Preface

Walter Knapp, Chairman of the Fourth International Workshop and Conference on Human Leucocyte Differentiation Antigens

One of the most impressive achievements in the study of regulatory molecules on the surface of human haemopoietic cells has been the discovery, functional characterization, purification, and cloning of a plethora of new leucocyte surface molecules with the help of monoclonal antibodies. Together with the tremendous enlightenment resulting from the success of this research, the vast quantity of data produced has also created considerable confusion. It soon became apparent to everyone in the field that international co-operative efforts were essential to bring order out of this chaos, and to study all antibody-defined structures at the molecular level with all available reagents.

The solution to this problem, the creation of an international Workshop series, pioneered by Laurence Boumsell and Alain Bernard, turned out to be highly successful. In spite of the tremendous workload for every participant, the number of scientists willing to collaborate in this venture has grown continuously. The Fourth International Workshop on Human Leucocyte Differentiation Antigens gathered together 525 laboratories which jointly evaluated and/or submitted 1100 different monoclonal antibodies to human leucocyte surface molecules.

All of the results obtained at this Workshop were presented and analysed at the final conference, held in Vienna on February 21–25, 1989 and are described in this book. As in previous Workshops and conferences, the main aim was to describe and name new leucocyte differentiation antigens, each defined by two or more monoclonal antibodies. Based on the Workshop data, agreement was reached on 35 new CD clusters and subclusters. In addition, seven previously established clusters were redefined. The experimental data forming the basis for these new definitions are contained in this volume. The results of detailed studies on all previously defined antigens are also included. This book describes the state of the art for human leucocyte surface antigens in 1989.

For organizational reasons the classical subdivision of the Workshop conference into T-cell, B-cell, and myeloid cell antigens was maintained and additional sections were added for NK/non-lineage, activation, and platelet antigens. The organization of this volume follows this scheme with divisions into corresponding sections. It should be emphasized, however, that the borders between the various cell types are no longer as firm as they used to be. Scientists, even if interested only in a particular cell type, are therefore advised to watch developments in the analysis of seemingly unrelated cell types.

The appendices to this volume contain a summary report (CD guide) of all CD antigens defined so far, a complete list of all antibodies evaluated in the Fourth Workshop, and a list of author's addresses. Special care has been taken to compile an

antibody index (as complete as possible) which should help the reader to find all experimental results obtained with a given antibody.

I am deeply indebted to the section committees of the Fourth International Workshop and Conference for their enthusiasm and fantastic support in the difficult two years of the Workshop organization. My thanks also go to the staff of the Vienna Medical Academy for Postgraduate Education and to Mrs Veronika Demetler for invaluable help in the organization of this Workshop and Conference.

Without ample financial contributions, this meeting would not have been possible. We are very grateful to: Deutsche Forschungsgemeinschaft, Bonn; Dakopatts a/s, Glostrup; Becton Dickinson Immunocytometry Systems, Mountain View, California; Coulter Immunology, Hialeah; Behringwerke AG, Marburg; and The Third International Workshop and Conference on Human Leucocyte Differentiation Antigens, all of whom made financial contributions to this Workshop.

Last, but not least, my gratitude goes to all contributors and to the publishers of this book. The early publication date was realized only due to the timely submission of our manuscripts and the efficiency of Oxford University Press.

Part 1 B-cell antigens

3 B-cell antigens: Section report

B. DÖRKEN, P. MÖLLER, A. PEZZUTTO, R. SCHWARTZ-ALBIEZ, and G. MOLDENHAUER	15
B1 B-cell antigens: CD10 B. DÖRKEN, P. MÖLLER, A. PEZZUTTO, R. SCHWARTZ- ALBIEZ, and G. MOLDENHAUER	33
B2 B-cell antigens: CD19 B. DÖRKEN, P. MÖLLER, A. PEZZUTTO, R. SCHWARTZ- ALBIEZ, and G. MOLDENHAUER	34
B2.1 Cloning and structure of CD19, a member of the immunoglobulin superfamily. Use of transfected cells to examine the Workshop antibodies THOMAS F. TEDDER, CARY M. ISAACS, and ANN PENTA	36
B2.2 Down-regulation of B-cell activation by CD19 mAb ANTONIO PEZZUTTO, THOMAS B. BARRETT, LARRY ELLINGSWORTH, BERND DÖRKEN, and EDWARD A. CLARK	39
B2.3 Regulation of human B-cell proliferation by the CD19 cell-surface glycoprotein JOHN G. SHIELDS, KEVIN P. RIGLEY, and ROBIN E. CALLARD	40
B2.4 Altered function of the CD19 receptor on human leukaemic B-cell precursors FATIH M. UCKUN and JEFFREY A. LEDBETTER	42
B2.5 Terminal differentiation: effects of CD19 antibodies on Ig-secreting cells BERND DÖRKEN, ANTONIO PEZZUTTO, GERHARD MOLDENHAUER, and FRANK EMMRICH	44
B3 B-cell antigens: CD20 B. DÖRKEN, P. MÖLLER, A. PEZZUTTO, R. SCHWARTZ- ALBIEZ, and G. MOLDENHAUER	46
B3.1 Structure of the CD20 antigen and gene of human and mouse B-cells: use of transfected cell lines to examine the Workshop panel of antibodies THOMAS F. TEDDER and ANN PENTA	48
B3.2 CD20 directly regulates transmembrane ion flux in B-lymphocytes JAMES K. BUBIEN, P. DARWIN BELL,	
RAYMOND A. FRIZZELL, and THOMAS F. TEDDER	51
B3.3 Surface IgM and CD20 receptors utilize distinct signal transduction pathways M. W. WHITE, G. L. SHU, K. E. DRAVES, D. R. MORRIS, and E. A. CLARK	54
B3.4 Protein kinase C can regulate phosphorylation of the B-cell CD20 protein MARY A. VALENTINE, KATHRYN E. MEIER, and EDWARD A. CLARK	56
B4 B-cell antigens: CD21 B. DÖRKEN, P. MÖLLER, A. PEZZUTTO, R. SCHWARTZ- ALBIEZ, and G. MOLDENHAUER	58
B4.1 A soluble form of CD21 antigen in B-cell cultures and human serum N. R. LING, JENNIFER LONG, DEBBIE HARDIE, P. RICHARDSON, and G. JOHNSON	60
B4.2 CD21 (CR2) is frequently expressed on the blasts of childhood T-cell acute lymphoblastic leukaemia (T-ALL) F. G. BEHM, T. J. FITZGERALD, D. F. PATTON, J. P. FULLENWIDER, J. A. ROGERS, G. RIVERA, and R. M. GOOHR	61
B5 B-cell antigens: CD22 B. DÖRKEN, P. MÖLLER, A. PEZZUTTO, R. SCHWARTZ- ALBIEZ, and G. MOLDENHAUER	63
B5.1 CD22 is homologous to myelin- associated glycoprotein IVAN STAMENKOVIĆ and BRIAN SEED	64
B5.2 The carbohydrate moiety of the CD22 antigen can be modulated by inhibitors of the glycosylation pathway REINHARD SCHWARTZ-ALBIEZ, BERND DÖRKEN, and GERHARD MOLDENHAUER	65
B6 B-cell antigens: CD23 B. DÖRKEN, P. MÖLLER, A. PEZZUTTO, R. SCHWARTZ- ALBIEZ, and G. MOLDENHAUER	67
B6.1 Expression, structure, and function of two species of Fcε receptor II (FcεRII/CD23)—FcεRIIa and FcεRIIb

T2.6 Human postnatal CD4 ⁻ , CD8 ⁻ , CD3 ⁻ thymic T-cell precursors differentiate into T-cell receptor δ-bearing cells STEPHEN M. DENNING, JOANNE KURTZBERG, DAVID S. LESLIE, and BARTON F. HAYNES	283
T2.7 Induction of lysis by TcRγδ ⁺ /CD3 ⁺ T-lymphocytes via CD2 requires triggering via the T11 ₁ epitope only S. P. GOEDEGEBUURE, D. M. SEGAL, E. BRAAKMAN, R. J. VREUGDENHIL, B. A. VAN KRIMPEN, R. J. VAN DE GRIEND, and R. L. H. BOLHUIS	286
T2.8 CD44 antibodies augment CD2-mediated peripheral blood T-cell activation STEPHEN M. DENNING, PHONG T. LE, KAY H. SINGER, and BARTON F. HAYNES	287
T3 Cluster report: CD3 ROLAND KURRLE	290
T3.1 Most murine anti human CD3 mAb recognize the human CD3ε subunit CATHERINE TRANSY, PHILIPPE E. MOINGEON, BRUCE MARSHALL, CHRISTOPHER STEBBINS, and ELLIS E. REINHERZ	293
T3.2 The majority of CD3 epitopes are conferred by the epsilon chain A. TUNNACLIFFE, C. OLSSON, A. TRAUNECKER, G. W. KRISSANSEN, K. KARJALAINEN, and A. DE LA HERA	295
T3.3 The expression of antigens detected by CD3 mAb in the cytoplasm of normal and leukaemic immature T-cells DARIO CAMPANA, ELAINE COUSTAN-SMITH, and GEORGE JANOSSY	297
T3.4 Expression and distribution of cytoplasmic CD3 antigen and TcR β-chain with or without expression of surface CD3 TcRα/β or TcRγδ complexes YOSHINOBU MATSUO, TOSHIRO ARIyasu, MICHAEL B. BRENNER, JIRO IMANISHI, MITSUO M. YOKOYAMA, and JUN MINOWADA	299
T3.5 TcRγδ ⁺ /CD3 ⁺ T-cell leukaemia T-ALL cells synthesize both full-length	299

xii Contents

TcR δ and α mRNA	R. I. H. BOLHUIS, K. BEISKE, L. K. KLEPPER, and C. ALFSEN	302	S. KLEIN, LINDA A. TERRY, and NEAL FLOMENBERG	328	
T3.6 Distribution of cells bearing the T-cell receptor gamma/delta in normal and pathological tissues	B. FALINI, L. FLENGHI, M. FAGIOLI, P.-G. PELICCI, S. PILERI, R. PACINI, L. MORETTA, and E. CICCONE	303	T4.7 Synergistic activation of complement by pairs of CD4 mAb	CHRISTIAN REITER, CHRISTINE FEDERLE, and E. PETER RIEBER	329
T3.7 Expression of antigens detected by T-cell receptor mAb on peripheral blood lymphocytes and thymocytes from different individuals	FRANCES M. GOTCH and ANDREW J. MCMICHAEL	305	T5 Cluster report: CD5	CHRISTIAN REITER	331
T3.8 Analysis of CD3 antibody induced cytotoxicity in CD3 $^+$ α/β TcR $^+$ and in CD3 $^+$ γ/δ TcR $^+$ cell lines	R. SCHWINZER and K. WONGEIT	307	T5.1 A comparison of the binding properties and some functional activities of CD5 mAb	H. FIEBIG, I. BEHN, U. HOMMEL, H. KUPPER, and W. EICHLER	332
T3.9 Stimulatory capacity of Workshop T-cell antibodies on T-lymphocyte clones	G. PAWELEC, A. REHBEIN, I. BÁLKO, U. REUSCH, K. SCHAUDT, and H.-J. BÜHRING	310	T5.2 Four epitopes on the CD5 (67 kDa) molecule are defined by the mAb of the Workshop CD5 panel	D. CARRIÈRE, C. FONTAINE, J. M. BENOIT, O. THURNEYSSSEN, and S. CARREL	335
T3.10 Expression of a functional CD3/T-cell receptor complex on leukaemic human T-cell precursors	JEFFREY A. LEDEBTER and FATIH M. UCKUN	312	T5.3 Epitope mapping of the CD5 molecule	LORNA MACKENZIE and PETER M. LYDYARD	336
T4 Cluster report: CD4	ULRICH MOEBIUS	314	T5.4 Lymphocyte activation by CD5 mAb	PETER M. LYDYARD and LORNA MACKENZIE	338
T4.1 Heterogeneity of the progeny of cloned human CD3 $^+$, CD4 $^+$, CD8 $^+$ thymic cells	I. BOUMSELL, H. DASTOT, M. SCHMID, and M. MATHIEU-MAHUL	316	T6 Cluster report: CD6	CHRISTIAN REITER	339
T4.2 Epitope definition of CD4 by primate studies and the anti-ID response to CD4-specific mAb: failure to induce anti-ID specific for HIV	MARGARET JONKER, WIM SLINGERLAND, HENK NIPHUIS, EDWARD S. GOLUB, GEORGE B. THORNTON, LIA SMIT, and JAPP GOUDSMITH	319	T6.1 Functional characterization of a novel B-cell subset defined by the CD6 antigen	N. ENDRES, G. RIETHMÜLLER, and E. P. RIEBER	340
T4.3 Regulation of CD4 $^+$ T-B lymphocyte adhesion through CD4 class II interaction	F. MAZEROLLES, P. F. VAN DE MOORTEL, F. AMBLARD, O. LECOMTE, D. PIATER-TONNEAU, C. AUFFRAY, and A. FISCHER	322	T7 Cluster report: CD7	CHRISTIAN REITER	341
T4.4 Dissociation of CD4 functional epitopes	SYLVAIN FLEURY, DANIEL LAMARRE, and RAFICK P. SEKALY	323	T8 Cluster report: CD8	ULRICH MOEBIUS	342
T4.5 Monoclonal antibodies to the CD4 and CD8 antigens precipitate variable amounts of CD4/CD8-associated p56 ^{lk} activity	CHRISTOPHER E. RUDD, KRISTINE E. BURGESS, ELIZBETH K. BARBER, and STUART F. SCHLOSSMAN	326	T8.1 Molecular requirements for human Lyt-3 heterodimer formation with CD8	JAMES P. DISANTO and NEAL FLOMENBERG	344
T4.6 Phosphorylation and down-regulation of CD4 and CD8 antigens in human T-cell clones and murine transfectants	JAMES P. DISANTO, JOHN		T8.2 Differential expression of the CD8 and Lyt-3 antigens on a subset of human T-cell receptor γ/δ -bearing lymphocytes	LINDA A. TERRY, JAMES P. DISANTO, TRUDY N. SMALL, and NEAL FLOMENBERG	345
			T8.3 Clonal human T-cells expressing a single CD8 polypeptide chain	ULRICH MOEBIUS, FRIEDHELM HERRMANN, THIERRY HERCEND, and STEFAN C. MEUER	347
			T8.4 Synergistic complement-mediated cell lysis using pairs of CD8 antibodies	C. I. BINDON, G. HALE, and H. WALDMANN	349
			T9 Cluster report: CD27	CHRISTIAN REITER	350
			T9.1 Definition of three epitopes of the CD27 molecule (P120 \rightarrow 55) present on activated normal lymphocytes	ROBERT D. BIGLER, TERRY L. DONAT, and CHRISTINE MARSH BOSELLI	351
			T10 Cluster report: CD28	CHRISTIAN REITER	352

T10.1 Functional properties of the human T-cell differentiation antigen CD28 RENÉ VAN LIER, MIRANDA BROUWER, ROLIEN DE JONG, MICHELLE GROOT, ELS DE GROOT, and LUCIEN AARDEN	353
T10.2 Effect of KOLT 2 (CD28) on T-cell proliferation induced by interleukins KEIJI OKUBO, TADASHI KARASHIMA, HIROSHI HACHISUKA, and YOICHIRO SASAI	355
T10.3 Co-operation between mAb T144 (BL6-F4), 15E8 (CD28), and Q6/64 (HLA Class I) in inducing T-lymphocyte proliferation P. CARANDENTE GIARRUSSO, A. LAMBERTI, M. C. TURCO, F. ALFINITO, M. DE FELICE, R. VAN LIER, S. FERRONE, and S. VENUTA	357
T10.4 Lack of accessory molecule CD28 on <i>M. leprae</i>-induced T-cell clones and lines from lepromatous leprosy patients JOHN B. A. G. HAANEN, SHUGUANG LI, WIM C. A. VAN SCHOUTEN, and RENÉ R. P. DE VRIES	358
T11 Cluster report: CD29 CHRISTIAN REITER	360
T12 Cluster report: CDw60 PETER RIEBER	361
T12.1 Antibodies of the T-cell Section recognizing gangliosides B. KNIEP, J. PETER-KATALINIC, P. RIEBER, H. NORTHOFF, and P. F. MÜHLRADT	362
T12.2 Activation of a human T-cell subset through a newly identified surface structure termed UM-4D4 DAVID A. FOX, LI KAN, LAWRENCE S. CHAN, OLE BAADSGAARD, KEVIN COOPER, and KAREN KOZARSKY	364
T12.3 A membrane-protein-associated oligosaccharide defining functional T-cell subsets E. P. RIEBER, B. KNIEP, and G. RANK	366
T13 New T-cell antibodies PETER RIEBER	368
T13.1 Characterization of a murine mAb reactive with a human lymphocyte surface molecule displaying features of a Qa/T1a-like product A. FUNARO, R. BARICORDI, M. ZACCOLO, S. ROGGERO, M. GEUNA, L. PERUZZI, and F. MALAVASI	373
T13.2 Activation and proliferation of human T- and B-lymphocytes through a novel surface structure termed CK226 ALESSANDRO POGGI and MARIA RAFFAELLA	375
T13.3 Characteristics of Ti antibodies T105-T109, lymphocyte-related antibody T26, and T-cell-related antibody T27 CARL HARALD JANSON, MAHMOOD J. TEHRANI, JOHAN GRUNEWALD, HÅKAN MELLSTEDT, and HANS WIGZELL	376
T13.4 Reactivity and functional analysis of unclassified T-cell Workshop antibodies DOROTHY E. LEWIS, SHANTA STANBERRY, MICHAEL MINSHALL, FENG LIU, RICHARD BRYAN, RICHARD W. BAILEY, and ROBERT R. RICH	378
T13.5 Interference of CD4 and new T-cell antibodies with the antigen-induced Ca²⁺ mobilization in T-cells U. PIRRON, T. SCHLUNCK, and E. P. RIEBER	380
T14 Papers on other studies	381
T14.1 Expression and functional role of CD23 on T-cells R. J. ARMITAGE, L. K. GOFF, and P. C. E. BEVERLY	381
T14.2 Modifications of CEM surface phenotype during HIV infection M. BODRUS, M. GILLET, D. SERVAIS, C. EUCHER, G. BURTONBOY, D. LATINNE, A. CORNET, T. GERVAIS, and M. DE BRUYÈRE	382

Part 3 Activation antigens

5 Activation Section report HARALD STEIN, ROLAND SCHWARTING, GERALD NIEDOBITEK, and FRIEDERIKE DALLENBACH	387
A1 Cluster report: CD25 ROLAND SCHWARTING and HARALD STEIN	399
A1.1 Functional and molecular properties of CD25 monoclonal antibodies M. JANSZEN, D. BUCK, and V. C. MAINO	403
A1.2 Screening the activation panel antibodies on COS cells transfected with activation antigen cDNAs DAVID CAMERINI and BRIAN SEED	406
A1.3 Expression of soluble Tac and T18 antigen in aplastic anaemia ARUNA RAGHAVACHAR, HUBERT SCHREZENMEIER, NORBERT FRICKHOEVEN, FRIEDEMANN HERRMANN, and HERMANN HEIMPEL	407
A1.4 CD25 mAb: epitopes recognized, effect on lymphocyte activation, mediation of ADCC A. M. RAVOET, D. LATINNE, B. COUVREUR, A. ZENEBERGH, M. DE BRUYÈRE, J. NINANE, and G. SOKAL	408
A2 Cluster report: CD26 HARALD	

STEIN, ROLAND SCHWARTING, and GERALD NIEDOBITEK	412
A2.1 Anti-DPP-IV and anti-Tal but not IOT 15 should be clustered in CDw26	
T. MATTERN, H.-D. FLAD, A. C. FELLER, E. HEYMANN, and A. J. ULMER	416
A2.2 The monoclonal antibody 134-2C2 recognizes a 120-kDa (CD26) protein and increases the PMA- and rIL-2-induced proliferation of T-lymphocytes M. PLANA, O. VIÑAS, M. ROMERO, R. VILELLA, and J. VIVES	417
A3 Cluster report: CD30 ROLAND SCHWARTING and HARALD STEIN	419
A3.1 Lack of expression of leucocyte common antigen (CD45) in anaplastic large-cell (ALC) lymphomas: diagnostic implications B. FALINI, O. MINELLI, S. PILERI, H. STEIN, G. DELSOL, and G. PALLESEN	423
A3.2 Ki-1 positive large-cell lymphoma: a clinico-pathological study of two cases	
R. INVERNIZZI, M. PAULLI, P. DE FAZIO, R. ROSSO, G. NALLI, M. L. ZAMBELLI, S. KINDL, U. MAGRINI, and E. ASCARI	424
A3.3 Detection of soluble Hodgkin-associated CD30 antigen in the sera of patients with Hodgkin's lymphoma	
C. BERENBECK, J. SCHROEDER, L. DA COSTA, W. JUNG, R. SCHMITS, V. DIEHL, A. GAUSE, and M. PFREUNDSCHUH	425
A3.4 Soluble CD30 antigen in the sera of patients with adult T-cell lymphoma/leukaemia (ATL); a marker for disease activity FRIEDERIKE DALLENBACH, OLIVERA JOSIMOVIC-ALASEVIC, HORST DÜRKOP, ROLAND SCHWARTING, TIBOR DIAMANTSTEIN, MASAO MATSUOKA, KIYOSHI TAKATSUKI, and HARALD STEIN	426
A4 Cluster report: CD69 ROLAND SCHWARTING, GERALD NIEDOBITEK, and HARALD STEIN	428
A4.1 Functional and biochemical characterization of the activation antigen CD69 defined by A10 (MLR3) mAb	
M. E. COSULICH, A. RISSO, M. R. MAZZA, D. SMILOVICH, M. C. CAPRA, A. MASSA, S. COSTANZI, I. BALDISSARRO, W. DROGE, and A. BARGELLESI	432
A4.2 Immunohistological and functional characterization of the mAb A91 (FN 50)-reactive activation antigen (CD69) expressed on subsets of normal and neoplastic lymphoid cells KLAUS BEISKE, DORDI ANNE AAS-ENG, ERLEND B. SMELAND, ANDERS SUNDAU, PER F. MARTON, and STEINAR FUNDERUD	436
A4.3 Characterization of a new activation-dependent antigen (CD69) recognized by the monoclonal antibody A12 (BL-Ac/p26) and equivalent Workshop antibodies (A10, A40, A90, A91) H. FIEBIG, INGRID BEHN, UNDINE HOMMEL, H. KUPPER, and W. EICHLER	439
A4.4 CD69: a gp 33/27 kDa activation inducer molecule (AIM) recognized by a group of mAb of the Workshop activation panel. Induction of T-cell proliferation through the AIM activation antigen	
MARTA CEBRIÀN, PALOMA SÁNCHEZ-MATEOS, JUAN M. REDONDO, ANGELES URSA, MANUEL O. DE LANDÁZURI, and FRANCISCO SÁNCHEZ-MADRID	441
A4.5 Stimulatory effect of A91 (FN 50) mAb on the proliferation of TPA-stimulated but not SPA-stimulated human B-cells	
DRAGAN JOVANOVIĆ, LJILJANA KOJIĆ, and KATARINA ISAKOVIĆ	444
A5 Cluster report: CDw70 HARALD STEIN, ROLAND SCHWARTING, GERALD NIEDOBITEK, and FRIEDERIKE DALLENBACH	446
A5.1 CDw70 mAb A109 (Ki-24): expression by reactive and neoplastic lymphoid cells HARALD STEIN, ALEXANDRA FERSZT, FRIEDERIKE DALLENBACH, DIETER DIENEMANN, OLIVER RENTROP, HANNO HOCK, and TIBOR DIAMANTSTEIN	449
A5.2 Production of two mAb identifying a novel activation antigen (CDw70), using spleen from nude mice bearing HLY-1 cell line A. AI SAATI, C. MAZEROLLES, S. CASPAR, H. HOUNIEU, P. BROUSSET, J. P. MAGAUD, M. THOMSEN, G. PALLESEN, B. GORGUET, S. CHITTAL, and G. DELSOL	452
A6 Cluster report: CD71 ROLAND SCHWARTING and HARALD STEIN	455
A7 Report on single/unclustered and provisionally grouped antibodies	
ROLAND SCHWARTING and HARALD STEIN	
A7.1 ACT35: a new mAb recognizing a 35-kDa antigen with a tissue distribution similar to that of the CD25 molecule (interleukin-2 receptor) ROLAND SCHWARTING and HARALD STEIN	460
A7.2 Two new mAb reactive with determinants shared by lymphoid and epithelial lineages R. J. ARMITAGE, D. KARDAMAKIS, L. K. GOFF, and P. C. L. BEVERLEY	465
A7.3 An mAb A54 (Tü 66) recognizing a novel activation antigen A. ZIEGLER, B. UCHANSKA-ZIEGLER, H. STEIN, and M. HADAM	467
A7.4 Distribution of the cellular myb-	

protein in human and haemopoietic cells as evidenced by mAb H. BADING, J. GERDES, R. SCHWARTING, H. STEIN, and K. MOELLING	468	of peripheral blood lymphocytes (PBL) from patients with primary Sjögren's syndrome (pSS) M. ŽEHER, F. ČYIMESI, P. SURÁNYI, A. SIPOS, and G. SZEGEDI	489
A8 Other studies FRIEDERIKE DALLENBACH, GERALD NIEDOBITEK, ROLAND SCHWARTING and HARALD STEIN		A8.12 Activation antigens on epidermal cell suspensions and cultured keratinocytes A. CERKI, G. TADINI, L. CROSTI, G. CATTORETTI, and E. BERTI	492
A8.1 Activation antigens precipitated by the Fourth Workshop mAb: new and previously defined clusters B. COUVREUR, A. M. RAVOËT, D. LATINNE, M. DE BRUYÈRE, J. NINAËN, and G. SOKAL	470	A8.13 Activation antigens on T- and B-cell activated lymphomas E. BERTI, F. CAPPIO, A. BRUSASCO, G. TADINI, L. FINA, and R. GIANOTTI	494
A8.2 Biochemical analysis of the Workshop antibodies of the Activation Section OLIVER RENTROP, HANNO HOCK, OLIVERA JOSIMOVIC-ALASEVIC, and TIBOR DIAMANTSTEIN	471	A8.14 Sequential appearance of the activation antigens R. VILELLA, J. MILÀ, J. SOLÉ, and J. VIVES	495
A8.3 An immunohistological analysis of the mAb in the activation antigen panel STEPHEN J. HAMILTON-DUTOIT and GORM PALLESEN	473	A8.15 Activation panel antigen expression on PBL activated by PHA or in MLR GREGORIO G. AVERSA and BRUCE M. HALL	498
A8.4 Reactivity of the antibodies of the activation panel with the T-blasts present in dermatopathic lymphadenopathy M. SPERLING, F. DALLENBACH, R. SCHWARTING, G. NIEDOBITEK, and H. STEIN	475	A8.16 In vivo characteristics of expression of activation antigens on peripheral blood mononuclear cells of alloimmunized volunteers in comparison to <i>in vitro</i> restimulation by PPD and tetanus toxoid in the case of sensitized healthy donors E. PÓCZIK, R. MIHALIK, E. GYÓDI, M. KASSAI, K. MAYER, E. PETHÖ, K. PALÓCZI, G. GY. PETRÁNYI, and M. BENCZÚR	502
A8.5 Identification of antibodies in the Workshop activation panel reactive with tumour cells in Hodgkin's disease D. B. JONES, M. CANTARINI, K. HIGGINSON, and D. WRIGHT	477	A8.17 Tonsillar dendritic-cell-induced T-lymphocyte proliferation: analysis of molecular mechanisms using the activation panel of mAb PHILIP D. KING and DAVID R. KATZ	503
A8.6 Activation antigen expression in EBV-negative Burkitt lymphoma (BL), EBV-converted BL (EBV-BL), and lymphoblastoid cell lines (LCL) RAMASAMY SAKTHIVEL, BIRGER CHRISTENSSON, BARBRO EHJLN-HENRIKSSON, and GEORGE KLEIN	478	A8.18 An assessment of protein kinase activity associated with human activation antigens CHRISTOPHER E. RUDD, ANDREANI D. ODYSSEOS, and KRISTINE E. BURGESS	505
A8.7 Activation antigen expression in the human thymus DICK VAN WICHEN, HENK-JAN SCHUURMAN, and ROEI A. DE WEGER	484	A8.19 A new antigen correlated with lymphocyte activation O. PUGLIESE, F. QUINTIERI, A. D'AMBROSIO, A. SIRACUSANO, E. PICCOLELLA, and G. LOMBARD	508
A8.8 Staining of normal or rejected kidney using the activation panel JENNIFER A. WAUGH, G. ALEX BISHOP, GREGORIO G. AVERSA, RICHARD K. SIBLEY, and BRUCE M. HALL	485	A8.20 A rat mAb recognizing a novel 60-kDa molecule induces immunoglobulin secretion P. KOLECKI, H.-D. VOLK, T. HERMANN, and T. DIAMANTSTEIN	509
A8.9 Expression of activation antigens on HTLV-I and HTLV-II cell lines N. E. DUNLIAP, A. K. BERRY, I. GORE, JR., W. D. DECKER, T. L. SNYDER, G. M. SHAW, B. H. HAHN, and A. B. TILDEN	487	A8.21 Identification of a 45–60-kDa human B-cell activation antigen (Ag Iδ4) and its modulation by IL-4 and IL-2 ALAIN VALLÉ, PIERRE GARRONE, JEAN-PIERRE AUBRY, and JACQUES BANCHEREAU	510
A8.10 Constitutive expression of activation-related antigens on the surface membrane of human basophils P. VALENT, J. BESEMER, H. STOCKINGER, CH. STAIN, and P. BETTELHEIM	488	A8.22 LA45, an activation-induced human lymphocyte antigen with strong homology to MHC Class I molecules O. MAJDIC, E. SCHNABL, H. STOCKINGER, S. GADD, D. MAURER, T. RADASZKIEWICS, H. GAUGITSCH, I. LINDLEY, E. HOFER, and W. KNAPP	511
A8.11 Activation antigens on the surface			

Part 4 NK- and Non-lineage antigens

6 Non-lineage/natural killer Section report: new and previously defined clusters REINHOLD E. SCHMIDT

<p>N1 Cluster report: CD11 PETER</p> <p>UCIECHOWSKI and REINHOLD E. SCHMIDT 543</p> <p>N1.1 Analysis of mAb to the CD11a/CD18 (LFA-1) complex (N201–N232) using human–mouse hybrid cells G. M. TAYLOR, A. RÖBSON, and S. W. D'SOUZA 551</p> <p>N1.2 LFA-1 in lymphomas: absence in hairy-cell leukaemia. An analysis of the Workshop panel of CD11a/CD18 clustered antibodies G. PALLESEN, S. HAMILTON-DUTOIT, and T. PLESNER 553</p> <p>N1.3 The role of CD11/CD18 integrin molecules in neutrophil and monocyte homotypic adhesion BETTY J. LOCEY, CLARE M. ROGERS, and ROBERT F. TODD, III 555</p> <p>N1.4 Epitope mapping of rat CD11a/CD18 antibodies and comparison with Third and Fourth Workshop panels IAN POPE, GEOFF HALE, and HERMAN WALDMANN 559</p> <p>N1.5 CD11b/CD18-dependent homotypic neutrophil aggregation: evidence for discrete adhesiotopes and activation of the molecule J. P. BUYON, S. G. SLADE, R. A. PERDUE, and R. J. WINCHESTER 560</p> <p>N1.6 Human complement fragment C5a increases the expression of CD11b, CD11c, CD16, CD18, CD45, and other non-lineage antigens on myeloid cells THOMAS WERFEL, GABRIELE KOCH, and OTTO GÖTZE 563</p> <p>N1.7 The P150/95 (CD11c) complex is expressed on activated T-lymphocytes and rare T-cell malignancies ROLAND SCHWARTING, ULRICH MOEBIUS, STEFAN MEUER, and HARALD STEIN 564</p> <p>N1.8 The subunit specificity of the CD11a/CD18, CD11b, and CD11c panels of antibodies RICHARD S. LARSON, MARGARET L. HIBBS, ANGEL L. CORBI, EDWARD LÜTHER, JULIO GARCIA-AGUILAR, and TIMOTHY A. SPRINGER 566</p> <p>N1.9 Differential effects on leucocyte functions of CD11a, CD11b, and CD18 mAb MICHAEL S. DIAMOND, S. CLAIBORNE JOHNSTON, MICHAEL L. DUSTIN, PETER MCCAFFERY, and TIMOTHY A. SPRINGER 570</p> <p>N2 Cluster report: CD16 REINHOLD E. SCHMIDT and BÍČE PERUŠIÁ 574</p> <p>N2.1 Heterogeneity of CD16 mAb H. FIEBIG, F. BEHN, U. HOMMEL, H. KUPPER, W. EUCHLER, and M. LADUŠCH 578</p>	<p>N2.2 Monoclonal antibodies to CD16 detect antigenic differences in Fc_γRIII on neutrophils and natural killer cells HOWARD B. FLEIT, MARYANNA KUHNLE, and CATHERINE D. KOBASUIK 579</p> <p>N2.3 Differences between Fc_γRIII of human neutrophils and human K/NK lymphocytes in relation to the NA antigen system TOM W. J. HUIZINGA, MARION KLEIJER, DIRK ROOS, and ALBERT VON DEM BORNE 582</p> <p>N2.4 Phenotypic and functional studies using CD16 antibodies on human NK-clones P. UCIECHOWSKI, J. SCHUBERT, K. WORDELMANN, and R. E. SCHMIDT 586</p> <p>N2.5 Human NK-cells use a CD16 molecule distinct from the structure of neutrophils JÖRG SCHUBERT, WALDEMAR KOLANUS, PETER UCIECHOWSKI, ROLAND KURRLE, and REINHOLD E. SCHMIDT 587</p> <p>N2.6 Antigenic and functional properties of two low-affinity Fc_γR types: Fc_γRIII (CD16) on natural killer cells and polymorphonuclear neutrophils and Fc_γRII (CDw32) on neutrophils and B-cells B. PERUŠIÁ, M. A. CASSATELLA, I. ANEGÓN, and G. TRINCHIERI 590</p> <p>N2.7 Reactivity of Workshop CD16 mAb with distinct membrane-anchored forms of CD16 PERIASAMY SELVARAJ, MARGARET L. HIBBS, OLLI CARPÉN, and TIMOTHY A. SPRINGER 595</p> <p>N3 Cluster report: CD18 PETER UCIECHOWSKI and R. E. SCHMIDT 597</p> <p>N4 Cluster report: CDw32 REINHOLD E. SCHMIDT 599</p> <p>N4.1 gp39: The past 5 years' experience THEODORE F. ZIPF, GAMIL R. ANTOUN, GILLES J. LAUZON, B. M. LONGENECKER, and JOSEPH MIRRO, JR 602</p> <p>N5 Cluster report: CD43 MATTHIAS STOHL, ROSEMARIE DALCHAU, and REINHOLD E. SCHMIDT 604</p> <p>N5.1 Studies on the CD43 panel antibodies IRENA ŠTEFANOVÁ, IVAN HILGERT, and VÁCLAV HOŘEJŠÍ 608</p> <p>N5.2 Heterologous expression and molecular cloning of the CD43 antigen ANDREAS KUHRÖBER, EDDIE PIOTRKOWSKI, HANSJÖRG HAUSER, and WERNER LINDENMAIER 610</p>
