MYCOTOXINS

CHEMICAL, BIOLOGICAL AND ENVIRONMENTAL ASPECTS

VLADIMÍR BETINA

Department of Environmental Chemistry and Technology
Slovak Polytechnical University
Bratislava, Czechoslovakia

ELSEVIER

Amsterdam—Oxford—New York—Tokyo 1989

Distribution of this book is handled by the following publishers:

for the U.S.A. and Canada
Elsevier Science Publishing Company, Inc.
655 Avenue of the Americas
New York, NY 10017

*for the East European Socialist Countries, Democratic Republic of
Vietnam, Mongolian People's Republic, People's Republic of Korea,
People's Republic of China, Republic of Cuba*
Alfa, Hurbanovo nám. 3, 815 89 Bratislava, Czechoslovakia

Betina, Vladimir.

Mycotoxins: chemical, biological, and environmental aspects.

(Bioactive molecules; v. 9)

Bibliography: p.

Includes index.

1. Mycotoxins. 2. Toxigenic fungi.

PREFACE

PART I

| | |
|---|----|
| Chapter 1 — TAXONOMY OF MYCOTOXIN-PRODUCING FUNGI | 19 |
| Contents | 19 |
| 1.1 Introduction | 19 |
| 1.2 <i>Aspergillus</i> toxins | 20 |
| 1.3 <i>Penicillium</i> toxins | 22 |
| 1.4 <i>Fusarium</i> toxins | 24 |
| 1.5 Toxins produced by other genera | 24 |
| References | 26 |
| Chapter 2 — MYCOTOXINS AS SECONDARY METABOLITES | 27 |
| Contents | 27 |
| 2.1 Introduction | 27 |
| 2.2 Biosynthesis of mycotoxins | 28 |
| 2.2.1 Polyketide-derived mycotoxins | 31 |
| 2.2.2 Terpenoid mycotoxins | 33 |
| 2.2.3 Mycotoxins derived from amino acids | 34 |
| 2.3 Secondary metabolism and growth | 35 |
| 2.4 Raison d'être of secondary metabolites in fungi | 36 |
| References | 40 |
| Chapter 3 — BIOLOGICAL EFFECTS OF MYCOTOXINS | 42 |
| Contents | 42 |
| 3.1 Introduction | 42 |
| 3.2 Acute and chronic toxicity | 43 |
| 3.3 Cytotoxicity | 44 |
| 3.4 Neurotoxicity | 46 |
| 3.5 Immunosuppressive effects | 46 |
| 3.6 Teratogenicity | 47 |
| 3.7 Mutagenicity | 47 |
| 3.8 Carcinogenic and antitumor mycotoxins | 50 |
| 3.9 Other effects in mammals | 51 |
| 3.10 Effects of mycotoxins on animal and human health | 51 |
| 3.11 Insecticidal effects | 54 |
| 3.12 Effects on microorganisms and metabolism by microorganisms | 54 |

| | | |
|--|---|------------|
| 3.13 | Phytotoxicity | 56 |
| | References | 58 |
| Chapter 4 — BIOCHEMICAL MODES OF ACTION OF MYCOTOXINS | | 63 |
| | Contents | 63 |
| 4.1 | Introduction | 63 |
| 4.2 | Interactions with DNA molecules | 66 |
| 4.3 | Replication, transcription and translation inhibitors | 68 |
| 4.4 | Effects on cell membranes and energy metabolism | 71 |
| | References | 74 |
| Chapter 5 — STRUCTURE—ACTIVITY RELATIONSHIPS AMONG MYCOTOXINS | | 75 |
| | Contents | 75 |
| 5.1 | Introduction | 75 |
| 5.2 | Structural features of mycotoxins responsible for their biological activity | 76 |
| 5.3 | Structure—activity relationships among mycotoxin families | 79 |
| 5.3.1 | Aflatoxins and related compounds | 79 |
| 5.3.2 | Ochratoxins and related dihydroisocoumarins | 81 |
| 5.3.3 | Trichothecenes | 81 |
| 5.3.4 | Small lactones | 83 |
| 5.3.5 | Macrocyclic lactones | 84 |
| 5.3.6 | Anthraquinoid mycotoxins | 88 |
| 5.3.7 | Tremorgenic mycotoxins | 89 |
| 5.4 | Miscellaneous mycotoxins | 90 |
| | References | 91 |
| Chapter 6 — ENVIRONMENTAL ASPECTS OF TOXIGENIC FUNGI AND THEIR TOXINS | | 94 |
| | Contents | 94 |
| 6.1 | Introduction | 94 |
| 6.2 | Mycotoxins in agricultural products | 96 |
| 6.3 | Mycotoxins in animal products | 102 |
| 6.4 | Mycotoxins in mould-ripened foods and mould fermentations | 104 |
| 6.5 | Prevention of mould growth and decontamination of mycotoxins in agricultural products | 105 |
| 6.6 | Detection of mycotoxins in natural products | 108 |
| | References | 110 |
| Part II | | |
| Chapter 7 — AFLATOXINS, STERIGMATOCYSTINS AND VERSICOLORINS | | 114 |
| | Contents | 114 |
| 7.1 | Introduction | 114 |
| 7.2 | Aflatoxins | 120 |
| 7.2.1 | Producing organisms | 120 |

| | | |
|-------|---|-----|
| 7.2.2 | Biosynthesis | 120 |
| 7.2.3 | Isolation | 126 |
| 7.2.4 | Physical and chemical properties | 127 |
| 7.2.5 | Biological activity | 130 |
| 7.2.6 | Mode of action | 132 |
| 7.2.7 | Environmental aspects | 134 |
| 7.2.8 | Detoxification of foods | 138 |
| 7.3 | Sterigmatocystins and related compounds | 139 |
| 7.3.1 | Producing organisms | 139 |
| 7.3.2 | Biosynthesis | 140 |
| 7.3.3 | Isolation | 140 |
| 7.3.4 | Physical and chemical properties | 141 |
| 7.3.5 | Biological activity and mode of action | 143 |
| 7.3.6 | Environmental aspects | 144 |
| 7.4 | Versicolorins | 144 |
| | References | 145 |

Chapter 8 — OCHRATOXINS AND RELATED DIHYDROISOCOUMARINS 151

| | | |
|-------|--|-----|
| | Contents | 151 |
| 8.1 | Introduction | 151 |
| 8.2 | Ochratoxins | 153 |
| 8.2.1 | Producing organisms | 154 |
| 8.2.2 | Biosynthesis | 154 |
| 8.2.3 | Isolation | 156 |
| 8.2.4 | Physical and chemical properties | 158 |
| 8.2.5 | Biological activity | 159 |
| 8.2.6 | Mode of action | 161 |
| 8.2.7 | Environmental aspects | 163 |
| 8.3 | Viomellein and structurally related mycotoxins | 164 |
| 8.3.1 | Producing organisms | 165 |
| 8.3.2 | Biosynthesis | 165 |
| 8.3.3 | Isolation | 167 |
| 8.3.4 | Physical and chemical properties | 167 |
| 8.3.5 | Biological activity and mode of action | 168 |
| | References | 169 |

Chapter 9 — CITRININ 174

| | | |
|-------|--|-----|
| | Contents | 174 |
| 9.1 | Introduction | 174 |
| 9.2 | Producing organisms | 176 |
| 9.3 | Biosynthesis | 177 |
| 9.4 | Isolation | 180 |
| 9.5 | Physical and chemical properties | 181 |
| 9.6 | Biological activity | 182 |
| 9.6.1 | Antimicrobial properties | 182 |
| 9.6.2 | Toxicity | 182 |
| 9.6.3 | Phytotoxicity | 184 |

| | | |
|---|--|------------|
| 9.7 | Mode of action | 184 |
| 9.8 | Environmental aspects | 187 |
| | References | 188 |
| Chapter 10 — TRICHOHECENES | | 192 |
| | Contents | 192 |
| 10.1 | Introduction | 193 |
| 10.2 | Trichothecenes without an oxygen function at the C-8 position | 195 |
| 10.2.1 | 12,13-Epoxytrichothec-9-ene | 197 |
| 10.2.2 | Trichodermol (roridin C) | 198 |
| 10.2.3 | Trichodermin | 198 |
| 10.2.4 | Trichodermadiene | 198 |
| 10.2.5 | Di- <i>O</i> -Acetylverrucarol | 199 |
| 10.2.6 | Scirpentriol | 199 |
| 10.2.7 | Monoacetoxyscirpenol | 199 |
| 10.2.8 | Diacetoxyscirpenol (anguidin) | 200 |
| 10.2.9 | 7 α -Hydroxydiacetoxyscirpenol | 201 |
| 10.3 | Trichothecenes with an oxygen function other than ketone at the C-8 position | 201 |
| 10.3.1 | 12,13-Epoxytrichothec-9-ene-4 β ,8 α -diol | 201 |
| 10.3.2 | T-2 triol | 203 |
| 10.3.3 | Neosolaniol | 203 |
| 10.3.4 | Neosolaniol monoacetate | 205 |
| 10.3.5 | 4 β ,8 α -Diacetoxy-12,13-epoxytrichothec-9-ene-3 α ,15-diol | 206 |
| 10.3.6 | HT-2 toxin | 206 |
| 10.3.7 | T-2 toxin | 206 |
| 10.3.8 | Acetyl T-2 toxin | 207 |
| 10.3.9 | Crotocin | 207 |
| 10.3.10 | Sporotrichiol | 208 |
| 10.4 | Trichothecenes with a ketone at the C-8 position | 208 |
| 10.4.1 | Trichothecin | 208 |
| 10.4.2 | Deoxynivalenol (vomitoxin) | 210 |
| 10.4.3 | Deoxynivalenol monoacetate (3-acetyldeoxynivalenol) | 210 |
| 10.4.4 | Nivalenol | 211 |
| 10.4.5 | Fusarenon-X (nivalenol monoacetate) | 211 |
| 10.4.6 | Nivalenol diacetate | 212 |
| 10.5 | Macrocyclic trichothecenes | 212 |
| 10.5.1 | Verrucarins | 212 |
| 10.5.1.1 | Production and isolation | 212 |
| 10.5.1.2 | Physical and chemical properties | 214 |
| 10.5.1.3 | Biological activity | 215 |
| 10.5.2 | Roridins | 215 |
| 10.5.2.1 | Production and isolation | 215 |
| 10.5.2.2 | Physical and chemical properties | 215 |
| 10.5.2.3 | Biological activity | 216 |
| 10.5.3 | Satratoxins | 216 |
| 10.5.4 | Vertisporin | 220 |
| 10.5.5 | Myrotoxins | 220 |
| 10.5.5.1 | Producing organism | 220 |

| | | |
|----------|--|-----|
| 10.5.5.2 | Production and isolation | 220 |
| 10.5.5.3 | Physical and chemical properties | 220 |
| 10.5.5.4 | Biological activity | 221 |
| 10.5.6 | Baccharinoids | 221 |
| 10.5.6.1 | Source and isolation | 221 |
| 10.5.6.2 | Physical and chemical properties | 222 |
| 10.5.6.3 | Biological activity | 223 |
| 10.5.7 | Miotoxins and miophytocenes | 223 |
| 10.5.7.1 | Source and isolation | 223 |
| 10.5.7.2 | Physical and chemical properties | 225 |
| 10.5.7.3 | Biological activity | 226 |
| 10.6 | Biosynthesis of trichothecenes | 226 |
| 10.7 | Structure—activity relationships | 230 |
| 10.8 | Mode of action | 233 |
| 10.9 | Environmental aspects | 235 |
| | References | 238 |

Chapter 11 — PATULIN AND OTHER SMALL LACTONES 242

| | | |
|--------|--|-----|
| | Contents | 242 |
| 11.1 | Introduction | 243 |
| 11.2 | Patulin | 246 |
| 11.2.1 | Producing organisms | 246 |
| 11.2.2 | Biosynthesis | 246 |
| 11.2.3 | Isolation | 250 |
| 11.2.4 | Physical and chemical properties | 250 |
| 11.2.5 | Biological activity | 251 |
| 11.2.6 | Mode of action | 252 |
| 11.2.7 | Environmental aspects | 252 |
| 11.3 | Penicillic acid | 253 |
| 11.3.1 | Producing organisms | 253 |
| 11.3.2 | Biosynthesis | 254 |
| 11.3.3 | Isolation | 255 |
| 11.3.4 | Physical and chemical properties | 256 |
| 11.3.5 | Biological activity | 256 |
| 11.3.6 | Mode of action | 256 |
| 11.3.7 | Environmental aspects | 256 |
| 11.4 | Mycophenolic acid | 257 |
| 11.4.1 | Producing organisms | 257 |
| 11.4.2 | Biosynthesis | 257 |
| 11.4.3 | Isolation | 259 |
| 11.4.4 | Physical and chemical properties | 260 |
| 11.4.5 | Biological activity | 260 |
| 11.4.6 | Mode of action | 260 |
| 11.4.7 | Environmental aspects | 261 |
| 11.5 | Butenolide | 261 |
| 11.5.1 | Producing organisms | 261 |
| 11.5.2 | Production and isolation | 261 |
| 11.5.3 | Physical and chemical properties | 261 |

| | | |
|--------|---|-----|
| 11.5.4 | Biological activity and environmental aspects | 262 |
| 11.6 | Citreoviridin | 262 |
| 11.6.1 | Producing organisms | 262 |
| 11.6.2 | Biosynthesis | 262 |
| 11.6.3 | Isolation | 263 |
| 11.6.4 | Physical and chemical properties | 264 |
| 11.6.5 | Biological activity | 264 |
| 11.6.6 | Mode of action | 264 |
| 11.6.7 | Environmental aspects | 265 |
| | References | 265 |

Chapter 12 — ZEARALENONE AND ITS DERIVATIVES 271

| | | |
|------|--|-----|
| | Contents | 271 |
| 12.1 | Introduction | 271 |
| 12.2 | Producing organisms | 275 |
| 12.3 | Biosynthesis | 276 |
| 12.4 | Isolation | 277 |
| 12.5 | Physical and chemical properties | 278 |
| 12.6 | Biological activity | 278 |
| 12.7 | Environmental aspects | 280 |
| | References | 281 |

Chapter 13 — CYTOCHALASANS 285

| | | |
|----------|--|-----|
| | Contents | 285 |
| 13.1 | Introduction | 286 |
| 13.2 | [11]Cytochalasans | 288 |
| 13.2.1 | Cytochalasins C and D | 292 |
| 13.2.1.1 | Producing organisms | 292 |
| 13.2.1.2 | Biosynthesis | 292 |
| 13.2.1.3 | Isolation | 293 |
| 13.2.1.4 | Physical and chemical properties | 294 |
| 13.2.2 | Cytochalasin G | 295 |
| 13.2.2.1 | Producing organisms | 295 |
| 13.2.2.2 | Biosynthesis | 295 |
| 13.2.2.3 | Isolation | 295 |
| 13.2.2.4 | Physical and chemical properties | 296 |
| 13.2.3 | Cytochalasins H and J | 296 |
| 13.2.3.1 | Producing organism | 296 |
| 13.2.3.2 | Biosynthesis | 296 |
| 13.2.3.3 | Isolation | 296 |
| 13.2.3.4 | Physical and chemical properties | 297 |
| 13.2.4 | Zygosporins D, E, F and G | 297 |
| 13.2.4.1 | Producing organism | 297 |
| 13.2.4.2 | Biosynthesis | 297 |
| 13.2.4.3 | Isolation | 297 |
| 13.2.4.4 | Physical and chemical properties | 298 |
| 13.2.5 | Aspochalasins A, B, C and D | 298 |

| | | |
|----------|---|-----|
| 13.2.5.1 | Producing organism | 298 |
| 13.2.5.2 | Biosynthesis | 298 |
| 13.2.5.3 | Isolation | 299 |
| 13.2.5.4 | Physical and chemical properties | 299 |
| 13.2.6 | Engleromycin | 300 |
| 13.2.6.1 | Physical and chemical properties | 300 |
| 13.3 | [13]Cytochalasans | 300 |
| 13.3.1 | Deoxaphomin, proxiphomin and protophomin | 304 |
| 13.3.1.1 | Producing organisms | 304 |
| 13.3.1.2 | Biosynthesis | 304 |
| 13.3.1.3 | Isolation | 305 |
| 13.3.1.4 | Physical and chemical properties | 306 |
| 13.3.2 | Chaetoglobosins and acetylchaetoglobosins | 306 |
| 13.3.2.1 | Producing organisms | 306 |
| 13.3.2.2 | Biosynthesis | 306 |
| 13.3.2.3 | Isolation | 307 |
| 13.3.2.4 | Physical and chemical properties | 309 |
| 13.3.3 | Cytochalasins K | 310 |
| 13.3.3.1 | Producing organisms | 310 |
| 13.3.3.2 | Biosynthesis and isolation | 310 |
| 13.3.3.3 | Physical and chemical properties | 310 |
| 13.4 | 24-Oxa-[14]cytochalasans | 312 |
| 13.4.1 | Cytochalasins A and B | 313 |
| 13.4.1.1 | Producing organisms | 313 |
| 13.4.1.2 | Biosynthesis | 313 |
| 13.4.1.3 | Isolation | 314 |
| 13.4.1.4 | Physical and chemical properties | 315 |
| 13.4.2 | Cytochalasins F, L and M | 315 |
| 13.5 | 21,23-Dioxa-[13]cytochalasans | 315 |
| 13.5.1 | Cytochalasin E | 316 |
| 13.5.1.1 | Producing organisms | 316 |
| 13.5.1.2 | Biosynthesis | 316 |
| 13.5.1.3 | Isolation | 317 |
| 13.5.1.4 | Physical and chemical properties | 317 |
| 13.6 | Biological activity of cytochalasans | 317 |
| 13.7 | Mode of action of cytochalasins | 319 |
| | References | 322 |

Chapter 14 — RUBRATOXINS 325

| | | |
|------|--|-----|
| | Contents | 325 |
| 14.1 | Introduction | 325 |
| 14.2 | Producing organisms | 326 |
| 14.3 | Biosynthesis | 326 |
| 14.4 | Isolation | 327 |
| 14.5 | Physical and chemical properties | 328 |
| 14.6 | Biological activity | 329 |
| 14.7 | Mode of action | 330 |
| | References | 331 |

| | |
|---|---------|
| Chapter 15 — ANTHRAQUINONES | 333 |
| Contents | 333 |
| 15.1 Introduction | 333 |
| 15.2 Monomeric anthraquinones | 335 |
| 15.2.1 Producing organisms | 335 |
| 15.2.2 Biosynthesis | 336 |
| 15.2.3 Isolation | 339 |
| 15.2.4 Physical and chemical properties | 340 |
| 15.3 Bianthraquinones | 340 |
| 15.3.1 Producing organisms | 340 |
| 15.3.2 Biosynthesis | 340 |
| 15.3.3 Isolation | 343 |
| 15.3.4 Physical and chemical properties | 343 |
| 15.4 Modified bianthraquinones | 343 |
| 15.4.1 Producing organisms | 343 |
| 15.4.2 Biosynthesis | 345 |
| 15.4.3 Isolation | 346 |
| 15.4.4 Physical and chemical properties | 346 |
| 15.5 Biological activity of fungal anthraquinones | 347 |
| 15.6 Mode of action | 349 |
| 15.7 Environmental aspects | 350 |
| References | 350 |
| Chapter 16 — TREMORGENIC MYCOTOXINS | 353 |
| Contents | 353 |
| 16.1 Introduction | 354 |
| 16.2 Penitrems, janthitrems, lolitrems, aflatrem, paxilline, paspaline, paspalicine, paspalinine and paspalitrems A and B | 355 |
| 16.2.1 Penitrems | 355 |
| 16.2.1.1 Producing organisms | 355 |
| 16.2.1.2 Biosynthesis | 356 |
| 16.2.1.3 Isolation | 357 |
| 16.2.1.4 Physical and chemical properties | 360 |
| 16.2.2 Janthitrems | 360 |
| 16.2.2.1 Producing organisms | 360 |
| 16.2.2.2 Biosynthesis | 360 |
| 16.2.2.3 Isolation | 361 |
| 16.2.2.4 Physical and chemical properties | 361 |
| 16.2.3 Lolitrems | 362 |
| 16.2.4 Aflatrem | 363 |
| 16.2.4.1 Producing organism | 363 |
| 16.2.4.2 Biosynthesis | 363 |
| 16.2.4.3 Isolation | 364 |
| 16.2.4.4 Physical and chemical properties | 365 |
| 16.2.5 Paxilline | 365 |
| 16.2.5.1 Producing organisms | 365 |
| 16.2.5.2 Biosynthesis | 365 |
| 16.2.5.3 Isolation | 366 |

| | | |
|--|--|------------|
| 16.2.5.4 | Physical and chemical properties | 366 |
| 16.2.6 | Paspaline, paspalicine, paspalinine and paspalitrems A and B | 366 |
| 16.2.6.1 | Paspalinine, paspalicine and paspalinine | 367 |
| 16.2.6.1.1 | Biosynthesis | 367 |
| 16.2.6.1.2 | Isolation | 368 |
| 16.2.6.1.3 | Physical and chemical properties | 369 |
| 16.2.6.2 | Paspalitrems A and B | 370 |
| 16.2.6.2.1 | Production | 370 |
| 16.2.6.2.2 | Isolation | 370 |
| 16.2.6.2.3 | Physical and chemical properties | 370 |
| 16.3 | Territrems | 371 |
| 16.3.1 | Producing organisms | 371 |
| 16.3.2 | Biosynthesis | 372 |
| 16.3.3 | Isolation | 372 |
| 16.3.4 | Physical and chemical properties | 372 |
| 16.4 | Verrucosidin | 374 |
| 16.5 | Verruculotoxin | 374 |
| 16.5.1 | Producing organism | 374 |
| 16.5.2 | Production and isolation | 375 |
| 16.5.3 | Physical and chemical properties | 375 |
| 16.6 | Tremorgens containing a 6-methoxyindole moiety | 375 |
| 16.6.1 | Producing organisms | 375 |
| 16.6.2 | Biosynthesis | 376 |
| 16.6.3 | Isolation | 377 |
| 16.6.4 | Physical and chemical properties | 378 |
| 16.7 | Tryptoquivalines | 379 |
| 16.7.1 | Producing organisms | 379 |
| 16.7.2 | Biosynthesis | 380 |
| 16.7.3 | Isolation | 380 |
| 16.7.4 | Physical and chemical properties | 380 |
| 16.8 | Biological activity of tremorgenic mycotoxins | 382 |
| 16.9 | Environmental aspects | 384 |
| | References | 384 |
| Chapter 17 — EPIPOLYTHIOPIPERAZINE-3,6-DIONES | | 388 |
| | Contents | 388 |
| 17.1 | Introduction | 388 |
| 17.2 | Gliotoxins | 389 |
| 17.2.1 | Producing organisms | 389 |
| 17.2.2 | Biosynthesis | 389 |
| 17.2.3 | Isolation | 391 |
| 17.2.4 | Physical and chemical properties | 392 |
| 17.3 | Sporidesmins | 393 |
| 17.3.1 | Producing organism | 393 |
| 17.3.2 | Isolation | 393 |
| 17.3.3 | Physical and chemical properties | 393 |
| 17.4 | Chetocin and related toxins | 396 |
| 17.4.1 | Chetocins | 396 |

| | | |
|--|---|------------|
| 17.4.2 | Verticillins | 398 |
| 17.4.3 | Melinacidins | 398 |
| 17.4.4 | Chetomin | 399 |
| 17.5 | Emestrin | 399 |
| 17.6 | Biological activity of epipolythiopiperazine-3,6-diones | 400 |
| 17.7 | Environmental aspects | 4030 |
| | References | 403 |
| Chapter 18 — MISCELLANEOUS TOXINS | | 406 |
| | Contents | 406 |
| 18.1 | Introduction | 407 |
| 18.2 | PR toxin | 407 |
| 18.2.1 | Producing organism | 407 |
| 18.2.2 | Biosynthesis | 409 |
| 18.2.3 | Isolation | 409 |
| 18.2.4 | Physical and chemical properties | 409 |
| 18.2.5 | Biological activity and mode of action | 411 |
| 18.3 | Secalonic acid D | 411 |
| 18.3.1 | Producing organisms | 412 |
| 18.3.2 | Biosynthesis | 412 |
| 18.3.3 | Isolation | 413 |
| 18.3.4 | Physical and chemical properties | 413 |
| 18.3.5 | Biological activity | 413 |
| 18.3.6 | Mode of action | 414 |
| 18.3.7 | Environmental aspects | 414 |
| 18.4 | Viridicatumtoxin | 414 |
| 18.5 | Cyclochlorotine | 415 |
| 18.5.1 | Production and isolation | 416 |
| 18.5.2 | Physical and chemical properties | 416 |
| 18.5.3 | Biological activity | 416 |
| 18.6 | Cyclopiazonic acid | 417 |
| 18.6.1 | Producing organisms | 417 |
| 18.6.2 | Biosynthesis | 417 |
| 18.6.3 | Isolation | 419 |
| 18.6.4 | Physical and chemical properties | 419 |
| 18.6.5 | Biological activity | 419 |
| 18.6.6 | Environmental aspects | 420 |
| 18.7 | Moniliformin | 420 |
| 18.7.1 | Producing organisms | 420 |
| 18.7.2 | Production and isolation | 420 |
| 18.7.3 | Physical and chemical properties | 420 |
| 18.7.4 | Biological activity and mode of action | 421 |
| 18.7.5 | Environmental aspects | 422 |
| 18.8 | Fusarin C | 423 |
| | References | 424 |

bioactive molecules

volume 9

MYCOTOXINS

CHEMICAL, BIOLOGICAL
AND ENVIRONMENTAL ASPECTS

bioactive molecules

- Volume 1 Mycotoxins and Phycotoxins, edited by P. S. Steyn and R. Vlegaar
- Volume 2 Naturally Occurring Carcinogens of Plant Origin, edited by I. Hirono
- Volume 3 Biophosphates and their Analogues, edited by K. S. Bruzik and W. J. Stec
- Volume 4 Phenothiazines and 1,4-Benzothiazines, edited by R. R. Gupta
- Volume 5 Chemical Carcinogens, edited by P. Politzer and F. J. Martin, Jr.
- Volume 6 Anthracycline and Anthracenedione-Based Anticancer Agents, edited by J. W. Lown
- Volume 7 Chemistry and Biology of Naturally-Occurring Acetylenes and Related Compounds (NOARC), edited by J. Lam, H. Breteler, T. Arnason and L. Hansen
- Volume 8 Metalloproteins: Chemical Properties and Biological Effects, edited by S. Otsuka and T. Yamanaka
- Volume 9 Mycotoxins: Chemical, Biological and Environmental Aspects, by V. Betina

ELSEVIER

Amsterdam—Oxford—New York—Tokyo 1989

Distribution of this book is handled by the following publishers:

for the U.S.A. and Canada
Elsevier Science Publishing Company, Inc.
655 Avenue of the Americas
New York, NY 10017

*for the East European Socialist Countries, Democratic Republic of
Vietnam, Mongolian People's Republic, People's Republic of Korea,
People's Republic of China, Republic of Cuba*
Alfa, Hurbanovo nám. 3, 815 89 Bratislava, Czechoslovakia

for all remaining areas
Elsevier Science Publishers
Sara Burgerhartstraat 25
P.O. Box 211, 1000 AE Amsterdam, The Netherlands

Library of Congress Cataloging-in-Publication Data

Betina, Vladimir.

Mycotoxins: chemical, biological, and environmental aspects.

(Bioactive molecules; v. 9)

Bibliography: p.

Includes index.

1. Mycotoxins. 2. Toxigenic fungi.
