137 Chaonei Dajie, Beijing, China

ISBN 7-80003-021-0/TM.01

统一书号, 15262.14

First Printing in August, 1987

TOPICS

PART ONE

P --- Plenary Lectures	P-1
A --- Field Theory and Calculation Method Applied to Electrical Machines	1
B --- Theory, Modelling and Identification	173
C --- Asynchronous Machines	266
D --- Power Electronics and Asynchronous Machines	368

PART TWO

E --- Power Electronics, Synchronous Machines and DC Machines	537
F --- Special Machines	700
G --- Wind-Driven Machines	853
H --- Design and Manufacturing Problems	889
I --- Testing Technology and Instruments	1007
Supplement Papers	S-1 S-49

CONTENTS : PART TWO

E --- Power Electronics, Synchronous Machines and DC Machines

E 1	<i>Atanasiu G., Nica E.</i> The Analysis of the Electromagnetic Torque of the Self- Controlled Synchronous Motor	538
E 2	<i>Bausch H., Lange B.</i> Permanent Magnet AC Servomotors with Sinusoidal Stator Currents	542
E 3	<i>Bellou G.K., Safacas A.N.</i> Investigation of a System for Generating High Current Pulses	547
E 4	<i>Carpinelli G., Gentile G., Piccolo A., Rotondale N.</i> Analysis of Generation Systems for Unbalanced Networks	552
E 5	<i>Chatelain J., Tu Xuan M., Kawkabani B.</i> Damping of the Unbalanced Magnetic Pull in Machines with Rotor Eccentricity by Using Windings with Parallel Paths	558
E 6	<i>Chen Heng</i> State-Space Analysis of Synchronous Machine Performance	562
E 7	<i>Chen Mingde, Wei Meiqi</i> Considerations of Designing PM DC Motors	566
E 8	<i>Chen Xianfeng, Cai Lijuan, Luo Xiaogang</i> Microprocessor γ Control of a Three-Phase Cycloconver- tor for a Brushless Synchronous Motor	570
E 9	<i>Chen Xianming, Li Nailu</i> A Universal Regulator for Thyristor Excitation of Large A.C. Generators	574
E10	<i>Del Pizzo A., Pagano E., Perfetto A.</i> The Smallest Suitable D.C. Commutating Machine	579
E11	<i>Diao Shiliang, Chen Ziqiang</i> Coordinated Application of Excitation System of Synch- ronous Machine on the Small Disturbance Stability in Multimachine System	584
E12	<i>Dudzikowski I.</i> The Method of Calculation Magnetic Circuits of D.C. Motors Excited by Two-Component Magnets	588
E13	<i>Fang Chengzhi, Sun Yunpeng</i> Research on Electric Driving System and Servomotor for Industrial Robot	592

E14	<i>He Youguan</i> The Analysis of the Salient-Pole Synchronous Machine as the Equivalent Nonsalient-Pole One	594
E15	<i>Huang Jun, Zhang Linzheng</i> The Transient Analysis of Reswitching of a Synchronous Generator after Faults	598
E16	<i>Huang Xiaohe, Zhang Wenju</i> A New Way of Adjusting Excited Energy and Transient Studying of NSBSM	602
E17	<i>Jakubowicz A.</i> Hierarchical Digital Design of an Autonomous Actuator Module for Robotics: Constraints on the Static Converter	606
E18	<i>Jevremović R.M.</i> A New Method of DC Series Motor Parameter Estimation	610
E19	<i>Jiang Zongdao</i> Synchronous Motor Protection on Falling-Out of Synchronism and Its Restoration with Load Undiminished	613
E20	<i>Kang Jie, Qi Zhizong, Chen Peiyuan, Yan Lietong, Yao Rouping</i> The Permanent Magnet DC Motor with Compound Characteristic	617
E21	<i>Kelemen A., Imecs M.</i> Analogy Between DC and Synchronous Machine for Field-Oriented Control	621
E22	<i>Khater F.M.H.</i> A Digital Control Scheme for Thyristor Excitation Systems	625
E23	<i>Li Jianjiu, Yin Jiaji, Lin Jinming, Yang Genwen</i> The Method of Time-Space Symmetrical Components and Its Application	629
E24	<i>Liu Bochun</i> Optimal Adaptive Control Servosystem with Pulse-Width Modulated Amplifier for DC Motor	633
E25	<i>Liu Taizhang, Ye Changguo, Zhang Weixian</i> An Exciterless, Brushless, Three-Phase A.C. Generator with Thyristor-Direct-Excitation	637
E26	<i>Liu Xing</i> Application of Digital LQI Controller to Microprocessor Based Motor Drives	641
E27	<i>Lu Jiayuan, Wang Yizhi</i> A DC Motor Speed Control System Using PLL Technique	645
E28	<i>Nafpaktitis D.I., Safacas A.N.</i> A Method of Pulse Generating for an Improved Starting of a Synchronous Machine FED by Current Inverters	649

E29	<i>Oyawa J., Toba S., Higuchi T., Yamada E.</i> The Characteristics of Half-Wave Rectified Brushless Synchronous Motor	654
E30	<i>Pan Guanhai</i> A Criterion for Transient Stability of Synchronous Machines	658
E31	<i>Sakarellos A.P., Safacas A.N.</i> Investigation of the Operation of a Self-Controlled Synchronous Motor Drive System	662
E32	<i>Tso S.K., Wei L.K.</i> A Novel Implementation of High-Performance Synchronous-Motor Drives	667
E33	<i>Tung Tiaosheng, Liu Xing</i> The Minimum-Energy Consumption Control of Electric Motor-Driven Considering Armature Inductance and Its Singular Solution	671
E34	<i>Vasile C.</i> On the Optimization of Electrical Drive Systems with Elastic Coupling	676
E35	<i>Vauhkonen V., Mård M.</i> Compensated Field-Oriented Control of Cycloconverter-FED Synchronous Motors in Rolling Mill Drivers	679
E36	<i>Wei Wende, Gue Jingcun, Xie Guoliang, Fu Jinhai</i> Theoretical Analysis and Design of Center-Tapped Single Phase Synchronous Motor	683
E37	<i>Wiart A.</i> Drive Systems Using Synchronous Motors Supplied via Natural Commutation Inverters---Applications in Industry and Railway Traction	687
E38	<i>Wu Shuolin</i> The Development of Some Parameters Equations of D.C. Machine and Their Application in Design	691
E39	<i>Xu Naibo</i> Accurate Determination of the Current Locus of a Synchronous Motor Operating from a Constant Voltage Supply	693
E40	<i>Zhang Shugin</i> A New Type of Single Phase Synchronous Generator with Induced Excitation	697

F --- Special Machines

F 1	<i>Avallone M., Isastia V., Scarano M.</i> A Mathematical Model for Hybrid Stepping Motors Modelling	700
-----	---	-----

F 2	<i>Bharadwaj D.G., Gopalakrishnan</i> Computer Aided Design of Printed Circuit DC Motors	706
F 3	<i>Cheng Shukang, Wang Zongpei</i> Detailed Analysis of Magnetic System in a Hybrid Step Motor	710
F 4	<i>Chiang Manjun</i> A New High Accuracy Angular Position Transducer VR Two Speed Resolver	714
F 5	<i>Chung Taekynug, Hahn Songyop, Won Jongsoo, Park Minh</i> Dynamic Performances of a Rotary-Linear Step Motor	718
F 6	<i>EL-Drieny S.</i> An Experimental Investigation of a Low Speed Double-Sided Linear Induction Motor	721
F 7	<i>Eastham T.R., Yuan Hongping, Dawson G.E.</i> Pole Shaping in Switched Reluctance Motors	725
F 8	<i>Evans P.D., Brown D., Eastham J.F.</i> A Study of Permanent Magnet Disc Motor Design	729
F 9	<i>Favier P., Schoorens H.</i> Design of a Vibration Absorber by Means of a Single or Double-Effect Reluctance Actuator	733
F10	<i>Gao Chao, Xiao Haibing</i> Direct Digital Control of Switched-Reluctance Drives	738
F11	<i>Gierczak E., Mendrela E.A.</i> Calculation of LIM Performance Taking into Account End Effects and Current Asymmetry	742
F12	<i>Hanitsch R., Neubauer L.</i> Permanent Magnet Motor with Neodymium-Iron-Boron Magnets	746
F13	<i>Hu Chun, Hu Yihua</i> Design and Analysis for DC linear Motors with Rare-earth Permanent Magnets	750
F14	<i>Huang Wanmin</i> A New Reluctance Motor	754
F15	<i>Jin Nianzu, Mao Xixiang</i> Performance Prediction and Design of Limited Angle Torque Motor with BEM	758
F16	<i>Kordecki A., Weglinski H.B.</i> PM Structures of Concentrators of Magnetic Induction for Electrical Machines	762
F17	<i>Laporte B., Huang F.</i> About a Special Winding for a Linear Induction Motor	766

F18	<i>Li Zhongjie, Cao Zhitong</i> The Acceleration Control of the Stepping Motor	769
F19	<i>Liu Weicheng, He Xiangji</i> Nonlinear Model for Predicting the Pullout Torque/Frequency Characteristics of a Hybrid Stepping Motor under Different Types of Driver	773
F20	<i>Lou An, Xiong Qiusi, Yang Jie</i> Stepping Motor Minimum Time Optimal Control	777
F21	<i>Mailfert A., Kubler H., Zhou J.</i> Hybrid Stepping Motors Comparative Experimental Results	781
F22	<i>Morar R., Dăscălescu L., Iuga A.</i> Control Procedures for DC-Type Hybrid Step Motors Used in Electrode-Positioning Systems of Electrostatic Separators	784
F23	<i>Qin Reifeng, Zhong Ruyu</i> The Starting Process Analysis of the Hysteresis Motor by Using the State Variable Method	788
F24	<i>Rahman M.A., Osheiba A.M.</i> Effects of Shunt Compensation on the Performance of Hysteresis-Reluctance Motors	791
F25	<i>Tan Zuowu, Yun Jialing</i> Investigation of Permanent-Magnet Oscillation Motor	795
F26	<i>Tian X., Glaize C.</i> The Feeding Modes of Three-Phase Reluctance Machines	799
F27	<i>Toacșe G., Romanca M., Pană G.</i> Electronic Step Transducer for PM Hybrid Stepping Motor	803
F28	<i>Utsumi T.</i> Characteristics by the Change of Scale of Annular Linear Induction Motor	807
F29	<i>Wang Hui, Li Qingnian, Xu Panxi</i> A Reluctance Multipole Resolver	811
F30	<i>Wang Xiaoming, Wang Zongpei</i> A New Type Step Motor Unit	815
F31	<i>Wang Zongpei, Zeng Qinggan</i> Analysis and Suppression of the Resonance in Stepping Motors	819
F32	<i>Wu Shijie, Chen Jinghua</i> Characteristics of Single-Phase Hysteresis Motor with Slot Bridge Operated with Voltage Invertor	823
F33	<i>Wu Zhigou</i> The Auxiliary Generator in Rare-Earth Cobalt Alternating Current Permanent Magnet Electrical Machine	827

F34	<i>Xu Jinxing</i> Speed Control of a Step Motor with Phase-Locked Loop Regulation	831
F35	<i>Xu Shangang, Su Laibing, Zhu Weihang</i> The Incremental Motion System of Planomotor	834
F36	<i>Yun Jialing, Tan Zuowu</i> Improvement of Position Accuracy of Step Motors	837
F37	<i>Zheng Zhihui</i> Miniaturization of High Property Moving Coil Motor Tachometer Units	841
F38	<i>Zhou E, Lin Mingyao</i> Starting Performance of the New Type of Reluctance Motors	845
F39	<i>Zou Jibin, Lu Yongping</i> Damping Step Motors by Ferrofluid	849

G --- Wind-Driven Machines

G 1	<i>Chang Feng, Yang Bingshou, Jiang Jiangow</i> An Approach for Reckoning Fuel Saving of Wind-Diesel Power System	853
G 2	<i>Ioannides M., Vernardos P., Tegopoulos J.A.</i> Steady-State Characteristics of a Wind Driven Self-Excited Asynchronous Generator in both Autonomous and Nonautonomous Operation	856
G 3	<i>Li Zhaoping</i> The Design Charactor of Induction Wind-Driven Generator Connected with Electrified Wire Netting	860
G 4	<i>Lu Jian, Wang Chengxu</i> The Simulation System of Wind Turbine Performance Using a Microcomputer Controlled SCR-DC Motor	865
G 5	<i>McQuin N.P., Williamson S.</i> Design of a Single-Phase Induction Generator for Aero-Turbine Applications	869
G 6	<i>Ni Shouyuan, Chang Zhenyan</i> The Study of Variable-Speed Constant-Frequency Generators Using Field Modulation and Their Applications for Wind-Electric Systems	873
G 7	<i>Ueda R., Sonoda T.</i> Relation between Self-Excitation Modes and Electromagnetic Torque in Self-Excited Type Induction Generator	877
G 8	<i>Wang Jinhui, Wang Chengxu</i> The Variable Speed and Constant Frequency Generator Using Monoboard Microcomputer Control	881

G 9	<i>Wu Hanguang, Novotny D.W.</i> Controlled Single Phase Self-Excited Operation of Induction Generators	885
 <u>H --- Design and Manufacturing Problems</u>		
H 1	<i>Belmans R., Witte J.D., Vandenput A., Geysen W.</i> Theoretical and Experimental Analysis of the Stator Natural Frequencies of Induction Motors	889
H 2	<i>Chen Qiaofu, Li Xiangcheng</i> The Optimization Design and Program of Large Transformers	893
H 3	<i>Chen Yicheng, Tang Renyuan, Xie Shuming</i> The Poly-Objective Design Optimization For Nd-Fe-B PM Synchronous Motor	896
H 4	<i>Dăscălescu L., Iuga A., Morar R., Neamtu V.</i> Copper Recovery from Wastes in Electrical Machines Industry	899
H 5	<i>Deng Changcheng</i> Exploration to Series Design of Hydro-Generators	903
H 6	<i>Feng Runxiang, Xu Suqing, Huo Hongxuan</i> Research Work to Improve the Reliability of Shearer Motor	907
H 7	<i>Fu Ziqing</i> Testing and Study of the Effect of Copper Shield in the Stator End Region of QFSN-300-2 Turbogenerator	910
H 8	<i>Guo Jianhua, Liu Renxiu, Wu Xiangzhong, He Jiayou Wang Jikang</i> Designing and Manufacturing the High-Voltage Turbo-Generator	914
H 9	<i>Hribernik B.</i> Designing of a Series of IEC Sized Small Induction Motors Using CAD and Optimization Methods	917
H10	<i>Hu Yujun, Cheng Liangyu</i> The Latest Optimum Design Technique of Three-Phase Asynchronous Motor	921
H11	<i>Li Zhongwu, Yu Yongxian</i> The Relations between Overall Dimensions and Basic Parameters of Submarine Main Propulsion D.C. Machine and Determination of Its Pole-Pair Number	925
H12	<i>Liao Shaobao, Gu Guobiao, Li Zuozhi</i> Self-Circulating Evaporative Cooling System Applied to Electrical Generators	929

H13	<i>Lin Defang</i> Optimized Design of Structure of the Magnetic Circuit for Permanent-Magnet Motors	933
H14	<i>Liu Zhongbai</i> The Effect on the Performance of Turbogenerator by Changing the Shape and Distribution of Its Rotor Slots	937
H15	<i>Mukosiej J.</i> A Comparison of Two Methods of the Calculation of Tem- perature Rises of Electric Machines	941
H16	<i>Pang Qihuai</i> The Study of Separating Electromagnetic and Mechanic Noise for Fraction Horsepower Asynchronous Motor	946
H17	<i>Qiu Changtao</i> Study of Optimisation Techniques for Electric Machine Design	949
H18	<i>Ruelle G.</i> Modern Modular Design Turbogenerators in the 150 to 700MW Range	953
H19	<i>Shangguan Yuanding</i> The Impedance Calculation of a Dual Split-Core Type Transformer	957
H20	<i>Sheng Changda</i> The Prospect of Application of Evaporative Cooling Technique on Large Generator from the View of Operation	961
H21	<i>Wang Fengxiang, Zhang Bingyi</i> Waveform Optimization Design of a Converter AC Machine	965
H22	<i>Witt W.</i> The Sign of Zone Factor of Short Cord Windings	969
H23	<i>Xian Weirong, Jiang Zongrong</i> Parallel Searching Technique in the Multi-Objective Optimal Design of REPM Generators	973
H24	<i>Xie Shiyong</i> Evaporative Cooling of Electrical Machine	977
H25	<i>Xiong Jiaju</i> Certain Tests and Studies for Gap Pick-up Hydrogen Cooled Rotor of DFEM's Large Turbine Generators	981
H26	<i>Yu Xinchang</i> Optimum Design of Energy-Saving Induction Motor	985
H27	<i>Zeng Wenyan, Gu Guobiao</i> The Evaporative-Cooling of Turbogenerator Rotors	989
H28	<i>Zhang Juntao, Liang Xuekun, Li Zuozhi, Gu Guobiao</i> Analysis of Application of Evaporative Cooling to Large Rating Hydroelectric Generators	993

H29	<i>Zhang Shijun, Li Xiaojie, Yan Rongsheng</i> The Under-Excitation Tests of the Hydraulic Turbine Generator TSL 260/79-8	996
H30	<i>Zhao Zhengming</i> A New Systematic Analysis Approach for Determination of the Heating and Cooling State of Electric Machine	999
H31	<i>Zhu Jimei, Shao Yasheng</i> Modal Influential Factor Method for Dynamic Balancing of Large Turbo-Generator's Flexible Rotor	1003
 <u>I --- Testing Technology and Instruments</u>		
I 1	<i>Chen S.S., Feng F.S.</i> An Example of Detection of Insulation Overheated with Generator Core Monitor	1007
I 2	<i>Chen Shide, Wu Keqing, Zhang Jiming</i> Microcomputer Control Instrument for Measuring Instant- aneous Rotational Speed	1010
I 3	<i>Chen Xiaoyang, Suo Jian, Wang Zhenqing</i> Automatic Measurement of Motor Time Constant	1014
I 4	<i>Dou Yuqin, Xu Boxiong</i> Fast Automatic Measurement of Winding Resistance of Large Power Transformer	1018
I 5	<i>Dzierżanowski A., Hickiewicz J., Szymaniec S., Wach P.</i> Diagnostic Investigations of Induction Machines with Squirrel-Cage Defects	1021
I 6	<i>Gao Wenjie, Yang Chuantai, Zeng Liquan</i> Microcomputer-Based Measuring System for the Perfor- mance Testing of Induction Machines	1025
I 7	<i>Hetman A., Isalski L., Makuch J., Starzak S.</i> The Monitoring and Alarm System for High Accuracy Measurements of Temperature	1030
I 8	<i>Hickiewicz J., Szymaniec S, Wach P</i> Measuring Methods of Induction Machines Resonant Frequencies	1033
I 9	<i>Karmaker H.C.</i> Prediction and Measurement of Parasitic Stray Losses in Large Synchronous Machines	1037
I10	<i>Le Maosheng, Weng Jinshan, Tang Weijin</i> The Method and Instrument for Fast Measurement of the Resistance (Temperature-Rise) of Heated Stator Winding of Asynchronous Machines	1040

I11	<i>Lin Zairong</i> A Micro Computer-Based Instrument for Analyzing Motor Wave	1043
I12	<i>Lou Yongle, Ren Zhongyue</i> A New Testing Method of Temperature-Rise Test of Synchronous Generators by Microcomputer	1047
I13	<i>Peng Youyuan</i> The Prediction of the Induction Motor Full Load Stator Winding Temp. Rise	1051
I14	<i>Topa I, Gogioiu A.</i> Researches Concerning the Calculation of Electric Machines and Energy Recovery Equipments in Running-in Installations	1054
I15	<i>Vas P., Brown J.E.</i> Monitoring the Electromagnetic Torque of Multi-Phase A.C. Machines	1058
I16	<i>Xia Houchun</i> The Methods of Measuring and Analyzing Vibrations of Electrical Machines	1062
I17	<i>Xu Boxiong</i> An On-Line Method for Measuring the Stator Winding Temperature-Rise of an AC Machine by a Single Board Microcomputer	1066

APPENDIX

AUTHOR - INDEX

A - 1

Supplement Papers

P 8	Reichert K., Neidhöfer G. Trends in the Development of Medium and Large Electrical Machines	S-1
B25	Fransua A. The Conservation of the Reactive Power in A.C. Three- Phase Electrical Machines	S-7
B26	Kudarauskas S., Vaupsas J. Energetical Fluxes in the Electrical Machines	S-10
C27	Attaianese C., Del Pizzo A., Nuccio S., Ricco Galluzzo G. Influence of the Saturation on the No-Load Test of Asynchronous Motors	S-14
D44	Benzi F., Petrecca G. The Role of Electrical Variable Speed Drives in Industrial Energy Conservation	S-19
D45	Magureanu R., Solacolu C. A Novel Approach to the Analysis of Induction Motors PWM-Inverter-Fed	S-24
F40	Simion E., Munteanu R., Topa V. Double-Acting Parametric Ferroresonant Micromotor in Levitation Regime	S-28
F41	Vasile N., Hogeia F. Comparative Thermal Performances of the DC and AC Servomotors	S-32
H32	Bhadra S.N. An Approach to Obtain Hysteresis Curves of Trans- formers from No-Load Current and Loss Measurements	S-36
H33	Moraru A., Anghel F. High Frequency Natural Modes of Oscillation in Two- Strand Twin-Interleaved Transformer Windings	S-40
H34	Verma S.P. Shaft-Potentials and Bearing Currents in Modern Turbogenerators	S-44

Note: All the supplement papers were received late
because of the mail delay
