DESIGNING SUSTAINABLE CITIES IN THE DEVELOPING WORLD

Acknowledgements

The authors would like to express their gratitude to Dr Regina Mapua Lim for her editorial assistance in preparing this book.

The authors and publisher thank the following publishers and organisations for permission to reproduce illustrations. While we have made every effort to contact and acknowledge copyright holders and sources, the many changes of publishers and the merger of publishing companies have sometimes made it difficult to contact the actual copyright holder. If there are errors or omissions please contact the authors and we will gladly correct this in subsequent printing.

List of Contributors

Roger Zetter
Roger Zetter is Professor and Deputy Head of the Department of Planning in the School of Built Environment at Oxford Brookes University. His research, teaching, consultancy and publishing interests are in urban-sector aid policies, housing and environmental policies for low-income urban dwellers, with a particular interest in informal land markets, land tenure and urban land policies, mainly in the context of sub-Saharan Africa. He also has extensive research and consultancy experience on refugees, asylum seeking and forced migration. He has conducted research and consultancy for UNDP, Oxfam, ESRC, EU, Joseph Rowntree Foundation, Home Office (UK). His books include *Planning in Cities: Sustainability and Growth in the Developing World* (Zetter and White, IT Publications 2002) and *Market Economy and Urban Change: Impacts in the Developing World* (Zetter and Hamza, Earthscan 2004). His forthcoming book, *The Reception and Integration of Asylum Seekers and Refugees in Europe:Convergence or Divergence?* (Zetter, Griffiths and Sigona) will be published by Macmillan/Palgrave.

Georgia Butina Watson
Georgia Butina Watson is Professor of Urban Design and Head of Department of Planning at Oxford Brookes University. She has co-authored several books and exhibitions on theory and practice of urban design and has been a keynote speaker at many conferences in the UK and abroad. Her professional expertise includes the study of urban morphology, community development and place identity and she is a co-author, with Ian Bentley, of *Identity by Design* (Architectural Press 2006). She has directed many UK and overseas government projects, for example in Mexico and Thailand, and her recent work on sustainable community development in the UK has contributed to the improvement of many settlements and local areas. She makes regular visiting lecturing contributions to UK and overseas universities and her latest project for A-level Geography students on Making Better Places won several commendations and a Silver Medal Award from the British Geographical Association. She is also a founder member of the urban design consultancy Place-ID.

****

Ian Bentley
Ian Bentley is Emeritus Professor of Urban Design at the Joint Centre for Urban Design, Oxford Brookes University. He was lead author of *Responsive Environments* (Architectural Press 1985), author of *Urban Transformations* (Routledge 1999) and co-author, with Georgia Butina Watson, of *Identity by Design* (Architectural Press 2006). He has acted as external examiner across a range of postgraduate courses

in urban design, urban regeneration, cultural studies and public art, and has been a keynote speaker at numerous urban design conferences in the UK and internationally. He is a founder member of the urban design consultancy Place-ID, and currently leads the JCUD's outreach programme, delivering the Centre's urban design courses in the workplace to a range of local authority clients.

Mohammed Abdullah Edrees

Mohammed Abdullah Edrees is an Assistant Professor of Urban Design at Umm Al-Qura University Makkah Al-Mukarramah city, Saudi Arabia. He has a BA in architecture, MLA (Masters in Landscape Architecture) and a PhD in Urban Design from Cardiff University in Wales. His main research interests are urban development, land subdivision with particular concern for residential open space and low cost housing. He developed a land subdivision model to improve residential environmental quality. He works for the Hajj Research Institute at Umm Al-Qura University which focuses on crowd control and management at the Hajj and the development of the Hajj site for pilgrims uses. He has several publications in the academic journals concerning residential environments and low cost housing, crowd management and the Hajj site development.

Jane Handal

Jane Handal is an architect and an urban designer with a BSc in architecture from Birzeit University (Palestine) and an MA and PhD in Urban Design from Oxford Brookes University. Her PhD explored the relationship between Urban Design and Development, placing special emphasis on reconstructing identity in post conflict settings. She has worked as an architect in Palestine and as an urban designer/planner for the Ministry of Planning and International Cooperation (under Norwegian and Palestinian Management), between 1995 and 1999 – an era in which the rebuilding of Palestine presented tremendous opportunities and challenges. She has work experience with the World Bank where she worked for six months on urban and social development in North Africa. Dr Handal is currently employed by the Aga Khan Trust for Culture, UK as a manager for their socio-economic projects in Cairo-Egypt.

Luis Gabriel Juárez-Galeana

After finishing his doctorate at Oxford Brookes University, UK, Luis Gabriel Juárez-Galeana returned to private practice, where he has been combining urban design theories and best practice with the commercial realities of urban development. Recently he has submitted a 6,000 dwellings masterplan in East London which includes the application of vertical and horizontal mixed use and conceptualising transport nodes as places for community interaction instead of origin-destination elements only. Other activities include developing in-house research and methods dealing with consultation and participatory design as well applying and testing Space Syntax theories in the urban development market.

Yanet Lezama-López

Yanet Lezama-López has been a conservation officer at the National Anthropology and History Institute of Mexico (INAH) since 1987. She is an architect and holds a Master's degree in architecture from the National Autonomous University of Mexico (UNAM). She worked at architectural studios for several years, where she became a qualified designer. She joined the PhD Programme at the Joint Centre for Urban Design at Oxford Brookes University. Her main research interests are in urban design, conservation of the built heritage and management, as well as community involvement and dealing with conflicts. She is currently carrying out research on urban conservation, place-identity and local communities in World Heritage historic cities for INAH (*Instituto Nacional de Antropología e Historia*) (National Institute of Anthropology and History) in Mexico, where she is also an advisor on urban conservation and planning.

Regina Mapua Lim

Regina Mapua Lim is a designer by profession with degrees from the Rhode Island School of Design (RISD) in architecture, product design and fine arts. Her interest in vernacular architecture and the processes for understanding it in its cultural context stems from design projects involving traditional communities and their building techniques for contemporary architecture. She holds postgraduate degrees in International Studies in Vernacular Architecture and has taught courses, given lectures and design studios at RISD, University Colleges of London, and Oxford Brookes University on: design in a cultural context; socially responsible design; natural hazards and traditional building; and oral and visual research methods.

Jose Julio Lima

Jose Julio Lima is Professor of Urban Design and Planning at Universidade Federal do Pará, Brazil. He completed his PhD in the School of Architecture at Oxford Brookes University. After working in local planning government agencies in Brazil, he has been involved in research on urban regulatory instruments and is interested in socio-spatial segregation and democratisation of urban reform instruments for Brazilian cities. He is currently working with *planos diretores* (masterplans) for medium and small cities in the Amazon basin. He has published in Brazil and abroad including chapters in books such as *Planning in Cities: Sustainability and Growth in the Developing World*, (2002 edited by Zetter et al.), *Brasil Urbano*, and periodicals.

Ana Maria Maldonaldo-Fuse

Ana Maria Maldonaldo-Fuse received her first degree in Landscape Architecture at the National University in Mexico City. Her interests, since then, have been closely related with the use and management of urban landscape, with particular emphasis in social, environmental and economic sustainability. She combined activities as a landscape consultant, university lecturer and collaborations with NGOs and community groups to put her ideas into practice. Her PhD at Oxford Brookes University was focused on developing methods of applying the concepts of diverse aspects of sustainability

此为试读,需要完整PDF请访问: www.ertongbook.com

to urban green open spaces. Currently she contributes as a guest speaker to Mexican universities, she is involved with research projects on urban sustainability with different government institutions and NGOs, and works in private practice.

Koyi Mchunu
Koyi Mchunu has recently completed his PhD at the Department of Planning, Oxford-Brookes University. Prior to joining Oxford-Brookes, he was a lecturer in the Department of City Planning, Cape Peninsula University of Technology, Cape Town. His main research interests include planning theory, with particular interest in cross-cultural planning; environmental justice; low-cost housing strategies; and the application of human rights in the context of the built environment. His research publications include: *Report on Informal Land in Informal Sector Housing* (South African Land Management for Informal Sector 1997); *Race and Technology, the Role Models as Teaching Method* (Centre for Research in Engineering Education, University of Cape Town 1998); 'From Apartheid City to Sustainable City: Compact City Approach as a Regulative Ideal' (in Zetter et al. (eds), *Planning in Cities: Sustainability and Growth in the Developing World* 2002).

Anwar Punekar
Anwar Punekar is Assistant Professor of Urban Design in Malik Sandal Institute of Art and Architecture, Visvesvaraya Technological University, India. Since 2000, he has been researching in the Joint Centre for Urban Design at Oxford Brookes University. His interest in urban revitalisation in culturally diverse contexts comes from his involvement with the revitalisation of historic centres of Bijapur, Badami, Aihole and Pattadkal in India. He is also involved in research for the Commission for Architecture and Building Environment (CABE, UK); Historic Environments and Local Management (HELM, UK) besides teaching on various programmes in the School of Built Environment, Oxford Brookes University.

Norma E. Rodrigo-Cervantes
Norma E. Rodrigo-Cervantes has worked since 1992 as a conservation officer at INAH (*Instituto Nacional de Antropología e Historia*) (National Institute of Anthropology and History) in Mexico City. She has extensive experience in the topics of historic zones designation and their urban issues. Her background is in architecture and restoration of historical monuments. During her PhD studies at the Joint Centre for Urban Design at Oxford Brookes University her research focused on urban strategies for conservation and management of Mexican historic centres designated as World Heritage Cities. Her main professional interests are in the design of management plans addressing the cultural and economic values of these particular places.

Silvia de Schiller
Professor of Architecture and Environment at the University of Buenos Aires, since 1984, and senior researcher in urban sustainability, Silvia de Schiller directs the Research Centre Habitat and Energy, the Laboratory of Environmental Studies and the

Technical Assistance Programme on Environmental Architecture. She graduated from Buenos Aires University, followed by postgraduate studies on housing and planning in The Netherlands and a PhD in Urban Design at Oxford Brookes University. She is the National Representative of iiSBE (International Initiative for a Sustainable Built Environment) and invited lecturer at universities in Latin America, Europe and Japan. She has received awards for innovative research in architecture and prizes in international competitions; she publishes extensively and participates actively in international conferences.
