HOUGHTON MIFFLIN COMPANY / BOSTON

ATLANTA
DALLAS
GENEVA, ILL.
HOPEWELL, N.J.
PALO ALTO

AUTHORS: **Dr. A. Harris Stone** is Professor of Science Education at Southern Connecticut State College. He is the author of a college textbook, *Teaching Children Science*, a book of poetry, *The Last Free Bird*, and a number of other books in many areas of science.

Dr. Lloyd R. Sherman is a science teacher and curriculum developer at Benjamin Franklin High School in New York City. He has taught in Kenya and developed ecology curricula for the Wildlife Education Center, Nairobi National Park.

CONSULTANTS: **Dr. Phyllis Gross**, Professor of Biological Sciences, California State University, Hayward, California.

Dr. Charles A. Martin, Associate Professor of Science Education and Urban Affairs, and Editor of *The Journal of Negro Education*, Howard University, Washington, D.C.

Dr. Russell C. Oakes, Professor of Science Education, State University of New York, Geneseo, New York.

Key to Pronunciation Guide

Some words in this book that may be unfamiliar to you or hard to pronounce are followed by a pronunciation guide in parentheses. The guide syllable printed in capital letters should be given the greatest emphasis when you say the word. In the key below, the first column is a list of the letters or marks used in many dictionary pronunciation guides, with an example of the sound that each one stands for. The next column shows how the same sound appears in the guides in this book. The third and fourth columns list examples of words that contain that sound, and their pronunciation guides.

<i>Letter or mark</i>	<i>Appears in this book as:</i>	<i>Example</i>	<i>Guide</i>
a (hat, map)	a	alphabet	AL fuh beht
ā (age, face)	ay	Asia	AY zhuh
ā (care, air)	ai	share	shair
ā (father, far)	ah	farming	FAHR mihng
ch (child, much)	ch	China	CHY nuh
e (let, best)	eh	test	tehst
ē (equal, see, machine, city)	ee	leaf	leef
èr (term, learn, sir, work)	ur	tangerine	tan juh REEN
i (it, pin, hymn)	ih	earth	urth
ī (five, ice)	y	system	SIHS tuhm
	eye	alive	uh LYV
k (coat, look)	k	island	EYE luhnd
o (hot, rock)	ah	corn	kawrn
ō (open, go, grow)	oh	otter	AHT uhr
ô (order, all)	aw	rainbow	AHT uhr
		normal	RAYN boh
oi (oil, voice)	oy	always	NAWR muhl
		boiling	AWL wayz
		poison	BOYL ihng
ou (house, out)	ow	fountain	POY zuhn
s (say, nice)	s		FOWN tuhn
sh (she, revolution)	sh	mice	mys
u (cup, butter, flood)	uh	ration	RASH uhn
û (full, put, wood)	u	study	STUHD ee
		blood	bluhd
ü (rule, move, food)	oo	pull	pul
zh (pleasure)	zh	wool	wul

Contents

Chapter 1 Learning to Learn

What Is Learning? 4

- Experience 1 / Remembering Helps in Learning 7
Learning to Be Blind 7, Learning by Ear 8,
Figuring Out a Puzzle 8, Learning From
Mazes 8
- Experience 2 / Seeing What's There 11
Looking at Mealworms 12,
Natural Learning 12
- Experience 3 / Environments for Learning 14
Do Sow Bugs Like It Dark or Light? 14,
Do Sow Bugs Like It Wet or Dry? 16
- Experience 4 / Putting Things Into Groups 17
Grouping Leaves 18, Grouping Seeds 19
- Experience 5 / Learning by Guessing 20
A Cold Goldfish 20
- Experience 6 / Counting Helps Understanding 22
Finding Average Hand Spans 24, Finding
Total Numbers 24, Counting Living Things 25
- Experience 7 / Learning by Experimenting 26
Experimenting With Seeds 26
- Experience 8 / Learning by Discovering 30
Discovering With Rhododendrons 30,
Discovering With Gardens 32, Discovering
With Spider Webs 32, Discovering With
Puzzles 33

Learning Is a Way of Changing 34

- Focus 1 / What Is a Cat? 34 Focus 2 / Coyotes and
Rabbits 36 Focus 3 / Heartbeats 38 Focus 4 /
Egrets! 39 Focus 5 / What Happened Here? 41

Chapter 2 Being Different Makes It

Patterns of Differences in Living Things 49

- Experience 1 / Some Reproductive Patterns 51
Kinds of Reproduction 52, The Gestation
Period 54, A Man and a Woman 56, How
Populations Grow 58, Differences in Skills 59
- Experience 2 / Your Parents and You 60
How Gametes Are Formed 61, The DNA
Model 62, Random Selection 64
- Experience 3 / Families of Genes 66
Looking at Eyes 66, The Queen's Genes 68
- Experience 4 / Individual Differences 71
Different Amounts of Light 73, Leaves and
Stems Are Different 74

Experience 5 / Environments for Growing	74
Mapping Environments	74, Favorite Environments 78, Choosing Your Environment 78
Experience 6 / Fitting Into the Environment	79
A World Within a World	79, Specialization 80, Life Returns to a Volcanic Island 82
Experience 7 / Places Where You Live	84
Hearing Old Sounds	85, Seeing New Sights 87, Seeing and Feeling 87, Environments for Each Animal 90
Living Things Have Different Patterns	92
Focus 1 / Reproduction	92
Focus 2 / The Menstrual Cycle	94
Focus 3 / Prejudice	96
Focus 4 / Food Differences	98
Focus 5 / Sharing the Environment	103

Chapter 3 Being Alike Is Together

Patterns of Being Alike	108
Experience 1 / You Are Made of Cells	108
The Microscope	110, Salting a Cell 110
Experience 2 / What Are Cells?	110
What Cells Do	112, How Cells Divide 113, Mitosis in Onion Cells 114
Experience 3 / The Digestion of Food	115
Chemical Digestion	115, Do You Digest Like a Cow? 116, What Eats What? 118
Experience 4 / The Breath of Life	119
How Plants Breathe	119, Animal Lungs 120, In Goes the Good Air 122, Lung X Rays 123
Experience 5 / Transporting Liquids and Waste	126
Circulation in a Goldfish	126, Liquids in Plants 126
Experience 6 / Liquid Transport in Humans	129
The Pump Machine	129, Liquid Waste 132
Experience 7 / Skeletal Structures	133
Whales, Bats, and Humans	134, Clouds and Bikes 136, A Bony Jigsaw Puzzle 137, Keeping in Shape 139
Experience 8 / Animal Behavior	142
Sleeping and Eating Behavior	143, Space to Live 144, Solving Puzzles 145
Experience 9 / Sensing the Environment	147
Do Euglena React to Light or Dark?	148, Plant Senses 148, Funny Sensors 150, Using Your Senses 150, Reflexes 150
Experience 10 / Similarities in Development	151

Mothers and Babies 152, Stages of Development 152
Experience 11 / Similarities in Structure 154
The Eyes and I 154, Look-Alikes 155
Living Things Are Alike In Many Ways 156
Focus 1 / Water Animals 157 Focus 2 / Birds From Fishes? 158
Focus 3 / Similarities in Plants and Animals 159
Focus 4 / Digestion 159 Focus 5 / Watching Ants 159
Focus 6 / Flower Parts 159 Focus 7 / Lungs 160

Chapter 4 Giving and Taking

Giving and Taking Isn't Always Sharing 166
Experience 1 / Photosynthesis 167
Storing and Using Energy 168, Chlorophyll and Light 172, Chloroplasts Do It 175, Separating the Green 176
Experience 2 / Respiration 179
Energy 179, Changing Food to Energy 181, Hot Frog, Cold Frog 182, Blood Sugar 182
Experience 3 / Energy Flow 183
Food Chains 184, Food Webs 186, Food Pyramids 187
Experience 4 / Energy Balance 192
Using Energy 192, Measuring Calories 194, Dieting 196
Experience 5 / Sharing 198
Ways of Sharing 199, Energy Without Sunlight 200, Do You Share? 200
Experience 6 / Regulators 201
In Balance 202, Regulating Plant Foods 203
Experience 7 / Food Value 205
Making Food 205, Buying Food 207, Food and Diseases 210
Experience 8 / What You Can't See 210
Colors, Heat, and Feelings 211, Things That Go Bump 213, Territories, Yours and Theirs 215
Giving and Taking Is Natural 219
Focus 1 / Sugar in Leaves 219 Focus 2 / Super Energy 220
Focus 3 / Astronauts' Energy 220 Focus 4 / Balance in Your Environment 221
Focus 5 / Eating Out 222

Chapter 5 Living Up to the Rules

What Are the Rules? 228
Experience 1 / Seeing the Rules 230
Tree Parts and Keys 231, Making a Rule 234,

	Rules for Naming	235
Experience 2 / Rules of Life		238
	Dominant and Recessive Genes	239,
	The Punnett Square	241
Experience 3 / Populations		244
	Men and Women	245, Big and Small Living
	Things	248, Counting Large Numbers
Experience 4 / Biological Rhythms		253
	A Biological Clock	254, Some Biological
	Rhythms	255, The Sleep Rhythm
Experience 5 / Cycles		261
	The Water Cycle	262, The Gas Cycles
	Hot and Cold	264, 268
Experience 6 / Some Other Rules		271
	Camouflage	271, Migration
	Metamorphosis	275, Niches
Experience 7 / Rules and Regulations		279
	Society's Rules	280, Our Own Rules
	Rules of Feelings	283, 287
Patterns of Living		290
Focus 1 / Tsavo Elephants		292
Focus 2 / Rules of Growing Up		293
Focus 3 / Building Up		294

Chapter 6 Changing the Rules

Keeping Changes in Balance		301
Experience 1 / Changing Environments		302
	Slow Changes	302, Fast Changes
	Changes Caused by People	305, Continents
	and Climates	306, A Make-Believe
	Animal	308, The Iguana
Experience 2 / Internal Changes		311
	Mutations	312, Fruit Flies
Experience 3 / Life in Space		317
	A Space Survival Problem	318,
	Space Adaptation	319
Experience 4 / Adaptation and Variation		322
	Adapting by Inventing	323,
	Body Adaptations	324, Being a Biped
	The Peanut Problem	327, 328
Experience 5 / Differences in a Population		329
	Changing an Environment	330, Breeds of
	Animals	332
Experience 6 / Social Climates		334
	Classroom Atmosphere	336,
	Being Comfortable	337
Experience 7 / Fossil Stories		339

Finding and Reading Fossils 340, Making
Models of Fossils 342, The Walking Stick 343
Change and Balance 345
Focus 1 / Adapting to Temperature 346 Focus 2 / Flying
Iguanas 346 Focus 3 / Fossils of the Antarctic 347
Focus 4 / The History of the Earth 347 Focus 5 / The
Chemical Pond 350

Chapter 7 People Make Changes

What Do People Change? 357
Experience 1 / Planning Changes 358
Beefing Up 359, Cereal 360, Grafting 361
Experience 2 / Changing the Earth 363
Strip Mining 364, Erosion 365,
Making Soil 369
Experience 3 / Dumping in the Air 370
Particles in the Air 371, Invisible, but
Deadly 374, How Does Smoke Affect Living
Things? 376
Experience 4 / Dirty Water 378
Fit to Drink 379, Using Up Oxygen 381,
Water Use 383
Experience 5 / People Change the Land 385
Using the Land 386, Machines and the
Land 386, Living on the Land 388
Experience 6 / Living Together 390
Extinction Is Forever 391, Pets Using
Protein 392, Overdoing It 394
Learning From Changes 396
Focus 1 / Rationing 397 Focus 2 / Building Buildings
397 Focus 3 / Cleaning Dirty Water 398

Chapter 8 Tomorrow

Where Is Tomorrow? 405
Experience 1 / Caring for Machines 406
Population, Pressure 407, Pressures on
People 409, Societal Pressures 410
Experience 2 / Finding Your Stresses 412
Work Stresses 412, Play Stresses 415,
Growing Stresses 417
Experience 3 / Life in Space 419
The Search for Life 420, Problems of Space
Life 421, Life in a Closed System 421
Experience 4 / Learning to Live for Tomorrow 423
Long Life 424
Tomorrow Is Here 428
The Beauty of Life 428

Glossary 433

Picture Credits and Acknowledgments 439

Index 441

Preface to the Student

When you begin your study of the life sciences you have to know how to start. Should you start with things you know about or with new ideas and new observations? The next page will help you think about this question. Each of the pictures is of something you know quite well. But you may not have seen each in the same way that you will see them here. Turn the page and start your study of the life sciences.

Can you guess what these pictures are? Do they show living things or non-living things? Do you think the real things are the same size as they appear here? If you knew the real size, would you be able to make better guesses? Does the color help, or the shapes you can see?

These are just some of the questions that scientists ask. As you do the activities in this book, you will also learn to ask questions as scientists do. And you will find that in science, as in most other things, asking the right questions is often more important than finding the answers.

Learning to Learn

*Before I can learn
what I want
to know,
I have to
experience enough
so that I can
learn.*

Miguel and Melanie went to Miguel's flat roof top every day for three weeks. They hoped to see the first flight of the baby pigeons. Nothing had happened yet.

One day, when they were looking at the baby birds in their nest, Miguel tried to think like a bird. He told Melanie how he thought he might feel if he were a young bird who had to learn to fly.

"I'm sure I would be afraid," he said. "It's a long way down to the ground."

"Yes," agreed Melanie. "If you didn't fly the first time, you would probably fall and die. I wouldn't even try it."

Miguel thought for a while. "But you couldn't stay in the nest for the rest of your life, could you? You might not try today but I bet that one day, maybe tomorrow, you would try. Maybe it's like when we learned to walk."

A couple of days later they went to the roof top as usual. But the nest was empty. Looking up, they saw the young pigeons and their parents flying back to the nest. Miguel and Melanie had missed the first flight.

"I wonder how they learned so quickly?" Melanie asked.

"I don't know," said Miguel. "All that time we spent watching, we didn't see them take off. Just yesterday they seemed afraid to fly."

Later Miguel told his mother that the birds had learned to fly in one day.

"I don't understand such fast learning," he said.

"What did you learn from watching the birds all these weeks?" his mother asked him.

Miguel looked at her questioningly. She said, "Well, did you notice that the birds didn't learn until they tried to fly?"

Is there any learning going on here?

What Is Learning?

People **learn**, from the moment they are born. A baby animal learns to recognize its own mother and father. Children learn to walk even if no one teaches them.

People learn in many different ways. Learning about how we learn is one way to know more about ourselves. Here are some examples of the ways people learn.

When you were about a year old you made sounds that almost no one understood. Soon you imitated the words you heard older people say. Children learn by saying and doing what other people say and do. Many animals learn this way too.

Did you ever have to find your way to a place you'd never been to before? You needed some information before you left. Maybe someone told you which way to go, or made a map for you. On your way there, you may have seen buildings and signs that you could remember, some with
