NITROSOUREAS IN CANCER TREATMENT

Proceedings of the International Symposium on Nitrosoureas in Cancer Treatment held in Montpellier (France), 26-27 January, 1981.

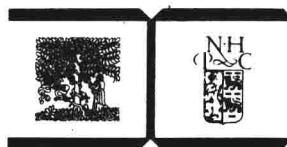

Sponsored by the Institut National de la Santé et de la Recherche Médicale, the National Cancer Institute and the Centre National de la Recherche Scientifique, under the auspices of the French-American agreement.

Editors: B. SERROU

- No. 19 **Nitrosoureas in Cancer Treatment**
 edited by B. Serrou, P.S. Schein and J.-L. Imbach, 1981.

PREFACE

This book is a collection of the papers presented at an international symposium devoted to "Nitrosoureas in Cancer Treatment" held in Montpellier, France on January 26 and 27, 1981. The symposium represented the fruits of a joint Franco-American effort under the auspices of INSERM, CNRS and the National Cancer Institute (NCI) who offered a meeting ground to the foremost authorities in this field. The participants included basic scientists and clinicians from France, America, Europe and Japan.

The medical management of cancer is a rapidly evolving approach which presently accounts for a 41% cure rate when complemented by surgical and radiotherapeutic loco-regional therapy. This percentage promises to show a steady rise in the years ahead. The medical approach to cancer therapy is primarily concerned with chemo-, immuno- and hormonotherapies. The field of chemotherapy has undergone rapid expansion in recent years, receiving particular attention as an adjuvant in solid tumor therapy. Within this context, nitrosoureas have earned an undeniable place, especially in the treatment of solid tumors.

This alone serves as ample reason for a symposium evaluating the efficacy of this family of drugs and their potential applications in the future. The unique aspect of this symposium is that it addresses itself to a range of difficulties from laboratory synthesis to clinical evaluation. In the span of two days, a highly concentrated exchange of information took place concerning the problems of laboratory synthesis, mechanisms of action, short and long term secondary toxic effects and clinical results which primarily dealt with brain tumors, digestive tract tumors and malignant melanoma. Other topics of discussion included high therapeutic doses of nitrosoureas followed by autologous bone marrow grafts and the difficulties involved in the development of new derivatives. The final evaluation was judged sufficiently impressive as to assign a very definite place to nitrosoureas in cancer treatment and to deem the development of new derivatives indispensable. The latter will hopefully produce even more effective drugs which could be especially useful in the treatment of chemo-resistant tumors such as brain, lung and digestive tract tumors. The new approaches which were proposed give rise to the hope that this type of drug may yet enjoy an even wider application in cancer therapy in the coming years.

We believe that the articles presented in this book will offer the reader a very precise idea of the role of nitrosoureas in cancer treatment as well as a glimpse toward the future. For these reasons the book should serve as a reference for those interested in the field whether they be organic chemists, biologists or clinicians. We wish to thank all of the speakers at the symposium whose cooperation and enthusiasm assured the overwhelming success of the meeting. The quality of the papers within this collection bear witness to the present interest and future hopes for the nitrosoureas in the treatment of cancer.

The Editors.

CHEMISTRY, MECHANISM OF ACTION AND EXPERIMENTAL EVALUATION	
Historical overview of nitrosourea development A. Goldin	3
The chemistry of the nitrosoureas J.A. Montgomery	13
Modification of DNA and RNA bases by the nitrosoureas D.B. Ludlum and W.P. Tong	21
DNA alkylation, crosslinking and repair K.W. Kohn, L.C. Erickson and G. Laurent	33
A molecular basis for differences in nitrosourea bone marrow toxicity D. Green, J.D. Ahlgren and P.S. Schein	49
A molecular rationale for nitrosourea induced cytotoxicity K.D. Tew	61
Enzymes involved in the repair of DNA alkylated by N-methyl-N-nitrosourea J. Laval and J. Pierre	79
Inhibition and recovery of DNA and RNA synthesis in normal and tumour cells by some nitrosoureas L.B. Gorbacheva, V.N. Verovsky, E.S. Sokolova and G.V. Kukushkina	85
Synthesis and evaluation of new nitrosoureas congeners T. Suami, T. Kato and T. Hisamatsu	97
Anti-tumour studies on a nitrosocarbamate of 19-nortestosterone: <i>In vitro</i> and <i>in vivo</i> B. Hartley-Asp, R. Shepherd and A. Stamvik	105
Novel lipophilic nitrosoureas A.J. Bigler, L. Buus, P. Bregnedal, O. Svendsen, G. Atassi, J. Müntzing and G. Jensen	113
New nitrosoureas derivatives and related compounds J.L. Imbach, J. Martinez, J. Oiry, Ch. Bourut, E. Chenu, R. Maral and G. Mathé	123

Nitrosoureas as potential radiosynergists T.P. Johnston, G.P. Wheeler, G.S. McCaleb, B.J. Bowdon and J.A. Montgomery	139
Comparative disposition in animals of RFCNU and RPCNU D. Godeneche, J.-C. Madelmont, M.-F. Moreau, R. Plagne and G. Meyniel	153
Comparative mutagenicity for <i>Salmonella typhimurium</i> of four new nitrosourea analogues: CNCC, RFCNU, RPCNU and chlorozotocin (CZT) D. Marzin, C. Jasmin, J.L. Imbach and G. Mathé	165
New nitrosoureas - Therapeutic and long-term toxic effects of selected compounds in comparison to established drugs G. Eisenbrand, M. Habs, W.J. Zeller, H. Fiebig, M. Berger, O. Zelesny and D. Schmähl	175
<i>In vivo</i> study of chronic hematotoxicity of three nitro- soureas, chlorozotocin (chloro-2-ethyl)-ribofuranosyl-3- nitrosourea and (chloro-2-ethyl)-1-ribopyranosyl-3- nitrosourea C. Jasmin, K.J. Mori, M. Hayat, J.S. MacDonald and G. Mathé	193
Effect of two nitrosoureas (methyl-CCNU, BCNU) with 5-fluoro-uracil upon the human granulopoietic system W. Schreml and H.-P. Lohrmann	207
<i>In vitro</i> effects of three nitrosoureas (RFCNU, RPCNU, CCNU) on human lymphocytes C. Levallois, J. Oiry, J.-L. Montero, J.-L. Imbach and J.-C. Mani	215
<i>In vitro</i> and <i>in vivo</i> effects of a sugar derivative of nitro- sourea (RFCNU) on immune response in the cancer patient D. Cupissol, A. Rey, F. Favier and B. Serrou	221
Effects of new nitrosourea derivatives on proliferation of EMT 6 cells <i>in vitro</i> : Time lapse cinematographic and flow cytofluorometric studies M. Collyn-d'Hooghe, M.N. Vlaeminck and J.L. Imbach	229
The use of human glioma cell cultures in evaluating the clinical efficacy of nitrosoureas D.G.T. Thomas and J.L. Darling	239
CLINICAL EVALUATION OF NITROSOUREAS	
Clinical studies of new nitrosoureas under development in Japan M. Ogawa	249
Should patients with massive secondary cancer of the liver undergo chemotherapy with nitrosoureas? P. Bories, B. Nalet, D. Mirouze, G. Pomier-Layrargues, B. Serrou and H. Michel	261

Randomized study of 1-methyl-1-nitrosourea (MNU) versus DTIC in patients with metastatic melanoma K. Kolaric, A. Roth and R. Tomek	269
Use of nitrosoureas in the trials of the W.H.O. International Melanoma Group G. Beretta, E. Bajetta and A. Morabito	279
BCNU and CCNU in combined chemotherapy of inoperable bronchogenic carcinoma: Experience on 219 patients F. Salvati, L. Portalone, M. Signora and F. Mariottini	285
The treatment of metastatic or recurrent gastrointestinal cancers, glioblastomas and brain metastasis of various tumors with ACNU W. Wellens, R. Donhuijsen-Ant, E. Kabota, G. Kleinmanns, G. Mussgnug, M. Schroeder and M. Westerhausen	289
