SETAC Publications

Books published by the Society of Environmental Toxicology and Chemistry (SETAC) provide in-depth reviews and critical appraisals on scientific subjects relevant to understanding the impacts of chemicals and technology on the environment. The books explore topics reviewed and recommended by the Publications Advisory Council and approved by the SETAC North America, Latin America, or Asia/Pacific Board of Directors; the SETAC Europe Council; or the SETAC World Council for their importance, timeliness, and contribution to multidisciplinary approaches to solving environmental problems. The diversity and breadth of subjects covered in the series reflect the wide range of disciplines encompassed by environmental toxicology, environmental chemistry, hazard and risk assessment, and life-cycle assessment. SETAC books attempt to present the reader with authoritative coverage of the literature, as well as paradigms, methodologies, and controversies; research needs; and new developments specific to the featured topics. The books are generally peer reviewed for SETAC by acknowledged experts.

SETAC publications, which include Technical Issue Papers (TIPs), workshop summaries, newsletter (*SETAC Globe*), and journals (*Environmental Toxicology and Chemistry* and *Integrated Environmental Assessment and Management*), are useful to environmental scientists in research, research management, chemical manufacturing and regulation, risk assessment, and education, as well as to students considering or preparing for careers in these areas. The publications provide information for keeping abreast of recent developments in familiar subject areas and for rapid introduction to principles and approaches in new subject areas.

SETAC recognizes and thanks the past coordinating editors of SETAC books:

A.S. Green, International Zinc Association
Durham, North Carolina, USA

C.G. Ingersoll, Columbia Environmental Research Center
US Geological Survey, Columbia, Missouri, USA

T.W. La Point, Institute of Applied Sciences
University of North Texas, Denton, Texas, USA

B.T. Walton, US Environmental Protection Agency
Research Triangle Park, North Carolina, USA

C.H. Ward, Department of Environmental Sciences and Engineering
Rice University, Houston, Texas, USA

Acknowledgments

This book presents the proceedings of a Pellston Workshop convened by the Society of Environmental Toxicology and Chemistry (SETAC) in Pensacola, Florida, in February 2009. The 46 scientists, managers, and policymakers involved in this workshop represented 5 countries. We thank all participants for their contributions, both in the workshop and in subsequent discussions resulting in this book.

The workshop and this book were made possible by the generous support of the following organizations (in alphabetical order):

- American Petroleum Institute
- Australian Academy of Technological Sciences and Engineering (partially supported by the International Science Linkages–Science Academies Programme, part of the Australian Government Innovation Statement, Backing Australia’s Ability)
- Canadian Industry Selenium Working Group (comprising contributions from members, in alphabetical order: Areva, Cameco, CVRD Inco, Grand Cache Coal, Kemess, Peace River Coal, Prairie Mines, Shell, Sherritt Coal, Teck Coal, Teck Resources, TransAlta, and Western Coal Corporation)
- Canadian Nuclear Safety Commission
- CH2M HILL
- Electric Power Research Institute
- Environment Canada
- Rio Tinto
- U.S. Environmental Protection Agency Office of Water
- U.S. Fish and Wildlife Service
- U.S. Utility Water Act Group

The workshop would also not have been possible without the very capable management and excellent guidance provided by SETAC staff, particularly Greg Schiefer and Nikki Turman. The efforts of Mimi Meredith in the production of this book are gratefully acknowledged.

William J. Adams
Marjorie L. Brooks
Charles G. Delos
Samuel N. Luoma
William A. Maher
Harry M. Ohlendorf
Theresa S. Presser
D. Patrick Shaw

About the Editors

Peter M. Chapman is a principal and senior environmental scientist with Golder Associates Ltd. in Burnaby, British Columbia, Canada, and has been working on selenium issues since 1995. In 2001 SETAC awarded him the Founders Award, their highest award for lifetime achievement and outstanding contributions to the environmental sciences.

William J. Adams is chief advisor to Rio Tinto on site remediation risk assessment and leads a global team responsible for managing closed mining sites and areas under management. He has conducted research on selenium since 1972 and has published 20 papers on selenium ecotoxicology-related topics.

Marjorie L. Brooks is an assistant professor at Southern Illinois University at Carbondale (Illinois, USA). She is interested in the effects of multiple, abiotic stressors such as UV radiation, metals, and selenium on aquatic biota.

Charles G. Delos is an environmental scientist in the Office of Water of the U.S. Environmental Protection Agency (Washington, DC, USA). He has worked on environmental modeling, risk assessment, and water quality criteria, and is currently responsible for selenium criteria development.

Samuel N. Luoma is with the John Muir Institute of the Environment, University of California (Davis, California, USA) and the Natural History Museum (London), and is an emeritus after 34 years at the U.S. Geological Survey (Menlo Park, California, USA). He has worked on exposure, effects, modeling, and monitoring of selenium since the late 1980s.

William A. Maher is a professor in environmental/analytical chemistry, dean of applied science, and director of the Ecochemistry Laboratory, Institute of Applied Ecology, University of Canberra, Australia. He was awarded the Royal Australian Chemical Institute Analytical Divisions medal in 2002 and their Environmental Chemistry Divisions medal in 2004.

Harry M. Ohlendorf is a technology fellow with CH2M HILL in Sacramento, California, USA. He has conducted evaluations of the ecotoxicology of selenium since 1983, when he began studies of the effects of selenium on birds at Kesterson Reservoir, California.

Theresa S. Presser is a chemist with the National Research Program of the U.S. Geological Survey. She has conducted research on selenium sources and exposure since her initial investigations at Kesterson National Wildlife Refuge and in the Coast Ranges of California in 1983.

D. Patrick Shaw is a senior environmental scientist with Environment Canada in Vancouver, British Columbia, Canada. He has been involved in selenium issues in western Canada since 2003.

Workshop Participants⁺

Workshop chair: Peter M. Chapman, Golder Associates Ltd.

⁺Affiliations were current at the time of the workshop.

^{*}Steering committee member

[†]Provided discussion or commentary presentation in opening plenary

WORKGROUP 1: PROBLEM FORMULATION

William J. Adams*

Rio Tinto
Magna, Utah, USA

John Besser

U.S. Geological Survey
Columbia, Missouri, USA

Keith Finley (Rapporteur)[†]

Duke Energy
Huntersville, North Carolina, USA

William A. Hopkins

Virginia Polytechnic Institute and State
University
Blacksburg, Virginia, USA

Dianne Jolley[†]

University of Wollongong
Wollongong, New South Wales
Australia

Eugenia McNaughton[†]

U.S. Environmental Protection Agency
San Francisco, California, USA

Theresa S. Presser*

U.S. Geological Survey
Menlo Park, California, USA

D. Patrick Shaw*

Environment Canada
Vancouver, British Columbia
Canada

Jason Unrine

University of Kentucky
Lexington, Kentucky, USA

Terry Young (Chair)

Oakland, California, USA

WORKGROUP 2: ENVIRONMENTAL PARTITIONING

Martina Doblin

University of Technology
Sydney, New South Wales
Australia

Teresa Fan

University of Louisville
Louisville, Kentucky, USA

Simon Foster

University of Canberra
Canberra, ACT
Australia

Reid Garrett

Progress Energy
Raleigh, North Carolina, USA

William Maher*

University of Canberra
Canberra, ACT
Australia

Greg Möller

University of Idaho
Moscow, Idaho, USA

Anthony Roach†

Centre for Ecotoxicology
Lidcombe, New South Wales
Australia

Dirk Wallschläger

Trent University
Peterborough, Ontario
Canada

WORKGROUP 3: TROPHIC TRANSFER

David Buchwalter

North Carolina State University
Raleigh, North Carolina, USA

Nicholas Fisher

Stony Brook University
Stony Brook, New York, USA

Martin Grosell (Rapporteur)

University of Miami
Miami, Florida, USA

Sam Luoma*†

U.S. Geological Survey
Menlo Park, California, USA

Teresa Mathews

Institute for Radiological Protection and
Nuclear Safety
Cadarache, St. Paul lez Durance Cedex
France

Patricia Orr†

Minnow Environmental
Georgetown, Ontario
Canada

Robin Stewart (Chair)

U.S. Geological Survey
Menlo Park, California, USA

Wen-Xiong Wang

Hong Kong University of Science and
Technology
Kowloon, People's Republic of China

WORKGROUP 4: TOXIC EFFECTS

Marjorie L. Brooks*

Southern Illinois University
Carbondale, Illinois, USA

Peter M. Chapman*

Golder Associates
Burnaby, British Columbia
Canada

David K. DeForest (Rapporteur)

Windward Environmental
Seattle, Washington, USA

Guy Gilron

Teck Cominco
Vancouver, British Columbia
Canada

Dale Hoff

U.S. Environmental Protection Agency
Duluth, Minnesota, USA

David M. Janz (Chair)†

University of Saskatchewan
Saskatoon, Saskatchewan
Canada

Dennis O. McIntyre†

Great Lakes Environment Center
Columbus, Ohio, USA

Christopher A. Mebane

U.S. Geological Survey
Boise, Idaho, USA

Vincent P. Palace[†]

Department of Fisheries and Oceans
Winnipeg, Manitoba
Canada

Joseph P. Skorupa[†]

US Fish and Wildlife Service
Arlington, Virginia, USA

Mark Wayland

Environment Canada
Saskatoon, Saskatchewan
Canada

**WORKGROUP 5: RISK
CHARACTERIZATION**

Patrick Campbell

West Virginia Department of
Environmental Protection
Charleston, West Virginia, USA

Steve Canton[†]

GEI Consultants
Littleton, Colorado, USA

Charles G. Delos*

U.S. Environmental Protection Agency
Washington, DC, USA

Anne Fairbrother[†]

Exponent
Bellevue, Washington, USA

Nathaniel Hitt

U.S. Geological Survey–Leetown
Science Center
Kearneysville, West Virginia, USA

Peter Hodson (Chair)

Queens University
Kingston, Ontario
Canada

Lana Miller

University of Lethbridge
Lethbridge, Alberta
Canada

Harry M. Ohlendorf*

CH2M HILL
Sacramento, California, USA

Robin Reash (Rapporteur)

American Electric Power
Columbus, Ohio, USA
