares slavery in the ancient cultures of Mesopotamia, Egypt, China, India, Greece, and Rome. It also describes the role of slavery in the economies of ancient Greece and the ante-bellum American South. The latter comparison seems especially appropriate since in both instances, ancient and modern, the surrounding political structures were democratic.

#### SOCIAL LIFE IN MALI (1200–1400) (p. 300)

Medieval Europe in many respects constituted an underdeveloped economy. Production was quite limited and was almost entirely agrarian. This essay explores the ways in which that society compares with Mali Society. It discusses Islamic influences on marriage customs, education, and daily life in the African setting, allowing students to draw comparisons with similar European institutions influenced by Christianity, as examined in the preceding chapter.

#### THE FAMILY IN EUROPE AND CHINA (1400–1800) (p. 408)

Throughout the human experience, the family has been the most enduring of all institutions. Recent scholarship has greatly improved our understanding of the early modern European family. This essay draws upon that knowledge, enabling students to compare and contrast the European family of the era with family structures in China.

#### THE ABOLITION OF SLAVERY IN THE TRANSATLANTIC ECONOMY (p. 754)

The abolition of chattel slavery in the transatlantic economy stands as one of the most remarkable social and economic developments of the eighteenth and nineteenth centuries. Never before had a society abolished slavery. This essay traces the history of that crusade, noting the manner in which it

influenced the societies of Africa, Latin America and North America.

**IMPERIALISM: ANCIENT AND MODERN** (p. 958)  
During the past two centuries no interaction of the West with the rest of the world was more important or of more enduring significance than the establishment of colonial empires in Asia and Africa. This essay recalls for students the earlier empires that were part of the Western experience, comparing the imperialism of the ancient world with that of the modern era.

#### GLOBAL DEMOCRATIZATION (p. 1116)

With the collapse of communism in the past decade, democratization has made enormous gains in Europe and the former Soviet Union. This essay places the recent European experience in the context of the worldwide movement of the past half-century toward greater democratic political participation. It pays particular attention to the civil rights movement in the United States and to the movements toward democracy in Latin America.

### Political Transformations

This new map feature concentrates on six highly significant moments of political transformation in the history of the West. As with *The West & the World*, most *Political Transformations* emphasize the interaction of the West with other areas of the world. Each of the features provides a brief overview of the transformation illustrated by a map as well as in an illustrative document. The features will provide opportunities for study not only by individual students, but also for class discussion. The topics for this feature are:

- Greek Colonization from Spain to the Black Sea
- Muslim Conquests and Domination of the Mediterranean to about 750
- Voyages of Discovery and the Colonial Claims of Spain and Portugal
- The Congress of Vienna Redraws the Map of Europe
- The Mandate System: 1919 to World War II
- Decolonization in Asia and Africa

**Maps and Illustrations** The skillful use of color in the maps greatly improves their clarity and peda-

gical usefulness. All 90 maps in the text have been carefully edited for accuracy. The text also contains almost 500 color and black and white illustrations. In this edition, we have added photographs to the timelines preceding each part of the book.

**A Note on Dates and Transliterations** With this edition of *The Western Heritage* we shift to the use of B.C.E. (before the common era) and C.E. (common era) instead of B.C. (before Christ) and A.D. (*anno domini*, the year of the Lord) to designate dates.

Also, we have followed the most accurate currently accepted English transliterations of Arabic words. For example, today Koran is being replaced by the more accurate *Qur'an*; similarly *Muhammad* is preferable to *Mohammed* and *Muslim* to *Moslem*.

**Ancillary Instructional Materials** *The Western Heritage* sixth edition comes with an extensive package of ancillary materials.

*For the Instructor:*

- **Instructor's Manual with Test Items** prepared by Perry M. Rogers, Ohio State University. The manual includes chapter summaries, key points and vital concepts, identification questions, multiple-choice questions, essay questions, and suggested films.
- **Transparency Acetates** of the four-color maps, charts, figures, and graphs in the text provide useful instructional aids for lectures.
- **Prentice Hall Custom Test**, available in Windows, DOS, and Macintosh format, provides the questions from the printed test item file for generating multiple versions of tests.
- **Administrative Handbook** by Jay Boggis provides instructors with resources for using *The Western Heritage* with Annenberg/CPB telecourse, *The Western Tradition*.

*For the Student:*

- **Study Guide, Volumes I and II** includes commentary, definitions, identifications, map exercises, short-answer exercises, and essay questions.
- **Map Workbook** gives the student the opportunity to increase their knowledge of geography through identification exercises.

- **Documents in Western Civilization, Volumes I and II**, provides over 100 additional primary source readings with questions for discussion.
- **Telecourse Study Guide, Volumes I and II**, by Jay Boggis correlates *The Western Heritage* with the Annenberg/CPB telecourse, *The Western Tradition*.

*Media Ancillaries:*

- **The Western Heritage, Interactive Edition, Version 2.0** takes students on an interactive journey through the evolution of Western civilization and its people. With over 600 study questions, quizzes, and comprehension exercises, this unique CD-ROM provides a highly visual multimedia learning experience that will engage and captivate students' imagination. Available for IBM/Mac.
- **The World Wide Web Companion Study Guide** (<http://www.prenhall.com/kagan>) directly complements *The Western Heritage* and correlates the text to related material on the Internet. Each "chapter" corresponds to the chapter in the textbook and consists of objectives, multiple choice quizzes, essay questions, chapter chat, web destinations, and help.

**Acknowledgments** We are grateful to the scholars and teachers whose thoughtful and often detailed comments helped shape this revision:

Lenard R. Berlanstein, University of Virginia, Charlottesville  
Stephanie Christelow, Idaho State University

**The New York Times** and **Prentice Hall** are sponsoring **Themes of the Times**: a program designed to enhance access to current information of relevance in the classroom.

Through this program, the core subject matter provided in the text is supplemented by a collection of time-sensitive articles from one of the world's most distinguished newspapers, **The New York Times**. These articles demonstrate the vital, ongoing connection between what is learned in the classroom and what is happening in the world around us.

To enjoy the wealth of information of **The New York Times** daily, a reduced subscription rate is available. For information, call toll-free: 1-800-631-1222.

**Prentice Hall** and **The New York Times** are proud to co-sponsor **Themes of the Times**. We hope it will make the reading of both textbooks and newspapers a more dynamic, involving process.

# ABOUT THE AUTHORS

---

**Donald Kagan** is Hillhouse Professor of History and Classics at Yale University, where he has taught since 1969. He received the A.B. degree in history from Brooklyn College, the M.A. in classics from Brown University, and the Ph.D. in history from Ohio State University. During 1958–1959 he studied at the American School of Classical Studies as a Fulbright Scholar. He has received three awards for undergraduate teaching at Cornell and Yale. He is the author of a history of Greek political thought,

*The Great Dialogue* (1965); a four-volume history of the Peloponnesian war, *The Origins of the Peloponnesian War* (1969); *The Archidamian War* (1974); *The Peace of Nicias and the Sicilian Expedition* (1981); *The Fall of the Athenian Empire* (1987); and a biography of Pericles, *Pericles of Athens and the Birth of Democracy* (1991); and *On the Origins of War* (1995). With Brian Tierney and L. Pearce Williams, he is the editor of *Great Issues in Western Civilization*, a collection of readings.

---

**Steven Ozment** is McLean Professor of Ancient and Modern History at Harvard University. He has taught Western Civilization at Yale, Stanford, and Harvard. He is the author of eight books. *The Age of Reform, 1250–1550* (1980) won the Schaff Prize and was nominated for the 1981 American Book Award. *Magdalena and Balthasar: An Intimate Por-*

*trait of Life in Sixteenth Century Europe* (1986), *Three Behaim Boys: Growing Up in Early Modern Germany* (1990), and *Protestants: The Birth of a Revolution* (1992) were selections of the History Book Club, as is also his most recent book, *The Bürgermeister's Daughter* (1996).

---

**Frank M. Turner** is John Hay Whitney Professor of History at Yale University, where he served as University Provost from 1988 to 1992. He received his B.A. degree at the College of William and Mary and his Ph.D. from Yale. He has received the Yale College Award for Distinguished Undergraduate Teaching. He has directed a National Endowment for the Humanities Summer Institute. His scholarly research has received the support of fellowships from the National Endowment for the Humanities and the Guggenheim Foundation. He is the author

of *Between Science and Religion: The Reaction to Scientific Naturalism in Late Victorian England* (1974), *The Greek Heritage in Victorian Britain* (1981), which received the British Council Prize of the Conference on British Studies and the Yale Press Governors Award, and *Contesting Cultural Authority: Essays in Victorian Intellectual Life* (1993). He has also contributed numerous articles to journals and has served on the editorial advisory boards of *The Journal of Modern History*, *Isis*, and *Victorian Studies*.
