ADVANCES IN MANUFACTURING TECHNOLOGY III

■ Proceedings of the Fourth National
Conference on Production Research ■

Sheffield City Polytechnic, September 1988

Edited by B Worthington

Organized by the Consortium of Heads of University and Polytechnic
Production Engineering Departments (COPED)

Billings Book Plan, Worcester

The Consortium of Heads of University and Polytechnic Departments of Production Engineering (COPEd)

The Consortium is an independent body and was established at a meeting held at the Loughborough University of Technology on 17th February 1978. Its main aim is to promote production engineering education, training and research. To achieve this the Consortium maintains a close liaison with those Government Departments and other bodies concerned with the initial and continuing education and training of professional engineers and responds to appropriate consultative and discussion documents and other initiatives. It organizes and supports national production engineering education and research conferences and symposia. The Institution of Production Engineers, with whom there is a close working arrangement, undertakes the secretarial duties.

The Consortium consists of the Heads of those university and polytechnic departments or sections whose first priority is to production engineering and who have a direct responsibility for running Honours degree courses in the field of production engineering.

Acknowledgements

I would like to take the opportunity of thanking Peter McGoldrick for providing the benefit of his experiences of co-ordinating previous conferences. My colleagues, Mike Hubbard, Bill Hales and Terence Perera have all provided much needed assistance when requested. Various members of the staff of Kogan Page have been both helpful and considerate, as have all the Authors.

In anticipation, I would like to thank all those 'former friends' who have been persuaded to chair sessions and the conference staff of Sheffield City Polytechnic for their professionalism. Finally, thank you to Jennifer Smith who did all the work.

Brian Worthington

The Editor

Brian Worthington has been involved in COPED initiatives for a number of years. After ten years in manufacturing industry he moved into academia and, after a number of posts, moved to Sheffield City Polytechnic in 1978.

He lectures in manufacturing engineering and is an active member and sits on the Council of the Institution of Production Engineers. He has been involved with the development of undergraduate and postgraduate courses in manufacturing/production engineering for many years and is the author of over 20 papers on research.

Contents

Author Index.....	15
Introduction	17
<i>D. Spurgeon</i>	
Quality and Measurement	
Surface Topography Measurement Using CAD Generated Referencing.....	19
<i>M R Morshedizadeh and C Wykes</i>	
Developing an Inspection Checklist System: Practicalities and Pitfalls.....	30
<i>M Sheldon, A D Turvey, B G Dale and D M Lascelles</i>	
A Study of Statistical Process Control in a Printed Circuit Board Manufacturer.....	35
<i>M M Manson and B G Dale</i>	
Defining Requirements for the Quality Database.....	40
<i>Barbara M Savage and James D T Tannock</i>	
The Statistical Evaluation of the Effectiveness of a Low-Cost Surface Finish Stylus Instrument.....	45
<i>A Statham, E M Aspinwall and K J Stout</i>	
The Contribution of Quality Circles to Company-Wide Quality Improvement.....	51
<i>K F Sherwood and B G Dale</i>	
Questions about Quality Costs.....	56
<i>Anil K Bajpai and Phillip C T Willey</i>	
Ultrasonics for Flexible Manufacturing.....	62
<i>P Johns, S Munro, S Pomeroy, M Rafiq, R Williams, M Wybrow and C Wykes</i>	
Plastic and Composite Materials	
Materials in Advanced Engineering Applications.....	66
<i>T G Lindsay and H Milne</i>	
Computer-Aided Materials Selection.....	70
<i>R W E Lamb</i>	
Intpretation of Fatigue Data Surfaces to Optimise Production (Plastic Pipe) Evaluation Test Level.....	75
<i>C Lawrence</i>	
Manufacture of Fibre Reinforced Plastic Components Using Fibre Reinforced Plastic Tools...80	
<i>C R J Hartman, S Shaheen, Y B Kavina and R A Whitaker</i>	

Justification for the Use of Fibre Reinforced Plastics (FRP) as Tooling Materials for the Manufacture of RFP Remote Manipulators.....	85
<i>Y B Kavina, C R J Hartman, S Shaheen, R A Whitaker</i>	

CAD

The Impact of CAD on Design Management and Performance	90
<i>R Masson</i>	
Precedance Constraints in Dynamic Design Analysis and Reanalysis of Machine Tool Structures	95
<i>J A Brandon</i>	
Machine Tool Analysis and Synthesis Based on the Graphical Machine Representation Model	100
<i>G Q Huang and J A Brandon</i>	
Reconciliation of Analytical and Experimental Results for the Design of Spindle-Bearing Systems.....	105
<i>K J H Al-Shareef and J A Brandon</i>	

CIM and Expert Systems

Communications in a Manufacturing Environment.....	110
<i>S P Wilkinson</i>	
Computer Integrated Manufacture and its Supporting Technologies.....	116
<i>K B Chuah</i>	
SURFEX: An Expert System for 3-D Surface Machining Data.....	122
<i>Gordon Smith</i>	
Use of Expert Systems in the Specification of Manufacturing Systems.....	127
<i>Umit S Bititci</i>	
A Prolog Front-End for FMS Simulation.....	133
<i>A S Carrie and K H Tang</i>	
The Evaluation of a Flexible Manufacturing Cell in a Company Manufacturing Bespoke Control Panels	138
<i>J M Ibbotson, J S Hutton and J R Chandler</i>	
Designers' Requirements of a CIM System.....	143
<i>J Guggenheim and T W A Whitfield</i>	
A Knowledge-Based Press Tool Assembly System.....	152
<i>F Koroupi and M Loftus</i>	
The Introduction of a Shopfloor Data Collection and Machine Monitoring System within a CIM Environment.....	157
<i>C C Brown and R Leonard</i>	
A Generative Integrated Process Planning System (GIPPS v1.1): Unexpected Material Benefits.....	162
<i>M T Khorami, C R McMillan and P Mowforth</i>	
Islands of Automation to CIM (Computer Integrated Manufacturing).....	168
<i>A W Duffill</i>	
Computer Integrated Manufacturing and Product Innovation.....	173
<i>A R Young</i>	

Requirements to Interface MMS Protocol to Production Control System.....	178
<i>P R Bunn and K Vinodrai Pandya</i>	

A Computer Technique for the Nesting of Two Dimensional Polygonal Components.....	183
<i>Peter F McGoldrick and Lu Wen</i>	

A Framework for Expressing Flexibility in FMS.....	188
<i>M Dooner and A De Silva</i>	

Simulation

Modular Simulation Models for FMS.....	193
<i>A S Carrie and T S Chan</i>	

Development of an FMS by Simulation.....	198
<i>S P Wilkinson</i>	

The Future of FMS Simulation.....	202
<i>P L Primrose and C C Brown</i>	

The Development of Operational Strategies for an FMS Using Graphical Animation.....	210
<i>D T S Perera</i>	

Automation

Power Press Protection Systems.....	217
<i>A D Hope</i>	

Design of Automated Guided Vehicles.....	223
<i>P Cameron-MacDonald and I Cameron</i>	

Robots and Assembly

Robot Manipulator Trajectory Tracking, Performance Assessment and Closed Loop Trajectory Control.....	228
<i>M Dickinson and A S Morris</i>	

An Assembly Classification System - The Foundation for Adaptable Assembly.....	235
<i>C B Byrne and S H Hopkins</i>	

Programmed (Controlled) Compliance of a Micromanipulator for Assembly.....	240
<i>N A Aspragathos, C J Bland and S H Hopkins</i>	

The Integration of Force Sensing into Robot Based Automation Systems.....	245
<i>S G Andrews and C F Earl</i>	

Macro/Micro Manipulator Part 1. A justification for the enhancement of industrial robot capability and performance, for tasks such as assembly and position adjustment by the attachment of a suitable micro-manipulator to the industrial robot or macro-manipulator	250
<i>Y B Kavina, C J W Woods, S Shaheen, A Nowrouzi, H Koçekali and R A Whitaker</i>	

Macro/Micro Manipulator Part 2. The design of a low cost, 3-axis, D.C. motor driven, selectively compliant micro-manipulator for high levels of positional accuracy and repeatability in robotics applications including assembly.....	254
<i>C J W Woods, Y B Kavina, S Shaheen and R A Whitaker</i>	

An Off-Line Programming Aid for Industrial Robots.....	258
<i>R Herfie, P Broomhead and R J Grieve</i>	

The Robotic Application of Two-Part Adhesives in High Precision Product Assembly.....	263
<i>C Hitchin, M F Carr and R J Grieve</i>	

Pose Error Determination of Robot End Effector.....	268
<i>A Nowrouzi, Y B Kavina, H Koçekali and R A Whitaker</i>	
The Design of a Robotic Tool Changing System.....	273
<i>R Semple, M P Corderoy and A R Mileham</i>	
On the Vibration Characteristics of Robots.....	278
<i>A S White, Y Wong, R Gill, P T Gleeson and R C Seals</i>	

Work Design and Organisation

Improving the Ergonomics of Production Sewing Tasks.....	284
<i>C M Haslegrave and H Gregg</i>	
Managing Value Engineering During a Period of Corporate Disruption.....	289
<i>J A Brandon and R Raybould</i>	

CAPM

Modelling of Information and Materials Flow in Printed Circuit Board Manufacturing.....	294
<i>R K Maji and A Lucas-Smith</i>	
An Investigation of Productivity Improvement within Bareboard Manufacturing.....	299
<i>R K Maji and Cliff Whiston</i>	
Production Allocation is as Easy as 1-2-3.....	304
<i>John Kemp and Cliff Jones</i>	
A 'Smart' Production Planning System.....	310
<i>Cliff Jones and Kamal Chaharsooghi</i>	
The Design of a Generative Computer Aided Process Planning System – For Turned Components in a Conventional Machine Tool Environment.....	315
<i>I Isik and A R Mileham</i>	
A Capacity Modelling System for Small Batch Engineering Manufacture.....	320
<i>J Beatty, P H Lowe and D Radley</i>	
Production Scheduling Using Heuristic Techniques.....	325
<i>H Bera and R Gill</i>	
Enhanced MRP Offers Visibility in Manufacturing.....	332
<i>S O Olaoye and G B Williams</i>	
Shopfloor Data Collection – Yield Improvement with a PC Based Process Management Information System.....	340
<i>G M Geary, M Ashton and P Green</i>	
Process Monitoring – Yield Improvement with a Real Time Data-Logger Display and Analysis System	345
<i>G M Geary and B M Quinn</i>	
BAKERCAM	350
<i>J Drysdale</i>	

Production Economics

The Motivation for Manufacturing Investment.....	355
<i>P L Primrose</i>	

The Economics of Production and its Dependence on Market Research.....	360
<i>F Etemad, D J Leech and D B Williams</i>	
The Use of Cost Data as a Basis for Decision Making in AMT Environments.....	365
<i>P F Kelly, J R Chandler and D M Hall</i>	
Continuous versus Single Shift Production – Its Consequences/Management for the Energy Profile within the Steel and Iron Industries.....	370
<i>A J Griffiths and R I Grosvenor</i>	
A Review of Advanced Manufacturing Technology Investment Procedures.....	375
<i>S W Bootherstone and D Spurgeon</i>	
Risk Assessment of Capital Investment in Manufacturing.....	380
<i>B B Hundy and D J Hamblin</i>	
Training and Quality Motivation – Some Forgotten Lessons from Japan.....	385
<i>D C Perman</i>	

Manufacturing Systems

Random Order Based Production – Its Effect on a Large Customer, Low Volume Based Industry.....	390
<i>A J Griffiths, P S Cheema and D R Towill</i>	
A Manufacturing Cell Incorporating a Robot and Press Brake, for the Production of Sheet Metal Components.....	395
<i>R J Stamp, C F Earl, P Holland and N W Hird</i>	
The Development of IDEFc as an Effective Tool for Mapping Quality Management Systems.....	400
<i>R T Crossfield, J Taylor, B G Dale and J J Plunkett</i>	
Design of Advance Manufacturing Technology Systems – Problems and Issues.....	406
<i>S K Banerjee</i>	
Group Technology – The State of the Art.....	412
<i>John L Burbidge</i>	
The Use of Software Engineering Techniques for the Development of Control Software in a Network Transputer System for FMS Operation.....	425
<i>S P Low</i>	
A Manufacturing Manifesto for Van Moppes IDP Ltd.....	431
<i>M Woods, P Davies, W Jones and M B Bassett</i>	

Processes

The Hydraulic Bulge Forming of Tubular Components – The Effect of Changing the Tube Blank Material.....	439
<i>M I Hutchinson, R Crampton, M S Ali and M S J Hashmi</i>	
The Impact of Flexible Manufacturing Systems on Marketing.....	445
<i>N J Quick, N J Stanley and G E Greenley</i>	
Method for Stabilisation and Control of the Deep Hole Drilling Process (DHD) Using Twist Drills.....	450
<i>Y Kavaratzis and J D Maiden</i>	
The Application of Spherical Trigonometry to the Evaluation of the Cutting Action of a Tool with Complex 3-Dimensional Geometry.....	456
<i>P M Webb and J D Maiden</i>	

Roughness and Metallurgical Structure of Machined Surfaces.....	462
<i>L A Blunt, W J Tomlinson and S Spraggett</i>	
Advances in Polishing of Brass Musical Instruments.....	467
<i>A P Jarvis</i>	
An Energy Analysis of the Mandrel Tube Rolling Process.....	472
<i>K Baines</i>	
Monitoring of Electrical Quantities During Resistance Seam Welding.....	477
<i>I Basarab-Horwath</i>	
Dispensing of Adhesives in Surfaces Mount Technology.....	484
<i>D Koshal, H A Nagi and D M Ashby</i>	
A Rethink of Scissor Design and Manufacture.....	489
<i>N J Quick</i>	
An Approach to Computer Aided Bandsaw Teeth Testing and Design.....	494
<i>M Sarwar, S R Bradbury and M Dinsdale</i>	
Some Aspects of Operating Conditions in Cold Roll Forming.....	502
<i>J Fewtrell and D A Milner</i>	

Human Factors

Meeting Product-Flow Objectives: A Systematic Investigation Using a Critical Incident Technique.....	508
<i>Brian Trought</i>	
The Role of Training in the Transfer from Research to Industry of Developments in Production Engineering.....	513
<i>C E Hutchin</i>	

Introducing AMT

The Implementation Cube for Advanced Manufacturing Systems.....	519
<i>David Tranfield and Stuart Smith</i>	
Selection Procedures Adopted by Industry for Introducing New Machine Tools.....	525
<i>W Gerrard</i>	
A Strategy for Selecting and Introducing New Technology/Machine Tools.....	532
<i>W Gerrard</i>	
The Economic and Social Effects of New Technology – An Overview.....	537
<i>W Gerrard</i>	

Developments in Education and Training

A Strategy for the Teaching of Manufacturing Automation Technologies in Higher Education.....	543
<i>J R Chandler, P F Kelly and B Clarke</i>	
The Creation of a CIM System at Napier Polytechnic of Edinburgh.....	548
<i>I McLeod</i>
