	Adobe Certification	4
	 A Quick Tour of Adobe InDesign	5
	Getting started	6
	Threading text in frames	10
	Working with styles	20
	Placing graphics	24
	Working with master pages	31
	On your own	36
 Lesson 1	 Getting to Know the Work Area	39
	Getting started	40
	Looking at the work area	41
	Changing the magnification of your document	51
	Navigating through your document	54
	Working with layers	59
	Using context menus	61
	Using online Help	63
	Using Adobe online services	65
	On your own	66
	Review questions	67
	Review answers	67

Lesson 2	Setting Up Your Document	71
	Getting started	72
	Starting a new document	73
	Editing master pages	75
	Creating a master for footers	77
	Creating a placeholder master	84
	Applying the masters to document pages	94
	Adding sections to change page numbering	96
	Placing text and graphics on the document pages	98
	Overriding master-page items on document pages	100
	Editing master pages	102
	Viewing the completed spread	104
	On your own	104
	Review questions	106
	Review answers	106
Lesson 3	Working with Frames	109
	Getting started	110
	Modifying text frames	111
	Modifying graphics frames	116
	Creating new frames and adjusting the contents	124
	Orienting objects in space	130
	Finishing up	133
	On your own	134
	Review questions	135
	Review answers	135
Lesson 4	Creating and Applying Colors, Tints, and Gradients	139
	Getting started	140
	Defining printing requirements	141
	Adding colors to the Swatches palette	141
	Applying colors to objects	143
	Creating dashed strokes	146

	Working with gradients	147
	Creating a tint	150
	Creating a spot color	151
	Applying color to text	154
	Using advanced gradient techniques	157
	Viewing the completed spread	162
	On your own	163
	Review questions	164
	Review answers	164
Lesson 5	Importing and Linking Graphics	167
	Getting started	168
	Adding graphics from other programs	170
	Comparing vector and bitmap graphics	170
	Managing links to imported files	171
	Placing a Photoshop file and adjusting view quality	176
	Working with clipping paths	178
	Working with alpha channels	181
	Importing an Illustrator file	186
	Placing a PDF file	188
	Using a library to manage objects	190
	On your own	193
	Review questions	194
	Review answers	194
Lesson 6	Drawing Vector Graphics	197
	Getting started	198
	Setting up the document grid	200
	Drawing straight segments	201
	Drawing with the pencil tool	210
	Drawing curved segments with the pen tool	215
	Drawing combinations of curved and straight segments	217
	Creating a compound path	227

	Creating a perfect semicircle	229
	Adding an end shape to an open path	232
	Creating a texture effect using a colorized image	233
	Creating and adding an inline graphic	235
	Reflecting objects	239
	On your own	241
	Review questions	243
	Review answers	243
Lesson 7	Working with Transparency	247
	Getting started	248
	Importing and colorizing a black-and-white image	249
	Applying transparency settings	250
	Exporting to Adobe Acrobat PDF files	261
	On your own	264
	Review questions	265
	Review answers	265
Lesson 8	Importing and Editing Text	269
	Getting started	270
	Flowing text	272
	Working with styles	277
	Aligning text vertically	283
	Threading text	284
	Changing the number of columns on a page	286
	Adding a page continuation note	290
	Creating and applying a character style	293
	Finding and changing	295
	Spell-checking a story	300
	Creating text on a path	301
	On your own	304
	Review questions	306
	Review answers	306

Lesson 9	Working with Typography	309
	Getting started	310
	Adjusting vertical spacing	311
	Changing fonts and type style	317
	Changing paragraph alignment	319
	Adding a decorative font and special character	320
	Applying special font features	323
	Adjusting letter and word spacing	327
	Working with tabs	331
	Creating a hanging indent	335
	Adding a rule below a paragraph	336
	On your own	337
	Review questions	339
	Review answers	339
Lesson 10	Creating Tables	343
	Getting started	344
	Importing and formatting a table	347
	Using graphics within tables	355
	Formatting text within a table	360
	Finishing up	364
	On your own	364
	Review questions	366
	Review answers	366
Lesson 11	Publishing with XML	369
	Getting started	370
	About XML tags	371
	Defining XML tags	372
	Working with the Structure pane	378
	Exporting to XML	381

Getting Started

Welcome to Adobe® InDesign® 2.0. InDesign is a powerful design and production tool that offers precision, control, and seamless integration with other Adobe professional graphics applications. Using InDesign, you can produce professional-quality, full-color output on high-volume color printing presses, or to a wide range of output devices and formats, such as desktop printers, PDF files, and HTML files.

Writers, artists, designers, and publishers today can communicate to a broader audience than ever before and through an unprecedented variety of media. The Adobe Network Publishing vision recognizes this with tools for creating visually rich content that is available anywhere, any time, and on any device. InDesign supports this view with its seamless integration with Adobe Photoshop®, Adobe Illustrator®, Adobe Acrobat®, and Adobe GoLive®. The *Adobe InDesign 2.0 Classroom in a Book* introduces and describes new features, workflows, and techniques that support this new wave of publishing.

About Classroom in a Book

Adobe InDesign 2.0 Classroom in a Book® is part of the official training series for Adobe graphics and publishing software from Adobe Systems, Inc.

The lessons are designed so that you can learn at your own pace. If you're new to Adobe InDesign, you'll learn the fundamentals you'll need to master to put the program to work. If you've already been using Adobe InDesign, you'll find that *Classroom in a Book* teaches many advanced features, including tips and techniques for using this exciting design tool.

Each lesson provides step-by-step instructions for creating a specific project. You can follow the book from start to finish, or do only the lessons that meet your interests and needs. Each lesson concludes with a review section summarizing what you've covered.

Prerequisites

Before beginning to use *Adobe InDesign 2.0 Classroom in a Book*, you should have a working knowledge of your computer and its operating system. Make sure you know how to use the mouse and standard menus and commands, and also how to open, save, and close files. If you need to review these techniques, see the printed or online documentation included with your Windows or Mac OS documentation.

Installing the program

You must purchase the Adobe InDesign software separately. For complete instructions on installing the software, see the Introduction to the *Adobe InDesign User Guide*.

Installing the Classroom in a Book fonts

To ensure that the lesson files appear on your system with the correct fonts, you may need to install the Classroom in a Book font files. These fonts are in the Fonts folder on the Adobe InDesign Classroom in a Book CD. If you already have these on your system, you do not need to install them. If you have Adobe Type Manager (ATM®), see its documentation on how to install fonts. If you do not have ATM, installing it from the Classroom in a Book CD automatically installs the fonts. Please read the instructions carefully because you do not need to install ATM if you are running Windows XP or Mac OS 10.1.

 *You can also install the Classroom in a Book fonts by copying all the files in the Fonts folder on the InDesign Classroom in a Book CD to the Fonts folder within the folder in which you installed InDesign on your hard disk. This makes the fonts available to InDesign but not to other applications.*

To install the Adobe InDesign Classroom in a Book fonts

- 1 Insert the Adobe InDesign 2.0 Classroom in a Book CD into your CD ROM drive.
- 2 (Windows only.) Select the appropriate folder for your version of Windows.
- 3 Install the font files using the procedure for the version of your operating system:
 - Windows (other than Windows XP). Open the ATM installer files on the CD, which are located in the Fonts/ATM/set folder. Double-click the installer files (Setup), and follow the on-screen instructions for installing ATM and the fonts.
 - Windows XP. Do not use the ATM font installer to install the fonts. Instead, simply drag the fonts from the Classroom in a Book CD to your hard disk and place them in either the InDesign 2.0 fonts folder (typically in C:\Program Files\Adobe\InDesign 2.0\Fonts) or your system fonts folder (typically in C:\Program Files\Common Files\Adobe\Fonts).

- Mac OS 9. Open the ATM installer file on the CD, located in the Fonts/Fonts/ATM 4.6.1+Fonts Installer folder. Double-click the ATM 4.6.1+Fonts Installer to install the fonts.
- Mac OS 10.1. Open the Fonts/Fonts/ATM 4.6.1 + Fonts Installer folder on the CD. Select all of the fonts in the Fonts folder and drag them into the Library/Fonts folder on your hard disk. You can select and drag multiple fonts to install them, but you cannot drag the entire folder to install the fonts.

Copying the Classroom in a Book files

The Classroom in a Book CD includes folders containing all the electronic files for the lessons. Each lesson has its own folder. You must install these folders on your hard disk to use the files for the lessons. To save room on your hard disk, you can install the folders for each lesson as you need them.

To Install the Classroom in a Book files:

- 1 Insert the ID2_CIB CD into your CD-ROM drive
- 2 Create a folder on your hard disk and name it **IDCIB**
- 3 Copy the lessons that you want to the hard drive:
 - To copy all of the lessons, drag the Lessons folder from the CD into the IDCIB folder
 - To copy a single lesson, drag the individual lessons folder from the CD into the IDCIB folder
- 4 In Windows unlock the files you copied
 - If you copied all of the lessons, double click the unlock.bat file in the IN2_CIB/Lessons folder
 - If you copied a single lesson, drag the unlock.bat file from the Lessons folder on the CD into the IDCIB folder. Then double-click the unlock.bat file in the IDCIB folder

***Note:** If you are using Windows XP or Windows 2000 you need to set your computer's time zone to Pacific Standard Time in order to prevent error messages when working on Classroom in a Book lessons that involve linked files.*

Open the Date and Time Control Panel and make sure that Pacific Standard Time is selected.

Restoring default preferences

To ensure that the tools and palettes function exactly as described in this lesson, you must delete or deactivate (by renaming) the InDesign Defaults file and the InDesign SavedData file.

The InDesign Defaults file and the InDesign SavedData file control how palettes and command settings appear on your screen when you open the Adobe InDesign program. Each time you exit Adobe InDesign, the position of the palettes and certain command settings are recorded in these files. To ensure that the tools and palettes function exactly as described in this book, you can delete the current InDesign Defaults and InDesign SavedData files at the beginning of each lesson. (If they don't already exist, Adobe InDesign will create new versions of these files the next time you start the program and save a file.)

Important: *If you want to save the current settings, rename the defaults files rather than deleting them. When you are ready to restore the settings, change the names back and make sure that the files are located in the InDesign 2.0 folder (Windows*) or the Preferences folder (Mac OS).*

1 If InDesign is running, choose File > Exit (Windows) or File > Quit (Mac OS).

2 To locate the InDesign defaults files, do one of the following:

- (Windows) Choose Start from the Windows taskbar, and then choose Find > Files or Folders. For Named, type **"InDesign Defaults"**, **"InDesign SavedData"** (including the quotation marks). For Look In, select Local Hard Drives (or the drive that contains Windows). Then click Find Now. Drag the InDesign Defaults and InDesign SavedData files to the Recycle Bin (or rename them). Do not delete any other InDesign file. Close the Find dialog box.
- (Mac OS) Choose File > Find from the Finder menu. For Find Items, choose On Local Disks, Except CD-ROMS. In the text box, type **InDesign Defaults**. Then click Find. Drag the InDesign Defaults file to the Trash or rename it. In the same way, search for **InDesign SavedData** and delete or rename this file. Do not delete any other InDesign file. Close the Find windows.

 *If you renamed the defaults files to preserve them, you can return to your previous settings by first deleting the newest copies of the InDesign Defaults and InDesign SavedData files. Then restore the original names of the files you renamed in the steps above.*

A Quick Tour of Adobe InDesign

This interactive demonstration of Adobe InDesign provides an overview of key features of the program. It should take you approximately 30 minutes to complete.

Getting started

You'll start the tour by opening a partially completed document. You'll add the finishing touches to this 6-page article on Mexican folk art written for an imaginary travel magazine. Before you start Adobe InDesign, you should restore the default preferences for InDesign if you have not already done so in this session. Restoring default preferences ensures that the tools and palettes function exactly as described in this lesson. After you learn how to use InDesign, this step is no longer necessary.

- 1 Delete or deactivate the InDesign Defaults file and the InDesign SavedData file, following the procedure in “Restoring default preferences” on page 3.
- 2 Start Adobe InDesign.
- 3 Choose File > Open, and locate the ID_00 folder in the Lessons folder you copied from the InDesign Classroom in a Book CD to your hard disk:
- 4 In the ID_00 folder, double-click ID_01.indd.

Note: In Windows, your extensions may be hidden. If this is so, the file appears as ID_01 (not ID_01.indd) in the Open a File dialog box.

If an alert message appears that asks which dictionary file you want to use, click No (Windows) or Document (Mac OS).

- 5 Choose File > Save As, and rename the file **Tour** in the ID_00 folder. If someone else has created this file, choose Yes to replace it.

Viewing the document

The first spread (pages 2 and 3) appears on your screen. You'll now look at the rest of the 6-page article using several navigation methods. First, you'll use the Navigator palette, which is useful for changing the view magnification. As in Adobe Illustrator and Adobe Photoshop, palettes are often grouped with other palettes. However, you can move, separate, and combine these palettes any way you like.

- 1 Choose View > Fit Spread in Window.
- 2 Click the Navigator palette tab to bring it to the front of the palette group.

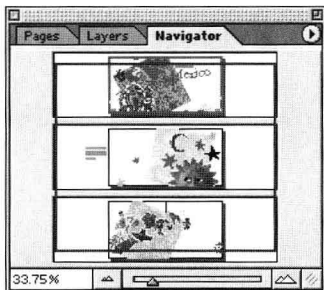

- 3 Position the pointer on the palette-menu button (☰) on the right side of the palette window, and choose View All Spreads from the Navigator palette menu. If you can't see the three spreads well, drag the lower right corner of the palette down to resize it; drag it back up when you're finished.

Like many palettes, the Navigator palette has a menu that displays additional options.

Notice that the red view box in the Navigator palette determines which area of the document is displayed.

- 4 In the Navigator palette, click the center of the middle spread to view pages 4 and 5. If necessary, drag the red box so that you can see pages 4 and 5.

Now we'll look at the Pages palette, which is another useful tool for turning pages. You'll be using the Pages palette throughout this tour, so you'll separate the Pages palette from the other two palettes.

- 5 Click the Pages palette tab, and then drag the Pages tab below the other palettes.
