Eighth International Conference on

POWER ELECTRONICS AND VARIABLE SPEED DRIVES

POWER ELECTRONICS AND VARIABLE SPEED DRIVES

18 - 19 September 2000

Venue

IEE, Savoy Place, London, UK

ORGANISED BY

the Power Division of the Institution of Electrical Engineers

in association with

EUREL

Institute of Electronic & Electrical Engineers (UKRI Section) (IEEE)
Institution of Engineers of Ireland (IEI)
South African Institute of Electrical Engineers (SAIEE)
Verband Deutscher Elektrotechniker (VDE)

ORGANISING COMMITTEE

Dr M Sumner, University of Nottingham

Dr J C Clare, University of Nottingham

Dr R J Bassett, Alstom

Dr M Egan, PEI Technologies

Dr T Green, Imperial College of Science, Technology and Medicine

Chairman

Deputy Chairman

Dr M Johnson, University of Newcastle

Mr S Loddick, Alstom Drives and Controls

Mr D Richards, Alstom Drives and Controls

Author Disclaimer

"While the author and the publisher believe that the information and guidance given in this work are correct, all parties must rely upon their own skill and judgement when making use of it. Neither the author nor the publisher assume any liability to anyone for any loss or damage caused by any error or omission in the work, whether such error or omission is the result of negligence or any other cause. Any and all such liability is disclaimed."

Copyright and Copying

"All Rights Reserved. No part of this publication may be produced, stored in a retrieval system, or transmitted in any form or by any means - electronic, mechanical, photocopying, recording or otherwise - without the prior written permission of the publisher."

Conditions of Acceptance of Advertisements

The Institution reserves the right to refuse to insert any advertisements (even if ordered and paid for) and/or to make alterations necessary to maintain its standards.

It is not guaranteed that any advertisement will be placed in any specified position or on any specified page unless agreement has been entered into and the agreed surcharge paid.

Every effort will be made to avoid errors but no responsibility will be accepted for any mistakes that may arise in the course of publication of any advertisement. These mistakes may include non-insertion, insertions other than those ordered and errors and omissions within the advertisement.

Notice to cancel any advertisement must be received in writing ten days prior to its next scheduled appearance, otherwise a charge will be made.

No responsibility will be accepted for repetitive errors unless the advertiser's correction has been accepted in respect of that error

No responsibility will be accepted for loss or damage alleged to arise from errors within advertisement copy, non-appearance of an advertisement or delay in forwarding box number replies.

Advertisers are required to ensure that the content of advertisements conforms to all legislation currently in force affecting such matters. They shall further indemnify the publisher in respect of any claims, costs and expenses that may arise from anything contained within the advertisement and published on their behalf by the Institution of Electrical Engineers.

The placing of an order or contract for insertion of an advertisement in any newspaper or journal published by the Institution of Electrical Engineers whether in writing or by verbal or telephone instructions will be deemed an acceptance of each and all the above conditions.

Published by the Institution of Electrical Engineers, London.

articles on condition that a full reference to the source is shown.

	Page No.
KEYNOTE ADDRESS	
The Future of Electric Drives: Where are we headed? Professor R D Lorenz University of Wisconsin-Madison, USA	1
CONTROL OF ACTIVE FILTERS	
A survey of active filters and reactive power compensation techniques M El-Habrouk, M K Darwish and P Mehta Brunel University, UK	7
Current control of active power filters assisted by adaptive algorithm S Fukuda and H Kamiya Hokkaido University, Japan	13
Predictive control of active power filters J H Marks and T C Green Imperial College of Science, Technology and Medicine, UK	18
System impedance measurement for use with active filter control B Palethorpe, M Sumner and D W P Thomas University of Nottingham, UK	24
DIRECT AC-AC (MATRIX) CONVERTERS	
The effects of sampling delays and non-ideal filtering on the performance of matrix converter modulation algorithms J C Clare, L Empringham and P W Wheeler University of Nottingham, UK	29
Implementation of a matrix converter using P-channel MOS-controlled thyristors K G Kerris Army Research Laboratory, USA P W Wheeler, J C Clare and L Empringham University of Nottingham, UK	35

Artificial loading of the induction motors using a matrix converter C Klumpner and I Boldea "Politehnica" University of Timisoara, Romania F Blaabjerg Aalborg University, Denmark	40
New application fields of the PWM IGBT AC chopper K Veszprémi and M Hunyár Budapest University of Technology and Economics, Hungary	46
HF CONVERTERS	
Electrical aspects of the "Gasthuisberg" University Hospital relighting project J Van den Keybus, A Woyte and R Belmans Katholieke Universiteit Leuven, Belgium	52
Optimal design of a toroidal transformer fed by non sinusoidal high frequency currents O N Ninet IUT de Bethune, France G Grellet Université Lyon 1, France H M Morel and D L Ligat	57
H M Morel and D L Ligot INSA Cegely, France	
J J Rousseau Université de Saint Etienne, France	
Resonant power supply for discharge lamps M Littlefair Nordson Ltd, UK J Richardson and R T Rakowski Brunel University, UK	63
A simplified Neumann's formula for calculation of inductance of spiral coil H L Chan, K W E Cheng and D Sutanto The Hong Kong Polytechnic University, Hong Kong	69
An extended load range ZCS-ZVS bi-directional phase-shifted DC-DC converter H L Chan, K W E Cheng and D Sutanto The Hong Kong Polytechnic University, Hong Kong	74
Prediction of radiated EMI from high frequency power converters R Thomas, F Li and C Garrett University of Brighton, UK	80

Multifunctional digitally-controlled bidirectional three-phase soft-switching PWM converter H Yamamoto, C Y Inaba, E Hiraki and M Nakaoka Yamaguchi University, Japan	86
Power electronic ballast using resonant switched capacitor techniques K W E Cheng, H Y Wang, D K W Cheng and D Sutanto The Hong Kong Polytechnic University, Hong Kong	91
A novel voltage source PWM DC-DC converter using transformer parasitic inductive components-assisted soft-commutation scheme T Morimoto, K Saito, M Nakamura and M Nakaoka Yamaguchi University, Japan	97
Test and characterisation of modern fast recovery diodes for high speed switching applications M T Rahimo Semelab plc, UK N Y A Shammas	103
Operation of system double fed machine-turbine in power network L Schreier, M Chomát and J Bendl Institute of Electrical Engineering ASCR, Czech Republic	109
RENEWABLE ENERGY	
A fuzzy logic controlled power electronic system for variable speed wind energy conversion systems Z Chen and M McCormick De Montfort University, UK S Arnalte Gómez Universidad Carlos III de Madrid, Spain	114
Design and construction of a modular electronic photo-voltaic simulator S H Lloyd, G A Smith and D G Infield Loughborough University, UK	120
Real-time maximum power point tracking for grid-connected photovoltaic systems L Zhang and Y Bai University of Leeds, UK A Al-Amoudi King Abdulaziz City for Science and Technology (KACST), Saudi Arabia	124

Maximum power point tracking with capacitor identifier for photovoltaic power system N Kasa and T Iida Okayama University of Science, Japan H Iwamoto Mitsubishi Electric Corporation, Japan	130
110W low cost, efficient PV-grid interface for rural electrification M N Mather Eastern Cape Technikon, South Africa M Malengret University of Cape Town, South Africa J C Le Claire L'Université de Nantes, France	136
INDUCTION MOTOR DRIVES	
A method of iron loss and magnetising flux saturation modelling in stationary frame reference of single and two-phase induction machines M Popescu Helsinki University of Technology, Finland V Navrapescu Polytechnics University Bucharest, Romania	140
Improved direct and inverse Gamma models for vector controlled induction machines M Popescu Helsinki University of Technology, Finland	147
PSpice model for asymmetrical two-phase induction motors D Vanata GND Nagares, Spain J Maicas Martí University of Valencia, Spain	154
Application of Rosenbrock algorithm to motor parameters identification using transient stator current measurements M Bounekhla IEU Blida, Algeria M E Zaïm and M Aït-Ahmed GE44-LARGE, France A Rezzoug GREEN-UHP Nancy I, France	158
An adaptive rotor flux observer with time varying gain for direct field oriented induction motor drives A Damiano, G Gatto, I Marongiu and M Scano Università di Cagliari, Italy	163

An observer-based DTC of induction motors driven by 3-level inverter for improving low speed operation K B Lee Korea University, Korea J H Song, I Choy and J Y Choi ISCRC, KIST, Korea	170
Optimum-seeking field weakening control of induction motor drives L Harnefors, K Pietiläinen and L Gertmar Mälardalen University, Sweden	176
Current fed induction machine J F Yhuel, S Siala and J C Le Claire LARGE "GE 44", France	182
Low cost technique for sensorless vector control of induction motors robust in the presence of variations of resistive parameters F Vargas-Merino, J Fernández-Moreno, F M Pérez-Hidalgo and J L Duran-Paz Universidad Málaga, Spain	188
Performance comparison of the controller configurations for the sensorless IM drive using the modified speed adaptive observer F Yusivar, H Haratsu, T Kihara, S Wakao and T Onuki Waseda University, Japan	194
Parameter identification and comparison of an induction motor model T Lehtla, J Joller, M Lehtla and J Laugis Tallinn Technical University, Estonia	201
Sliding mode control of an induction motor F Cupertino, A Lattanzi and L Salvatore Politecnico di Bari, Italy	206
MACHINES	
Enhanced harmonic injection for determination of harmonic loss in induction machines K J Bradley, J C Clare, R Magill, A Ferrah, P Wheeler, P Sewell and W Cao University of Nottingham, UK	212
Analytical calculation of the airgap flux density of PM synchronous motors with buried magnets including axial leakage, tooth and yoke saturations P Thelin and H-P Nee KTH, Royal Institute of Technology, Sweden	218
Asynchronous linear machine as booster for railway vehicles Th Werle and A Binder Darmstadt University of Technology, Germany	224

High phase number induction motor drives for battery applications U C Mupambireyi, N P van der Duijn Schouten, B M Gordon and R A McMahon University of Cambridge, UK	229
POWER SEMICONDUCTOR DEVICES	
Rapid cycle testing of high current IGBT powerswitch modules S Large Ministry of Defence, UK P Walker Ultra Electronics (Power Electronics and Magnetic Systems Ltd), UK	235
1.6kV 4H-SiC Schottky diodes for IGBT applications C M Johnson, N G Wright, A B Horsfall and D J Morrison University of Newcastle, UK M Rahimo and D A Hinchley Semelab, UK A Knights University of Surrey, UK	241
Analysis on switching behaviour of trench and planar IGBTs under soft and hard switching conditions H Iwamoto, A Kawakami, H Kondo and M Tabata Mitsubishi Electric Corporation, Japan N Wheeler Mitsubishi Electric Europe BV, Germany	246
The use of capsule IGBTs in the series connection P R Palmer and H S Rajamani University of Cambridge, UK N Dutton Hill Graham Controls Ltd, UK	250
A new 1700V IGBT module for 690V AC industrial inverter applications H Iwamoto and M Tabata Mitsubishi Electric Corporation, Japan K Mochizuki Fukuryo Semiconductor Engineering Corporation, Japan E Thal and N Wheeler Mitsubishi Electric Europe BV, Germany	256

FIELD ORIENTATION AND SENSORLESS CONTROL

The application of field oriented control to a cascaded doubly-fed induction machine B Hopfensperger Siemens plc, UK	262
D J Atkinson University of Newcastle upon Tyne, UK	
R A Lakin Nada Electronics Ltd, UK	
Use of adaptive notch filtering for accurate speed holding in a sensorless induction motor drive G Turl, M Sumner and G M Asher University of Nottingham, UK	268
An improved sensorless vector controlled induction motor drive employing artificial neural networks for stator resistance estimation J A Campbell, M Sumner and M Curtis University of Nottingham, UK	274
Influence of different inverter control and test pulse generation schemes on sensorless control of AC machines T M Wolbank and B Haidvogl Vienna University of Technology, Austria	280
POWER FACTOR CORRECTION	
A novel single-stage off-line converter with PFC, fast output voltage regulation and reduced switching frequency range D L O'Sullivan, M G Egan and M J Willers PEI Technologies, Ireland	286
AC/DC power factor correction using interleaved boost and Cúk converters A Newton and T C Green Imperial College of Science, Technology and Medicine, UK D Andrew	293
Harland Simon plc, UK	
PWM inverter harmonic correction topologies for three-phase diode rectifiers J Salmon University of Alberta, Canada	299
A resonant current controller for fast AC voltage regulation J C Le Claire, S Siala and R Le Doeuff GE44-LARGE, France J Saillard SEI EP, France	305

BRUSHLESS AND RELUCTANCE MOTOR DRIVES

Power factor and inverter rating - a compromise in doubly fed reluctance machine drives M G Jovanović University of Northumbria at Newcastle, UK	311
Discrete position sensing for linear switched reluctance motor J Corda and B Ouhab University of Leeds, UK	317
Performance prediction and field weakening simulation of a brushless DC motor H Zeroug University of Sciences and Technology H B, Algeria D Holliday, D Grant and N Dahnoun University of Bristol, UK	321
Control of single-phase permanent magnet brushless DC drives for high- speed applications Z Q Zhu, S Bentouati and D Howe University of Sheffield, UK	327
DC/DC CONVERTERS AND CONTROL	
A novel ZVS/ZCS hybrid high-frequency PWM DC-DC converter with low voltage and current stresses S Hamada Sansha Electric Mfg. Co. Ltd, Japan L Gamage, M Abdullah Al, T Morimoto and M Nakaoka Yamaguchi University, Japan	333
Practical design methodology for a new three-phase DC-DC fully resonant converter employing LCC-type tank circuit S Akre, M Egan and M J Willers PEI Technologies, Ireland	340
An isolated low-profile low-power converter S C Tang, S Y R Hui and H Chung City University of Hong Kong, Hong Kong	346
Discrete sliding mode control of a boost converter for output voltage tracking J Matas, L G de Vicuña, O López, M López and M Castilla Universidad Politécnica de Cataluña, Spain	351

ACTIVE FILTERS & POWER QUALITY

Fast response solid-state on load transformers tap-changer J Faiz University of Tehran, Iran H Javidnia University of Tabriz, Iran	355
Dynamic voltage restorer with battery energy storage for voltage dip mitigation C Zhan, M Barnes, V Ramachandaramurthy and N Jenkins UMIST, UK	360
Instantaneous power quality compensation analysis of unbalanced power systems Z Chen De Montfort University, UK	366
Modelling and simulation of a variable speed stand-alone generator system Y Hu, M Cirstea and M McCormick De Montfort University, UK L Haydock Newage International Ltd, UK	372
New unity power factor diode rectifiers using ripple-power re-rectification T Sakkos and V Sarv Tallinn Technical University, Estonia	378
Active filtering and power factor correction using a DSP controlled rectifier bridge T Pagá, G Pesse, J Restrepo and J M Aller Universidad Simón Bolívar, Venezuela	382
A three-phase voltage-type PWM rectifier with the function of an active power filter T Kataoka, Y Fuse, D Nakajima and S Nishikata Tokyo Denki University, Japan	386
A new fuzzy logic strategy for active power filter A Dell'Aquila, G Delvino, M Liserre and P Zanchetta Politecnico di Bari, Italy	392

Possibilities to increase input impedance or power factor of line side	
converters supplied by DC or AC railway network	398
