Photocopying

Single photocopies of single chapters may be made for personal use as allowed by national copyright laws. Permission of the Publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier's Rights Department in Oxford, UK: phone (+44) 1865 843830, fax (+44) 1865 853333, e-mail: permissions@elsevier.com. Requests may also be completed on-line via the Elsevier homepage (<http://www.elsevier.com/locate/permissions>).

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA: phone (+1) (978) 7508400, fax: (+1) (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44) 20 7631 5555; fax: (+44) 20 7631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Tables of contents may be reproduced for internal circulation, but permission of the Publisher is required for external resale or distribution of such material. Permission of the Publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the Publisher is required to store or use electronically any material contained in this work, including any chapter or part of a chapter.

Except as outlined above, no part of this work may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the Publisher. Address permissions requests to: Elsevier's Rights Department, at the fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

CONTENTS

List of Contributors	v
Chapter 1 The Theoretical and Methodological Toolbox of Urban Economics: From and Towards Where? <i>Roberta Capello and Peter Nijkamp</i>	1
1.1. Pathways in regional science and urban economics	2
1.2. The role of urban economics in regional science	4
1.3. Advances in urban economics: recent theoretical and methodological directions	6
1.3.1. Prefatory remarks	6
1.3.2. Tendencies in theory	6
1.3.3. Tendencies in models and methods	13
1.4. Urban economics and regional science transition	16
1.5. Hurdles to be crossed	19
1.6. Reasons and structure of the volume	20
References	24
PART 1 AGGLOMERATION	
Chapter 2 Urban Scale Economies: Statics and Dynamics <i>Philip McCann</i>	31
2.1. Introduction	31
2.2. Cities, returns to scale and agglomeration	33
2.3. Cities, innovation and firm creation	37
2.4. Clusters, firm types and the nature of transactions	40
2.5. The empirics of cities	45
2.6. Conclusions	52
References	53
Chapter 3 Beyond Optimal City Size: Theory and Evidence Reconsidered <i>Roberta Capello</i>	57
3.1. Introduction	57
3.2. Optimal city size: an old and still unsolved issue	59

3.3. New paradigms for an old problem	62
3.3.1. The neoclassical and Christallerian city	62
3.3.2. The network city	66
3.4. Traditional empirical analyses: the aspatial city	70
3.5. Recent empirical analyses: city size and environmental aspects	74
3.6. Recent empirical analyses: the specialised city in an urban system	77
3.7. Concluding remarks	81
References	82
Chapter 4 Spatial Externalities and the Urban Economy	87
<i>Erik T. Verhoef and Peter Nijkamp</i>	
4.1. Cities in perspective	88
4.2. Urban externalities	91
4.3. An overview of urban externalities studies	95
4.3.1. Theoretical studies	96
4.3.2. Towards empirical studies	98
4.4. A modelling framework for urban externalities: analysing first-best and second-best policies for multiple externalities	100
4.4.1. The analytical model	102
4.4.2. A numerical example: base-case equilibrium	109
4.4.3. First-best regulation	112
4.4.4. Second-best regulation	114
4.5. Conclusion	117
References	118
Chapter 5 Uncertainty, Social Capital and Community Governance: The City as a <i>Milieu</i>	121
<i>Roberto Camagni</i>	
5.1. Introduction: complexity and uncertainty	122
5.2. Uncertainty and the concept of local <i>milieu</i>	124
5.3. Relational capital as a crucial constituent of the local <i>milieu</i>	129
5.4. The city as a <i>milieu</i>	134
5.4.1. The conditions for a comparison	134
5.4.2. The economic role of the city and a taxonomy of urban agglomeration advantages	137
5.4.3. The theoretical relationships between the <i>Milieu</i> and the City	140
5.5. Towards a new urban governance: the tool of strategic planning	143
5.6. Conclusions	147
References	147

PART 2 ACCESSIBILITY

Chapter 6 Land-use, Transportation and Urban Development	153
<i>Ken J. Button, Peter Nijkamp and Piet Rietveld</i>	
6.1. Introduction	154
6.2. Linking land-use and transport	155
6.3. The distant past – up to the mid-1980s	158
6.4. Congestion and pricing of transportation infrastructure	162
6.5. Investment in transportation infrastructure	166
6.6. Transportation, information and land-use	169
6.7. Transportation demand modeling	172
6.8. Conclusions	174
References	174
Chapter 7 Transport Systems and Urban Equilibrium	181
<i>Lars Lundqvist</i>	
7.1. Introduction	182
7.2. Equilibrium and optimum in urban systems analysis	183
7.3. Transport systems and urban land use in simplified urban geographies	185
7.3.1. Symmetric continuous space: optimum and equilibrium	185
7.3.2. Symmetric discrete space: optimum and equilibrium	190
7.4. Transport systems and urban land use in realistic urban geographies	197
7.4.1. Modular/iterative approaches: optimum and equilibrium	197
7.4.2. Simultaneous/integrated approaches: optimum and equilibrium	202
7.5. Lessons	206
7.6. Research directions	208
References	209
Chapter 8 Intra-metropolitan Agglomeration, Information Technology and Polycentric Urban Development	213
<i>Jungyul Sohn, Geoffrey J.D. Hewings and Tschangho John Kim</i>	
8.1. Introduction	213
8.2. Spatial clustering of economic activities	216
8.3. Information technology and urban spatial structure	220
8.4. Spatial simultaneous equation systems	223
8.5. Regressions for attraction and spillover effects	226
8.6. Study area: Seoul metropolitan region	231

8.7. Intra-metropolitan agglomeration in Seoul	233
8.8. IT impact and polycentric urban development in Seoul	237
8.9. Conclusions	243
References	244
Chapter 9 Dual Earners, Urban Labour Markets and Housing Demand	249
<i>Jan Rouwendal and J. Willemijn Van Der Straaten</i>	
9.1. Introduction	250
9.2. Locational choices of couples in the US	251
9.2.1. Summary Costa and Kahn	251
9.2.2. Methodological issues	254
9.2.3. Urban labour market	255
9.3. Location choices of couples in the Netherlands	260
9.3.1. The data	260
9.3.2. Regional division	261
9.3.3. Results	262
9.3.4. Conclusions and comparison	265
9.4. Further empirical analysis	265
9.4.1. Urban wage premium	265
9.4.2. Dual earners and urban wage premium	268
9.4.3. Conclusions so far	269
9.4.4. Dual earners and the housing market	270
9.5. Conclusions	280
References	282
Chapter 10 Land Use Regulation and Its Impact on Welfare	285
<i>Stephen Sheppard</i>	
10.1. Introduction	285
10.2. Evolution of the literature	288
10.2.1. Theoretical analysis of the efficiency of land use regulation	289
10.2.2. Other possible effects	293
10.3. A 'canonical' model of land use control	294
10.4. Extending the model: potentially beneficial land use regulation	302
10.5. Empirical studies of land use regulation	307
10.5.1. Data and empirical evidence	308
10.5.2. Assessing the impact of land use regulation	311
10.5.3. Distributional impacts	312
10.6. Conclusion	314
References	315

PART 3 SPATIAL INTERACTION, MIGRATION AND COMMUTING

Chapter 11	Spatial Interaction Models: From the Gravity to the Neural Network Approach	319
	<i>Manfred M. Fischer and Aura Reggiani</i>	
11.1.	Introduction	319
11.2.	Context and analytical framework	320
11.2.1.	The generic spatial interaction model of the gravity type	322
11.2.2.	Specification of the deterrence function	324
11.2.3.	Four different cases	324
11.3.	The statistical equilibrium	327
11.4.	The choice-theoretic approach	330
11.5.	The neural network approach	334
11.5.1.	The unconstrained case of neural spatial interaction modelling	335
11.5.2.	The class of singly constrained neural spatial interaction models	336
11.5.3.	The modelling process	337
11.5.4.	The network learning problem and parameter estimation procedures	338
11.6.	Concluding remarks	342
	References	343
Chapter 12	Commuting: The Contribution of Search Theory	347
	<i>Jos van Ommeren</i>	
12.1.	Introduction	347
12.2.	Search theory	350
12.2.1.	The basic assumption	350
12.2.2.	The optimal strategy	352
12.2.3.	Moving behaviour	355
12.2.4.	The optimal reservation wage strategy	355
12.2.5.	Adaptions and extensions	360
12.2.6.	Marginal willingness to pay	368
12.2.7.	Geographical structure	370
12.3.	The observed commuting costs distribution	372
12.4.	Conclusion	375
	References	375
Chapter 13	Ethnic Concentration and Human Capital Formation	381
	<i>Thomas de Graaff and Henri L.F. de Groot</i>	
13.1.	Introduction	382
13.2.	A model of migration and human capital accumulation	385

13.2.1. The economy	387
13.2.2. Endogenous migration	391
13.3. Within-country homogeneous human capital	393
13.4. Heterogeneous human capital and migration	396
13.4.1. Negative impact of the neighborhood	399
13.4.2. Positive impact of the neighborhood	400
13.5. Conclusion	402
Appendix A13. Comparative statics	403
Appendix B13. Human capital accumulation when migration costs do not depend on human capital	405
References	407

PART 4 URBAN HIERARCHY

Chapter 14 Advanced Insights in Central Place Theory	413
<i>Shin-Kun Peng</i>	
14.1. Introduction	414
14.2. Central place theory	416
14.3. The existence of a monocentric configuration	420
14.4. The emergence of urban system	427
14.5. The rank-size distribution in an urban hierarchy	432
14.6. Conclusions	438
References	438
Chapter 15 The City System Paradigm: New Frontiers	443
<i>Hesham M. Abdel-Rahman</i>	
15.1. Introduction	444
15.2. The internal structure of the city	448
15.3. Agglomeration economies and city systems	452
15.3.1. Equilibrium system of cities	453
15.3.2. Institutional city formation mechanisms	454
15.4. Identical cities without trade	456
15.4.1. Public good	457
15.4.2. Marshallian externality	459
15.4.3. Differentiated intermediate input	461
15.4.4. Differentiated consumption good	465
15.5. Specialization and trade	468
15.6. Specialization vs. diversification	471
15.6.1. Cross-product externality	471
15.6.2. Transportation costs	472
15.6.3. Economy of scope	474
15.6.4. Product cycle	478

15.7. Heterogeneous household and income disparities	479
15.8. Efficient system of cities	483
15.9. Conclusion	490
References	491

Chapter 16 The City Network Paradigm: Theory and Empirical Evidence	495
<i>Roberto Camagni and Roberta Capello</i>	

16.1. Introduction	496
16.2. Cooperation networks among firms: the emerging economic paradigm	499
16.3. Cities as collective actors	502
16.4. The structure of the urban system: from city hierarchy to city networks	504
16.4.1. The need for a new paradigm	504
16.4.2. The three logics of spatial behaviour of the firm	506
16.4.3. The structure of the urban system	508
16.4.4. The city network paradigm	510
16.5. Do city networks really exist? An econometric experiment	513
16.6. Do city networks really generate advantages for city partners? Some empirical evidence	517
16.6.1. A measurement of ‘network surplus’	517
16.6.2. Preconditions for the exploitation of network surplus	521
16.7. Conclusions	525
References	527

PART 5 URBAN COMPETITIVENESS

Chapter 17 Dynamic Urban Models: Agglomeration and Growth	533
<i>Marcus Berliant and Ping Wang</i>	

17.1. Introduction	534
17.2. From Solow–Swan to Ramsey urban growth models	539
17.2.1. The aggregate production approach to urban growth	540
17.2.2. The golden rule solution	544
17.2.3. The optimal exogenous growth framework	545
17.3. From exogenous to endogenous urban growth models	548
17.3.1. A basic one-sector endogenous urban growth model	549
17.3.2. A modified one-sector model of endogenous urban growth	552
17.3.3. Housing dynamics and zoning	557
17.3.4. Two-sector endogenous urban growth and stability	562
17.3.5. Endogenous growth in a perfectly competitive economy with a system of cities	568

17.4. Urban growth models with an imperfectly competitive market	569
17.4.1. The role of Marshallian externalities and imperfect competition	569
17.4.2. The non-Walrasian approach to agglomeration and growth	572
17.5. Avenues for future research	575
References	577
Chapter 18 New Economic Geography Explanations of Urban and Regional Agglomeration	583
<i>Kieran P. Donaghy</i>	
18.1. Introduction	583
18.2. Krugman's core-periphery model	586
18.2.1. Consumer behavior	587
18.2.2. Producer behavior	589
18.2.3. Transportation costs	592
18.2.4. Normalizations and short-run equilibrium	593
18.3. Developments in the new economic geography	595
18.4. Accomplishments and challenges	600
References	605
Chapter 19 Agglomeration and Knowledge Diffusion	609
<i>Johannes Bröcker</i>	
19.1. Introduction	610
19.2. A growth model with two regions	611
19.2.1. Firms	611
19.2.2. Households	613
19.2.3. Dynamic equilibrium	614
19.3. Dynamics: convergence and divergence	618
19.3.1. Divergence	619
19.3.2. Agglomeration	622
19.3.3. Convergence	626
19.4. Efficiency	627
19.5. Conclusion	631
References	632
Chapter 20 Innovation and the Growth of Cities	635
<i>Zoltan J. Acs</i>	
20.1. Introduction	635
20.2. Heterogeneity vs. specialization	636
20.3. Endogenous technical change	639

20.4. Entrepreneurship and innovation	645
20.5. Towards a “new model of regional economic development?”	652
References	655

Chapter 21 Cities and Business 659

Roger R. Stough and Rajendra Kulkarni

21.1. Introduction	660
21.2. The location of technology intensive business	661
21.3. Changes in business context and operations	666
21.4. Land use and business location patterns	670
21.4.1. Urban land use theory and use patterns	670
21.4.2. Urban decentralization and business activity	671
21.4.3. Edge cities and the structure of business activity	673
21.5. Entrepreneurship and enterprise development in cities	675
21.5.1. Interest in enterprise development has been increasing	675
21.5.2. Reasons for growth in enterprise development	676
21.5.3. Enterprise development: approaches in cities	679
21.5.4. General observations and conclusions: enterprise development and cities	682
21.6. Discussion, conclusions and policy implications	683
References	685

PART 6 URBAN POLICY

Chapter 22 Strengthening Municipal Fiscal Autonomy Through Intergovernmental Transfers 691

Peter Friedrich, Joanna Gwiazda and Chang Woon Nam

22.1. Introduction	691
22.2. Fiscal equalisation to protect municipalities by conditional grants	696
22.2.1. Some fiscal issues surrounding the principle of connection	696
22.2.2. Conditional grants	700
22.3. Principle of parallelism to prevent fiscal autonomy through unconditional grants	707
22.3.1. Definition of the principle of parallelism	707
22.3.2. Analysis of the principle of parallelism	711
22.4. Conclusions	723
References	724

Chapter 23 Urban Quality of Life and Public Policy: A Survey 729

Gordon Mulligan, John Carruthers and Meagan Cahill

23.1. Introduction	729
23.2. Interurban scale	731

23.2.1. City rankings	731
23.2.2. Other hedonic issues	740
23.2.3. Population and employment relocation	750
23.2.4. Industrial and business location	757
23.2.5. Local economic development and planning	762
23.3. Intraurban scale	765
23.3.1. Deprivation	765
23.3.2. Growth and planning	772
23.4. Concluding remarks	786
References	787
Chapter 24 Policy Issues in the Urban South	803
<i>Manie Geyer</i>	
24.1. Introduction	804
24.2. The South in global terms	804
24.2.1. Changing global divisions of labour	804
24.2.2. Policies that caused economic change	807
24.2.3. The impact of foreign direct investment	808
24.2.4. Mega cities of the South	810
24.3. Development frameworks of the past	816
24.3.1. Neo-liberalism	816
24.3.2. Criticism of the lagging South	818
24.4. Making markets work in the South	820
24.4.1. Pillars in the Southern economic markets	820
24.4.2. Building new market structures in the urban South	821
24.5. New markets and urban sustainability	825
24.6. Conclusion	830
References	831
Chapter 25 Urban Policy in a Global Economy	837
<i>Åke E. Andersson, Lata Chatterjee and T.R. Lakshmanan</i>
