Peterson
Principles of Marketing

Preface

The unprecedented success of *Contemporary Marketing*, Ninth Edition, confirmed our belief in the importance of integrating today's technology—the Internet, CD-ROM, and multimedia—to traditional, as well as, emerging marketing concepts. The publication of *Contemporary Marketing*^{WIRED} ushered in a new generation of textbooks equipped to prepare marketing students for the new millennium.

Creating a marketing textbook wired for the twenty-first century has also made us all too aware of the need for a means of staying in front of today's changing technology. The pace of technological innovations means that the traditional three-year revision cycle of *Contemporary Marketing* is simply too long to offer current information to today's students.

Our response to these needs to offer a textbook portraying the issues of today and tomorrow is the creation of *Contemporary Marketing 1999*. This updated edition of the text allows us to supply instructors and students with the very latest real-world company examples, up-to-date technology information and Internet addresses, and today's most current issues and trends.

This currency is apparent beginning with the first page of Chapter 1. Virtual Vineyards, the highly successful online marketer demonstrates the strength of the World Wide Web in twenty-first century marketing. The "Marketing Hall of Fame" feature "How Marketing Helped Refloat the Titanic," explores the role of marketing in the success of this recent Academy Award winner and the first film to generate more than \$1 billion in box-office receipts. Throughout the text, new materials abound:

- ▼ Internet commerce and privacy issues in Chapter 3
- ▼ Emergence of Comedy Central cable channel in Chapter 5
- ▼ Oprah Winfrey–Cattlemen court battles in Chapter 8
- ▼ The success of Chrysler's Camp Jeep in Chapter 17
- ▼ How advertisers have changed their message to women in Chapter 18
- ▼ Frito-Lay's use of sales force automation in Chapter 19
- ▼ Ticket pricing for professional sports events in Chapter 20

In addition, a new continuing case has been added. The subject, Yahoo!, ties in directly with the book's theme of technology.

For most students, an equally important characteristic of *Contemporary Marketing 1999* is price. By publishing

the new edition in a paperback format, the book's retail price is approximately 35 percent less than the previous edition and well below the price of competing hard cover texts.

Contemporary Marketing Firsts

Some 1.2 million students have been introduced to the dynamic world of marketing through *Contemporary Marketing*. And after reading this sampling of our many "firsts," we hope you'll understand why *Contemporary Marketing* continues to rank first with instructors and students alike.

- ▼ The **FIRST** marketing text written specifically for the student—rather than the professor—featuring a clear, concise style that readers can readily understand and enjoy.
- ▼ The **FIRST** marketing text based on marketing research and written the way instructors actually teach the course.
- ▼ The **FIRST** text to integrate computer applications into each chapter.
- ▼ The **FIRST** text to employ extensive pedagogy—such as boxed features—to breathe life into exciting real-world concepts and issues of marketing.
- ▼ The **FIRST** text to introduce end-of-chapter video cases tied to professionally produced video segments.
- ▼ The **FIRST** text to offer services and international chapters early and to thoroughly integrate those topics throughout the textbook with literally hundreds of examples.
- ▼ The **FIRST** text to include a separate chapter on quality and customer satisfaction.
- ▼ The **FIRST** text to utilize multimedia technology to integrate all components of the principles of marketing ancillary program—*Contemporary Marketing* laser discs linked to videos, overhead transparencies, and material from the text—enabling instructors to custom create exciting, energetic lecture presentations.
- ▼ **FIRST** to integrate a true technology emphasis throughout the text and package. *Contemporary Marketing 1999* incorporates the technology theme into every facet: opening vignettes, chapter concepts, end-of-chapter assignments, boxed features, cases, and innovatively packaged items. The text applies today's technology—the Internet, CD-ROM, and multimedia—to traditional as well as emerging marketing

concepts. Creative assignments and exercises give students hands-on experience in applying technological advances to real marketing issues. Engaging in-text examples include company Web addresses and students can glean additional information and insight from *Contemporary Marketing's* own home page.

TECHNOLOGY EMPHASIS

Student Preface

A high-tech student preface details the emphasis *Contemporary Marketing 1999* places on technology and gives directions to the Boone & Kurtz home page and other Internet resources.

Technology-Based Chapter Openers

Innovative chapter opening vignettes illustrate current marketing technology in action and link real-world scenarios to chapter concepts. Each vignette describes how an actual company has applied technology to its competitive advantage or highlights a current topic in marketing. The marketing environment chapter (Chapter 3) opens with descriptions of Internet and Web privacy and security issues, while the business-to-business marketing chapter (Chapter 9) begins discussing the software Millennium Bug (Y2K), and the retailing coverage chapter (Chapter 15) begins with discussions of the cyber-market.

Technology in Marketing Research

Coverage of technology in marketing research includes examples of high-tech tools and how computers are used to support marketing decision systems, including marketing databases, warehousing, and decision support systems.

'netWork Technology Exercises

End-of-chapter 'netWork applications give students hands-on experience employing the Internet in marketing-related exercises. These cutting-edge exercises:

- ▼ Contain problems that require students to locate data on different Web sites.
- ▼ Include computer exercises that can be completed at the *Contemporary Marketing* Web site.
- ▼ Incorporate follow-up assignments enabling students to further research in-text examples on Dryden Web locations.

Video Case Web-Site Questions

End-of-chapter video case questions include exercises that require students visit a specific Web site related to the company or the concepts covered in the video in order to obtain the information necessary to solve the application.

CONTENT

Early Emphasis on the Internet and Relationship Marketing

Chapter 1, "Developing Relationships through Customer Focus, Quality, Technology, and Ethical Behavior," reflects the text's integrated emphasis on technology. Students are immediately introduced to hot topics such as the Internet, virtual marketing, and interactive marketing. The chapter also discusses relationship marketing, the increasing influence of global marketing, and the role of ethics and social responsibility in building customer relationships.

Relationship Marketing Chapter

An entire chapter has been devoted to relationship marketing, including coverage of database marketing, strategic alliances, co-marketing, co-branding, and dedicated sales forces. Coverage of this increasingly important marketing topic begins early in the text in Chapter 1 before the in-depth discussion in Chapter 10. Relationship marketing is also integrated throughout the text.

Integrated Communications Approach to Advertising and Promotion

The material on advertising and promotion emphasizes an integrated marketing communications approach, reflecting emerging trends in the field. Chapter 17, "Integrated Marketing Communications" also details the importance of the Internet's role in the promotional mix, including discussions of methods for determining the effectiveness of using Web sites. Sponsorship as a promotional tool and expanded coverage of direct marketing are also included in Chapter 17.

Value and Customer Satisfaction

Chapter 2, "Creating Value through Customer Satisfaction and Quality," focuses on the importance of value and customer satisfaction to marketing. Quality is presented as a part of customer satisfaction, rather than vice versa. Value is shown as the link between quality and customer satisfaction and the path leading to successful customer relationships.

Direct Selling and Direct Marketing Coverage

Discussions of direct selling as a separate channel are in Chapter 14, while discussions of direct mail are presented in the context of direct marketing in Chapter 18.

Ethics Emphasis

Beginning early in the text (Chapter 1) with a section on "Ethics and Social Responsibility: Doing Well by Doing Good," *Contemporary Marketing 1999* emphasizes how ethical behavior promotes lasting customer relationships and leads to marketplace success. In addition to each chapter's ethical controversy boxes, Chapter 3 includes discussions of marketing's role in society, marketing ethics, and social responsibility. Special attention is also given to ethics in promotion, with sections in Chapters 17, 18, and 19.

PEDAGOGICAL FEATURES

"Marketing Hall of Fame" and "Marketing Hall of Shame" Boxes

Each chapter contains "Marketing Hall of Fame" and "Marketing Hall of Shame" boxes that detail actual marketing strategies that scored big as well as those that flopped. Presented in a punchy, eye-grabbing format, these stories give students an inside view of the results of actual marketing decisions.

"Solving an Ethical Controversy" Boxes

Real-world ethics and diversity issues are integrated with chapter concepts in this exciting boxed feature that appears in every chapter. These topics are an excellent springboard for classroom discussion and debate.

Questions for Critical Thinking

Included in each "Marketing Hall of Fame" and "Marketing Hall of Shame" boxed feature are "Questions for Critical Thinking" that reflect the text's emphasis on critical-thinking applications. These exercises help students develop analytical skills while considering specific business scenarios.

"Briefly Speaking" Cut-Ins

Intriguing, unusual, and entertaining marketing facts are featured in each chapter in unique "Briefly Speaking" cut-in quotes.

NEW! Continuing End-of-Part Case on Yahoo!

A continuing, end-of-part case on Yahoo! is fully integrated with chapter concepts, implementing new topics and issues as students learn them.

Marketing Dictionary

A student-friendly "Marketing Dictionary" defines key terms as they appear in the text and provides a list of definitions for each two-page spread.

End-of-Chapter Achievement Check Summaries

Each chapter contains an "Achievement Check Summary" section that uniquely reinforces chapter concepts by reviewing chapter highlights with quiz-like true/false and short multiple-choice questions. This question and answer format provides a more interactive and creative method for reviewing key chapter concepts.

UNPARALLELED RESOURCE PACKAGE

Boone & Kurtz Home Page

Using the *Contemporary Marketing* Web site, professors and students can gain additional information, resources, and firsthand experience surfing the Net. Featuring in-text graphics and illustrations, the **Boone & Kurtz home page** is completely integrated with text topics as well as end-of-chapter exercises and video cases, many of which require readers to look up information at this or other Web sites. The home page is also the address for additional material integrated with the end-of-chapter computer exercises. The Boone & Kurtz home page is located on the Dryden World Wide Web site at

<http://www.dryden.com/mktng/boone/>

The Boone and Kurtz Web site includes the following features:

- ▼ "Incorporating the Internet into Your Basic Marketing Class" for professors
- ▼ "Teaching Resources" section for professors
- ▼ Short summaries of articles with accompanying supporting exercises
- ▼ Integration with end-of-chapter 'netWork applications
- ▼ Additional chapter review exercises

- ▼ “Career Communications” section for students
- ▼ Integration with the Discovering Your Marketing Career CD-ROM
- ▼ Integration with end-of-chapter video cases
- ▼ Chat area for students and professors
- ▼ Many other additional resources

World Wide Web Directory

Giving readers even more practice cruising the World Wide Web, online addresses are included for companies and organizations highlighted in extended-text examples, focus boxes, opening vignettes, and photo illustrations. Readers are also referred to Web sites to gain additional insight on chapter material, such as secondary data discussion in marketing research and competitive analysis relating to marketing planning. Addresses are spotlighted in the text with a special eye-catching design. In addition, company Web addresses are listed alphabetically on the endpapers of the text.

PowerPoint/CD-ROM Media Active Presentation Software

Classroom lectures and discussions come to life with this innovative presentation tool. Extremely professor-friendly and organized by chapter, this program enables instructors to custom design their own multimedia classroom presentations, using overhead transparencies, figures, tables, and graphs from the text as well as completely new material from outside sources. Content is provided by Rajiv Vaidyanathan, University of Minnesota—Duluth.

CD-ROM: *Discovering Your Marketing Career*

This innovative, student-friendly software package helps students learn about and assess their compatibility with marketing careers. In one comprehensive, multimedia CD-ROM, students receive broad guidance and practical advice on everything from clarifying the depth of their interest in a particular marketing career to preparing and implementing an effective job search strategy.

Students complete questionnaires regarding their preferences both for marketing-related job activities as well as such career factors as work environment, compensation, and career advancement. The program matches students’ responses to specific marketing careers. Then, a customized video summarizes what their responses reveal about how well the career suits them. Student subsequently read a detailed report explaining how each of their responses may or may not indicate a good career match.

Through videos, audios, and extensive textual content,

comprehensive career profiles present a detailed, up-to-date picture of actual job responsibilities, career paths, and skills required to be successful. Students are also advised on current compensation levels and associations, directories, books, and other relevant information for finding out more about the marketing career of interest. Career profiles were compiled following extensive interviews with professionals from such prominent firms as AT&T, General Electric, Ogilvy & Mather, J. Walter Thompson, Walt Disney, The Coca-Cola Company, Microsoft, General Mills, Johnson & Johnson, Procter & Gamble, Neiman Marcus, Wal-Mart, Sears, Kmart, Digital Equipment Corporation, and IBM. Content for the program is provided by Eric Sandburg of Career Design Software.

The CD-ROM includes a free copy of the student version of *Career Design*, a landmark career planning software program based on the work of John Crystal, the major contributor to the most widely read career text of all time, *What Color is Your Parachute?* by Richard N. Bolles.

Internet Marketing Connection

Available through The Dryden Press’ Web site, students owning a copy of the *Discovering Your Marketing Career* CD-ROM can download the **Internet Marketing Connection**, an online guide to a wide range of marketing links. This innovative resource is run from the student’s favorite Web browser, enabling the user to read the description of a marketing link and then click on the link to immediately visit that Internet location. Although topics may change according to current availability on Web sites, these are representative of the links:

- ▼ Global marketing
- ▼ Direct marketing
- ▼ Business-to-business marketing
- ▼ Sports marketing
- ▼ Database marketing
- ▼ Marketing issues related to ethics, quality, social responsibility, and cultural diversity
- ▼ Marketing through strategic alliances and co-branding
- ▼ Relationship marketing

Students can also link to Web sites where they can identify marketing job opportunities in the career fields covered in *Discovering Your Marketing Career*. The **Internet Marketing Connection** is updated regularly to ensure links are current. Visit The Dryden Press’ Web site at

<http://www.dryden.com/mktng/careercd/>
for the latest version.

Custom Videos

Integrating your text's new technology emphasis, this exciting, innovative video package adopts a problem-resolution approach to video segments, which are tied directly to chapter concepts and even includes art and graphics from the text. Custom-produced for *Contemporary Marketing*, the videos were created in partnership with successful, well-known companies, giving students a real-world perspective of how firms meet the challenges of the marketplace.

The videos illustrate such themes as quality, customer satisfaction, branch equity, relationship marketing, teamwork, product revitalization, regulation, and ethics. Additionally, segments conclude with career profiles of people featured in the videos. These real-world marketers discuss their career paths, marketing successes, key managerial skills, and the role of marketing, as well as offer personal advice to students. The video career profiles are coordinated with Dryden's *Discovering Your Marketing Career* CD-ROM.

The 21 video segments (each approximately 15 minutes) includes the following:

- Chapter 1:** A Search Engine Named Yahoo! (Yahoo!)
- Chapter 2:** Pursuing a Lofty Goal (Wainwright Industries, Inc.)
- Chapter 3:** Riding on the Information Superhighway (AT&T)
- Chapter 4:** Building a Global Competitive Advantage (Whirlpool Corporation)
- Chapter 5:** Growing Pains (Kropf Fruit Company)
- Chapter 6:** Taking the Path of Customer Focus (Walker Information)
- Chapter 7:** Targeting the Business Traveler (Marriott International)
- Chapter 8:** Beating Baldness (Pharmacia and Upjohn Inc.)
- Chapter 9:** Creating Kitchens to Please Partners (Delfield Corporation)
- Chapter 10:** Launching Tommy: The New American Fragrance (Tommy Hilfiger)
- Chapter 11:** Serving the Needs of Golf Professionals (Slazenger USA)
- Chapter 12:** The Boulevard Cruiser (Cadillac)
- Chapter 13:** Changing to Help Others Change (Andersen Consulting)
- Chapter 14:** Choosing Channels (Next Door Foods)
- Chapter 15:** Renewing Retailing (Kmart)
- Chapter 16:** Leveraging the Links of Logistics (Dow Chemical)
- Chapter 17:** Flying High—From Nearby Skies (Cherry Capital Airport)
- Chapter 18:** Creating Advertising That Charms, Disarms, and Delivers (W.B. Doner Ad Agency)
- Chapter 19:** Selling the Free-Standing Insert (Valassis Communication, Inc.)

- Chapter 20:** Pricing a Lifesaver (Second Chance)
- Chapter 21:** Combating Competition in the Cookie Market (Archway Cookies)

Instructor's Resource Manual

The **Instructor's Resource Manual** includes the following:

- ▼ Suggested class schedules
- ▼ Ideas for more than 100 term paper topics
- ▼ Ideas on how to use the Internet and technology in your class
- ▼ Changes in the new ninth edition of *Contemporary Marketing*^{WIRED}
- ▼ New chapter coverage
- ▼ New features
- ▼ Internet addresses for each chapter
- ▼ Annotated learning goals
- ▼ Key terms
- ▼ Lecture outline
- ▼ Answers to the "Achievement Check Summary" sections
- ▼ Answers to review questions
- ▼ Answers to discussion questions
- ▼ Answers to 'netWork assignments
- ▼ Answers to video case questions (cases to accompany each video are placed at the end of each text chapter)
- ▼ Answers to "Questions for Critical Thinking" box questions
- ▼ Guest speaker suggestions

Test Bank

Available in computerized and printed formats, **Test Bank** offers more than 4,000 questions—the most of any principles text—including application and knowledge-based multiple-choice, true/false, short-answer, and essay questions. Each question is keyed to specific chapter learning objectives and level of difficulty. Students will also be tested on their knowledge of the "Marketing Hall of Fame," "Marketing Hall of Shame," and "Solving an Ethical Controversy" boxed material. This **Test Bank** has also been thoroughly reviewed by 21 professors to ensure an accurate, high-quality product. **Test Bank** authors include Amy Enders, Northampton Community College, William

Rice, California State University—Fresno and Ken Lawrence, New Jersey Institute of Technology.

Computerized Test Bank

Available in IBM-, Windows-, and Macintosh-compatible formats, the computerized version of the printed test bank enables instructors to preview and edit test questions, as well as add their own. The tests and answer keys can also be printed in “scrambled” formats.

RequesTest and Online Testing Service

The Dryden Press makes test planning quicker and easier than ever with this program. Instructors can order test masters by question number and criteria over a toll-free telephone number. Test masters will be mailed or faxed within 48 hours. Dryden can provide instructors with software to install their own online testing program, allowing tests to be administered over network or individual terminals. This program offers instructors greater flexibility and convenience in grading and storing test results.

Study Guide

Designed to enhance student understanding and provide additional practical application of chapter content, this comprehensive learning tool includes chapter outlines, experiential exercises, self-quizzes, cases, short-answer questions, computer and Internet application problems, crossword puzzles, marketing plan exercises, term projects, and solutions to study questions. The **Study Guide** was written by Tom O'Connor, University of New Orleans.

Overhead Transparencies

Full-color **Transparency Acetates** have been created with striking graphic illustrations and advertisements.

The Marketing Game

An innovative new Windows-based computer simulation by Robert Schaffer of California State Polytechnic—Pomona, has been added to the *Contemporary Marketing* package. *The Marketing Game* is a traditional simulation game with some novel twists. The underlying model is based on the digital camera industry and will help students develop their marketing skills within the framework of an evolving product life cycle.

Large classes can play *The Marketing Game* in solitaire mode, with each student competing against computer-generated opponents. This option greatly reduces classroom game management problems and allows instructors to provide their students with a computer simulation experience that they would otherwise be unable to implement. Because of its link to the Internet, there also is an option to allow competitive play between teams of students at different universities.

Other Marketing Simulations

Microsim, a marketing simulation game created by Steven Schnaars of Baruch College, and *Applying Marketing Principles*, written by Professor Robert Schaffer, California State Polytechnic—Pomona, enhance classroom participation and give students hands-on experience applying chapter concepts to real-world marketing issues.

Instructor's Correlation Guide

This ancillary has been developed to assist professors using *Contemporary Marketing 1999* in conjunction with the extensive ancillary package published with *Contemporary Marketing*^{WIRED}. The Instructor's Correlation Guide includes:

- ▼ Changes in the new 1999 edition of *Contemporary Marketing*
- ▼ Answers to the new Yahoo! continuing case questions
- ▼ Answers to the questions for critical thinking for all of the new “Hall of Fame” and “Hall of Shame” boxed items
- ▼ Teaching notes for each of the 21 videos (outlines for each video case, descriptions, case topics, video running times, and more)
- ▼ Errata sheets for the Test Bank and Study Guide, and also page references for all Test Bank and Study Guide questions

The Dryden Press will provide complimentary supplements or supplement packages to those adopters qualified under our adoption policy. Please contact your sales representative to learn how you may qualify. If as an adopter or potential user you receive supplements you do not need, please return them to your sales representative or send them to:

We are especially grateful to Andy Winston—whose contributions to this textbook were invaluable. Special thanks also goes to our research assistants—Jeanne Bartimus, Jamie Campbell, Brandy Irvin, and Kyle King. Their good cheer and perseverance was a constant source of inspiration to the authors.

We would also like to thank our good friends at The Dryden Press. Bill Schoof, our acquisitions editor; Tracy Morse, our development editor; and Lisé Johnson, our market strategist, who were a valued part of this edition. Our sincere thanks goes to each of them.

Other Dryden Press contributors to *Contemporary Marketing 1999* were Kathryn Stewart, our project editor; Bill Brammer, art director; Darryl King, production manager; and Adele Krause, picture and rights editor. Thanks so much for your efforts on our behalf.

Last but not least, we gratefully acknowledge the efforts of Marlene Bellamy, Nancy Moudry and Doris Milligan, for contributing their time and talents to this textbook.

Louis E. Boone
David L. Kurtz

To the Student

Marketing has gone high-tech. And never has there been a more exciting time to study this dynamic field. New technological advances have created an industry of endless opportunities—limited only by a marketer's creativity.

Contemporary Marketing 1999 is wired for these advances, integrating a technology emphasis throughout the text and package. Internet, CD-ROM, multimedia—these are some of the new tools you'll use to learn about traditional and emerging marketing concepts and issues.

For example, *Contemporary Marketing 1999* is closely tied to the Internet, including its own student-friendly site on the World Wide Web. The Internet offers countless exciting opportunities for marketers. With Boone & Kurtz, you'll learn firsthand what an effective marketing tool this—and other high-tech applications—can be, as well as experience the intricacies of effectively navigating the Information Superhighway.

The Internet is literally the application of various marketing principles:

1. The Internet is all about advertising—from advertising goods and services to creating an image through the home page.
2. Many companies gather data over the Net—practical information about competitors, suppliers, and customers. Many companies have questionnaires on the Web for data gathering.
3. Companies can test market new ideas or product enhancements over the Net.
4. Home pages often include e-mail addresses or links, offering another avenue for helpful information.
5. Legal issues are reviewed on the Web. Issues such as product liability or the Communications Decency Act may be investigated. There are also mechanisms for reporting consumer complaints to various agencies.
6. The Web opens the door to international companies or governments. It is especially insightful to investigate legal issues regarding marketing in other countries.
7. Many special interest groups have home pages. Ethical and environmental issues, for example, are frequently reviewed.
8. The Web is an entirely different channel for distribution of goods, services, and information.
9. The nature of selling may change significantly due to consumers having direct access to producers.
10. The Internet may be used for job searches. Many

companies post job openings on their homes pages. There are also several online job search services.

As you can see, the applications are endless. And *Contemporary Marketing 1999* is your direct link to marketing innovation. Visit the Boone & Kurtz *Contemporary Marketing* Web site at

STUDENT GLOSSARY OF HELPFUL INTERNET TERMS

Bookmark. A browser feature that places selected URLs in a file for quick access.

FTP (file transfer protocol). A tool for transferring files between computers on the Internet, often used to transfer large files of statistics, scientific experiments, and full-text articles.

Gopher. A text-based Internet search engine developed by the University of Minnesota that provides subject access to files on the Internet through menus.

Home page. The first hypertext document displayed on a Web server. A home page is often a menu page with information on the developer and links to other sites.

HTML (hypertext markup language). Code in which World Wide Web documents are written and presented.

HTTP (hypertext transfer protocol). The protocol used by the Web to transfer hypertext documents.

Hypertext. Documents that contain links to other documents, allowing the user to jump from one document to another.

URL (uniform resource locator). Web address that gives the exact location of an Internet resource.

Usenet. A group of systems that enable users to discuss specific topics through newsgroups.

World Wide Web (WWW). A hypertext-based system for finding and accessing Internet resources.

HOW TO GET ONLINE

Learning to use the basic tools will make surfing the Net more profitable and enjoyable for you. An Internet home page site, sometimes set up as a menu, is the first page of a site linked to other sites by hypertext, which enables you to jump from place-to-place in a document or in another

related document in a totally different site. Each site has an address, which is referred to as a URL, or uniform resource locator. Using a URL is a fast way to get to a site. Setting a bookmark makes getting to a useful site at a later time even faster. If you do not know a specific URL, you can use any of various search engines such as Yahoo!, Infoseek to conduct a search.

YOUR PERSONAL WORLD WIDE WEB DIRECTORY

Contemporary Marketing 1999 provides students with an in-text World Wide Web directory. Online addresses are included in the textbook for organizations highlighted in extended-text examples, focus boxes, opening vignettes, and photo illustrations. Company Web addresses are also listed alphabetically on the endpapers (inside front and back cover pages) of the text.

For additional resources, you can reach the Boone & Kurtz *Contemporary Marketing*, home page at

<http://www.dryden.com/mktng/boone/>

Because the Internet is a constantly changing network of networks, no subject list is ever complete. Each day, addresses change, new sites are added, and old sites disappear without warning. Following are some addresses for major pages providing links to numerous other sites relating to marketing and business:

SEARCH ENGINES

If you don't know the URL for a site, you can use various search engines to perform a keyword search by developer or subject name. As with everything on the Internet, these search tools change daily and new features are constantly added. The following search engines can help track down online information on a variety of topics:

Search.com (<http://www.search.com/>). This site gives access to more than 300 specialized indexes and search engines.

Metacrawler (<http://www.metacrawler.com/>). This tool submits your query to nine of the top search engines at once.

Altavista (<http://altavista.digital.com/>). This service provides one of the largest search indexes on the Web.

Infoseek Guide (<http://www.infoseek.com/>). This search index includes millions of listings.

Yahoo! (<http://www.yahoo.com/>). This useful search index divides reference sites into logical groups.

Government Data Sources

U.S. Census Bureau (<http://www.census.gov/>). This site provides free access to many census data reports and tables, including international census data from many countries.

U.S. Bureau of Economic Analysis (<http://www.bea.doc.gov/>). This site provides national and regional economic information, including gross domestic product by industry.

U.S. Bureau of Labor Statistics (<http://stats.bls.gov/>). This site gives access to the GLS survey of consumer expenditures, a report on how U.S. consumers spend their money.

Department of Commerce/STAT-USA (<http://www.stat-usa.gov/>). This subscription-based site provides access to hundreds of government-sponsored marketing research studies and other statistical information.

FedWorld (<http://www.fedworld.gov/>). This site provides a central access point for locating government information. If you need data from the government but don't know where to find it, start here.

PRIVATE DATA SOURCES

Knight-Ridder Information (<http://www.dialog.com/>). This extensive database provides access to thousands of marketing research reports, industry and competitor information, and trade publications. Although it proves itself an excellent source for secondary data of all types, a typical search can be expensive. Knowledge index, available on CompuServe, provides access to many of the Dialog databases for an hourly fee.

Lexis-Nexis (<http://www.lexis-nexis.com/>). This is another extensive—and expensive—database of directories, trade publications, and legal information.

HOW TO CITE INTERNET SITES

If you plan to use the information you have pulled from the Internet in a research paper or in homework assignments, you need to know how to cite the information correctly. Although formats are still being developed for the various types of electronic documents, new editions of most of the accepted style manuals have a section on citing electronic resources, including the Internet.

The University of Michigan's Internet Public Library has a list with links to recommended electronic information citation guides at

<http://www.ipl.org/classroom/userdocs/internet/citing.html>

Another useful site

<http://www.uvm.edu/~xli/reference/estyles.html>

offers citation formats based on the forthcoming book by Li & Crane, *Electronic Styles: An Expanded Guide to Citing Information*, according to the American Psychological Association and the Modern Language Association styles.

CD-ROM: *Discovering Your Marketing Career*

This innovative, student-friendly software package helps you learn about and assess your compatibility with marketing careers. This comprehensive, multimedia CD-ROM offers broad guidance and practical advice on everything from selecting a career path to implementing an effective job search strategy. And it's completely integrated with Boone & Kurtz's home page.

After asking you questions regarding specific job activities and such factors as work environment, compensation and career advancement, the program matches your preferences to specific marketing careers. A customized video and detailed report provide insight into your responses and subsequent career match.

Comprehensive career profiles present an up-to-date picture of actual job responsibilities, career paths, and skills required to be successful. Information is also available on current compensation levels and associations, directories, books, and other relevant information for researching the marketing career of interest.

Career profiles were compiled following extensive interviews with professionals from such prominent companies as AT&T, General Electric, Ogilvy & Mather, J. Walter Thompson, Walt Disney, The Coca-Cola Company, Microsoft, General Mills, Johnson & Johnson, Procter & Gamble, Neiman Marcus, Wal-Mart, Sears, Kmart, Digital Equipment Corporation, and IBM.

Also included on the CD-ROM is a free copy of the student version of *Career Design*, a career planning soft-

ware program based on the work of John Crystal, the major contributor to *What Color is Your Parachute?* by Richard N. Bolles.

Internet Marketing Connection

Available through The Dryden Press' Web site, students owning a copy of the CD-ROM can download the **Internet Marketing Connection**, an online guide to a wide range of marketing links. Operated from your favorite Web browser, this innovative tool enables you to read the description of a marketing link and then click on the link to immediately visit that Internet location. Following is just a sampling of topics:

- ▼ Global marketing
- ▼ Direct marketing
- ▼ Business-to-business marketing
- ▼ Sports marketing
- ▼ Database marketing
- ▼ Marketing issues related to ethics, quality, social responsibility, and cultural diversity
- ▼ Marketing through strategic alliances and co-branding
- ▼ Relationship marketing

You can also link to Web sites where you can identify marketing job opportunities in the career fields covered in *Discovering Your Marketing Career*. The **Internet Marketing Connection** is updated regularly to ensure links are current. Visit The Dryden Press' Web site at

<http://www.dryden.com/mktng/careercd>
for the latest version.

About the Authors

Louis E. Boone (Ph.D.) holds the Ernest G. Cleverdon Chair in Business and Management at the University of South Alabama. He formerly chaired the Division of Management and Marketing at the University of Tulsa and has taught marketing in Australia, Greece, and the United Kingdom.

Dr. Boone is a prolific researcher and writer. In addition to authoring numerous marketing and business texts and computer simulation games, he recently published *Quotable Business*, Revised Edition (Random House, 1998). His current research focuses on event and sports marketing. Dr. Boone's research has been published in such journals as the *Journal of Marketing*, *Journal of Business Strategy*, *Journal of Retailing*, *Business Horizons*, *Journal of Business Research*, *Journal of Business of the University of Chicago*, *Journal of Personal Selling & Sales Management*, *Journal of Marketing Education*, *Business*, and *Sport Marketing Quarterly*. He has served as president of the Southwestern Marketing Association and vice president of the Southern Marketing Association.

David L. Kurtz (Ph.D.) is the R.A. and Vivian Young Chair of Business Administration at the University of Arkansas. He was formerly the head of the Department of Marketing and Transportation at Arkansas.

Prior to returning to his graduate alma mater, Dr. Kurtz held the Thomas F. Cleed Chair in Business and Finance at Seattle University. Earlier, he was department head at Eastern Michigan University. Dr. Kurtz has also taught at Davis & Elkins College and Australia's Monash University.

Dr. Kurtz has authored or co-authored 33 books and more than 115 articles, cases, and papers. His work has appeared in such publications as the *Journal of Marketing*, *Journal of Retailing*, *Journal of the Academy of Marketing Science*, *Journal of Business Research*, and numerous other well-known journals.

Dr. Kurtz has been active in many professional organizations, including president of the Western Marketing Educators Association, vice president of the Academy of Marketing Science and the Southwestern Marketing Association. He was named educator of the year by the Western Marketing Educators' Association. He is also the recipient of an honorary doctorate in pedagogy degree from Davis & Elkins College for his contributions to business education.
