**UCLA Symposia on Molecular and Cellular Biology
New Series**

Series Editor

C. Fred Fox

Volume 1

Differentiation and Function of Hematopoietic Cell Surfaces

Vincent T. Marchesi and Robert C. Gallo, *Editors*

Volume 2

Mechanisms of Chemical Carcinogenesis

Curtis C. Harris and Peter A. Cerutti, *Editors*

Volume 3

Cellular Recognition

William A. Frazier, Luis Glaser, and David I. Gottlieb, *Editors*

Volume 4

Rational Basis for Chemotherapy

Bruce A. Chabner, *Editor*

Volume 5

Tumor Viruses and Differentiation

Edward M. Scolnick and Arnold J. Levine, *Editors*

Volume 6

Evolution of Hormone-Receptor Systems

Ralph A. Bradshaw and Gordon N. Gill, *Editors*

Volume 7

Recent Advances in Bone Marrow Transplantation

Robert Peter Gale, *Editor*

Volume 8

Gene Expression

Dean H. Hamer and Martin J. Rosenberg, *Editors*

Symposia Board

C. Fred Fox, Director
Molecular Biology Institute
UCLA

Members

Ronald Cape, Ph.D., MBA
Chairman
Cetus Corporation

Pedro Cuatrecasas, M.D.
Vice President for Research
Burroughs Wellcome Company

Luis Glaser, Ph.D.
Professor and Chairman
of Biochemistry
Washington University School
of Medicine

Donald Steiner, M.D.
Professor of Biochemistry
University of Chicago

Ernest Jaworski, Ph.D.
Director of Molecular Biology
Monsanto

Paul Marks, M.D.
President
Sloan-Kettering Institute

William Rutter, Ph.D.
Professor and Chairman
of Biochemistry
University of California Medical
Center

Sidney Udenfriend, Ph.D.
Director
Roche Institute

The members of the board advise the director in identification of topics for future symposia.

Preface

The papers presented in this volume derive from the 1983 Cetus-UCLA Symposium on "Gene Expression" held in Park City, Utah. The success of this meeting was due in large part to the excellent organizational skills of Sandy Malone and her UCLA staff.

The Symposium dealt with gene function and structure in a wide variety of biological systems. Researchers working on the molecular biology of prokaryotic, lower and higher eukaryotic systems were brought together to compare and contrast the regulatory mechanisms operating to control gene expression in different organisms.

We wish to thank Cetus Corporation for its generous sponsorship of this meeting. We also gratefully acknowledge gifts from: Abbott Diagnostics Division, Asahi Chemical Industry Co., Ltd., Beckman Instruments, Inc., Bristol-Myers Company, Industrial Division, E.I. du Pont de Nemours & Company, Genentech, Inc., Imperial Chemical Industries, Merck Sharp & Dohme Research Laboratories, New England Biolabs, Inc., Pfizer Central Research, Schering Corporation, Searle Research and Development, and Smith, Kline & French Laboratories. The generous support of these companies helped make this scientific meeting possible.

**Dean H. Hamer
Martin J. Rosenberg**
