Contents

In memory of Lewis W. Wannamaker, P. Ferrieri and E. L. Kaplan, University of Minnesota, U.S.A. 17

Epidemiology of Streptococcus and Streptococcal Diseases

- Pharyngeal carriage of beta-haemolytic streptococci in Malaysian schoolchildren
F. Jamal, J. George and A. Darus 19
- Food-borne epidemics of groups A, C and G streptococcal pharyngitis in Israeli Military camps (1980-83)
M. Ferne, D.I. Cohen, T.M. Rouach, G. Dinari and S. Bergner-Rabinowitz 22
- A seroepidemiological study on group A streptococci in Japan and Ecuador
M. Morita, K. Shoji, T. Yamawaki, S. Saito, and N. Ishida 23
- An epidemiological study of Hemolytic streptococci in pupils at seven prefectures in Japan
M. Okuyama and K. Nakajima 25
- Long term study of streptococcal infection at an outpatient clinic
T. Murai, Y. Inazumi, T. Agata, Y. Kaneko and M. Tokumaru 26
- Epidemiology of throat carriers of streptococci among children in Otsu, Shiga
T. Takeuchi and S. Kawakita 29
- The investigation of outbreaks of infection caused by human strains of Lancefield group C or group G streptococci
G. Colman, and A. Efstratiou 30
- Annual changes of upper limit of ASO titer in school children
S. Fujikawa and M. Ohkuni 32
- Bacteriocin production by rheumatogenic and nephritogenic streptococci
J.R. Tagg 34
- Some provisional M-types among *Streptococcus pyogenes* (Lancefield group A)
C.A.M. Fraser and G. Colman 35
- M-typability of group A streptococci
J. Šrámek, H. Havlíčková and J. Rotta 37
- Changes and changing patterns of T-types of group A streptococci and their drug resistance in Japan
K. Takizawa, Y. Asai, T. Yasuda and Y. Miyamoto 38
- Bacteriological study on group B streptococcal infections in new born babies in Japan
T. Agata, Y. Inazumi, T. Murai and Y. Kaneko 40
- Serotype distribution of group B streptococci in the GDR over a 10-year period (1975-84)
E. Günther and W. Köhler 41
- Group B streptococci in the throat
C.G. Cumming and P.W. Ross 43
- The carriage of group B streptococci (GBS) in mothers and babies
P.W. Ross, J.R. Neilson and C.G. Cumming 44
- Group B streptococcal carriage in Chinese females of Hong Kong
Chan Suk Hung, T. Murai, Y. Kaneko, T.F. Fok and S.P. Lau 46
- Zoonotic aspects of human/animal group-B streptococcal infection
N.E. Jensen and B. Berg 48

Characterization and Identification of Streptococci

- Proposed revision of nomenclature of group B streptococcus (GBS) serotypes
J. Jelinková and J. Motlová 51
- Serology of the nutritionally variant streptococci
I. van de Rijn and M.J. George 52
- Identification of surface antigens associated with pheromone response in *Streptococcus faecalis*
M.L. Tortorello, D.A. Krung and G.M. Dunny 54
- Gram positive anaerobic cocci: Aspects of their isolation and characterization
G.L.F. Smith, C.G. Cumming and P.W. Ross 55
- Charting hemolytic streptococci of palatine tonsils by *in situ* culture
Q G. Zanen-Lim, N.J. van den Broek and H.C. Zanen 57

Rapid serological identification of beta haemolytic streptococci from throat swabs with selective enrichment broth using coagglutination technique V. Satwik, H. Kapoor and K. Prakash	58
Direct demonstration of group A streptococcal antigen by latex agglutination in throat swabs of patients with pharyngitis C.D. Berkowitz, B.F. Anthony, C. Levitt, E.L. Kaplan, E. Wolinsky, D. James, S. Feldman and A.L. Bisno	59
Serogrouping of streptococci by enzyme-linked immunosorbent assay (ELISA) technique J.C. Huang, R. Lessard and B. Diena	61
Characterization of group C and G streptococcal deoxyribonucleases K.B. Sharma, A.K. Kapoor and K. Prakash	63
Physiologic and <i>in vitro</i> virulence differences among four beta-haemolytic group C <i>Streptococcus</i> species R.R. Facklam and L. Edwards	64
Motile streptococci: Mainly streptococci other than group D H. Hashimoto, H. Nakano, H. Kawakami and S. Ishida	67
A new scheme for serotyping of group G streptococci S.F. Lawal and O.D. Ogunbi	69
The group G streptococcus: Its role as a possible pathogen S.E. Read, H.F.M Reid, D.C.J. Bassett, T. Poon-King and J.B. Zabriskie	70
New an. phipathic molecules from nutritionally variant streptococci I. van de Rijn and M.J. George	72
Serological grouping, biochemical properties and drug susceptibility of streptococci isolated from pigs in Japan C. Sugimoto, K. Tominaga, K. Kashiwazaki and R. Azuma	74
Binding Mechanisms of Streptococci	
Electron microscopic visualization of fibrinogen binding to group A streptococcus and its M protein-linked nature competition with other plasma proteins J. Havlíček, M. Rýc, J. Pokorný, H. Havlíčková and O. Kühnemund	79
Interactions of nephritis-associated group A streptococci with aggregated human IgG C. Schalén, P. Christensen, D. Kurl, J. Gramek and M.-L. Svensson	81
Specific binding of fibrinogen fragment D by M ⁺ and M ⁻ group A streptococci and isolation of a receptor different from M protein K.H. Schmidt and W. Köhler	83
Group A streptococcal cell wall protein is bound to human pharyngeal epithelial cells S. Tylewska and W. Hryniewicz	85
Covalent linkage of fibrinogen receptor to streptococcal M protein O. Kühnemund, J. Havlíček and W. Köhler	86
Nonspecific inhibitor of GAS adherence to human epithelial cells from normal mammalian sera A. Totolian, K. Grabovskaya, L. Burova, I. Malisheva, J. Havlíček, M. Rýc, J. Pokorný and O. Kühnemund	88
Induction and specificity of anti-IgG following immunization with streptococci C. Schalén, L.A. Burova, P. Christensen, R. Grubb, M.-L. Svensson and A.A. Totolian	89
Biochemical and immunological properties of group B streptococcal clumping factor Y. Usui, Y. Ichiman, Y. Ohshima, T. Ohtomo and K. Yoshida	91
Factors influencing adherence of group-B streptococci to human epithelial cells A. Totolian, T. Bulgakova, K. Grabovskaya, M. Rýc, J. Jelínková and R. Bicoová	93
Role of lipoteichoic acid in the adherence of group B streptococci to vaginal epithelial cells G. Teti, G. Orefici, F. Tomasello, R. Trifiletti, C. Fava, S. Recchia and P. Mastroeni	94
Binding of human α_2 -macroglobulin to streptococci of group A, B, C and G H.P. Müller and H. Blobel	96
Specific binding of human immunoglobulin G to group L and U streptococci G.S. Chhatwal, C. Lämmler, I. Dutra and H. Blobel	98
Binding of fibronectin to buccal epithelial cells W.A. Simpson, D.L. Hasty and E.H. Beachey	100
Oral Streptococci	
Effects of sodium and potassium ions on characteristics of oral bacteria K.W. Knox, H. Forester, N.A. Jacques, A.J. Wicken and R.J. Fitzgerald	105

Protein PI of <i>Streptococcus mutans</i> : an M-protein-like virulence factor of oral streptococci H. Forester, N. Hunter, J.A. Loudon, K.M. Weston and K.W. Knox	107
Erythromycin stearate prophylaxis of <i>Streptococcus viridans</i> bacteraemia in patients undergoing dental extraction D.C. Shanson, S. Akash and M. Harris	109
Agglutinating antibodies to serotype <i>Streptococcus mutans</i> : Serotypic variations of reference strains and clinical isolates F. Ota, H. Kato, K. Okada and K. Fukui	110
<i>Streptococcus viridans</i> bacteraemia with special reference to <i>Streptococcus sanguis</i> P. Gaustad	112
The use of API-20 STREP for the classification and identification of viridans streptococci G.L. French, H. Talsania and I. Phillips	114
Variability of protein production by oral streptococci L. Hardy, H. Forester, K.W. Knox and A.J. Wicken	115
Effects of exocellular glucans from streptococci on murine natural reactivity P. Marconi, L. Scaringi, L. Tissi, P. d'Errico, R. Orsatti, G. Pellegrini and G. Orefici	117
Immunochemical properties of a monoclonal antibody specific serotype g carbohydrate antigen of <i>Streptococcus mutans</i> K. Futagami, Y. Nishida, N. Okahashi and S. Hamada	118
Immunochemical characterization of a new amphipathic antigen of <i>Streptococcus sanguis</i> ATCC 10557 T. Yamamoto, T. Koga and S. Hamada	120
<i>Streptococcus pneumoniae</i>	
Pneumococcal infection and serotypes from patients with systemic diseases (a four-year-study) P. Nunthapisud, W. Anantchanachai and A. Sukonthaman	125
Pneumococcal serotypes in childhood and adult infections in Israel S.B. Rabinowitz, M. Ferne, D. Leve and J. Henrichsen	127
Serological typing of pneumococci in pneumonia, meningitis and otitis Shao-Qing Ding	128
The present status of the WHO pneumococcal typing surveillance programme J. Henrichsen	129
Identification of <i>Streptococcus pneumoniae</i> by a rapid extemporaneous coagglutination system R. Guinet, G. Barbe, M. Boude, D. Nerson and M. Carraz	130
Enzyme-linked immunosorbent assay (ELISA) for detection of antibodies to purified pneumococcal haemolysin (pneumolysin) in patients with pneumoniae K. Kanclerski, M. Granström, M. Kalin and R. Möllby	132
Opsonization of type 25 pneumococci by the alternative complement pathway independently of anticapsular antibody D.P. Fine, K.A. Hoskins, G. Schiffman, J.E. Schweinle and J.C. Guckian	134
Extracellular Products of Streptococci	
The detection of low molecular weight proteins in preparations of erythrogenic toxin type A with similar isoelectric points D. Gerlach, J.H. Ozegowski, H. Knöll and W. Köhler	139
The influence of immunization with ET type A on the infection of rabbits with viable streptococci S.E. Holm, H. Knöll, D. Gerlach, J.H. Ozegowski and W. Köhler	141
Production of leukocyte migration inhibition factor induced by erythrogenic toxin in vitro V. Hřibálová, D. Gerlach, J.-H. Ozegowski and H. Knöll	143
Light and electron microscopic demonstration of the binding of erythrogenic toxin A on human lymphocytes using colloidal gold as marker M. Wagner, B. Wagner, S. Scriba, D. Gerlach, H. Knöll, W. Köhler and S.E. Holm	145
Hemolytic inhibition of streptolysin C Y. Okuyama	147
Isoelectric points of streptolysin O from groups A, C and G streptococci J. Suzuki, E. Yoshihara and S. Kobayashi	150
Effect of streptolysin S on human T lymphocyte subsets W. Ilrynowicz, J. Pryjma, and K. Kanclerski	152

Extracellular products of group A streptococci as a possible virulent marker in human infections J.C. Huang and B. Diena	153
Evaluation of the role of hemolysin and pigment in pathogenesis of early onset group B streptococcal infection D.E. Wennerstrom, J.C. Tsaihong and J.T. Crawford	155
Streptococcal nuclease B: Purification and characterization of subspecies E.D. Gray, T. Siefferman and Z. Tavakoliyazdi	157
Electrophoretic patterns of group A streptococcal DNase characteristic for their T-types T. Yamada, Y. Miyakawa, M. Shitara, Y. Fukazawa, Y. Shiokawa and N. Kosakai	158
Drug and mental resistance of streptococci: Its correlation with extracellular DNase production T. Yamada, Y. Miyakawa, Y. Fukazawa, M. Shitara, H. Nakahara, N. Kosakai and Y. Shiokawa	160
Peptidase activities of various streptococcus species. A sample identification system for streptococcus T. Arai, A. Kusakabe and S. Komatsu	161
Factors influencing the continued presence of nephritis strain associated protein in streptococcal group A culture supernatants K.H. Johnson, S.D. Elliot, D. Buskirk and J.B. Zabriskie	163
Serological studies and some characters of an extracellular protein associated with nephritogenic streptococci H. Ohkuni, Y. Todome, H. Takasaki, J.W. Quan and Y. Kimura	165
Extraction of the nephritis strain associated protein from whole cells of nephritogenic streptococcus J.W. Quan, H. Ohkuni, E. Watari, T. Todome, Y. Kimura, K. Suzuki, K. Aihara, T. Haseba and T. Watanabe	167
Production of monoclonal antibody to an extracellular protein associated with nephritogenic streptococci H. Takasaki, Y. Todome, K. Yoshimura, Jia-Wu Quan, H. Ohkuni and Y. Kimura	168
Cationic extracellular streptococcal antigen: Affinity for the renal glomerulus A. Vogt, A. Mertz, S. Batsford and B. Rodríguez-Iturbe	170
Lymphocytic stimulation with cationic antigens produced by streptococci isolated from patients with nephritis J. Mosquera, B. Rodríguez-Iturbe, A. Vogt and S. Batsford	171
Mitogenic activity of extracellular, cationic streptococcal antigens: Analysis of proliferating lymphocyte subpopulations in newborns and adults H. Schneider and A. Vogt	173
Mitogenic activity of extracellular cationic-A-streptococcal products: Analysis of leucocyte response M. Suzuki, M. Vogt and S. Batsford	174
Cellular components of streptococci	
A streptococcal inactivator of chemotaxis: A new virulence factor specific to group A streptococci P.P. Cleary, E. Chenoweth and D. Wexler	179
Electron microscopy of the group A streptococcal cell surface V.A. Fischetti and M. Fazio-Zanakis	180
Attempt to prepare M-typing sera for <i>S. pyogenes</i> by immunization of guinea pigs with "native" M proteins enzymatically obtained H. Usami, Y. Sugahara, and M. Tsujimoto and S. Kotani	183
The complete amino acid sequence of streptococcal pep M5 protein B.N. Manjula, A.S. Acharya, S.M. Mische, T. Fairwell, B.L. Trus and V.A. Fischetti	185
Protective epitopes of group A streptococcal M proteins shared with sarcolemmal membrane proteins of human heart J.B. Dale and E.H. Beachey	188
Chemically synthesized protective epitopes of streptococcal M protein E.H. Beachey, J.B. Dale and M. Seyer	190
Ultrastructural localization of lipoteichoic acid on group A streptococci M. Wagner, B. Wagner, M. Rýc and R. Bícova	192
Induction of serum factor causing tumour necrosis by lipoteichoic acids (LTA) of <i>Streptococcus pyogenes</i> H. Usami, A. Yamamoto, M. Nagamuta, Y. Sugahara, S. Hamada, T. Yamamoto, K. Kato	195
S. Kokeyuchi and S. Kotani	
Effect of streptococcus peptidoglycan and its synthetic analogues on rabbit blood elements M. Rýc, J. Rotta, R. Straka, J. Pokorný, V. Hřibálová and M. Zaoral	196
Analysis of group A and C streptococcal membrane proteins I. van de Rijn, and M.X. Triscott	199

Studies on the production of CAMP factor of group B streptococci and their application to the CAMP test	
J.W. Tapsall and E.A. Phillips	201
Phagocytosis promotion of GBS type Ia ⁽⁹⁰⁾ by a sialic acid specific lectin from the snail <i>Cepaea hortensis</i>	
S.E. Holm, A.-M. Bergholm and M. Wagner	203
Ibc protein antigens in culture supernatants of group B streptococci: Comparison to HCl-extracted antigens	
P. Ferrieri, D.R. Johnson and A.E. Flores	204
Characterization of the group-specific polysaccharide of group B streptococcus	
D.G. Pritchard, B.M. Gray and H.C. Dillon, Jr.	206
Characterization of group B streptococcal carbohydrate antigens by lectins	
G. Uhlenbruck, R. Lütticken and G. Böhmer	208
Type-specific polysaccharide and lipoteichoic acid-two polymers associated with virulence of Type III group B streptococci	
S.J. Mattingly, T.J. Nealon and M.K. Yeung	211
Studies on the lipocarbohydrate antigen associated with the cell membrane of group B streptococcus, Type III	
C.G. Cumming, P.W. Ross and G.L.E. Smith	213
Immunological and biological properties of streptococcal amphiphiles	
S. Hamada, T. Koga, T. Yamamoto, J.R. McGhee and S.M. Michalek	215

Streptococcal Genetics

The gene responsible for the synthesis of type A streptococcal exotoxin (erythrogenic toxin) in group A streptococci is located in bacteriophage T12	
C.R. Weeks and J.J. Ferretti	219
A cloned streptokinase from <i>Streptococcus equisimilis</i> H46A	
H. Malke and J.J. Ferretti	221
Studies to improve molecular cloning in streptococci	
R. Lütticken, K.-H. Friedrich and R.A. Klaer	222
Genetic and molecular characterization of streptococcal plasmids	
G. Bieth, K. Pepper, C. Le Bouguenec and T. Horaud	224
Relationship between bacteriocin and M-protein production and plasmid content of group A streptococci	
W.J. Simpson and J.R. Tagg	227
Analysis of the streptococcal M6 protein gene product and its relation to M protein genes from other streptococci	
V.A. Fischetti, K.F. Jones, B.N. Manjula, W.M. Pulliam, S.K. Hollingshead and J.R. Scott	229
Genetic basis of antibiotic resistance in group A, C and G streptococci	
A. Buu-Hoi and T. Horaud	231
Cloning of streptococcal genes with <i>Streptococcus-Escherichia coli</i> shuttle vector pSA3	
M.L. Dao and J.J. Ferretti	233
Hybridization of a cloned group C streptococcus streptokinase gene with DNA from other streptococcal species	
T.T. Huang, H. Malke and J.J. Ferretti	234
Intergenic cell fusion between L-form cells of <i>Streptococcus faecalis</i> and <i>Staphylococcus aureus</i>	
Y. Hirachi, Y. Toda, Y. Kato, M. Kurono, N. Takemasa and S. Kotani	236
Insertion of the phage λ L47-1 DNA into the <i>Streptococcus sanguis</i> chromosomal DNA: the use in molecular cloning experiments	
V. Golubkov, A. Suvorov, T. Gupalova, I. Iontova, T. Kolesnichenko and A. Totolian	238

Immune Response to Streptococcal Cellular Agents

Enzyme linked immunoassay (ELISA) for detection of group A streptococcal carbohydrate antibodies	
A. Benslimane, M. Carraz, C. Veyseyre, R. Verney, A.M. Bellaton and J. Rotta	243
Sensitization of blood cells with group A, C-polysaccharide for diagnosis of infection with β -hemolytic streptococci	
T. Matsuishi, M. Hashimoto and A. Yamaguchi	245
The first complete primary structure of the variable domain of a murine antistreptococcal group A carbohydrate antibody	
T. Grütter, H. Herbst, R. Aebersold, J.-Y. Chang and D.G. Braun	246

Dynamics of group A streptococcal polysaccharide antibody production in goat A.R. Lakshmy and D. Prakash	248
Antibody response and cellular immunity to streptococcal polysaccharide in IgA nephropathy M. Hiramatsu, T. Suzuki, K. Takahashi and Z. Ota	249
Serological studies in poststreptococcal glomerulonephritis using streptococcal antigen (preabsorbing antigen, PA-Ag) N. Yoshizawa, S. Oshima, A. Takeuchi, K. Takahashi, I. Sagel and G. Tresar	251
Antibodies to glomerular heparan sulfate proteoglycan in patients with acute and chronic poststreptococcal glomerulonephritis H. Fillit, S. Damle, C. Volin, J. Gregory, T. Poon-King and J.B. Zabriskie	253
Delayed-type hypersensitivity to streptococcal antigens immunomodulated by synthetic adjuvants J. Rotta, M. Zaoral, J. Pekárek, J. Ježek, M. Rýc and R. Straka	254
Cellular hypersensitivity to group A streptococcal cell wall antigens in patients with acute glomerulonephritis S.H.M. El Tayeb, A.M.S. Ghanem, S.I. Sobri and Z.G.A. Mageed	255
Immune responses to coccal cellular antigens in rheumatic fever and control subjects D.R. Martin and K.J. Dick	257
Production of monoclonal antibodies to group A streptococcal cell membrane M. Yoshimoto, S. Hosoi, S. Fujisawa, M. Sudo and R. Okuda	259
Lymphocyte response in rheumatic fever patients depends on the source of the group A streptococcal isolate S.E. Read, H.F.M. Reid, T. Poon-King and J.B. Zabriskie	261
T and B lymphocytes and cellular reactivity to streptococcal antigens in patients with acute rheumatic heart disease K. Prakash and P.K. Bhatnagar	263
Immune regulation by suppressor monocytes in patients with acute glomerulonephritis H.F.M. Reid, T. Poon-King, S.E. Read and J.B. Zabriskie	264
An HLA-linked immune suppression gene to streptococcal antigen and its role in the pathogenesis of rheumatic heart disease Y. Nishimura, T. Sasazuka, K. Amamiya and K. Hirosawa	266
The role of HLA-DR molecule in the antigen presentation of streptococcal cell wall antigen to helper T cells Y. Nishimura, K. Hirayama, K. Tsukamoto and T. Sasazuki	268
Characterization of Antigen to Streptococci (cross-reactivity, protective antigen)	
Cross-reaction between skin and skin <i>Streptococcus pyogenes</i> antigens E.M.M. Nasr and S.H.M. El Tayeb	273
Immunological similarities: human heart and group A streptococci M.W. Cunningham, K. Krisher and D.C. Graves	275
Estimation of the protective level of antibody to group B streptococcal polysaccharide antigens S.P. Gotoff, K.M. Boyer, E.M. Klegerman, C.K. Papierniak and C. Odell	278
Human colostral antibody to group B streptococcal polysaccharides J.N. Marxmiller, N.F. Concepcion and B.F. Anthony	279
Human IgG antibody to the group-specific polysaccharide of group B streptococcus B.F. Anthony, N.F. Concepcion and K.F. Concepcion	280
Extraction of specific protective immunoglobulins from pooled human sera to group B streptococci Y. Ichiman, M. Takahashi and K. Yoshida	282
Opsonic requirements of healthy adult, diabetic and neonatal sera for type II group B streptococci M.S. Edwards, B.W. Manulik, D.L. Kasper and C.J. Baker	284
Protection of group B streptococcal infection in mouse neonates by vertical immunization T. Itoh, H. Nakano, X-J. Yan and M. Yoshioka	286
Mouse-protective antibodies against the Ibc proteins of group B streptococci L. Bevanger and A.L. Næss	288
Monoclonal or polyclonal antibody-mediated protection against group B streptococci is markedly enhanced by fibronectin A.O. Shigeoka, D.G. Pritchard, S.H. Pincus, M. Egan and H.R. Miller	290
Prevalence of antibody against group B streptococcus type II M. Egan, B.M. Gray, D.G. Pritchard and H.C. Dillon, Jr.	292

The protective response of the horse to <i>Streptococcus equi</i> J.F. Timoney and J.F. Galan	294
Opsonization of type Ia group B streptococcus by purified C1 N.J. Levy and L. Kasper	296
Antibiotics and Streptococci	
Evaluation of a disc method for the detection of penicillin tolerance in streptococci G.J. Slater and D. Greenwood	301
Rifampin treatment for group A streptococcal carriers S.T. Shulman, R. Tanz, C. Willert, M. Barthel and R. Yogev	302
Demonstration of penicillin tolerance in group A streptococci K.S. Kim and E.L. Kaplan	304
Effects of subminimal inhibitory concentrations of antibiotics on group A and G streptococci L.C. Benchetrit, A.C.D. Castro, A.M.S. Figueiredo and L. Barrucand	305
Failed antibiotic therapy for follicular tonsillitis related to tolerant strains of <i>Streptococcus pyogenes</i> J. Michel, M. Ferne, L. Elbaz, and N. Michel	308
Rheumatic fever prophylaxis failure with benzathine penicillin G: 4-week versus 3-week program H.-C. Lue, M.-H. Wu, G.-J. Lin, R.-P. Hsieh, K.-H. Hsieh and J.-F. Chiou	310
Changing pattern of antibiotic susceptibility of antigenic groups of streptococci G. Koshi, R. Pandian and K.N. Brahmadathan	311
Selective intrapartum chemoprophylaxis of perinatal group B streptococcal infections K.M. Boyer, C.A. Gadzala, P.D. Kelly and S.P. Gotoff	313
Clindamycin treatment of group B streptococcal oral/rectal colonization in infant rats P. Ferrieri and J. Nelson	314
Rifampin and penicillin therapy for eliminating nasal colonization of type III group B streptococci in infant rats S.T. Shulman, D.D. Millard and R. Yogev	316
Group B streptococcal infection: studies in an animal model and <i>in vitro</i> effects of antibiotics on the micro-organism S.E.L. Fracalanza and L.C. Benchetrit	318
Impact of phenoxymethylpenicillin, erythromycin, clindamycin and doxycycline on <i>Streptococcus salivarius</i> in the oropharynx E.C. Nord, A. Heimdahl and L. Borthen and J. Söderholm	320
Clinical Aspects on Streptococci	
Neonatal colonization and infections with streptococci T.D. Chugh, S.A. Ghaffor, A.C. Kuruvilla and E.A. Bishibishi	325
Isolation of <i>Streptococcus mitior</i> from urogenital tract infection H.M. Sawsan, S.J.M. El Tayeb and A.A.A. Khalik	326
Perianal cellulitis and septicaemia—an unusual manifestation of group A beta hemolytic streptococci A. Sukonthaman, T. Siriwanji, C.A.M. Fraser, P. Nunthapisud, R. Sakulramrung, and S. Likitnukul	328
Tonsils <i>in situ</i> : Implications in streptococcal throat infection P.W. Ross and C.G. Cumming	330
Are all recurrences of "Pure" Sydenham's Chorea true recurrences of acute rheumatic fever? A.L. Bisno, X. Berrios, F. Quesney, A. Morales and J. Blazquez	331
A study on arrhythmogenicity in pediatric patients of chronic rheumatic heart disease Ching-Tsuen Shen, Nan-Koong Wang, Yung-Ming Lin, Chaur-Ren Tsai, Thay-Hsiung Chen	332
Beta hemolytic streptococcal types associated with psoriasis P.W. Belew, L.W. Wannamaker, D. Johnson and E.W. Rosenberg	334
Rheumatic fever and psoriasis occurring in the same individual P.W. Belew, M.D. Zanolli, J. Ghidoni, P.B. Skinner and E.W. Rosenberg	335
B cell alloantigen 883-A marker for rheumatic fever (RF) susceptibility gene. Characterization by a monoclonal antibody C. Yeadon, D. Buskirk, D. Lavamchy, D. Braun, M. Fotino, R.C. Williams, Jr. and J.B. Zabriskie	335
"Rheumatic" cell surface antigens in peripheral blood and tonsils in rheumatic heart disease E.D. Gray, W.E. Regelman, J.B. Zabriskie, A. El Kholy, Z. Abdin, R.M.H. Kamel, S.W. Zaher and D.G. Braun	337

- Lymphocyte subpopulations in rheumatic heart disease
W.E. Regelmann, E.D. Gray, L.W. Wannamaker, T.W. LeBien, M. Mansour, A. El Kholy and Z. Abdin 338
- Anti-streptococcal cell membrane titers in sera of patients with poststreptococcal infections and their sequelae
S. Fujisawa, M. Yoshimoto, M. Sudo and R. Okuda 340
- Prediction and incidence of morbidity due to group B streptococcal meningitis
M.S. Edwards, M.A. Rench and C.J. Baker 342
- A subtype of *Streptococcus suis* type 2 relevant to meningitis in man and pigs
J.P. Arends and H.C. Zanen 343
- ## Animal Model in Streptococcal Diseases
- An experimental study on streptococcal aerosol infection
M. Hokonohara, Y. Baba, M. Yoshinaga, K. Kawakami, H. Inoue and T. Terawaki 347
- PQ prolongation of ECG in the mouse immunized with the killed group A streptococci
K. Katoh, K. Matsunaga, T. Takahashi, T. Ohkubo, K. Okuda and I. Tadokoro 349
- Polyarthritis in mice following the systemic injection of the cell wall or its peptidoglycan fraction from group A streptococci and other bacteria
T. Koga, K. Kakimoto, T. Hirofuji, H. Ohkuni, K. Watanabe, K. Saisho, A. Sumiyoshi and S. Kotani 350
- Mechanisms of recurrence in bacterial cell wall-induced arthritis
R.E. Esser, S.A. Stimpson, S.K. Anderle, R.A. Eisenberg, R.R. Brown, W.J. Cromartie and J.H. Schwab 351
- A streptococcal antigen preabsorbing antigen (PA-Ag) causing *in situ* immune reaction in acute post-streptococcal glomerulonephritis (APGN)
N. Yoshizawa, S. Oshima, A. Takeuchi, K. Takahashi, I. Sagel and G. Treser 353
- Experimental model using viable bacteria for pathogenic studies of acute post-streptococcal glomerulonephritis
A.M. Bergholm and S.E. Holm 355
- Mouse model and human studies on Kawasaki disease (MCLS) with special reference to *Streptococcus sanguis*
Y. Miyamoto, S. Yamai, Y. Shimoda, T. Nikkawa, Y. Obara, Y. Kazuno, H. Takeda, H. Sasaki, H. Kawaoto and T. Takemura 357
- The production of congenital malformations using M-protein fraction of hemolytic streptococci
K. Miyata, T. Takasue, S. Ono, M. Ninomiya, E. Yamamoto, K. Kawakami and T. Terawaki 358
- Comparison of necrotising fasciitis due to groups A, C and G haemolytic streptococci and its reproduction in an animal model
D.V. Seal, M. Stephenson, A. Welch, B. Leppard, G. Colman and G. Hallas 360
- Experimental model of *Streptococcus pneumoniae* septicemia and meningitis in rabbits. A study of protection by low-dose anti-microbial treatment and by pre-immunization in splenectomized and non-splenectomized animals
E. Gutschik and J.A. Gyring 362

Introduction

The IXth Lancefield International Symposium on Streptococci and Streptococcal Diseases was held at Lake Yamanaka, Japan in September 1984. The present volume (Recent Advances in Streptococci and Streptococcal Diseases) includes all the presentations made, orally or as posters, at the Hotel Mt. Fuji meeting. Most of the papers were presented in a condensed but comprehensive form and we have retained the original writing of the authors as far as possible. However, in some papers we had to reduce the introductory statements, methods or a number of summaries. Some papers submitted for the above-mentioned Symposium were switched to the more appropriate sessions in this volume and were reclassified accordingly. However, it is hoped that the index will enable readers to find them easily. Since we wanted this volume to be printed as early as possible, the proofs have been read only by the editors; misunderstandings and misprints, therefore, have to be blamed on the editors, and not the authors. We are extremely grateful to our colleagues for their valuable contributions to this volume. Also, we express our gratitude to the Organizing Committee members and especially to Dr. Hisashi Ohkuni of the Department of Microbiology and Immunology, Nippon Medical School for his help and support in proofing this volume.

Introduction

The IXth Lancet International Symposium on Streptococcal and Staphylococcal Diseases was held at Lake Yamanaka, Japan in September 1984. The present volume (Recent Advances in Streptococcal and Staphylococcal Diseases) includes all the presentations made orally or as posters at the 1984 Mt. Fuji meeting. Most of the papers were presented in a condensed but comprehensive form and we have retained the original writing of the authors as far as possible. However, in some papers we had to reduce the introductory statements, methods or a number of summaries. Some papers submitted for the above-mentioned Symposium were switched to the more appropriate sessions in this volume and were resubmitted accordingly. However, it is hoped that the index will enable readers to find them easily. Since we wanted this volume to be printed as early as possible, the proofs have been read only by the editors; misunderstandings and misprints, therefore, have to be blamed on the editors, and not the authors. We are extremely grateful to our colleagues for their valuable contributions to this volume. Also, we express our gratitude to the Organizing Committee members and especially to Dr. Hisashi Ohnuma of the Department of Microbiology and Immunology, Nippon Medical School for his help and support in producing this volume.
