前言

《新疆专利产品新产品汇编》在自治区各级领导和有关部门的支持协助下，承蒙各认刊单位的厚爱，经多年来的征集，在当前坚持改革、扩大开放的大潮中间世了。在此，我们谨向关心此书的各级领导和认刊单位表示崇高的敬意和诚挚的感谢。

改革开放以来，特别是邓小平同志南巡讲话后，自治区各产业部门在“科学技术是第一生产力”的思想指导下，专利产品新产品的开发不断涌现，名家迭出，光景时新。为了把这些专利产品、新产品在自治区广泛宣传，推向全国，打入国际市场创造积极条件，以促进自治区与国内、国际间的经济信息、科研、技术、贸易的合作交流，为各产业部门和广大消费者提供一个可靠的购物导向，这就是我们编辑此书的宗旨。编者的这个初衷是否已经达到，只有等待广大读者翻阅此书后去评说了。

编入本书的各行业单位 2 百余家，彩照近 300 幅，分专利产品、新产品、其它产品三个部类编排。文字版主要介绍企业单位、专利产品新产品和其它产品名称、专利号（或申请号）和授权日期有关凭证；产品商标、规格、型号、功能、适用范围；企业技术力量、生产能力、技术指标和产供销需及经济效益；企业对外合作意向、方式和希望要求；产品的科研成果、获奖项目；企业法人代表、地址、电话、电挂、邮编等等。彩照版则以画面形象地反映专利产品、新产品、其它产品品种、企业领导肖像或工作照、设备工艺、产品生产车间以及企业办公场所等等。并且尽量做到文字语言的标准化、规范化；彩照清晰、色彩鲜明。

由于新疆地域辽阔，企业分散，组稿时间仓促，人力不足及其它诸多原因，许多应入编的专利产品、新产品未能征集进来，加之编者水平有限，错误和缺点在所难免，敬希有关专家学者和广大读者多提宝贵意见，以便出版续篇时借鉴。

PREFACE

This book A COLLECTION OF XINJIANG' S PATENTS AND NEW PRODUCTS appears with the support and assistance of the leaders at all levels and the concerned departments and organizations of the Xinjiang Uighur Autonomous Region. After one year of collecting data, it has at least come out in the spring tide of "persistence in reform and expansion of opening" Now, we would like to renew the assurances of our highest consideration and express our whole hearted gratitude to Leaders at all levels and the subscribers who are interested in this book.

Since carrying out the policy of "reform and opening" and especially since comrade Deng Xiao-Ping' s speeches during his inspection tour in the south of China, great advances have been made. Under the Guidance of the principle that science and technology are the major productive forces in all of the industrial branches of XUAR, various patents and new products have been constantly emerging, with each passing day. We Have compiled this book in order to publicize these patents and new products in the Autonomous Region, to introduce them to the whole country and the international market. We hope to promote cooperation and the development of domestic and international economic relations, trade, scientific research and new techniques, plus give a reliable consumer guide to all of the industrial branches and the mass of consumers. The right to judge whether the original intentions of the compilers have been realized is to be left to our numerous readers.

More than 200 enterprises and organizations in various trades have been included in this book, with nearly 300 colour photos. The whole book is divided into 3 sections according to the following categories: patent products, new products and other products, with a table of contents included.

The text of the book is mainly concerned with the introduction and descriptions of the enterprises, names of the patents, new products and other products. This includes then serial numbers patent (or application serial numbers) and the dates of issue, trade marks, specifications, types, functions and uses; and the production capacity, technical standards, technical equipment and personnel of the enterprises. Other information includes; their operational processes and conditions of their production, raw material supply, sales and marketing and their economic benefits; their intentions, ways and means, desires and requirements in the cooperation with others, their achievements in scientific and technical research and prizes; their legal representation address, telephone and cable numbers, postcode, etc.

To the colour photos, special attention was given to their portraying the patents and new products and there is a rich assortment of other commodities, there are also pictures of equipment and technology, workshops and offices and even the directors of the enterprises. We have made an effort to write the texts in a natural way and conforming the language to the

standard and to make the colour pictures clear and bright.

Since all the enterprises are spread throughout the vast territory of Xinjiang and there was a limit to the time and the number of compilers and many other difficulties , a number of patent and new products which should have been included in this book have not been gathered and put into it. Moreover, because of the limited knowledge of the compilers, mistakes and shortcomings are hard to avoid. We cordially welcome criticism from experts , scholars and the broad masses of our readers—so as to include the necessary improvements in writing the sequel of the book.

The compilers
