**CUMULATIVE INDEX
TO THE
MÖSSBAUER EFFECT
DATA INDEXES**

Preface

Nine volumes of the *Mössbauer Effect Data Index (MEDI)* have been published by Plenum Publishing Corporation, covering the literature from 1966 through 1976. Completing the series, this volume provides three indexes to the literature: by isotope, subject, and author. The isotope index lists the appropriate reference code numbers for each Mössbauer isotope except ^{57}Fe . The subject index, new to *MEDI*, is based on a computer search of our files. With each reference entered into the system is included a string of keywords. There are approximately 500 keywords currently in use, and the more important of these have been selected to generate the subject index; however, the development of the keyword system has been progressive so that occasionally the first few arti-

cles which include information on a particular topic may not have been keyworded for that topic and will not appear in the subject index. No differentiation is made between first and succeeding authors in the author index. Topics are listed with reference codes under each author's name.

For a description of the coverage of the literature, please refer to the prefaces of previous *MEDI*'s. Also included in these are the names of the many individuals and institutions who have assisted us through the years. This year Elizabeth Firnschild helped with the layout.
