PREFACE

While the possibility of bridging in free radicals is often considered or invoked in the research literature and for instructional purposes, the work which is frequently cited and the large amount of potentially relevant work which is usually ignored have not been discussed in a thorough and critical way. Hence, this book.

Although my primary goal has been to create a source for reference and teaching in an important area of free radical chemistry, its implementation has been guided without compromise by my belief that no harm should be done. I have tried to guide the reader, but have not made choices for him. I have tried to present accurately the work which I discuss, but have given no special weight to the views of the authors involved. I have tried to present the experimental observations in such a way as to enable the reader, without consulting the original literature, not just to formulate his own general conclusions but also to decide for himself whether the reaction mixture really was shown to contain 30% isopropyl chloride. Consequently, I have willfully obliged the reader to make his way through a "comprehensive" and somewhat critical book. My hope is that he will arrive at informed judgments with confidence and with the secure belief that he has not been misled.

My decision to base the primary organization of the book on the structure of the bridged(?) radical, rather than on the nature of the experiments performed or on the type of arguments employed, has led unavoidably to some repetition and referrals to other parts of the book. The result, however, is increased ease of obtaining information on specific points.

Lest the deceptively narrow title obscure the generality of the coverage, I should point out that I have discussed or tabulated in detail many areas of solution and gas phase kinetics, structural and mechanistic organic chemistry, free radical reactions, and stereochemistry.

My thanks to Barbara Kaplan for reading the manuscript and to George Zacharias for drawing the structures.

Leonard Kaplan

Bridged Free Radicals

CONTENTS

Preface	iii
List of Tables	ix
CHAPTER 1. DEFINITIONS	1
I. Structure	1
II. Energy	3
III. Control of Stereochemistry	6
IV. Interfacing Between Definitions	6
V. Application of Definitions	9
CHAPTER 2. SILYL-SUBSTITUTED RADICALS	13
I. β -Silylalkyl Radicals	13
II. β -Silylsilicoethyl Radicals	15
III. O-Silylmethylo Radicals	18
IV. β -Silylvinyl Radicals	21
V. β -Silyloxysilicoethyl Radicals	21
VI. γ -, δ -, and ϵ -Silylalkyl Radicals	25
VII. Miscellaneous	25
VIII. Summary	25
CHAPTER 3. GERMYL-SUBSTITUTED RADICALS	27
I. β -Germylalkyl Radicals	27
II. O-Germylmethylo Radicals	27
III. β -Germylvinyl Radicals	27
IV. Summary	30
CHAPTER 4. STANNYL-SUBSTITUTED RADICALS	31
I. β -Stannylethyl Radicals	31
II. O-Stannylmethylo Radicals	31

III.	β -Stannyvinyl Radicals	32
IV.	Miscellaneous	36
V.	Summary.	36
CHAPTER 5. CHLORO-SUBSTITUTED RADICALS		37
I.	β -Chloroalkyl Radicals	37
II.	β -Chlorocyclohexyl Radicals	151
III.	β -Chlorocyclopentyl Radicals	158
IV.	3-Chloro-2-Norbornyl Radicals	158
V.	2-Chloroallyl Radicals	159
VI.	γ -Chloroalkyl Radicals	159
VII.	γ -Chlorocyclohexyl Radicals	175
VIII.	γ -Chlorocyclopentyl Radicals	175
IX.	γ -Chlorocyclobutyl Radicals	179
X.	δ -Chloropropargyl Radicals	179
XI.	δ -Chloroalkyl Radicals	179
XII.	δ -Chlorocyclohexyl Radicals	183
XIII.	Miscellaneous γ - and δ -Chloro Radicals	184
XIV.	ϵ -, ζ -, η -, and θ -Chloroalkyl Radicals	184
CHAPTER 6. BROMO-SUBSTITUTED RADICALS		187
I.	β -Bromoalkyl Radicals	187
II.	β -Bromocycloheptyl Radicals	235
III.	β -Bromocyclohexyl Radicals	236
IV.	β -Bromocyclopentyl Radicals	249
V.	β -Bromocyclobutyl Radicals	263
VI.	3-Bromo-2-Norbornyl Radicals	265
VII.	3-Bromoalkyl Radicals	268
VIII.	3-Bromocyclohexyl Radicals	281
IX.	3-Bromocyclopentyl Radicals	282
X.	4-Bromoalkyl Radicals	283
XI.	4-Bromocyclohexyl Radicals	283
XII.	Miscellaneous δ -Bromo Radicals	284
XIII.	ϵ -Bromoalkyl Radicals	285

XIV. 2-Bromovinyl Radicals	285
XV. $-\text{C}\equiv\text{C}-\dot{\text{C}}=\text{C}^<\text{Br}$ Radicals	286
CHAPTER 7. IODO-SUBSTITUTED RADICALS	295
I. β -Iodoalkyl Radicals	295
II. γ -Iodoalkyl Radicals	300
III. δ -Iodoalkyl Radicals	302
IV. ϵ -Iodoalkyl Radicals	303
CHAPTER 8. SULFUR-SUBSTITUTED RADICALS	305
I. β -Thiyl-Alkyl Radicals	305
II. β -Thiyl-Cyclohexyl Radicals	308
III. β -Thiyl-Cyclopentyl Radicals	327
IV. 3-Thiyl-2-Norbornyl Radicals	330
V. 3-Thiyl-2-Bicyclo[2.2.2]Octyl Radicals	331
VI. 3-Thiyl-Cyclobutyl Radicals	331
VII. δ -Thiyl-Alkyl Radicals	334
VIII. 2-Thiyl-Vinyl Radicals	334
IX. $-\text{C}\equiv\text{C}-\dot{\text{C}}=\text{C}^<\text{S}$ Radicals	341
X. $\text{C}=\text{C}-\dot{\text{C}}=\text{C}^<\text{S}$ Radicals	341
XI. Thiylmethallyl Radicals	341
XII. β -Sulfonylalkyl Radicals	344
XIII. 3-Sulfonyl-2-Norbornyl Radicals	344
CHAPTER 9. CYANO-SUBSTITUTED RADICALS	347
I. β -Cyanoalkyl Radicals	347
II. γ -Cyanoalkyl Radicals	353
III. δ -Cyanoalkyl Radicals	353
IV. γ -Cyanocyclobutyl Radicals	353
CHAPTER 10. VINYL-SUBSTITUTED RADICALS	355
I. β -Vinylalkyl Radicals	355
II. 2-Norbornenyl and Methylenenorbornyl Radicals . .	375
III. Bicyclo[2.2.2]Octenyl Radicals	403

IV.	3-Cycloalkenylcarbonyl Radicals	405
V.	Methylene cycloalkyl Radicals	409
VI.	3-Cycloalkenyl Radicals	409
VII.	7-Norbornenyl Radicals	412
VIII.	γ -Vinylalkyl Radicals	414
IX.	δ -Vinylalkyl Radicals	415
X.	ϵ -Vinylalkyl Radicals	421
