AMERICAN AT ROLLS

AMERICAN PT BOATS IN WORLD WAR II

Volume Two

Victor Chun

Schiffer Military History
Atglen, PA

Dedication

To my wonderful wife, Susan, who has taken great care of me for more than 45 years, and my lovely daughter, Vicky, who has been a great help with this volume.

I would also like to dedicate this book to my late parents, Jinsie and Hong Cha, who instilled in me the discipline, perseverance and faith in God.

Book Design by Ian Robertson.

AMERICAN PT BOATS VOLUME TWO

Acknowledgments

This second volume would not have been possible without the help and support of the following people and organizations.

- Robert Biondi and Ian Robertson from Schiffer Publishing, who have been a great support since Volume I. Thank you for answering my numerous questions and allowing for this volume to be published.
- The PT Boat Museum's website "Message Board". I enjoyed reading and corresponding with other PT boat experts.
- Richard J. Washichek, the best graphic artist I have had the privilege to work with. His unique isometric drawings grace many pages of this book.
- Al Ross, who rescued the only drawing of PT 809 from oblivion.
- Frank J. Andruss, his private PT Boat Museum enables the public to view rare photos from his vast collection.

- Alyce N. Guthrie, Executive Vice President and Curator of the PT Boat Museum located in Germantown, TN. My research on PT boats would not have been possible without her and her daughter, Allyson G. Bethune's (Assistant to the Executive Vice President) professionalism and expertise.

- William Smallahaw, who provided me with Irwin Chase's patent for the Elcoplane. Without his help, the function of the louvers on the sides of the Elco boat would have been a guess at best.

- Kathy Brawn for her editing talent
- Ryan Baker, Frank Boyd, Alex Chun, Cathy Costello, Jeremiah Hergott and Dick Washichek for their endless patience and guidance working with me on the digital content of this book.

- Donald Brown, Steve Nugent, and Nathaniel Smith (their fathers served as PT boat skippers), who shared their respective fathers' photos.

- The U. S. Navy, the national archives, the PT Boat Museum, and the many people who provided me with the photos that are published in this book.

- Victoria Chun, my daughter, who helped me with this transcript and accompanied me on my research trip. Her typing speed is beyond my wildest imagination.

Foreword

Never have I encountered a PT boat veteran who called himself a hero. All the men I've known through PT boats, Inc. are humble. They always say they were just doing their job, the country needed them and they went. They went without question paying heavy prices along the four-year journey that was WWII.

I grew up with PT boats. On family vacations when I was a child, I remember my father stopping in so many towns, cities and farms to say hello or look for a PT veteran. Then the period of college, marriage, children and business interrupted my association with the organization. In 1982 it picked back up when I was asked to write some biographies to go in a 40-year history of PTs. Those writings grew into a full time job. It's a job that is so much more than a job. It sounds trite to say that, but it is so true. I am privileged to work for a remarkable organization of remarkable men and their families.

To say knowing, working for, and being with these men is an honor is an understatement of the greatest degree. My years in the PT boat veterans' realm and the success of their reunions, museum and archives could not be improved upon. Had I taken any other job, I wouldn't have ever known important men of such high caliber, nor what a role they played in WWII.

Generally speaking, if you describe something as "unique" in journalism class, the professor will chastise you. But I would use that word to describe PT boat men. During the war, the media latched onto the PT boat and the PT sailors and officers because the country needed articles and film that were uplifting. PT men were seen as dashing riders astride their charging steeds. Their deeds were widely published, so on the Home Front they were highly

regarded. Even so, most of the actions and operations were done quietly and unknowingly. Through stealth, conviction and perseverance they met enemies head-on. PTs challenged Axis navies in David and Goliath mode, putting the men at great risk. Yet, I've never heard them complain. In fact, many that I've known said they would do it all again. Many did go to Korea and a few to Vietnam. Through all the very close contact with the Axis, amid the carnage that comes with war and skirting death or coming head-to-head with it on their patrols, when they talk about WWII today, they do not complain about horrible conditions, long absences from home, or the great danger that so often slapped them in the face.

PTs were more frequently in contact and at close range with the enemy than any other surface vessels. They faced a world-wide battle under-supplied and ill-equipped. Yet they never received hazardous duty pay.

In my years as the board-appointed executive vice president, every veteran who has touched my life has brought me another step closer to understanding what a watershed event the war was. I believe with all my being that we Americans will forever be affected by these men riding those beautiful little expendable wooden boats. It is my honor to know the men who rode the boats, manned the tenders, and worked ashore in the PT bases. It is my privilege to help in some small way to keep their stories and history alive.

PT men may not have received their due from the Navy, the boats may not have displaced the amounts a battleship did, but I stand in awe of them.

How could I not?

Alyce N. Guthrie
Executive Vice President WWII PT Boat Museum and Archives

Introduction

This volume has enabled me to present the PT boats' service and contributions in World War II. Beyond the bravery and sacrifices of the PT boat crews and support groups throughout the war, there were three significant historical moments for PT boats. First, to defend the Philippines against a Japanese invasion six PT boats of Squadron 3, under the command of Lt. Bulkeley, were the only Navy to engage the enemy. Although all six boats were lost, their heroic actions bought the U. S. time to rebuild the new Navy. Second, during the early U. S. invasion of Guadalcanal, the U. S. warships were forced to make a tactical retreat due to the vastly superior Japanese forces. The PT boat squadrons were the only U. S. Navy forces that stayed behind to combat the Japanese destroyers shelling the beleaguered Marines on the island. Although vastly outnumbered and outgunned, the PT boats' guerilla type attacks

at night so unnerved the Japanese that the bombardment of Henderson Field stopped. For a while, the survival of the Marines and the entire campaign was in doubt. Third, at the Battle of the Surigao Strait, PT boats made first contact with the Japanese fleet as they entered the southern entrance of the strait. Several torpedo hits were observed. However, the most important part of their mission was to report the position of Japanese ships as they moved up the strait. With such intelligence, the U. S. capital ships were able to position themselves to cross the Japanese ships' "T" and destroy them.

In addition, like Volume I, this volume is also a pictorial presentation. Many modelers have contacted me through the years for pictures and drawings in order to provide the most authentic model. Therefore, I have specifically added drawings and pictures of different types and makes of PT boats from the Pacific to the European Theater of Operation.
