## VOLUME I WORKING PAPERS TO ACCOMPANY CHAPTERS 1-13 OF

#### Welsch, Newman, and Zlatkovich, Intermediate Accounting, 7th Edition

The working papers provide appropriate forms for solutions of the Exercises (approximately 470), Problems (approximately 380), and Cases (approximately 110), included in the above textbook. These working papers are assembled in two separate volume as follows:

Volume I—For Chapter 1-13 inclusive. Volume II—For Chapters 13-24 inclusive.

Each volume includes five groups of forms (each group is in a separate section) in the following order:	Number of Forms Provided Volume I
Specially designed forms—These forms (grouped by chapter) are specially designed for each selected exercise and problem. Typically, they provide most of the top and side captions required to solve the exercise	
or problem	309
number of exercises and problems	100
number of the exercises and problems	128
exercises and problems	29
Form D—T-account form—needed for only a few exercises and problems	4
Total forms provided	<u>570</u>

#### HOW TO SELECT THE APPROPRIATE FORMS FOR AN EXERCISE OR PROBLEM

On the next several pages is a list of the exercises, problems, and cases by **chapter** for which forms have been provided. There is a **separate line** for each exercise, problem, and case. The line for each exercise, problem, and case lists the **forms** and the **number** of each form needed for the solution. Each of the five groups of forms listed above is in a **separate section** in the above order (following the specially designed forms).

To solve a particular exercise or problem, first consult the list that follows and identify the forms needed. Next turn to the appropriate sections and select the required forms; then proceed with the solution. In formulating your response, do not hesitate to use scratch paper, aside from the standard forms.

Because of assembly constraints for worksheets that must be **folded**, such worksheets are placed at the **end** of the other forms. Folded worksheets are required for the following problems (none for exercises) as designated by a "W" under the column "Specially Designed Forms":

Problems 2-13, 2-14, Case 2-4
