PREFACE

The International Congresses of Angiology have had a 25-year tradition. Let us remember the 10 previous International Congresses, the first of which took place in Paris in 1952. On this occasion a stimulus for the foundation of the International Union, "Union Internationale d'Angéiologie" came into existence.

The period of 25 years is long enough to evaluate the scientific progress which has been made in diagnosis, therapy and prevention of vascular diseases. Proceedings of the previous International Congresses of Angiology became attractive resources for scientific information in libraries all over the world. They represent really historic documents of remarkable development of angiology and witness successful international cooperation in the settlement of serious medical problems of the twentieth century.

The Proceedings of the XI. International Congress of Angiology held in Prague 1978 under the stimulating title "Adaptability of Vascular Wall" contains 284 original papers dealing with scientific and clinical research in arterial, venous and lymphatic circulation. The papers are incorporated into 12 chapters according to the main topics.

In the first sections the questions of atherogenesis and thrombogenesis are discussed with regard to the adaptability of vascular wall in various metabolic, immunobiologic, and hemodynamic disorders. In the further sections attention is paid to new procedures in investigation, treatment, and prevention of arterial, venous, and lymphatic diseases. Peripheral microangiopathies, renovascular hypertension, and coronary circulation represent another part.

Many histochemical studies have shown that vascular tissue is of high biologic activity and is protected against pathologic processes by specific enzymatic systems. Regression of atherosclerosis was confirmed not only in experimental animals but it was also predicted in human beings when exogenous risk factors were eliminated. The adaptation of venous grafts into the arterial circulation revealed a remarkable ability of vascular tissue to be „arterialized" and to function in aorto-coronary or in femoro-tibial bypass as well.

New diagnostic methods in vascular diseases were presented and the findings were compared with radioisotopic, ultrasonic, and angiographic procedures. Pharmacotherapy was enriched by new drugs with anticoagulant and thrombolytic effect or with hypolipemic and vasodilation efficiency. Reconstructive surgery of arterial occlusions achieved unexpected progress. Recent epidemiologic studies confirmed the validity of the risk factor theory and several multifactorial preventive programmes are being conducted at present in different parts of the world.

The goal of the scientific program of the Congress was to bring together experts in the multiple disciplines that have a bearing on blood vessels. Participation of pathologists, histochemists, biochemists, radiologists, dermatologists, internists, and surgeons in the experimental and clinical research in the vascular diseases has shown that angiology is a modern interdisciplinary branch of medicine.

Presenting the Proceedings on „Adaptability of Vascular Wall" to medical people all over the world, we are convinced it will be fruitful for every medical doctor who is interested in new diagnostic, therapeutic and preventive procedures of vascular diseases.

Z. REINIŠ

CONTENTS

ATHEROGENESIS

<i>H. D. Green, D. J. Farrar, M. G. Bond, W. D. Wagner and R. A. Gobbee:</i> Physiological, morphological and angiochemical changes in aorta and lower extremity arteries in macaca fascicularis monkeys fed an atherogenic diet for 3 years		
<i>J. Kunz:</i> The proliferative activity of aortic endothelium and its significance for atherogenesis	3	
<i>G. Weber:</i> Ultrastructural aspects of atherogenesis	6	
<i>S. Taura, M. Taura, F. A., Kummerow and H. Imai:</i> Atherosclerosis of the coronary artery in normolipemic swine induced by withdrawal of hypervitaminosis D ₃	9	
<i>M. R. Roach and J. Fletcher:</i> The effect of different cholesterol diets on the localisation of sudanophilic lesions in rabbits	11	
<i>Z. Lojda:</i> Localization of some peptidases in the vascular wall	13	
<i>F. Schneider:</i> Spontaneous calcifying medial sclerosis of rabbits	16	
<i>T. Joshita, N. Sakata, Y. Yoshida and G. Ooneda:</i> Experimental pathological study on arterial wall injury given by elevated intravascular pressure and its repair-blood pressure and circumferential tension	19	
<i>K. T. Lee and W. M. Lee:</i> Effects of certain drugs on experimental atherosclerosis in swine	22	
<i>C. W. M. Adams, Y. H. Abdulla and O. B. Bayliss:</i> Regression of atherosclerosis: The cellular response and the local action of HDL	25	
<i>F. Numano:</i> Drugs affecting arterial permeability and atherogenesis	27	
<i>C. A. Villaverde, J. C. Martínez, L. Massanet, L. Badimón and F. G. Valdecasas:</i> Experimental atherosclerosis: Survival and spontaneous regression	30	
<i>M. Bihari-Varga:</i> Regression of experimental atherosclerosis	33	36
<i>K. T. Lee:</i> The reversibility of the human atherosclerotic plaque		38
<i>M. Tesi, L. Caramelli and A. Borgioli:</i> Electron microscopy remarks on the possibility of regression of human atherosclerosis		40
<i>P. Bravený, L. Vacek and L. Máčová:</i> Serum lipids and vasomotoric response of rats during experimental atherosclerosis		44
<i>S. I. Csögör:</i> Diffusible cholesterol and atherogenesis		46
<i>R. Dénes, R. Lehmann, R. Nienhaus, T. Kerényi, J. Mey and W. H. Hauss:</i> Studies on vessel wall cells of normal, hypertensive and streptozotocin diabetic animals. I. The proliferative capacity		48
<i>R. Nieuhan, R. Dénes and R. Lehmann:</i> II. Biomathematical evaluation of the proliferative capacity		50
<i>J. Skořepa, V. Puchmayer, S. Vinogradov and J. Zapletalová:</i> Molecular distribution of plasma triglyceride in arterial occlusive disease		53
<i>M. Dobrášová, K. Vondra, J. Šířbrná and J. Válek:</i> Lecithin cholesterol acyltransferase (LCAT) in prognosis of cardiovascular complications		56
<i>O. Brücknerová, A. Zechmeister and E. Hadašová:</i> The effect of Chelaton III on calcium metabolism in the arterial wall		59
<i>P. Hadjiisky, J. Renais and L. Scebat:</i> Aortic changes in spontaneously hypertensive rat (SHR) as related to atherosclerosis		62
Round-table discussion (Chairman: H. C. Stary)		65

THROMBOGENESIS

<i>G. Leone, G. Corvi, A. de Crescenzo, R. Landolfi and L. Parrinello:</i> The effect of a new inhibitor of platelet aggregation (K 3920) on some platelet functions in patients with vascular diseases	71	nolytic activity of the arterial wall of patent and occluded arteries	86
<i>T. Asano, A. Tamura, Ch. Ochiai and K. Sano:</i> Pathogenetic role of humoral agents released by platelet aggregation in the genesis of transient ischemic attacks	73	<i>H. Berent and Z. Rymaszewski:</i> Fibrinolytic activity in hyperlipoproteinaemias	88
<i>N. Mashimo, F. Numano, H. Maezawa, O. Matsubara, T. Motomiya and H. Yamazaki:</i> Platelet hypoaggreeability in spontaneously hypertensive rats related to thrombogenesis	76	<i>W. H. Krause and A. Lang:</i> Interaction of angiography with the blood coagulation and the fibrinolytic system	91
<i>I. Hagen and N. O. Solum:</i> Platelet adhesion, on the involvement of glycoprotein IIb/IIIa, an easily soluble platelet membrane glycoprotein in the interaction between platelets and the factor VIII-related protein	79	<i>F. R. Matthias, D. L. Heene and Th. Schöndorf:</i> Soluble fibrin in plasma and endoperoxide-formation in platelets as an indication of prethrombotic states following myocardial infarction	93
<i>R. Roncucci, R. Deperon, J. Destaillleur, J. Doumont, G. Lambelin, J. Lansen, F. van Stalle and R. Verhaeghe:</i> Platelet regeneration time in cardiovascular patients	81	<i>J. Roba, M. Claeys, R. Roet, W. van Opstal and G. Lambelin:</i> Erythrocyte membranes as a target for antithrombotic agents	96
<i>P. Pola, S. Savi, A. Dal Lago and J. Shami:</i> Atherosclerosis and factor XIII. A new technique for the determination of factor XIII using a laser nephelometer	84	<i>T. Abe, M. Kazama, K. Nakamura, I. Naito and J. Matsuda:</i> Different forms of soluble fibrin monomer complex indicating their different developmental processes in hypercoagulable states	99
<i>L. Donner and L. Vodáková:</i> Fibrinolytic activity of the arterial wall of patent and occluded arteries	107	<i>H. Denck, M. Fischer, P. Hopmeier, M. Lurf, E. Chowanetz and G. Premer:</i> Vascular operations with the aid of an autotransfusion system: Changes in blood coagulation	101
<i>P. Kirstein and A. G. Olsson:</i> Serum lipoprotein abnormalities in early stages of peripheral atherosclerosis	110	<i>A. Novotný and V. Dvořák:</i> Thrombogenic and atherogenic influence of castration in women	103

METABOLISM OF VASCULAR WALL

<i>P. Kirstein and A. G. Olsson:</i> Serum lipoprotein abnormalities in early stages of peripheral atherosclerosis	107	of varicose plasma proteins in peripheral vascular disease	115
<i>D. Sievers, H. M. Sahlender and W. Schoop:</i> Hyperlipoproteinemia and peripheral arterial disease	110	<i>A. N. Klimov:</i> A study of low and very low density lipoproteins, penetration, a radioactive label in the core of the lipoprotein particle, into the arterial wall	118
<i>H. Heckers, W. Burkhard, D. Platt and W. Fuhrmann:</i> Serum lipoprotein distribution in 103 nonagenarians	113	<i>A. Hirota, K. Chang, H. Sawai, T. Sakai, K. Ishida, So. Yabuki, K. Seki:</i> Protein components of edema fluid and serum	121
<i>F. S. Feruglio, A. Pezzoli and E. Pascali:</i> Arterio-venous differences		<i>R. Lehmann and R. Denes:</i> DNA	

template activity of aortic wall cells in experimental diabetes	123
<i>G. Pfizer and J. W. Peterson:</i> Stiffness of the arterial wall in response to potassium and pharmacological activation	125
<i>M. Bielawiec, A. Bodzenta and H. Lukjan:</i> Prostaglandin-like activity in patients suffering from occlusive arterial diseases	128
<i>H. P. Bruch, E. Schmidt and R. Laven:</i> Prostaglandins and motility of human veins	131
<i>J. Hladovec:</i> A rational basis for the use of drugs with endotheloprotective activity in peripheral ischaemia	134
<i>A. G. Hudetz, G. Márk, E. Monos, Judit Szutrély and A. G. Kovách:</i> Biomechanical properties of hog carotid arteries	136
<i>G. Márk, A. G. Hudetz, E. Monos, L. Fódy and A. G. B. Kovách:</i> Biomechanical properties of normal and fibrosclerotic human internal carotid arteries	139
<i>E. Schmidt, H. P. Bruch, R. Laven, G. Winter and P. Kujath:</i> Biomechanical and histological research on healthy and varicose human veins	142
<i>K. Feeser, R. Ebert and A. K. Horsch:</i> The influence of cigarette smoking	
on human arterial explants in vitro	144
<i>E. Monos and A. G. B. Kovách:</i> Postischemic hyperresponsiveness of canine carotid arteries	147
<i>V. Levický and A. V. Loud:</i> Volume and surface areas of some vascular smooth muscle cell organelles in rat	149
<i>H. Hutton and P. Vaupel:</i> Flow-resistance relationship for the cerebrovascular system of rabbits under normal and pathophysiological conditions	152
<i>E. Engler, D. Matthias and C. H. Becker:</i> Cell-kinetical investigations in the peripheral arterial vessels of rats with depot-angiotensin-hypertension between 3 hours and 14 days	155
<i>J. Török and R. Töröková:</i> The reactivity of isolated venous preparation from rabbits pretreated with reserpine	157
<i>G. L. Nadas, E. Monos, E. Mohácsi, J. Csépli and A. G. B. Kovách:</i> Effects of oxygen, hypoxia, metabolic inhibitors, nitrite, indomethacin, and adenosine on the spontaneous tone of a nerve-free vessel, the human umbilical artery	159
<i>J. Gero and M. Gerová:</i> Neuro-vascular transmission related to the rate and number of stimulation impulses	161

IMMUNOLOGICAL ASPECTS OF VASCULAR DISEASES

<i>K. Inada, A. Okada and R. Miyamoto:</i> Immunological studies in chronic occlusive arterial diseases	165
<i>J. Pokorný and Z. Ježková:</i> Significance of immunological studies of peripheral arterial diseases	167
<i>H. Yamaguchi, H. Takeuchi and Ch. Torikata:</i> Vascular changes of low calcium diet fed animals against soluble immune complex	170
<i>Z. Hrnčíř, M. Tichý and L. Hrnčířová:</i> Blood serum proteins and free SH groups in the diagnosis of classical polyarteritis nodosa	173
<i>M. Horváth, K. Ónody and S. Gerö:</i> The effect of autologous serum and some drugs on cellular immune reactions in vascular diseases	175
<i>B. Lacaze, C. Ferrand, and O. Pepin:</i> Immunology of endothelial cells action of ticlopidine	177
<i>R. Engemann, H. H. Körner and A. Thiede:</i> Immunological and functional of results allogeneic vein transplantation in the low pressure system	179
<i>E. Deltz and A. Thiede:</i> Immunological and functional results of allogeneic vein transplantation within the arterial system	182

ADAPTABILITY OF VASCULAR TISSUE SURGERY

<i>G. Sanoudos, P. Tsakonas and N. Tsaganos:</i> Reconstruction or amputation in old people with aortoiliac occlusive arterial disease?	187
<i>E. Tündér, K. Poder, H. Tikko, V. Mölder and E. Sepp:</i> Results of reconstructive surgery for occlusive disease of aortoiliac and femoropopliteal arteries	190
<i>V. Ružbarský and M. Krajiček:</i> The healing of vascular prostheses in a man	193
<i>V. Triponis and D. Triponiene:</i> Secondary reconstructive operations in patients after aortoiliac surgery	195
<i>J. Bartoš, K. Teršíp and B. Drugová:</i> Thrombosis of aorto-iliac reconstruction: Origin, prevention and treatment	198
<i>L. Romanovská, M. Krajiček and I. Přeovský:</i> Long-term changes of calf blood flow and local pressure in patients with aortofemoral reconstruction	201
<i>M. Bartel, W. Wagner and I. Marzoll:</i> Results of femoropopliteal venous bypass operation in chronic arterial occlusion	203
<i>J. D. Gruss, S. Kawai and C. Karadedos:</i> Our experience with the in-situ bypass in chronic occlusive disease of the femoropopliteal artery	206
