PREFACE

This text is designed for students who are pursuing further study in mathematics, as well as for those who are not. For those students who will take additional mathematics, the text will provide the skills, understanding, and insights necessary for success in future courses. For those students who will not pursue further mathematics, the extensive emphasis on applications and modeling will demonstrate the usefulness and applicability of mathematics in the world today. Additionally, the focus on problem solving that is a hallmark of this text provides numerous opportunities for students to reason and think their way through problem situations. Practicing such critical thinking skills will prove of future benefit to all students. I believe that the mathematics presented here is interesting, useful, and worth studying, and to get students to feel this way has been one of my goals in writing this text.

Use of Technology

I place increased emphasis on using graphical, numerical, and analytical points of view in discussions and in solving problems throughout the text. I also provide more opportunity for optional use of the graphing calculator as a tool to help students understand the concepts of algebra, and provide support for algebraic conclusions. While the use of technology is still optional, students who do not use a graphing calculator can still benefit from the technology discussions, as well as from the hundreds of calculator generated graphs that occur in the text. Any graphing utility or computer math package can be used in place of the graphing calculator.

I stress the difference between exact answers and the approximate answers given by a calculator, and discuss the limitations of a calculator graph. I also explain how a calculator drawn graph can assist students to draw or sketch a graph that clearly shows the important features of a function. In the exercises, the graphing calculator is often used as a means of making conjectures about new concepts and relationships. The text instructs students on how to use a graphing calculator, and more importantly, what to use it for and what not to use it for.

Graphing calculator screens generated from a TI-83 graphing calculator are included to give students the idea of things a graphing calculator can do to aid in the learning process. But, because of the rapid changes occurring in technology, and the specific differences among brands of calculators, this text does not give specific instructions on how to use the various other machines available. However, the *Graphing Calculator Manual* that accompanies this text

provides students with keystroke operations for many of the more popular graphing calculators, using specific examples drawn from this text to illustrate the various functions of those calculators.

Content Changes for the Second Edition

The entire first edition was carefully read for clarity of exposition, and rewritten where necessary. The major changes in this edition are as follows.

Chapter P This chapter contains prerequisite material on real numbers, rules of exponents, factoring, and simplifying expressions. Basic linear, quadratic, and absolute value equations and inequalities are covered in Chapter 1. Some sections from both of these chapters may be omitted depending on the preparation level of the students.

Revised Chapter 3 Quadratic type equations, equations with rational exponents or radicals, and more complicated absolute value equations now occur in Section 3.5, following the theory of polynomial equations, Section 3.4. Because some of these equations are polynomial equations, they will be better understood after the theory of polynomial equations has been studied.

New or Enhanced Features

Linking Concepts This **new feature** is located at the end of nearly every exercise set. It is a multi-part exercise or exploration that can be used for individual or group work. The idea of this feature is to use a concept from the current section along with concepts from preceding sections (including preceding chapters), and ask questions that help students see the links among various concepts. Some parts of these questions are open-ended, and require somewhat more thought than standard exercises. Answers to this feature are given only in the Instructor's Solutions Manual.

Applications Hundreds of **new exercises** have been added to the exercise sets, and most of them involve applications of real-world situations and often cite data sources. The emphasis of the new exercises is on understanding concepts and relationships.

Exercise Sets The exercise sets have been examined carefully to ensure that the exercises range from easy to challenging, and are arranged in order of increasing difficulty. Many new exercises require a graphing calculator.

Regression Problems Many **new regression problems** have been included in the text, so that students can start with real data, and use a calculator to obtain mathematical models of real problem situations.

Graphing Calculator Exercises Optional exercises that require a graphing calculator are now located in more natural positions in the exercises rather than at the end of the exercise sets as in the first edition. The exercises are optional and are marked with a graphing calculator icon .

Graphing Calculator Discussions Optional **new graphing calculator discussions** have been integrated into the text, and are set off by graphing calculator icons  so that they can be easily skipped by those not using this technology.

Web Site A **new Web site** has been established—designed to increase student success in the course by offering section-by-section tutorial help, additional group projects, downloadable programs for TI graphing calculators, and author tips. This icon  alerts students at times when this site would be helpful. The site will also be useful to instructors by providing dynamic resources for use in their course.

Continuing Features

Chapter Opener Each chapter begins with a Chapter Opener that discusses a real-world situation in which the mathematics of the chapter is used. Examples and exercises that relate back to the opener are included within the chapter.

Index of Applications The many applications contained within the text are listed in an Index of Applications that appears in the front of the text. The applications are page-referenced, and grouped by subject matter.

For Thought Each exercise set begins with a set of true or false questions that review the basic concepts in that section, help check student understanding before beginning the exercises, and offer opportunities for writing and/or discussion.

Writing/Discussion and Cooperative Learning Exercises These exercises deepen understanding by getting students to express mathematical ideas in writing, or to their classmates during small group or team discussions.

Highlights This end-of-chapter feature presents an overview of each section of the chapter, and is a useful summary of the basic information that students should have mastered in that chapter.

Chapter Review Exercises These exercises are designed to review the chapter without reference to the individual sections, and prepare students for the Chapter Test.

Chapter Test The problems in the Chapter Test are designed to help students measure their readiness for a classroom test. Instructors may also use them as a model for their own end-of-chapter tests.

Tying It All Together This reviews selected concepts from the present and prior chapters, and requires students to integrate multiple concepts and skills.

Acknowledgments

I would like to express my appreciation to the following reviewers whose comments and suggestions were invaluable in preparing this second edition:

Bill Ambrose, *West Texas A&M University*
 Ronald Brent, *University of Massachusetts-Lowell*
 LaJoycea Condry, *Tallahassee Community College*
 William Grimes, *Central Missouri State University*
 Dona Henderson, *University of South Dakota*
 Julia Hicks, *University of Arkansas*
 Dan Hostetler, *University of Cincinnati*
 Heidi Howard, *Florida Community College*
 Ben Neelley, *University of Texas Pan American*
 Desley Plaisance, *Louisiana State University*
 Allan Riveland, *Washburn University of Topeka*
 Erlan Wheeler, *Carthage College*

I would also like to thank the following previous edition reviewers:

Victor A. Belfi	Ricardo Moena
Daphne Bell	Robert E. Moyer
Donald W. Bellairs	E. James Peake
Steven W. Blassberg	James E. Peters II
Robert R. Boltz	Giles Wilson Maloof
Jerry Burkhart	Deborah J. Ritchie
Roger Carlson	Kenneth Seydel
Floyd L. Downs	Gerald M. Smith
Rebecca Gehrke-Griswold	Jan Vandever
Carolyn A. Goldberg	Stewart Venit
Kenneth Grace	Gerry Vidrine
Mickey L. Hoffman	Carol McRaney Walker
Carolyn T. Krause	Christin Walker
Claire Krukenberg	Lyndon C. Weberg
Anita D. Lesmeister	S. K. Wyckoff
Duncan J. Melville	Mary F. Yorke
Gael Mericle	

I also want to thank the many professors and students who have written to me with comments and suggestions. I am always glad to hear from users of my texts. You can write to me at the Department of Mathematics, Southeastern Louisiana University, Hammond, LA 70402, or send electronic mail to mdugopolski@selu.edu.

I also wish to express my thanks to Edgar Reyes, Southeastern Louisiana University, for working all exercises and writing the Solutions Manuals; Henry Smith, Southeastern Louisiana University, for working examples and exercises, and error checking the manuscript; Rebecca Muller, Southeastern Louisiana

University, for writing the Printed Test Bank; Margaret Donlan, University of Delaware, Dale Nauta, Orange Coast College, Patricia Schwarzkopf, University of Delaware, Burnette Thompson, Texas Southern University, and Lori Vrionis for presenting video lectures.

I give special thanks to my editor Bill Poole, project manager Christine O'Brien, and the entire Addison Wesley Longman team for their assistance, encouragement, and direction throughout the project: Barbara Atkinson, Donna Bagdasarian, Brenda Bravener, Karen Guardino, Peggy McMahon, Tricia Mescall, Karen Scott, and Greg Tobin.

I cannot put into words how much I appreciate the love and encouragement of my wife and daughters. Thanks to all.

M. D.
Hammond, Louisiana

SUPPLEMENTS

For the Student

Printed Supplements

● Student's Solutions Manual

ISBN 0-201-38392-6

Edgar Reyes, Southeastern Louisiana University

- Complete solutions to all odd numbered graphical and numerical exercises.
- Ask your bookstore about ordering.

● Graphing Calculator Manual

ISBN 0-201-38397-7

Stuart Moskowitz, Humboldt State University

- Graphing calculator usage instruction.
- Keystroke operations for the following calculator models: TI-82, TI-83, TI-85, TI-86, Casio Color Graphics 9850 Plus, HP38G.
- Worked-out examples taken directly from the text.

Media Supplements

● InterAct Math Tutorial Software

Throughout the text, this icon  indicates when this software would be helpful to students.

Windows ISBN 0-201-38381-0

Macintosh ISBN 0-201-38382-9

InterAct Math Tutorial Software has been developed and designed by professional software engineers working closely with a team of experienced math educators.

InterAct Math Tutorial Software includes exercises that are linked with every objective in the textbook and require the same computational and problem-solving skills as their companion exercises in the text. Each exercise has an example and an interactive guided solution that are designed to involve students in the solution process and to help them identify precisely where they are having trouble. The software recognizes common student errors and provides students with appropriate customized feedback.

With its sophisticated answer recognition capabilities, InterAct Math Tutorial Software recognizes appropriate forms of the same answer for any kind of input. It also tracks student activity and scores for each section, which can then be printed out.

The software is free to qualifying adopters or can be bundled with books for sale to students.

Videotape Series

Throughout the text, this icon  indicates when these videotapes would be helpful to students.

ISBN 0-201-38403-5

- Keyed specifically to text.
- An engaging team of lecturers provide comprehensive coverage of each section and every topic.
- Uses worked-out examples, visual aids, and manipulatives to reinforce concepts.
- Emphasizes the relevance of material to the real world and relates mathematics to students' everyday lives.
- Can be ordered by mathematics instructors or departments.

SUPPLEMENTS

For the Instructor

Printed Supplements

● Instructor's Solutions Manual

ISBN 0-201-38391-8

Edgar Reyes, Southeastern Louisiana University

- Complete solutions to all graphical and numerical exercises.
- Free to instructors with textbook adoption.

● Instructor's Testing Manual

ISBN 0-201-38396-9

Rebecca Muller, Southeastern Louisiana University

- Contains six alternative forms of tests per chapter (two are multiple choice), and answer keys.
- Free to instructors with textbook adoption.

Media Supplements

● TestGen-EQ with QuizMaster-EQ

Windows ISBN 0-201-38379-9

Macintosh ISBN 0-201-38380-2

TestGen-EQ is a computerized test generator with algorithmically defined problems organized specifically for this textbook. Its user-friendly graphical interface enables instructors to select, view, edit, and add test items, then print tests in a variety of fonts and forms. Seven question types are available, and search and sort features let the instructor quickly locate questions and arrange them in a preferred order. A built-in question editor gives the user the power to create graphs, import graphics, insert mathematical symbols and templates, and insert variable numbers or text. An "Export to HTML" feature lets instructors create practice tests that can be posted to a Web site. Tests created with TestGen-EQ can be used with QuizMaster-EQ, which enables students to take exams on a computer network. QuizMaster-EQ automatically grades the exams, stores results on disk, and allows the instructor to view or print a variety of reports for individual

students, classes, or courses. This program is available in Windows and Macintosh formats, and is free to adopters of the text.

 **InterAct Math Plus Software**

InterAct Math Plus combines course management and on-line testing with the features of the basic InterAct Math tutorial software to create an invaluable teaching resource.

Consult your Addison-Wesley representative for details.

INDEX OF APPLICATIONS

Archeology

Age of *Deinonychus*, 406
Ancient Egyptian trick, 15
Carbon 14 dating, 409
Dating a bone, 409
Dating a tree, 409
Dead sea scrolls, 410
Dinosaur speed, 259
Finding the half-life, 409, 416
Leakeys date Zinjanthropus, 400
Old clothes, 409
Radioactive decay, 374

Astronomy

Apogee, perigee, and eccentricity, 573
Comet Hale-Bopp, 571
Hale telescope, 558
Halley's Comet, 572
Hubble telescope, 556
Orbit of Mir, 572
Orbit of the moon, 572
Picturing earth, 572
Visual magnitude of Deneb, 411
Visual magnitude of a star, 411

Biology/Health/Life Sciences

Basic energy requirements, 176
Body-mass index, 26
Bungee jumping, 189
Cafeteria meals, 639
Carbon monoxide poisoning, 352
Cigarette consumption, 14
Contaminated chicken, 337
Dollars per death, 254
Drug testing, 302
Drug therapy, 609, 622
Efficiency for descending flight, 444
Excessive fat, 26
Extended drug therapy, 609
Free fall at Six Flags, 253
Growth rate for bacteria, 312
Having children, 640
Hiking time, 325
Hiking distance, 160

Human memory model, 401
Inspecting restaurants, 629
Learning curve, 416
Logistic growth, 412
Long-range therapy, 622
Male lung cancer death rate, 14
Nursing home care, 600
Nutrition, 498
Nutritional information, 514
Nutritional content, 506
Pediatric tuberculosis, 417
Percentage of body fat, 357
Physical fitness, 357
Poiseuille's Law, 245
Population of foxes, 411
Population of rabbits, 411
Prescribing drugs, 432
Protein and carbohydrates, 432
Rate of flu infection, 288
Recommended daily allowances, 506
Speed of a tortoise, 130
Spreading the flu, 639
Target heart rate, 14, 105

Business

Accounting problems, 446
Across-the-board raise, 220
Area of a lot, 107
Assigning vehicles, 640
Average cost, 129, 277
Balancing the costs, 352
Billboard advertising, 351
Bus routes, 629
Business expansion, 649
Capital cost and operating cost, 352
Capital investment, 453
Carpenters and helpers, 277
Choosing a team, 639
Company cars, 629
Comparing costs, 92
Computer design, 130
Computer passwords, 629
Computer recyclers, 338
Computers and printers, 276

Concert revenue, 189
Concert tickets, 288
Construction penalties, 105
Corporate taxes, 93
Cost accounting, 93
Cost of watermelons, 80
Cost of a car, 105
Costly campaign, 75
Daisies, carnations, and roses, 482
Demand and revenue, 156
Depreciation rate, 40, 245
Disaster relief, 622
Dogs and suds, 526
Doubles and singles, 432
Driving speed, 159
Economic forecast, 337
Economic impact, 400, 622
Economic order quantity, 39
Eggs and magazines, 526
Estimating costs, 14
Filing a tax return, 206
Filing invoices, 75
Free wax, 15
Furniture rental, 432
Gasoline sales, 542
Handling charge for a globe, 259
Hard drive capacity, 411
Harvesting wheat, 107

 Saving for retirement, 275, 622
 Short term loans, 246
 Stock market losses, 431
 Stocks, bonds, and a mutual fund, 445
 Thirty-year bonds, 80
 Value of an annuity, 622

Miscellaneous

Age disclosure, 542
 Arming the villagers, 506
 Assigned reading, 609, 629
 Assigning topics, 640
 Atonement of Hercules, 629
 Batman and Robin, 107
 Bennie's coins, 542
 Bridge hands, 639

Burgers, fries, and cokes, 445
 Charleston earthquake, 129
 Choosing a committee, 662
 Choosing a prize, 629
 Choosing a vacation, 662
 Choosing a name, 629
 Choosing songs, 629
 Clark to the rescue, 629
 Coffee and muffins, 633
 Delicate balance, 472
 Distribution of coins, 445
 Distribution of coin types, 432
 Doubling the bet, 417
 Drawing cards from a deck, 628
 Family tree, 622
 Fantasy Five, 639
 Fire code inspections, 639
 Friends, 546
 Grade on an algebra test, 254
 Graduating seniors, 431
 Granting tenure, 629
 Job candidates, 639
 Lindbergh's air speed over Newfoundland,
 276
 Making a dress, 130
 Marching bands, 640
 Mixed signals, 453
 Modern American trick, 15
 Mount of cans, 609
 Parading in order, 629
 Parking tickets, 640
 Piano tuning, 39
 Playing a lottery, 639
 Poker hands, 628, 639
 Political correctness, 472
 Possible words, 629
 Postal rates, 498
 Prize-winning pigs, 639
 Quality time, 431
 Reading marathon, 600
 Returning exam papers, 639
 Rolling dice, 639
 Rollover time, 400
 Saving the best till last, 639
 Scheduling radio shows, 629
 Scratch and win, 649
 Signal flags, 662
 Sleepless night, 628
 Television schedule, 639
 Tourists and Alaskans, 108
 Tummy masters, 661
 Voyage of the whales, 453
 Westward ho, 454
 Working together, 109, 463

Navigation

Air navigation, 584
 Marine navigation, 584
 Uniform motion, 104

Number

Integers, 108
 Lost numbers, 452
 Misplaced house numbers, 445
 More lost numbers, 452
 Odd integers, 108
 Recording experience, 108
 Square roots, 324
 Two more numbers, 155
 Two numbers, 155

Physics

Air mobile, 452
 Bird mobile, 432
 Fish mobile, 445
 Height of a ball, 129
 Height of a flare, 155
 Load on a spring, 259
 Maximum height of a ball, 288
 Maximum height of a football, 288
 Newton's law of gravity, 260
 Path of a missile, 444
 Thermistor resistance, 412

Probability

Any card, 651
 Checkmate, 651
 Choosing a chairperson, 650
 Colored marbles, 650
 Drive defensively, 650
 Dumping pennies, 652
 Earth-crossing asteroids, 651
 Electing Jones, 651
 Family of five, 651
 Five in five, 651
 Foul play, 650
 Four out of two, 651
 Full house, 662
 Future plans, 662
 Hurricane alley, 650
 Insurance categories, 651
 Jelly beans, 662
 Just guessing, 662
 Killer asteroids, 650
 Large family, 662
 Lineup, 650
 Lucky seven, 651
 Morning line, 651

My three sons, 662
 Numbered marbles, 650
 On target, 650
 Only one winner, 651
 Pick a card, 651
 Pick six, 651
 Public opinion, 651
 Read my lips, 650
 Rolling a pair of dice, 649
 Rolling fours, 650
 Rolling a die, 649
 Rolling a die twice, 649
 Rolling once, 651
 Rolling again, 662
 Rolling dice, 662
 Safe at last, 650
 Selecting students, 651
 Six or four, 651
 Stock market rally, 650
 Sum of six, 662
 Tax time, 650
 Ten or four, 651
 Tossing a coin, 649
 Tossing triplets, 650
 Tossing one coin twice, 649
 Tossing two coins once, 649
 Two out of four, 651
 Weather forecast, 651

Production

Acceptable bearings, 143
 Acceptable targets, 143
 Average cost, 75
 Bird houses and mailboxes, 478
 Break-even analysis, 324
 Cookie time, 542
 Cooling hot steel, 410
 Cost of baking bread, 322
 Demand equation, 128
 Fluctuating costs, 482
 Inventory control, 471
 Manufacturing cost, 376
 Marginal revenue, 190
 Marginal cost, 190, 277
 Pipeline or barge, 482
 Processing oysters, 253
 Production cost, 93

Science

Altitude and pressure, 289
 Altitude of a rocket, 357
 Bouncing ball, 622, 661
 Challenger disaster, 375
 Colombian earthquake of 1906, 400

Comparing exponential and linear growth, 376
 Cooking a roast, 410
 Distance to the sun, 27
 Diversity index, 402
 Doubling the sound level, 411
 Eavesdropping, 558
 Energy from the sun, 27
 First-class diver, 253
 Focus of an elliptical reflector, 571
 Mass of the sun, 27
 Masses of the planets, 255
 Moon talk, 80
 Orbit of the earth, 27
 Parabolic mirror, 584
 Radius of the earth, 27
 Richter scale, 400
 Room temperature, 410
 Searchlight, 590
 Second place, 253
 Speed of light, 27
 Telephoto lens, 584
 Time of death, 410
 Whispering gallery, 588

Sports

Adjusting the saddle, 105
 Angle of completion, 590
 Baseball statistics, 131
 Basketball bucks, 53
 Bicycle gear ratio, 142, 254
 Changing speed of a dragster, 259
 Choosing the right angle, 574
 Diagonal of a football field, 129
 Finding the freeboard, 104
 Fly ball, 80
 Green space, 108
 Harmonic mean, 93
 Hazards of altitude, 131
 Hazards of depth, 188
 Height of a sky diver, 129

Height of a baseball, 155
 High altitude climbers, 156
 High-income bracket, 14
 Hockey money, 53
 Initial velocity of a basketball player, 130
 Injuries in the Boston Marathon, 96, 105
 Laying out a track, 143
 Less powerful boat, 40
 Limiting velocity, 358
 Maximum sail area, 54, 323
 Minimum displacement for a yacht, 324
 Olympic track, 108
 Oxygen uptake, 94
 Planning a race track, 107
 Pole-vault principle, 254
 Position of a football, 375
 Racing speed, 106
 Racing rules, 527
 Ranking soccer teams, 515
 Rowers and speed, 245
 Rowing a boat, 106
 Sail area-displacement ratio, 40
 Selecting the cogs, 142
 Shooting a target, 509
 The 2.4-meter rule, 104
 Throwing a javelin, 450
 Time for a vertical leap, 156
 Time swimming and running, 325
 Track competition, 628
 Velocity for a vertical leap, 155
 Weight distribution, 445
 Width of a football field, 107

Statistics/Demographics

Age groups, 445
 Assigning volunteers, 640
 Average age of vehicles, 445
 Average speed, 75, 106
 Basketball stats, 106
 Black Death, 386

Bringing up your average, 142
 Comparing growth, 190
 Costly healthcare, 188
 Crude exports, 143
 Decline of the family, 375
 Declining defense, 277
 Dining in vs. dining out, 81
 Electronic mail, 629
 Enrollment data, 662
 Final exam score, 142
 Geometric mean, 325
 Growing number of millionaires, 357
 Health care expenditure, 174
 Life expectancy, 431
 Life expectancy in Lyon, 221
 Life expectancy in Paris, 221
 Linear extrapolation, 357
 Linear interpolation, 357
 Medicare and Medicaid, 188
 Motor vehicle ownership, 206
 Multiple-choice test, 629, 661
 Other means, 610
 Phone numbers, 629
 Political party preference, 431
 Population growth, 374
 Possible families, 662
 Poverty level, 410
 Predicting population, 388
 Raising a batting average, 142
 Students, teachers, and pickup trucks, 445
 Taking a test, 629
 Two models, 453
 Variance of the number of smokers, 288
 Violent crime, 290
 Weighted average with fractions, 142
 Weighted average with whole numbers, 142
 What a difference a weight makes, 542
 Women on the board, 175
 Women and marriage, 174
