Table of contents

Preface	13
<i>Dr. Ir. P.J. van der Aar</i>	
Understanding nutritional immunomodulation: Th1 versus Th2	15
<i>Bruno M. Goddeeris</i>	
• Abstract	15
• 1. Introduction	16
• 2. The immune orchestra	16
• 3. The induction of an immune response in secondary lymphoid organs	18
• 4. Immunological defence of the gut and the gut-associated lymphoid tissue (GALT)	19
• 5. Pathogen recognition receptors (PRR) and the pathogen-associated molecular patterns (PAMP)	20
• 6. The acute phase response and the arachidonic acid cycle	22
• 7. Nutritional modulation of immune responses	24
• 8. Conclusion	29
• References	29
Basis and regulation of gut barrier function and epithelial cell protection: applications to the weaned pig	31
<i>J.P. Lallès</i>	
• Abstract	31
• 1. Introduction	32
• 2. Glucose absorption, barrier function and epithelial cell protection	33
• 3. Gut physiology in pigs around weaning: recent findings and implications for rearing practice	40
• 4. Influence of early life events on gut physiology	43
• 5. Conclusions and perspectives	44
• Acknowledgements	45
• References	45
Effects of oxidative stress and selenium supplementation on piglets and the underlying mechanisms	53
<i>Chen Daiwen, Yu Bing, Yuan Shibin, Zhang Keying and He Jun</i>	
• Abstract	53
• 1. Development of the animal models	53
• 2. The detrimental effects of oxidative stress on weaned piglets	56
• 3. Effects of selenium supplementation on oxidative stress	60

• 4. The anti-oxidative mechanisms of selenium	62
• 5. Conclusion	65
• Acknowledgement	65
• References	65
Functional amino acids in swine nutrition and production	69
<i>Guoyao Wu, Fuller W. Bazer, Robert C. Burghardt, Gregory A. Johnson, Sung Woo Kim, Darrell A. Knabe, Xilong Li, M. Carey Satterfield, Stephen B. Smith and Thomas E. Spencer</i>	
• Abstract	69
• 1. Introduction	70
• 2. Efficiency of the utilization of dietary amino acids	71
• 3. Regulatory role for amino acids in gene expression	84
• 4. Applications of functional amino acids to swine nutrition and production	90
• 5. Conclusion	93
• Acknowledgments	93
• References	94
Glucose metabolism in reproductive sows	99
<i>Rosemarijn Gerritsen, Paul Bikker and Piet van der Aar</i>	
• Abstract	99
• 1. Introduction	100
• 2. Glucose and gestation	101
• 3. Insulin resistance	102
• 4. Glucose and lactation	106
• 5. Glucose and reproduction	108
• 6. Conclusions	110
• References	110
Sustainable pig house: first results of slurry flushing and the CYCLIZ® process	113
<i>Christian Leroux, David Guillou and Bernard Raynaud</i>	
• Abstract	113
• 1. The pig breeding in France along with sustainable development	113
• 2. InVivo's sustainable agriculture strategy	114
• 3. CRZA pig research station	116
• 4. The CYCLIZ® process	117
• 5. Discussion	126

Energy in poultry diets: adjusted AME or net energy	127
<i>Jan Dirk van der Klis, Cees Kwakernaak, Alfons Jansman and Machiel Blok</i>	
• Abstract	127
• 1. Introduction	127
• 2. Modified AME system in laying hen diets	128
• 3. Development of an atp-based net energy system	131
• 4. Net energy versus metabolisable energy system	132
• References	134
Molting in laying hens and <i>Salmonella</i> infection	135
<i>Steven C. Ricke, Claudia S. Dunkley, Jackson L. McReynolds, Kingsley D. Dunkley and David J. Nisbet</i>	
• Abstract	135
• 1. Introduction	135
• 2. Molting in the U.S. commercial egg industry	136
• 3. Feed withdrawal molt induction	137
• 4. Molting and <i>S. enteritidis</i> infection in laying hens	138
• 5. Control measures	139
• 6. Conclusions	140
• Acknowledgements	141
• References	141
Principles and application of glucogenic nutrient feed evaluation for ruminants	147
<i>Wilfried M. van Straalen and Bart M. Tas</i>	
• Abstract	147
• 1. Introduction	147
• 2. First limiting nutrients	149
• 3. Supply of glucogenic nutrients	150
• 4. Validation of nutrient flow and VFA pattern	154
• 5. Determination of requirement for glucogenic nutrients	156
• 6. Practical application of the glucogenic nutrient system	158
• 7. Conclusions	160
• References	160
Potential of fatty acids in mitigating ruminal methanogenesis	163
<i>Veerle Fievez, Gunjan Goel, Charlotte Boeckeaert and Bruno Vlaeminck</i>	
• Abstract	163
• 1. Introduction	163
• 2. Chemical structure of MCFA and PUFA and their sources	164
• 3. General antibacterial action of MCFA and PUFA	165
• 4. Methane inhibitory mechanism of MCFA and PUFA	167

• 5. Quantitative effect of MCFA and PUFA or their oil sources on rumen methane production	169
• 6. Interactions of fat sources with the basal diet	173
• 7. Side effects of oil sources	175
• 8. Oil supplements as methane mitigation strategies: perspectives	179
• References	181
 Nutritional manipulation of subacute ruminal acidosis in dairy cattle	 187
<i>Garret R. Oetzel</i>	
• Abstract	187
• 1. Introduction	187
• 2. Monitoring SARA in dairy herds	188
• 3. Nutritional causes of SARA	190
• 4. Prevention of subacute ruminal acidosis in dairy herds	196
• References	197
