# Foreword to the Thirteenth Edition

Welcome to the thirteenth edition of the PHYSICIANS' DESK REFERENCE For NONPRESCRIPTION DRUGS<sup>®</sup>, the over-the-counter drug companion to the Physicians' Desk Reference. The shift of some drug ingredients and dosage forms from prescription to over-the-counter status is continuing. It is the goal of the PHYSICIANS' DESK REFERENCE For NONPRESCRIPTION DRUGS<sup>®</sup> to provide detailed labeling information to help ensure appropriate use of these products. Manufacturers of these nonprescription drug products have included inactive ingredients as well as active ingredients to alert those who may have sensitivity to certain ingredients.

The PHYSICIANS' DESK REFERENCE For NONPRESCRIPTION DRUGS<sup>®</sup> is published annually by Medical Economics Data, a division of Medical Economics Company, Inc., with the cooperation of the manufacturers whose products are described in the Product Information and Diagnostics, Devices and Medical Aids Sections. It is organized in a similar manner to the PHYSICIANS' DESK REFERENCE with a Manufacturers' Index, Product Name Index, Product Category Index, and Active Ingredients Index—all color coded for quick reference. Descriptive labeling appears in the Product Information Section and Diagnostics, Devices and Medical Aids Section.

The function of the publisher is the compilation, organization, and distribution of this information. Each product description has been prepared by the manufacturer, and edited and approved by the manufacturer's medical department, medical director, and/or medical consultant. In organizing and presenting the material in PHYSICIANS' DESK REFERENCE For NONPRESCRIPTION DRUGS<sup>®</sup>, the publisher does not warrant or guarantee any of the products described herein or perform any independent analysis in connection with any of the product information contained herein. PHYSICIANS' DESK REFERENCE For NONPRESCRIPTION DRUGS<sup>®</sup> does not assume, and expressly disclaims, any obligation to obtain and include information other than that provided to it by the manufacturer. In making this material available it should be understood that the publisher is not advocating the use of any product described herein. Besides the information given here, additional information on any product may be obtained through the manufacturer.

# Introduction to the Third Edition

The third edition of this book is a revised and updated version of the second edition. It contains new material on the latest developments in the field of medical economics, and it also includes new chapters on health care delivery and health care financing. The book is designed to provide a comprehensive overview of the field of medical economics, and it is suitable for use as a textbook in a course on medical economics or as a reference work for researchers in the field.

The book is divided into three main parts. The first part, which is the largest, deals with the theory of medical economics. It covers the basic concepts and principles of medical economics, and it also discusses the role of the government in the health care system. The second part deals with the practice of medical economics. It covers the various methods and techniques used in the study of medical economics, and it also discusses the application of these methods and techniques to the study of health care delivery and health care financing. The third part deals with the future of medical economics. It discusses the challenges and opportunities facing the field of medical economics, and it also discusses the role of the government in the future of the health care system.

The book is written in a clear and concise style, and it is easy to read. It is also well organized, and it is easy to find the information you need. The book is a valuable resource for anyone interested in the field of medical economics, and it is a must-read for anyone who is studying or working in the field of health care delivery or health care financing.

# Contents

<b>Manufacturers' Index (White)</b> .....	1
The manufacturers appearing in this index have provided information concerning their products in the Product Information, Product Identification or Diagnostics, Devices and Medical Aids Sections. Included in this index are the names and addresses of manufacturers, individuals or departments to whom you may address inquiries, a partial list of products as well as emergency telephone numbers, wherever available.	
<b>Product Name Index (Pink)</b> .....	101
Products are listed in alphabetical order by brand or generic name. Page numbers have been included to assist you in locating additional information on described products.	
<b>Product Category Index (Blue)</b> .....	201
In this section described products are listed according to their appropriate product categories. The headings and sub-headings have been determined by the OTC Review process of the U.S. Food and Drug Administration.	
<b>Active Ingredients (Yellow)</b> .....	301
Products described in the Product Information Section are listed alphabetically in this section. The heading under which specific products are listed have been determined by the OTC Review process of the U.S. Food and Drug Administration.	
<b>Drug Information Centers</b> .....	321
An alphabetical listing by state of Drug Information Centers including address, telephone number and hours of operation.	
<b>Product Identification Section</b> .....	401
Capsules, tablets and packaging are shown in color as an aid to identification. Products are shown under company headings, and are not necessarily in alphabetical order since some manufacturers prefer to show their products in groups.	
<b>Product Information Section</b> .....	501
An alphabetical arrangement, by manufacturer, of nonprescription drugs which are described as to action, uses, administration and dosage, precautions, the form in which supplied and other information concerning their use, including common names and chemical names.	
<b>Diagnostics, Devices and Medical Aids</b> .....	779
This section contains product information on those product designed for home use. Items are listed alphabetically by manufacturer. Product descriptions supply essential information for appropriate understanding and use.	
<b>Poison Control Centers</b> .....	784
A list of centers and emergency telephone numbers.	

## SECTION 1

# Manufacturers' Index

The manufacturers whose names appear in this index have provided information concerning their products in either the Product Information Section, Product Identification Section, or the Diagnostics, Devices and Medical Aids Section.

Included in this index are the names and addresses of manufacturers, individuals or departments to whom you may address inquiries, a partial list of products as well as emergency telephone numbers wherever available.

The symbol ♦ indicates that the product is shown in the Product Identification Section.
