No part of this book may be used or reproduced in any form or by any means, or stored in a database or retrieval system, without prior written permission of the publisher except in the case of brief quotations embodied in critical articles and reviews. Making copies of any part of this book for any purpose other than your own personal use is a violation of United States copyright laws. For information, address Que Corporation, 201 W. 103rd Street, Indianapolis IN, 46290. You may reach Que's direct sales line by calling 1-800-428-5331.

Library of Congress Catalog No.: 97-69798

ISBN: 0-7897-1263-6

This book is sold *as is*, without warranty of any kind, either express or implied, respecting the contents of this book, including but not limited to implied warranties for the book's quality, performance, merchantability, or fitness for any particular purpose. Neither Que Corporation nor its dealers or distributors shall be liable to the purchaser or any other person or entity with respect to any liability, loss, or damage caused or alleged to have been caused directly or indirectly by this book.

99 98 97 6 5 4 3 2 1

Interpretation of the printing code: the rightmost double-digit number is the year of the book's printing; the rightmost single-digit number, the number of the book's printing. For example, a printing code of 97-1 shows that the first printing of the book occurred in 1997.

All terms mentioned in this book that are known to be trademarks or service marks have been appropriately capitalized. Que cannot attest to the accuracy of this information. Use of a term in this book should not be regarded as affecting the validity of any trademark or service mark.

Screen reproductions in this book were created using Collage Plus from Inner Media, Inc., Hollis, NH.

About the Authors

Nelson Howell is a veteran of the computer industry. Starting with IBM Mainframes in 1967, he has survived the changes from mainframes to mini's to microcomputers. He has had the opportunity to meet some of the founders of these computers including J. Presper Eckert and Admiral Grace Hooper. In addition to writing, he is now engaged in providing support to users of software for IKON Office Solutions. Now at home in Tucson, Arizona, he is surrounded by his family of four sons and a very tolerant wife.

Steve Banick, previously (and proudly) known as “the Network and Graphics Geek” in his past life as a corporate drone, has now found new life as a fledgling graphic designer. He still dabbles far too often in the technical area he claims to want to distance himself from. Principal of Steven Banick & Associates, he now works as a freelance designer for traditional and electronic media. Although he is married, he says he has dedicated his life to a greater purpose—to rid his house of cable television's influence.

Wayne Berry is the editor of 15 Seconds at <http://www.15Seconds.com>. The 15 Seconds Web site is a free resource for developers working with Microsoft Internet Solutions. Wayne has worked at Freeshop International (<http://www.freeshop.com>) as the director of development. He also worked for Microsoft at <http://www.microsoft.com> and served as software developer on the Microsoft Office Web team. You can reach Wayne at waynebe@15Seconds.com.

Chris Denschikoff has gotten away with being published for four years now. With documents as diverse as technical manuals, advertising copy, and interviews with rock-and-roll stars under his belt, he hopefully is up to the challenge of working for the Que Publishing sweatshop. Currently, he writes for an Edmonton local Arts & Entertainment magazine, *SEE*, as well as freelance work such as the books you're holding. He also does design work in his spare time.

Brian Farrar received his B.A. from Wabash College in 1985 in English and Economics. He completed an MBA from Indiana University in 1987. He began his career at GTE and progressed through a series of positions until in 1994 he left to start an Internet and intranet consulting practice for Metamor Technologies. Through this consulting practice, Brian has helped some of the largest companies in the world decide on and deploy Internet technologies to solve business problems.

Adam B. Plummer is a consultant within the Internet group of Metamor Technologies, a Chicago-based information technology consulting firm and Microsoft Solutions Provider. He has been involved with various Internet technologies since his days as an undergraduate in the College of Engineering at the University of Illinois at Urbana-Champaign. At Metamor, his current responsibilities include Web server design and administration, database design, and interactive Internet and intranet development. His experience covers the UNIX and Windows platforms, using a vast array of programming and scripting languages. You can reach Adam via Internet mail at adam.plummer@metamor.com or by telephone at (321) 251-2455.

We'd Like to Hear from You!

As part of our continuing effort to produce books of the highest possible quality, Que would like to hear your comments. To stay competitive, we *really* want you to let us know what you like or dislike most about this book or other Que products.

Please send your comments, ideas, and suggestions for improvement to:

The Networking Team

Thank you in advance. Your comments will help us to continue publishing the best books available in today's market.

Thank you,

The Networking Team

Contents at a Glance

Introduction

I Getting Ready for IIS

- 1 Understanding Web Servers 9
- 2 Planning for IIS 23
- 3 Understanding Windows NT and IIS 41
- 4 Connecting to the Internet 59

II Installing IIS and Related Services

- 5 Installing IIS 77
- 6 Installing and Using FTP Services 105
- 7 Installing and Using Mails Services 129
- 8 Installing and Using News Server Components 151
- 9 Broadcasting with NetShow 175
- 10 Understanding ISAPI 219
- 11 Understanding SQL Server 251
- 12 Installing and Understanding the Index Server 273
- 13 Using the Microsoft Management Console (MMC) 301

III Administration of IIS

- 14 Managing Server Logs 319
- 15 Performance Tuning 345
- 16 Understanding and Planning for Server-Side Loading 375
- 17 Microsoft Site Server: Using the Suite of Server Management Tools 397
- 18 Troubleshooting Techniques for Your Server 415

IV Understanding IIS Production and Security Requirements

- 19 Be Your Own ISP: Allowing Dynamic User Access 431
- 20 Firewalls and Data Security 461
- 21 Secure Transactions with IIS (HTTPs) 475
- 22 Advanced Security Concepts 495
- 23 Client Server Development 517

V | Developing Web Sites with IIS and Microsoft Technologies

- 24 Using Active Server Pages on Your Site 537
- 25 Building Pages with VBScript 559
- 26 Building Pages with Java and JavaScript 587
- 27 Building Database Access with the Internet Database Connector 619
- 28 Developing Advanced Data Connector Content 643
- 29 Developing with ActiveX Data Objects 659
- 30 Marketing Your Site 685
- 31 Proposing, Justifying, and Measuring the Success of Your Site 701

VI | Appendixes

- A Add-Ons and Third-Party Products, Monitoring Tools, and Applications 719
- B Using Internet Browsers 729
- C Installing TCP/IP Support for Windows 3.x Clients 733
- D Installing SQL Server 743
- E Installing and Configuring Windows NT Server 757
- F ODBC 783

- Index 797

Table of Contents

Introduction 1

- What To Expect From IIS 2
- Who Should Use This Book 2
- How To Use This Book 2
- Conventions Used In This Book 6

I | Getting Ready for IIS

1 Understanding Web Servers 9

- Understanding the Web 10
 - Communications Architecture of the Web 10
- Functions of the Web Server 13
 - Authentication 14
 - URL Mapping 14
 - Creating a CGI Environment 16
 - Creating an ISAPI Environment 18
 - Sending Response Data 18
 - Logging and Tracking Resources 20
 - Pulling it All Together 21
- From Here... 21

2 Planning for IIS 23

- Finding a Server 24
- Identifying Your Audience and Content 24
- Getting Ready for Your Server 25
 - Getting an IP Address 25
 - Domain Names and InterNIC 25
 - Internet versus Intranet 26
 - ISPs, T1s, and 56-K Lines 26
- Reviewing Internet Services and Protocols 26
 - Sockets and Stacks 27
 - File Transfer Protocol 27
 - Gopher 29

The Web	29
HTTP	31
HTML	31
Understanding the IIS Architecture and IIS Services	31
Network Components	31
Internet Service Manager	32
IIS Services	32
Dynamic Web Applications	33
Security with IIS	33
Windows NT Performance Monitor	34
Logging and Statistics with IIS	34
Searching Your Web Site	35
Overview of IIS Server Attributes	35
Understanding Multihome Servers	37
Using Multiple Servers	37
Looking at Databases in IIS	38
Testing and Staging Your Server	38
From Here...	38

3 Understanding Windows NT and IIS 41

Testing IIS Installation	42
IIS Software Requirements	44
Using Windows NT with TCP/IP	44
Using Database Services	45
Understanding Windows NT	47
Using NTFS	47
Using the User Manager	49
Understanding Windows NT Services	50
DCOM Registration and the Registry	51
Using Internet Information Server	53
Understanding Directory Access via IIS	54
Managing User Accounts	55
From Here...	57

4 Connecting to the Internet 59

Internet Connectivity Architectures	60
The Isolated Web Segment	60

Packet Filter Gateway Web Connectivity	63
Bastion Host Web Connectivity	66
Choosing the Type of Internet Connection	68
Choosing a Dial-Up or a Dedicated Connection	69
Choosing the Right Bandwidth	70
Choosing the Right ISP	72
Finishing Your Web Site Plan	73
From Here...	73

II | Installing IIS and Related Services

5 Installing IIS 77

Starting the Installation	78
Examining the Components	88
Certificate Server	88
Internet Mail Server	89
Internet News Server	89
Microsoft Script Debugger	89
Microsoft Site Server Express—Posting Acceptor	90
Microsoft Site Server Express—Site Analyst	90
Microsoft Site Server Express—Usage Analyst	90
Microsoft Site Server Express—Web Publishing Wizard 1.5	90
Microsoft Transaction Server	92
Windows Scripting Host	92
Configuring the Internet Web Site	92
Creating a New Web Site	92
Creating a New Virtual Directory	95
Configuring a Web Site and a Virtual Directory	97
From Here...	103

6 Installing and Using FTP Services 105

Understanding Basic FTP Setup	106
FTP Overview	106
FTP Platform Independence	106
Connecting with the FTP Protocol	107

Understanding FTP Clients	107
Windows NT Command-Line Client	108
The WS_FTP PRO Client	110
Using a Web Browser as an FTP Client	112
Understanding FTP Users	114
Public Users	114
Broad Group Private Users	114
Special Group Private Users	114
Individual Emergency Private Users	115
Individual Private Users	115
Understanding FTP Virtual Servers	115
Understanding the FTP Root or Home Directory	118
Creating and Using FTP Virtual Directories	119
Securing FTP	121
Logging FTP Access	123
From Here...	126

7 Installing and Using Mail Services 129

Understanding the SMTP Protocol	130
Understanding User Agents and Message Transfer Agents	131
Examining the Structure of a Mail Message	132
Envelope	132
Headers	132
Body	133
Reviewing SMTP Procedures	133
Mail	133
Forwarding	134
Verifying	135
Expanding	135
Sending and Mailing	135
Opening and Closing	136
Changing Roles	136
Reviewing SMTP Commands	136
Looking at SMTP Replies	137
Looking at the Key Features of Microsoft Internet Mail Server	137

Reviewing Hardware and Software Requirements for Microsoft Internet Mail Server	138
Client Requirements or “Other SMTP Server”	138
Server Requirements	138
Installing Microsoft Internet Mail Server	139
Configuring Internet Mail Server	140
Setting Up the SMTP Site	140
Setting Up Security	145
Creating Message Settings	146
Determining Delivery Options	147
Configuring Remote and Local Domains	148
Understanding How Internet Mail Server Works	148
Local Delivery	148
Remote Delivery	149
From Here...	150

8 Installing and Using News Server Components 151

Reviewing System Requirements for the News Server	152
Looking at the Posting Message Format	152
From Header Line	153
Date Header Line	154
Newsgroups Header Line	154
Subject Header Line	154
Message_ID Header Line	154
Path Header Line	154
Optional Header Lines	154
Understanding the Network News Transfer Protocol	155
Commands within NNTP	155
Responses within NNTP	156
Installing Microsoft News Server	157
Configuring News Server	158
The News Site Tab	158
The Security Accounts Tab	162
The NNTP Settings Property Page	164
The Home Directory Tab	164
The Directory Security Tab	165
The Groups Tab	167

Testing the News Server	168
Adding an Expiration Policy	172
From Here...	173

9 Broadcasting with NetShow 175

Setting Up NetShow	176
NetShow Needs	176
Installing NetShow Server and Content Creation Tools	179
Equipping Your Clients	181
Understanding NetShow	182
NetShow Basics and Terminology	182
What Are Streams and Programs?	183
Channels and Announcements	184
Overview	184
Creating Content	185
Production	186
Building ASFs	189
The ASF Editor	191
Converting Existing Audio with the WAVToASF Tool	195
Converting Existing Video with the VidToASF Tool	195
Live Streams with the Real-Time Encoder Tool	196
Scripting Your ASFs	200
Testing	200
Delivering Content	201
Playing Stand-Alone	201
Launching the Player from a Page	202
Embedding the Player in a Page	203
NetShow Administrator	204
From Here...	216

10 Understanding ISAPI 219

Understanding the ISAPI Architecture	220
ISAPI versus CGIs	220
ISAPI and DDLs	220
The ISAPI Filter	221
Understanding ISAPI Applications	221
Using Extension Control Blocks	223

Using the <i>CHttpServer</i> Class	225
Using the <i>CHttpServerExtension</i> Class	227
Using the <i>CHtmlStream</i> Class	229
Understanding ISAPI Filters	230
Using the <i>CHttpFilter</i> Class	230
Using the <i>CHttpFilterContext</i> Class	238
Building a Simple ISAPI DLL	241
Understanding Parse Maps	241
Using the Visual C++ ISAPI Wizard	243
Installing ISAPI DLLs in IIS 4.0	247
From Here...	250

11 Understanding SQL Server 251

Why the Move to SQL Server?	252
Understanding Relational Features of SQL Server	253
Exploring Client/Server Features of SQL Server	255
Examining SQL Server Features and Components	258
Devices and Databases	259
Transact-SQL	259
Command-Line Applications	261
Applications	264
From Here...	271

12 Installing and Understanding the Index Server 273

An Index Server Overview	274
Index Server Architecture	275
Using Queries	276
Understanding the Scanning Process	278
Understanding the Filtering Process	278
Understanding Merging and Index Creation	280
Using Index Server	281
Using the Content Replication System (CRS)	283
Content Replication Scenarios	284
Setting Up the Content Replication System	288
Using CRS to Move Web Content	292
From Here...	299

13 Using the Microsoft Management Console (MMC) 301

- Microsoft Management Console Overview 302
- Adding Snap-Ins and Creating Tools 304
 - Adding Snap-Ins to the Console 305
 - Working with Consoles 306
- Understanding Microsoft's Plans for MMC 308
 - Microsoft's Description of MMC 309
 - Examining the MMC User Interface 309
 - Examining How MMC Works 311
 - Looking at MMC Tools 312
 - Looking at Snap-Ins 312
 - Looking at Console Extensibility Mechanisms 313
- From Here... 315

III Administration of IIS

14 Managing Server Logs 319

- Logging IIS Activity 320
 - Choosing a Log Format 322
 - Choosing an Appropriate Cycling Period 324
 - Choosing a Good Location for Files 325
- Logging to a Database 327
 - Creating the Database 328
 - Creating the Table 328
 - Creating a System Data Source 329
 - Configuring IIS to Use a System DSN 332
- Reading Log Entries 332
 - W3C Extended Log Format 333
 - NCSA Common Log Format 335
 - IIS Log Format 336
 - HTTP Status Codes 337
 - HTTP Request Methods 340
- Converting Log Files 342
- Generating Useful Reports 342
- From Here... 343

15 Performance Tuning 345

- An Introduction to High Performance Concepts 346
 - Healthy Server, Long Life 346
 - Rapid Delivery 347
 - Web Sites Built for Speed 347
- Tuning Your Server 348
 - Performance Monitor: Your Window to Your Server's Health 348
 - Event Viewer: Your Server's Own News Service 359
 - Task Manager: Real Time Server Monitoring 363
 - Resource Management 366
- Improving IIS Performance 367
 - Global Performance Changes 367
 - Modifying Individual Sites 372
- Web Site Considerations 372
 - Considering the Implications of Files 373
 - Planning for Quicker Service 373
- From Here... 374

16 Understanding and Planning for Server-Side Loading 375

- Preparing for Server-Side Loading 376
- Determining Load Using Performance Monitor 377
 - Performance Baselines 378
 - Monitoring and Logging Performance Data 378
 - IIS Monitoring Counters 379
 - Implementing Performance Modifications 384
- Using Event Viewer to Discover Errors 384
- Using TCP/IP Troubleshooting Utilities 386
 - The Address Resolution Protocol Utility 386
 - The Finger Utility 387
 - The Hostname Utility 387
 - The Ipconfig Utility 387
 - The Netstat Utility 388
 - The Nbtstat Utility 388
 - The Ping Utility 389
 - The Route Utility 389
 - The Tracert Utility 390
