2ND EDITION

## *About the Author*

**Arthur Griffith** is a computer programmer and a writer. He is the author of twelve books and the coauthor of three. His education was many years ago in a land far away, and he has a degree in Computer Science and Mathematics.

During his years as a computer programmer, he developed systems as varied as nuclear power-plant construction accounting, missile guidance, remote control of cable-TV set-top boxes, and satellite communications control. All the work he did with computer programming required the use of mathematics and the ability to explain complex concepts in simple language.

He moved to Alaska in an attempt to retire, but that project failed. He is now developing online tutorials and writing books, like this one.

He and his wife, Mary, live high up on a ridge in remote Alaska, with moose and bear in the yard and eagles hunting from the roof.

## ***Dedication***

To the nurses of the South Peninsula hospital, who kept this Dummy alive and able to write a book.

## *Author's Acknowledgments*

I need to thank the professionals at SPSS. In particular, Matthew Madden made information available that was invaluable in the writing of this book. Aaron Rangel operated an excellent program that provided access to a pre-release copy of the software. Sarah Tomashek connected me with the information necessary to write and made certain I was able to receive a copy of the software. Beth Narrish was kind enough to provide me with early access to a copy of the final release of SPSS.

Amy Fandrei at John Wiley first came up with the idea that this book should be written.

Christopher Morris at John Wiley was patient and understanding when delivery deadlines whisked by. He kept everything sane while I juggled the chapters of the book with the delivery schedule. Rhonda Smith checked the book for mistakes, so if you find anything wrong, it's her fault. (Kidding. Just kidding.)

## **Publisher's Acknowledgments**

We're proud of this book; please send us your comments at <http://dummies.custhelp.com>. For other comments, please contact our Customer Care Department within the U.S. at 877-762-2974, outside the U.S. at 317-572-3993, or fax 317-572-4002.

Some of the people who helped bring this book to market include the following:

### ***Acquisitions and Editorial***

**Sr. Project Editor:** Christopher Morris

**Acquisitions Editor:** Amy Fandrei

**Sr. Copy Editor:** Barry Childs-Helton

**Technical Editor:** Rhonda Smith

**Editorial Manager:** Kevin Kirschner

**Editorial Assistant:** Amanda Graham

**Sr. Editorial Assistant:** Cherie Case

**Cartoons:** Rich Tennant  
([www.the5thwave.com](http://www.the5thwave.com))

### ***Composition Services***

**Project Coordinator:** Patrick Redmond

**Layout and Graphics:** Melissa K. Jester,  
Ronald G. Terry, Christine Williams

**Proofreader:** Christine Sabooni

**Indexer:** Broccoli Information Mgt.

# Table of Contents

## **Introduction ..... 1**

|                                                         |   |
|---------------------------------------------------------|---|
| About This Book .....                                   | 1 |
| About the Data .....                                    | 2 |
| Who This Book Is For .....                              | 2 |
| How This Book Is Organized .....                        | 3 |
| Part I: The Fundamental Mechanics of SPSS .....         | 3 |
| Part II: Getting Data In and Out of SPSS .....          | 3 |
| Part III: Graphing Data .....                           | 3 |
| Part IV: Analysis .....                                 | 4 |
| Part V: Programming SPSS with Command Syntax .....      | 4 |
| Part VI: Programming SPSS with Python and Scripts ..... | 4 |
| Part VII: The Part of Tens .....                        | 4 |
| Icons Used in This Book .....                           | 4 |
| Where to Go from Here .....                             | 5 |

## **Part 1: The Fundamental Mechanics of SPSS ..... 7**

### **Chapter 1: Introducing IBM SPSS Statistics ..... 9**

|                                              |    |
|----------------------------------------------|----|
| Garbage In, Garbage Out .....                | 9  |
| Where Did SPSS Come From? .....              | 10 |
| The Four Ways to Talk to SPSS .....          | 11 |
| What You Can and Cannot Do with SPSS .....   | 12 |
| How SPSS Works .....                         | 13 |
| Where SPSS Works .....                       | 14 |
| All the Strange Words .....                  | 14 |
| All Those Files .....                        | 15 |
| Where to Get Help When You Need It .....     | 15 |
| Your Most Valuable Possession .....          | 16 |
| You Can Dive as Deep as You Want to Go ..... | 17 |

### **Chapter 2: Installing Software and Setting Options ..... 19**

|                                       |    |
|---------------------------------------|----|
| Getting SPSS into Your Computer ..... | 19 |
| What you need for running SPSS .....  | 20 |
| Cranking up the installer .....       | 20 |
| The SPSS installation sequence .....  | 21 |
| Late registration .....               | 27 |
| Starting SPSS .....                   | 27 |

|                                                     |    |
|-----------------------------------------------------|----|
| Exploring and Modifying: The Default Settings ..... | 29 |
| General options .....                               | 29 |
| Viewer options .....                                | 31 |
| Data options .....                                  | 32 |
| Currency options .....                              | 34 |
| Output Labels options .....                         | 35 |
| Chart options .....                                 | 36 |
| Pivot Tables options .....                          | 37 |
| File Locations options .....                        | 38 |
| Scripts options .....                               | 39 |
| Multiple Imputations options .....                  | 40 |
| Syntax Editor options .....                         | 41 |

### **Chapter 3: A Simple Statistical Analysis Example ..... 43**

|                                           |    |
|-------------------------------------------|----|
| When the Tanana at Nenana Thaws .....     | 43 |
| Entering the Data .....                   | 44 |
| Entering the data definitions .....       | 44 |
| Entering the actual data .....            | 49 |
| The Most Likely Hour .....                | 52 |
| Transforming Data .....                   | 54 |
| The Two Kinds of Numbers .....            | 57 |
| The Day It Is Most Likely to Happen ..... | 60 |

## **Part 11: Getting Data In and Out of SPSS ..... 63**

### **Chapter 4: Entering Data from the Keyboard ..... 65**

|                                                              |    |
|--------------------------------------------------------------|----|
| The Variable View Is for Entering Variable Definitions ..... | 65 |
| Name .....                                                   | 66 |
| Type .....                                                   | 67 |
| Width .....                                                  | 70 |
| Decimals .....                                               | 71 |
| Label .....                                                  | 71 |
| Value .....                                                  | 72 |
| Missing .....                                                | 73 |
| Columns .....                                                | 73 |
| Align .....                                                  | 74 |
| Measure .....                                                | 74 |
| Role .....                                                   | 75 |
| The Data View Is for Entering and Viewing Data Items .....   | 76 |
| Filling In Missed Categorical Values .....                   | 77 |

### **Chapter 5: Reading and Writing Files ..... 81**

|                                                  |    |
|--------------------------------------------------|----|
| The SPSS File Format .....                       | 81 |
| Formatting a Text File for Input into SPSS ..... | 82 |
| Reading Simple Data from a Text File .....       | 83 |

|                                                                   |            |
|-------------------------------------------------------------------|------------|
| Transferring Data from Another Program .....                      | 91         |
| Reading an Excel file .....                                       | 92         |
| Reading from an unknown program type .....                        | 93         |
| Saving Data and Images .....                                      | 94         |
| <b>Chapter 6: Data and Data Types .....</b>                       | <b>97</b>  |
| Dates and Times .....                                             | 97         |
| Time Schedule .....                                               | 100        |
| Creating a Multiple Response Set .....                            | 102        |

**Chapter 10: Some Types of Graphs . . . . .167**

|                                              |     |
|----------------------------------------------|-----|
| Line Chart .....                             | 167 |
| Simple line charts .....                     | 168 |
| Charts with multiple lines .....             | 169 |
| Scatterplots .....                           | 170 |
| Simple scatterplots .....                    | 170 |
| Scatterplots with multiple variables .....   | 172 |
| Simple three-dimensional scatterplots .....  | 173 |
| Grouped three-dimensional scatterplots ..... | 174 |
| Summary Point plots .....                    | 175 |
| Simple Dot plots .....                       | 176 |
| Scatterplot matrices .....                   | 177 |
| Drop-line charts .....                       | 178 |
| Bar Graphs .....                             | 180 |
| Simple bar graphs .....                      | 180 |
| Clustered bar charts .....                   | 181 |
| Stacked bar charts .....                     | 182 |
| Simple three-dimensional bar charts .....    | 183 |
| Clustered three-dimensional bar charts ..... | 184 |
| Stacked three-dimensional bar charts .....   | 186 |
| Simple error bars .....                      | 187 |
| Clustered error bars .....                   | 189 |

**Chapter 11: More Types of Graphs . . . . .191**

|                                           |     |
|-------------------------------------------|-----|
| Histograms .....                          | 191 |
| Simple histograms .....                   | 192 |
| Stacked histograms .....                  | 193 |
| Frequency polygons .....                  | 194 |
| Population pyramids .....                 | 195 |
| Area Graphs .....                         | 196 |
| Simple area graphs .....                  | 197 |
| Stacked area charts .....                 | 198 |
| Pie Charts .....                          | 199 |
| Boxplots .....                            | 200 |
| Simple boxplots .....                     | 200 |
| Clustered boxplots .....                  | 201 |
| One-dimensional boxplots .....            | 202 |
| High-Low Graphs .....                     | 204 |
| High-low-close graphs .....               | 204 |
| Simple range bar graphs .....             | 205 |
| Clustered range bar graphs .....          | 206 |
| Differenced area graphs .....             | 207 |
| Dual-Axis Graphs .....                    | 208 |
| Dual Y-axes with categorical X-axis ..... | 208 |
| Dual Y-axes with scale X-axis .....       | 209 |

**Part IV: Analysis ..... 211****Chapter 12: Executing an Analysis ..... 213**

|                              |     |
|------------------------------|-----|
| Generating Reports .....     | 213 |
| Processing summaries .....   | 213 |
| Case summaries .....         | 214 |
| Summaries in rows .....      | 217 |
| Summaries in columns .....   | 221 |
| OLAP cubes .....             | 224 |
| Modifying Pivot Tables ..... | 226 |

**Chapter 13: Some Analysis Examples ..... 229**

|                                    |     |
|------------------------------------|-----|
| Comparison of Means Analyses ..... | 229 |
| Simple means compare .....         | 230 |
| One-sample T test .....            | 231 |
| Independent-samples T test .....   | 232 |
| Paired-samples T test .....        | 233 |
| One-way ANOVA .....                | 234 |
| Linear Model Analyses .....        | 235 |
| One variable .....                 | 235 |
| More than one variable .....       | 236 |
| Correlation Analyses .....         | 237 |
| Bivariate .....                    | 238 |
| Partial correlation .....          | 239 |
| Regression Analyses .....          | 240 |
| Linear .....                       | 240 |
| Curve estimation .....             | 242 |
| Log Linear Analyses .....          | 244 |

**Part V: Programming SPSS with Command Syntax ..... 247****Chapter 14: The Command Syntax Language ..... 249**

|                                              |     |
|----------------------------------------------|-----|
| Commands .....                               | 249 |
| Keywords .....                               | 250 |
| Variables and Constants .....                | 251 |
| Data Declaration .....                       | 252 |
| Comments .....                               | 253 |
| The Execution of Commands .....              | 254 |
| Flow Control and Conditional Execution ..... | 255 |
| IF .....                                     | 256 |
| DO IF .....                                  | 256 |
| SELECT IF .....                              | 257 |
| DO REPEAT .....                              | 257 |
| LOOP .....                                   | 257 |
| BREAK .....                                  | 258 |

|              |     |
|--------------|-----|
| Files .....  | 259 |
| GET .....    | 259 |
| IMPORT ..... | 260 |
| SAVE .....   | 260 |
| EXPORT ..... | 260 |

## **Chapter 15: Command Syntax Language Examples .....261**

|                                           |     |
|-------------------------------------------|-----|
| Writing a Syntax Command Program .....    | 261 |
| Saving and Restoring Programs .....       | 263 |
| Adding a Syntax Program to the Menu ..... | 264 |
| Where to Find Syntax Commands .....       | 266 |
| Doing Several Things at Once .....        | 267 |
| Graphing Q-Q and P-P Plots .....          | 268 |
| Splitting Cases .....                     | 270 |
| Examining Data .....                      | 272 |

## ***Part VI: Programming SPSS with Python and Scripts .... 275***

### **Chapter 16: The Python Programming Language .....277**

|                                                             |     |
|-------------------------------------------------------------|-----|
| Instructing Python: You Type It In and Python Does It ..... | 277 |
| Understanding the Way Python Does Arithmetic .....          | 278 |
| Understanding the Way Python Handles Words .....            | 280 |
| Understanding the Way Python Handles Lists .....            | 284 |
| Making Functions .....                                      | 285 |
| Making Decisions with if/else .....                         | 287 |
| Doing It Over Again with for and while .....                | 289 |

### **Chapter 17: Python inside SPSS .....293**

|                                                   |     |
|---------------------------------------------------|-----|
| Installing Python for SPSS .....                  | 293 |
| Using a Language inside a Language .....          | 297 |
| Finding out about modules .....                   | 298 |
| Installing more modules .....                     | 299 |
| Executing Multiple Commands with One Submit ..... | 300 |
| Working with SPSS Variables .....                 | 301 |
| Accessing SPSS from Outside .....                 | 302 |

### **Chapter 18: Scripts .....303**

|                                                 |     |
|-------------------------------------------------|-----|
| Picking Up BASIC .....                          | 303 |
| Scripting Fundamentals .....                    | 304 |
| Software classes, objects, and references ..... | 304 |
| The classes of SPSS .....                       | 305 |
| Properties and methods .....                    | 307 |
| Creating a New Script .....                     | 308 |
| Automatic Scripts .....                         | 309 |

## ***Part VII: The Part of Tens..... 311***

### **Chapter 19: Ten (or So) Modules You Can Add to SPSS .....313**

|                                      |     |
|--------------------------------------|-----|
| Amos .....                           | 314 |
| Direct Marketing .....               | 314 |
| SPSS Missing Values .....            | 315 |
| SPSS Data Collection Data Entry..... | 315 |
| SPSS Regression.....                 | 316 |
| SPSS Advanced Statistics.....        | 316 |
| SPSS Exact Tests .....               | 316 |
| SPSS Categories .....                | 317 |
| SPSS Conjoint .....                  | 318 |
| SPSS Neural Networks.....            | 318 |
| SPSS Forecasting.....                | 319 |

### **Chapter 20: Ten Useful SPSS Things You Can Find on the Internet. . . 321**

|                                        |     |
|----------------------------------------|-----|
| SPSS Humor .....                       | 322 |
| The SPSS Home Page.....                | 322 |
| SPSS Developer Center .....            | 322 |
| User Groups .....                      | 323 |
| Mailing Lists and News Groups .....    | 323 |
| Python Programming .....               | 324 |
| Script and Syntax Programming.....     | 325 |
| Tutorials for SPSS and Statistics..... | 326 |
| SPSS Wiki .....                        | 327 |
| PSPP, a Free SPSS.....                 | 327 |

## ***Index..... 337***
