

*Covers All
Versions of
MS-DOS &
PC-DOS*

Jamsa's 1001 **DOS & PC** *Tips*

*A computer user's
best friend*

Kris Jamsa

*Best-Selling
Author*

Featuring:

- Time-Saving Batch Files
- Powerful DEBUG Script Files
- File Utilities That DOS Forgot
- Utility Commands to Control Your Environment
- Programs to Boost Your Hardware Capabilities

System

Tip

Keeping Other Users From Booting Your Hard Disk.	1	Changing the Number of Lines Your Screen Displays.	17
An Automatic Restart Command.	2	Improving Performance by Turning Disk Verification Off.	18
Installing Form-Feed Support for Print Screen Operations	3	Turn Off Disk Verification and Extended CTRL-BREAK Checking in One Step.	19
Preventing a Reboot Operation	4	Disabling AUTOEXEC.BAT.	20
Controlling the Cursor's Appearance	5	Recording the Date and Time the System Was Last Booted	21
ANSI.SYS Slows I/O Operations	6	Determining the Correct Number of Disk Buffers	22
On-line Help for DOS Commands	7	A More Flexible TYPE Command.	23
A Faster COMMAND.COM Reload.	8	Sometimes Order Is Important	24
Improving Performance by Turning Off Extended CTRL-BREAK Checking.	9	Turn Off Your System Only from the DOS Prompt	25
Which Executes First: BAT, EXE, or COM files?	10	When You Need an FCBS CONFIG.SYS Entry.	26
Documenting Your CONFIG.SYS File	11	When You Need to Use the LASTDRIVE	27
Using the TEMP Environment Entry.	12	Redefining DOS 5 Internal Commands	28
Increasing Your Environment Size	13	Generating an Escape Character	29
Don't Call Technical Support Without Them!	14	Automatic Fail on Critical Errors.	30
MORE15: A Timed MORE Command.	15	Understanding the PC's Interrupt Vectors	31
ASCII and Extended ASCII Characters	16	The Secret to Printing Your Screen Contents.	32
		Selecting a Screen Background Color with ANSI.SYS	33
		Creating an Escape Sequence with EDLIN.	34

What Device Drivers Are Installed?	35	When to Use the CONFIG.SYS	
A Quick Way to Perform		INSTALL Entry	64
Hexadecimal Addition and		Understanding Your Environment	
Subtraction	36	Use	65
Using the FOR Command from the		Testing for a Math Coprocessor	66
DOS Prompt.	37	Understanding Exit Status Values.	67
Is DOS in RAM or ROM?	38	Entering an Escape Character in	
Determining Whether SHARE Is		WordPerfect	68
Installed.	39	Are Your Interrupt Vector's Valid?	69
Clearing the Screen with ANSI.SYS.	40	Changing the Environment's Size.	70
Is ANSI.SYS Installed?	41	I/O Redirection and DOSKEY	
Creating an Escape Sequence with		Macros	71
EDIT	42	Be Aware of EMM386.EXE When	
Upgrading to DOS 5	43	Using Windows 3.0.	72
Selecting a Screen Foreground		Push In the Turbo Switch.	73
Color with ANSI.SYS	44	Generating a PC Siren	74
Generating an Escape Sequence		Selecting a Video Mode with	
with the PROMPT Command	45	ANSI.SYS	75
Using ANSI.SYS Text Attributes	46	Keeping Track of Your CMOS	
Creating a Custom Prompt	47	System Configuration	76
System Startup Troubleshooting.	48	Saving Your Setup Information to	
Understanding DEBUG Script Files	49	Disk	77
Using the Extended ASCII Box		Converting Hexadecimal and	
Characters	50	Decimal Numbers.	78
Taking a Critical Look at Your		Making Sure DOSKEY Is Correctly	
Command Path.	51	Installed.	79
Preventing Screen Burn-in	52	Traveling with or Mailing Floppy	
Understanding Megahertz	53	Disks.	80
Low-Tech Adding Machine	54	Using the BIOS to Select the Video	
Using the SETVER Device Driver.	55	Mode.	81
Making Room for New SETVER		Accessing the Command Line from	
Entries.	56	Your DEBUG Script Files	82
Catch That Bus!	57	Is the Mouse Driver Installed?	83
Placing the Cursor at a Specific Row		Selecting Your Screen's Text Mode	
and Column	58	Border Color.	84
Moving the Cursor Up, Down, Left,		Dumping Your BIOS Chip Date	
or Right.	59	with DEBUG	85
SX or DX: What's the Difference?	60	What Is Baud, Anyway?	86
Displaying File or Command		How Many Serial Ports Do I Have?	87
Output in Lowercase Letters	61	Using the BIOS to Determine the	
Installing a Larger DOSKEY Buffer	62	Current Video Mode.	88
DOS 5 Upgrade Users Beware	63	Using Machine Code to Create	
		Command Files.	89

Using Parameters in Your DOSKEY		Using the DOS 5 Upgrade to Build	
Macros	90	a Bootable System	117
Managing Your DOSKEY Macros	91	Restoring 25-Line Display Mode	
Using DOSKEY to Execute		Without ANSI.SYS	118
Multiple Commands on the		Selecting 50-Line Display Mode	
Same Line	92	Without ANSI.SYS	119
Is This a VGA?	93	Understanding MIPs, FLOPs, and	
Temporarily Increasing the		MFLOPs	120
Environment Size	94	What Are Multisynch Monitors?	121
Saving Your Macros to a Batch File	95	Understanding Video Coprocessors	122
Is This an EGA?	96	Understanding the PC's Modes of	
When You Need EGA.SYS	97	Operation	123
Print Screen Operations Whose		Understanding CRC	124
Colors Match the Screen	98	A Quick Lookup Table for the 8088	
Why Are Command Lines		Instruction Set	125
Restricted to 126 Characters?	99	Stepping Through a Command	
Understanding the Program		File's Execution with DEBUG	126
Segment Prefix	100	Monitoring the Flags Register While	
Using DEBUG to Display the		Debugging Your Script Files	127
Program Segment Prefix	101	Identifying the Correct Branch	
Make Sure You Install the Latest		Instruction	128
Drivers	102	Assigning Values to Memory	
An Automatic Enter	103	Locations with DEBUG	129
Using Each Line of a File with a		Discarding stderr's Output	130
Specific Command	104	What Is a File Handle, Anyway?	131
Trying to Save and Restore		Redirecting stderr's Output to the	
Environment Entries	105	Printer	132
Warm and Cold Boot Operations	106	Flushing Your DOSKEY Command	
Understanding ASCII	107	Buffer	133
Erasing an ECHO OFF Message	108	Vector Versus Raster Graphics	134
Turning the VGA Display On and		What Is Binary Coded Decimal?	135
Off	109	Changing the DOS Switch	
Correcting Misalignment in CGA		Character	136
Monitors	110	Converting Environment Entries to	
Using Your Modem as an		Uppercase Format	137
Auto-Dialer	111	What's an MPC?	138
An Auto-Dialer Rolodex	112	A Fast ANSI.SYS Screen Blanker	139
Using ANSI.SYS Text Highlighting		Executing Multiple Commands in	
Attributes	113	One Step	140
Performing Hexadecimal		Use LOADHIGH with	
Multiplication and Division	114	Environment Setting Commands	141
Toggling the Processor's Speed	115	What Are Fractals?	142
How Many Video Lines Are Active?	116	Understanding WAV Files	143

Understanding the Video Overscan Region.....	144	Flushing the Environment.....	170
Creating ASCII Files with WordPerfect	145	Why You Can't Boot from Drive B	171
What Are Video Display Pages?	146	Bypassing the Keyboard Lock.....	172
What Is Gray Scaling?	147	Delaying Your Modem Dial	173
Understanding the PC's Register Set	148	What Is NTSC?	174
Understanding the PC's Segment Registers	149	Loading Programs High in Conventional Memory	175
Understanding the PC's Offset Registers	150	Keeping Track of Boot Operations.....	176
Understanding the PC's General-Purpose Registers.....	151	Resetting the Boot Counter	177
What Is a PC Memory Model?	152	Correcting Video Misalignment from within AUTOEXEC.BAT	178
Do You Really Need the Mouse Driver?	153	Displaying Only Filenames in the DOS Shell.....	179
If Think You Have a Virus, Don't Panic	154	Controlling Your Modem Speaker	180
Disabling Your Phone's Call-Waiting Feature During Modem Operations.....	155	Viewing All Available DOS Version Number Information	181
Return to Traveler	156	What TSR's Are Loaded?	182
Assigning a Key's Scancode to the Environment	157	Displaying Information with MSD.EXE.....	183
Selecting 43-Line Display Mode Without ANSI.SYS.....	158	What Is Your UART Type?	184
Which Logical Floppy?	159	Displaying Your System's IRQ Use.....	185
Clearing the Screen in 43- or 50-Line Mode	160	Displaying Processor, Bus, and DMA Information	186
A Redirection Option for On-the-Fly File Creation.....	161	What Is APM?	187
Displaying Device Driver Information.....	162	Displaying Your COM Port Status.....	188
Repeating a Command a Specific Number of Times	163	Help for DEBUG Commands.....	189
Disabling the PC Speaker.....	164	Understanding DEBUG Command Fields.....	190
Executing a Command a Specific Number of Times	165	Generating Sounds with the PC Speaker	191
AT&T, MCI, Sprint? You Decide.....	166	Generating Music.....	192
Assigning a Specific Line of a File to an Environment Entry	167	Understanding MODE's Retry Option	193
Quieting Your Modem.....	168	Viewing Device Status Values.....	194
When to Patch COMMAND.COM.....	169	Understanding Fail on Int 24	195
		Zero-Filling Memory	196
		How DOSKEY Determines Macro Parameters.....	197
		Using CTRL Characters in Your DOSKEY Macro Names.....	198
		How Much DOSKEY Buffer Space Is in Use?	199

How Much Environment Space Is in Use?.....	200
Specifying Comment Lines in CONFIG.SYS.....	201
How to Find Undocumented Commands and Switches	202
DOSKEY Supports Virtually Any Macro Name	203
Traveling Faster Through Text in EDIT	204
Changing the Prompt for Programs that Let You Shell to DOS	205
Controlling Which Command DOS Executes.....	206
Support for Hercules Graphics Cards.....	207
Is a CD-ROM Driver Installed?.....	208
On a Network, Ask Before Changing LASTDRIVE	209
Be Aware of DOSKEY /REINSTALL	210
Understanding OCR	211
Swapping Mouse Buttons.....	212
Using the Mouse with EDIT	213
Keeping Track of Your Current Position Within EDIT	214
Freeing Conventional Memory by Using the High-Memory Area.....	222
Understanding Upper-Memory Blocks	223
Freeing Conventional Memory by Moving Device Drivers	224
Increasing Available Conventional Memory by Moving Memory-Resident Commands	225
Pretending You Have Expanded Memory Available.....	226
Using Shadow RAM	227
Understanding Cache Memory	228
Understanding Zero Wait State Memory	229
Understanding Memory Types.....	230
Verifying the Amount of Conventional Memory Installed.....	231
Determining Which Programs Are Consuming Your Conventional Memory	232
When You Need to Use STACKS	233
Avoiding Memory Conflicts.....	234
Is Expanded Memory Available?	235
Understanding the Memory Allocation Strategy	236
Selecting a Memory Allocation Strategy.....	237
Determining the Current Memory Allocation Strategy	238
Controlling Who Gets the High-Memory Area.....	239
Is the High-Memory Area Available?	240
Understanding MEM /DEBUG	241
Avoiding Conflicts in the Upper-Memory Area.....	242
Loading Drivers into Upper-Memory that Allocate Additional Memory	243
If Possible, Place SMARTDRV.SYS in Extended Memory	244
Viewing Your Expanded Memory Use	245

Memory

Tip

Understanding Conventional Memory	215
What Kinds of Memory Do I Have?	216
Freeing Conventional Memory by Moving FASTOPEN's Buffers.....	217
The Purpose of the DOS 5 LOADFIX Command.....	218
Understanding Expanded Memory	219
Understanding Extended Memory.....	220
Accessing Extended Memory with HIMEM.SYS	221

Controlling Expanded Memory Use with EMM386	246	What Is Address Line A20?	270
If You Don't Have Extended Memory, Don't Install HIMEM.SYS	247	Why DRAM Chips Store More Bits than SRAM Chips.	271
Using Memory Efficiently When You Install a RAM Drive.	248	Understanding Why DRAM Chips Are Slower than SRAM Chips.	272
Bypassing the Power-On Self-Test Memory Count.	249	Why DRAM Chips Need Refreshing.	273
Is DOS in High or Conventional Memory?	250	Decoding Memory Chips	274
Be Aware of the Weitek Coprocessor Memory Requirements	251	Should You Purchase a Third-Party Memory Manager?	275
Handling DMA Conflicts with EMM386.EXE	252	Using Expanded Memory with DOS 4	276
Avoiding Machine Conflicts with Address Line 20.	253	DOS 4 Expanded Memory on a 386.	277
Understanding the DOS 4 Install Entry.	254	Are You Using SETVER?	278
What Upper-Memory Blocks Are Available?	255	Minimizing FCBS Support	279
What Does DOS=HIGH Really Do?	256	DOS Always Rounds the Environment Size Up	280
Understanding Addressing Capabilities	257	Understanding the HIMEM.SYS /INT15 Switch	281
Understanding Flash Memory	258	A Pictorial View of Your System's Memory Use	282
Viewing SMARTDRV's Status.	259	Viewing Memory Blocks with MSD.EXE.	283
Flushing SMARTDRV's Write-Behind Buffer	260	Browsing Through Memory with MSD.EXE.	284
Understanding Cache Hits and Misses	261	Displaying and Controlling Expanded Memory from Within DEBUG	285
Understanding Memory Interleaving.	262	Is Your AMI BIOS Consuming RAM?	286
What Is Dual-Ported Video Memory?	263	Zero-Filling Extended Memory	287
Understanding Memory Speeds	264	Displaying Information About Expanded Memory	288
Buying Memory Chips.	265	Listing Your Expanded Memory Physical Page Addresses.	289
Understanding Memory Banks.	266	Displaying Information About Your Expanded Memory Board	290
Install System Board Memory First	267	Configuring SHARE	291
Installing SIMMs.	268	Loading DOS into High Memory Moves Disk Buffers Too	292
Understanding DOS 20-Bit Addressing.	269	Invoking MODE with LOADHIGH	293

Keyboard

Tip

Improving Your Keyboard's Response Rate	294
A Faster Keyboard in One Command	295
Creating a Larger Keyboard Buffer	296
Quickly Repeating Your Last Command	297
Canceling the Current Command	298
Making an Enhanced Keyboard Behave like a Conventional Keyboard	299
Temporarily Suspending a Program's Output	300
Using Part of the Previous Command Line by Pressing F2	301
Locking the Keyboard	302
Stuffing the Keyboard Buffer	303
Previous Command Editing with F4	304
Command-Line Editing with DOSKEY	305
Flushing the Keyboard Buffer	306
Turning Off NumLock	307
Toggling the Caps Lock Key	308
Toggling the SCROLL LOCK Key	309
Editing the Current Command with F5	310
Redefining Keys with ANSI.SYS	311
Entering a Carriage-Return with EDLIN	312
Defining Function Keys with the PROMPT Command	313
Allowing Batch Files to Respond to the Keyboard State	314
Appending Text from the Keyboard to an ASCII File	315
Understanding Keyboard Scancodes	316
Processing Keyboard Scancodes	317
Checking for a Keystroke	318
Command Editing with DOSKEY	319

Directing ANSI.SYS to Treat Enhanced Keys as Distinct	320
Simulating an Active Shift Key	321
Assign a Printer Form-Feed Operation to ALT-P	322
Obtaining a Key's Scancode	323
Understanding Your Keyboard Cable	324
Understanding the Keyboard Buffer	325
Better Understanding the Keyboard Buffer	326
Is This an Enhanced or Standard Keyboard?	327
Controlling DOSKEY's Insert and Overstrike Modes	328
Understanding the Keyboard Controller	329
Temporarily Shifting the Numeric Keypad Keys	330
Automating Keyboard Definitions	331
Getting Around a Stuck or Broken Key	332
Using the HOME and UP ARROW Keys to Change Directories	333
Turning the ENTER Key On and Off	334
Keyboard Swapping	335
Making Room for Your Keyboard	336
Sore Wrists? Check Your Keyboard Height	337
Keyboard Pads Reduce Wrist Strain	338
Understanding How Dust, Spills, and Smoke Can Effect the Keyboard	339

Disk

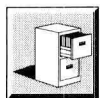

Tip

Finding a Misplaced File	340
Faster Disk Formats	341

Saving the Partition Table with MIRROR	342	Displaying the Contents of Your Disk's Boot Record	366
Saving Disk Space with DOSKEY Macros	343	Dumping the Boot Record in DEBUG	367
Creating an Emergency Floppy	344	How Many Floppy Disks Are Present?	368
Parking Your Hard Disk While It Is Not In Use	345	Understanding Disk Partitions.....	369
Why DOS 4.0 Requires SHARE for Disks Larger than 32Mb	346	Displaying the Master Boot Record's Contents	370
Correcting Fragmented Files with DOS	347	Saving Partition Information	371
Recovering Lost Files and Pieces of Files	348	Creating a Secondary, or Read-Ahead, Cache.....	372
A Disk's Data Storage Capacity Is Less than the Disk's Size	349	Installing DOS Error Messages on Floppy-Disk-Based Systems.....	373
Keep UNFORMAT and UNDELETE in Mind When You Share Disks.....	350	Reducing Disk I/O Operations Using SMARTDRV.SYS.....	374
Understanding the Master Boot Record.....	351	Used Correctly, RAM Drives Are Wonderful.....	375
Removing Semi-Dangerous Commands from a New User's Disk.....	352	Restoring an Entire Disk	376
Tricking Software into Using Your Hard Disk	353	If Disk Space Is Tight, Disable MIRROR's File Delete Tracking and Delete MIRROR's Disk Image Files	377
Backing Up Your Entire Disk.....	354	Understanding Logical Drive Names	378
Testing Whether a Drive Is Ready	355	Creating a Customized Logical Disk Drive.....	379
Flushing the Disk Buffers.....	356	How Much Disk Space Do Specific Files Consume?	380
Restart Your System After Correcting Fragmentation.....	357	Changing a Floppy Disk's Characteristics with DRIVPARM.....	381
Performing a Safe Format Operation	358	Does This Partition Exceed 32Mb?	382
Replacing FORMAT's /4 Switch with /F	359	Is This Drive Local or Remote?	383
Verifying the Contents of Mirror's Disk File	360	From Which Disk Did DOS Start?	384
Understanding Sector Interleaving.....	361	Is the Current Media Fixed or Removable?	385
How Many Disks Will an Incremental Backup Operation Require?	362	Understanding Write Precompensation.....	386
What's In a Disk Controller Name?	363	Understanding Low-Level Disk Format Operations	387
Increasing the Storage Capacity of Your 3 1/2-Inch Disk	364	Performing a Low-Level Format Operation	388
Understanding the Boot Record.....	365	What Is the Disk Landing Zone?	389
		What's My Number?	390

Reducing the Amount of Disk Space	
MIRROR Consumes.	391
Combine SMARTDRV and	
FASTOPEN for Best	
Performance	392
What Is a Form Factor?	393
Understanding the Information	
BACKUP Places on a Floppy	
Disk.	394
Obtaining Support for Newer Disks	
When Using an Older BIOS	395
Why You Normally Can't Apply	
Low-Level Formatting to IDE	
Disks	396
Improving Performance with a	
Caching Disk Controller	397
Thinking of Buying a CD-ROM?	398
How a CD-ROM Stores Data	399
How Does a WORM Device Differ	
from CD-ROM?	400
What Is a Magneto-Optical Drive?	401
Understanding Disk-Speed	
Components	402
Understanding What Really Gets	
Stored on Disk	403
Understanding	
Reduced-Write-Current Cylinders.	404
Understanding File Allocation Table	
Entry Sizes.	405
Understanding Sector Translation	406
FAT You Don't Want to Lose	407
A Bad File Allocation Table	408
How DOS Tracks Damaged	
Locations on Your Disk.	409
How Do the Damaged Disk	
Locations Identified by	
Low-Level Formatting	
Correspond to FORMAT's Bad	
Clusters?	410
The Ideal Floppy Disk Drive	411
What Are Hard Disk Cards?	412
Unwrite-Protecting 3 1/2-Inch	
Disks	413
Permanently Write-Protecting a 3	
1/2-Inch Disk	414
Cleaning Floppy Drives	415
Organizing Your Disks with a Disk	
Caddie	416
Bringing Bent Disks Back to Life	417
Reducing the Possibility of	
Formatting a Disk Accidentally.	418
Understanding the Extra Hidden File	419
Compressing Everything on Your	
Disk	420
Understanding Disk Serial Numbers	421
Huge Partitions Can Waste Huge	
Amounts of Space	422
Pay Attention to Early Signs of an	
Imminent Disk Failure	423
Rewriting the Master Boot Record.	424
Getting Back to Drive C from an	
Empty Floppy Drive	425
Viewing Your Disk Drive	
Information.	426
Solving Disk Errors on PCs that	
Stand on Their Sides	427
A Simplified FORMAT Command	
for Use in Batch Files	428
A Faster FORMAT Command that	
Adds a Disk Label	429
Displaying Partition Table	
Information with UNFORMAT.	430
Determining the Last Drive	431
Determining the Next Available	
Logical Drive Letter	432
Am I Connected to Network Drives?	433
Fixing the Probable Non-DOS Disk	
Error	434
Displaying the File Allocation Table	
Type	435
Quickly Selecting a Drive or	
Directory	436
A Low-Disk-Space Warning	437
Is This Drive a CD-ROM?	438
For a Single-Drive Copy Operation,	
Use XCOPY	439

Handling a Spill on a Floppy Disk	440
Removable Disk Media	441

Directory

Tip

Viewing Directories in Lowercase.	442
Renaming a Directory	443
Cleaning Up Your Root Directory	444
How Many Files Should a Directory Contain?	445
Optimizing Directory Order in Your Command Path.	446
Moving COMMAND.COM from the Root Directory	447
Displaying Directory and Subdirectory Listings.	448
Managing the DOS Directory	449
Copying an Entire Directory to Floppy Disks	450
Defining DOS 5 DIR Command Options.	451
Hiding a Directory.	452
Abbreviating Long Directory Names with SUBST	453
Sorting Directory Listings with DOS 5.	454
Removing Unused Directory Entries	455
Killing a Directory Tree	456
Checking a Directory for Fragmented Files	457
Displaying Only Directory Names.	458
Defining a Data File Search Path with APPEND	459
Improving Performance with FASTOPEN	460
A Directory Copy Batch File	461
When to Use . and	462
Does This Directory Contain Files?	463

Does This Directory Contain Subdirectories?	464
Directories Consume Disk Space, Too	465
Testing the Current Directory	466
Discarding Your Empties	467
Adding WINDOWS to Your Command Path as You Need It.	468
A More Selective File Delete Operation	469
Display Two Directory Listings Side by Side	470
Getting APPEND's Directory Search Settings	471
Conditional Execution Based on File Size.	472
An Easy CHDIR Command	473
Salvaging a Damaged Directory.	474
Dumping Root Directory Entries Using DEBUG	475
Renaming Root Directory Entries Using DEBUG	476
A Double Directory Listing.	477
How DOS Locates a File's FAT Entries.	478
Processing a List of Directories.	479
Expanding and Collapsing DOS Shell Directories	480
How Many Subdirectories Does This Directory Contain?	481
Working with Files that Reside in Different Directories	482
Controlling the Shell's Directory Tree Order.	483
Quickly Selecting All the Files in a Directory.	484
Labeling Your Floppy Disks.	485
Determining the Number of Unused Directory Entries	486
How Much Disk Space Am I Wasting?	487

Some Programs Use TMP Instead of TEMP	488
Periodically Cleaning Up After the DOS 5 Shell	489
Displaying the Current Directories for Each Disk	490
Saving and Restoring All Current Directories	491
Quickly Moving Up Directory Levels	492
Moving Up Directory Levels with DOSKEY	493
Creating the UTIL Directory	494
Using Logical Drives for Quick Directory Changes	495

File

Tip

Selective File Deletions	496
Creating a SAFEDL Command	497
Protecting AUTOEXEC.BAT	498
Creating and Selecting a Directory in One Step	499
Creating Extended ASCII Characters	500
Faster File Deletions Without MIRROR	501
Splitting Redirected Input	502
Small Files Don't Save Disk Space	503
Listing Today's Files	504
Copying a Large File	505
Using Extended ASCII Characters in Your Filenames	506
Moving a File from One Directory to Another	507
Protecting Files with the DOS 5 MIRROR Command	508
Compressing and Decompressing Files	509

Hiding and Unhiding Files Under DOS 5	510
Undelete Files Immediately	511
Understanding the CONFIG.SYS FILES Entry	512
Protecting Files with Read-Only Attributes	513
Displaying the Name of Every File on Your Disk	514
Copying Small Files from the Keyboard	515
Viewing the First <i>n</i> Lines of a Text File	516
Assigning Line Numbers to a Text File	517
Setting a File's Date and Time Stamp	518
Setting Several Files' Date and Time Stamps	519
Leave the System File Attribute for DOS Use Only	520
Verifying a Critical File Copy Operation	521
Making Your File Names More Meaningful	522
Displaying a Directory's Deleted Files	523
Abbreviating COPY Commands	524
Know When to Use RECOVER	525
Understanding the Asterisk (*) Wildcard	526
Using REPLACE to Update Files on Your Disk	527
Performing a Selective File Delete Operation	528
Viewing a File with PGUP and PGDN	529
Moving One or More Files	530
Mouse-Driven File Copy and Move Operations Within the DOS 5 Shell	531
Performing an Incremental Backup Operation	532
Searching Your Disk for Specific Files	533
Selectively Assigning File Attributes	534

Viewing a File's Contents in Hexadecimal and ASCII Formats	535	Increasing the Number of Programs that Support Data File Search Operations	558
Displaying a File's Last Lines	536	Restoring a Specific File from Your Backup Disks	559
Displaying File Contents or Command Output in Uppercase Letters	537	Excluding Files from a Specific Command.	560
Searching Files for Specific Text	538	Changing Date and Time Stamps for Multiple Files.	561
Counting the Number of Lines in a File or Redirected Input	539	Searching Your Disk for Duplicate Files.	562
Adding a Margin to Text Files	540	Replacing Text in a File	563
A One-Step Undelete Operation	541	Don't Use the Same Filename on Opposite Sides of a DOS I/O Redirection Operator	564
A Simple Virus Checker.	542	Executing a Specific Command for Current Directory Files with Specific Attributes	565
Counting the Number of Words in an ASCII File	543	Defining a Default File Specification	566
Moving the File WINA20.386 from Your Root Directory	544	Removing Stubborn Directories.	567
Replacing a Word or Phrase Throughout an ASCII File with EDIT	545	Removing a File's System Attribute	568
Copying the Files You Created Today to Floppy Disk	546	A Simple Encryption Filter	569
A TYPE Command with Batch File Support.	547	File Size Dictates Whether You Use COPY or XCOPY.	570
Using EDLIN to Replace a Word or Phrase Throughout an ASCII File.	548	When Copying Multiple Files, Use XCOPY.	571
Understanding How EXE and COM Files differ.	549	Quickly Moving, Copying, or Deleting ASCII Text with EDIT.	572
Backup Logs Make Files Easier to Find.	550	What Files Are Open?	573
Repairing Cross-Linked Files	551	Redirecting stderr's Output to a File.	574
Copying Zero-Length Files	552	Redirect Files More than Just Batch.	575
Understanding XCOPY's (F=File, D=Directory) Prompt.	553	Finding Lines in a File that Contain Specific Text	576
Creating a Monthly Backup Batch File	554	Extracting Specific Lines of Redirected Input	577
Creating an Incremental Backup Batch File	555	Solving FIND's Case Sensitivity.	578
Changing a File's Date and Time Stamp	556	Counting the Number of Occurrences of Specific Text in a File or Redirected Input	579
Controlling APPEND's Directory Search for Complete Pathnames	557	A Better Text Count Utility	580
		Locating Lines of a File or Redirected Input that Don't Contain Specified Text	581

Cutting and Pasting (Moving)	
ASCII Text with EDLIN	582
Comparing ASCII Files	583
Displaying the Line Numbers in a	
File that Contain Specific Text	584
Locating the First Occurrence of	
Text in a File or Redirected Input	585
Displaying the Line Numbers of	
Lines that Differ Between Two	
Files	586
Controlling FC's Case Sensitivity	587
You Can't Hide from CHKDSK	588
A Batch File FIND Command	589
Understanding Files Whose	
Extensions End with an	
Underscore	590
Are Two Files the Same?	591
A More Meaningful File	
Comparison	592
Processing a List of Files	593
Processing Files by Age	594
Backing Up Your CONFIG.SYS	
and AUTOEXEC.BAT Files	595
Parsing a Path Name	596
Processing the Smallest File	597
Processing the Largest File	598
Clearing a File's Attributes	599
Obtaining the Next Archive File	600
Obtaining the Next Hidden File	601
Obtaining the Next Read-Only File	602

Compressing Your Files Reduces	
Modem Transmission Times	613
Viewing BASIC Program Files	614
Are Your Files Really Readable?	615
Handling Utility Name Conflicts	616
Performing a Safe File Copy	
Operation	617
EDIT Relies on QBASIC.EXE	618
EDIT Does Not Create a Backup	
Copy	619
A Better-Fit File Copy	620
Removing a File's Hidden Attribute	621

Batch File

Tip

Discarding Command Messages	622
Sounding Your Computer's Bell	623
What Is Today's Date?	624
What Day of the Week Is Today?	625
Is It AM or PM?	626
What Month Is It?	627
Creating Readable Batch Files	628
Using IF ERRORLEVEL with DOS	
Commands	629
What Year Is This?	630
Echoing Blank Lines to the Screen	631
Sounding the Computer's Speaker	
in ECHO and PAUSE	
Commands	632
A Better PAUSE Command	633
A Different PAUSE Command	634
Using SHIFT to Enhance DEL	635
Merging Batch Files	636
A More Flexible PAUSE Command	637

Using CTTY and NUL to Discard Batch File Messages	638	Quitting a Batch File	662
Accessing the DOS Prompt from Your Batch File	639	Ways to Test for Missing Parameters	663
A Partial Suspend	640	Redirecting Input from the CON Device	664
Understanding ERRORLEVEL Testing	641	Faster Command Execution	665
Using REM to for Non-Comment Purposes	642	Building on the DEBUG Script Files	666
Combining Two IF ERRORLEVEL Commands for an Exact Test	643	XCOPY Is the Batch File Command of Choice	667
What Kind of Disk Is This?	644	Saving an Event's Time	668
Testing Your IF ERRORLEVEL Logic	645	A Locator Batch File	669
Invoking a Second Batch File with CALL or COMMAND /C	646	When to Use the NOT Operator	670
Testing Multiple Conditions in Your Batch Files	647	Using Named Parameters to Create Batch Subroutines	671
Building Batch Files on the Fly	648	@ECHO OFF Isn't Required	672
Prompting the User for a Yes or No Response	649	How DOSKEY Macros Differ from Batch Files	673
Saving and Restoring the Current Directory	650	Be Aware of REM and Redirection	674
A Different Type of ECHO Command	651	Executing Several Commands on the Same Line	675
Determining Whether HIMEM.SYS Is Installed	652	A Better Way to Compare Strings	676
Saving and Restoring the Current Drive	653	Waiting for a Key in the Range 0 through 9	677
Getting a Function Key Response	654	Waiting for a Letter from A through Z	678
Understanding Named Parameters	655	Move Batch File Remarks for Best Performance	679
Using Named Parameters to Store and Restore Environment Entries	656	Resuming a Batch File's Execution at a Specific Time	680
Assigning the Current Directory as an Environment Entry	657	Testing for an Existing File	681
Saving the Current System Time to a Named Parameter	658	Hiding a Batch File's Processing	682
Assigning the System Date to an Environment Entry	659	Cleaning Up Before Turning Off	683
Assigning the Current Drive to an Environment Entry	660	An Environment Parse Utility	684
Using Drop-Down Shadow Boxes to Improve Message Appearance	661	Controlling a File Copy Operation	685
		Is Task Switching Active?	686
		Getting a Response from the User	687
		Determining the Length of a String of Characters	688
