Atlas of Neuromuscular Diseases

This book is dedicated to Professors P.K. Thomas (London, UK) and John Griffin (Baltimore, MD, USA), our mentors in neuromuscular diseases and to our families whose help and support made this book possible.

Acknowledgments

A book of this type requires many contributors and the authors are grateful for the expert assistance we have received from our colleagues. Some colleagues are acknowledged as co-authors of specific chapters.

Mrs. Jeanette Schulz has been responsible for art and cartoons.

We would also like to acknowledge Dr. Barbara Mechtler Horvath, a radiologist with a special interest in MRI studies, for her expert input on the use of MRI in the neuromuscular clinic. Dr. Stefan Meng, a radiologist with a background in neuroanatomy, provided valuable clinical input on the utility of ultrasound in the neuromuscular clinic. We appreciate that he assists us in correlating ultrasound imaging with clinical presentation and electrophysiological assessments.

We are grateful to the members of the Neuromuscular Divisions of the Kaiser Franz Josef Hospital in Vienna, especially Drs. Peter Hitzenberger, Elisabeth Lindeck Pozza and Vera Wolhgenannt, the Department of Neurology, Innsbruck Medical University, especially Dr. Julia Wanschitz, University of Michigan, especially Drs. Brian Callaghan, Stephen Goutman and Ann Little, the University of Maryland, especially Drs. Justin Kwan, Charlene Hafer-Macko, Neil Porter, and Lindsay Zilliox. Their assistance in expanding our clinical neuromuscular knowledge and sharing their expertise on EMG, neuropathology, genetics and imaging studies have increased the quality of this book. We appreciate Jane Russell for assistance with copy-editing the section on Muscle Diseases.

Finally, we would like to thank Dr. Mila Blaivas, Dr. Andrea Vass, Ms. Judy Boldt, Ms. Claudia Steffek and Mrs. Lehnhart and Mr. Bachem from Springer for images, expert secretarial assistance and editing. Their assistance in completion of this book is deeply appreciated.

Contents

1	Tools	1
1.1	New Developments in Neuromuscular Disease	1
1.2	The Patient with Neuromuscular Disease	2
1.3	History and General Physical Examination	3
1.4	Neuromuscular Clinical Phenomenology	4
1.4.1	Motor Function	4
1.4.2	Abnormal Muscle Movements	5
1.4.3	Reflex Testing	7
1.4.4	Muscle Tone	8
1.4.5	Sensory Symptoms	8
1.5	Sensory Qualities	8
1.5.1	Myalgia and Pain	9
1.5.2	Neuropathic Pain	10
1.5.3	Autonomic Function	10
1.5.4	Gait, Coordination	11
1.5.5	Clinical Pitfalls	11
1.6	NCV/EMG/Autonomic Testing and Miscellaneous Electrophysiology	12
1.6.1	Motor NCV Studies	12
1.6.2	EMG Techniques	14
1.7	Laboratory Tests	14
1.7.1	Autoimmune Testing in Neuromuscular Transmission and Muscle Disorders	15
1.8	Genetic Testing	16
1.9	Neuroimaging Techniques: MR and Ultrasound	16
1.9.1	Imaging of the Spine and Vertebral Column	16
1.9.2	Imaging Muscle Disease	16
1.9.3	Imaging of Peripheral Nerves	18
1.10	Tissue Diagnosis: Muscle/Nerve/Skin Biopsy	18
1.10.1	Nerve Biopsy	19
1.10.2	Muscle Biopsy	19
1.11	Neuromuscular Approaches to Intervention: Effects of Regional Anesthetic Procedures	19

11.11.7	Prognosis	262
11.12	Facioscapulohumeral Muscular Dystrophy (FSHD)	262
11.12.1	Distribution	262
11.12.2	Clinical Syndrome	262
11.12.3	Pathogenesis	264
11.12.4	Diagnosis	264
11.12.5	Differential Diagnosis	264
11.12.6	Therapy	264
11.12.7	Prognosis	264
11.13	Distal Myopathies	264
11.13.1	Distribution	264
11.13.2	Clinical Syndrome	264
11.13.3	Pathogenesis	264
11.13.4	Diagnosis	264
11.13.5	Differential Diagnosis	265
11.13.6	Therapy	265
11.13.7	Prognosis	265
11.14	Congenital Myopathies	265
11.14.1	Distribution/Anatomy	265
11.14.2	Clinical Syndrome	265
11.14.3	Pathogenesis	266
11.14.4	Diagnosis	266
11.14.5	Differential Diagnosis	267
11.14.6	Therapy	267
11.14.7	Prognosis	268
11.15	Mitochondrial Myopathies	268
11.15.1	Distribution/Anatomy	268
11.15.2	Clinical Syndrome	268
11.15.3	Pathogenesis	268
11.15.4	Diagnosis	268

11.15.5	Differential Diagnosis.....	268
11.15.6	Therapy.....	268
11.15.7	Prognosis.....	268
11.16	Glycogen Storage Diseases.....	269
11.16.1	Distribution.....	269
11.16.2	Clinical Syndrome.....	269
11.16.3	Pathogenesis.....	269
11.16.4	Diagnosis.....	269
11.16.5	Differential Diagnosis.....	271
11.16.6	Therapy.....	271
11.16.7	Prognosis.....	271
11.17	Defects of Fatty Acid Metabolism.....	271
11.17.1	Distribution.....	271
11.17.2	Clinical Syndrome.....	271
11.17.3	Pathogenesis.....	271
11.17.4	Diagnosis.....	272
11.17.5	Differential Diagnosis.....	272
11.17.6	Therapy.....	272
11.17.7	Prognosis.....	272
11.18	Toxic Myopathies.....	272
11.18.1	Distribution/Anatomy.....	272
11.18.2	Clinical Syndrome.....	272
11.18.3	Pathogenesis.....	273
11.18.4	Diagnosis.....	273
11.18.5	Differential Diagnosis.....	273
11.18.6	Therapy.....	273
11.18.7	Prognosis.....	274
11.19	Critical Illness Myopathy.....	274
11.19.1	Distribution/Anatomy.....	274
11.19.2	Clinical Syndrome.....	274
11.19.3	Pathogenesis.....	274
11.19.4	Diagnosis.....	274
11.19.5	Differential Diagnosis.....	274
11.19.6	Therapy.....	274
11.19.7	Prognosis.....	274
11.20	Myopathies Associated with Endocrine/Metabolic Disorders and Carcinoma.....	274
11.20.1	Distribution/Anatomy.....	274
11.20.2	Clinical Syndrome.....	274
11.20.3	Pathogenesis.....	275
11.20.4	Diagnosis.....	275
11.20.5	Differential Diagnosis.....	275
11.20.6	Therapy.....	275
11.20.7	Prognosis.....	275
11.21	Myotonia Congenita.....	275
11.21.1	Distribution/Anatomy.....	275
11.21.2	Clinical Syndrome.....	275
11.21.3	Pathogenesis.....	276
11.21.4	Diagnosis.....	276
11.21.5	Differential Diagnosis.....	276
